Background

Pacific Autism Family Network (PAFN) is the first of its kind in North America and likely the world. The *project purpose* is the long-term operation of a state-of-the-art provincial knowledge centre for Autism. PAFN has brought together cutting-edge resources for research, information, learning, assessment, treatment, support, and building capacity to address the lifespan needs of individuals with Autism Spectrum Disorder and many other related disorders, and their families, across BC.
