**Subject:** Re: Question

OK, I will pass that along.

Thanks, Athana.

There is no moratorium on public consultations per se. The restrictions are around advertising, and then there is a general practice to avoid significant policy announcements. In terms of a consultation like this, I would have to know more about it, but it seems on its face there would be no problem starting any time and proceeding into the new year. Depending on the level of contention that may be attached, we would be looking for it to wrap up in early spring.
