Rob (RCMP) on site when I arrived at 09:50 or so. I had just returned home after driving to Rock Creek earlier and Dan called to inform me of the MVI. I returned west and took these pictures. The road conditions earlier were slippery and slushy. MC truck was on its way east behind me and came upon this incident as far as I know around 08:30.

Good Morning Cpl. Ferguson;

As you can see I am being asked for copies of the accident investigation. After listening to your news release this morning on the radio that states the investigation is now complete, I would appreciate a copy. This will allow me to compare with my own internal report and put some closure for the sake of our personnel.

With thanks

Glen Wakefield
Director Human Resources

Hi Glen

Just wondering if you have any new info as per cause of incident and what the investigation has found during the truck inspection.

I have heard a couple of things but not concrete as I have not contacted the RCMP, or Coroner for any results at this time.

Thanks,

Scott Peet

NAME: SUTCO CONTRACTING LTD.

Carrier's Safety Performance

Your NSC Carrier Profile is a record that keeps track of indicators of your on-road safety performance. These indicators are:

- * the number and type of at-fault accidents involving the vehicle(s) operating under your Safety Certificate (NSC points are removed from the profile for accidents if it can be determined that the driver was less than 50% at fault);
- * roadside (CVSA) vehicle inspections that put a vehicle or driver out-of-service;
- * contraventions (e.g. violation tickets) which have been deemed guilty; and
- * an overall total of accidents, out-of-service CVSA inspections, and contraventions.

The above items may have occurred while operating in BC or other North American jurisdictions.

Most items recorded on a Carrier Profile are assigned NSC profile points. The following chart indicates your point scores in each of the above categories.

PROFILE SCORES	FLEET SIZE	CONTRA-VENTIONS	OUT OF SERVICE CVSA	ACCIDENTS	OVERALL
SUTCO CONTRACTING LT	59.39	1.18	0.56	0.13	1.87
ANNUAL PROVIN MEDIAN	20.01 -	0.37	0.19	0.10	0.53

The chart compares your scores to the provincial average for carriers with the same or similar fleet size. Fleet size is determined by the number of days that your vehicle(s) have been operating under your NSC certificate over a 12-month period. Each 365 vehicle licenced days, or portion thereof, is considered to be one vehicle.

For your information, a copy of your Carrier Profile report is enclosed. The report shows information for each of the incidents recorded for your fleet. Please review the profile. If you find any inconsistencies, please report them to the NSC program office by mail, or by faxing a copy of the profile page(s) to (250) 952-0578. Indicate the discrepancy(s) and reason(s) why. If NSC points appear for an accident for which you were not considered to be 50% or more at fault, please provide a copy of this information from your insurance provider. The NSC program office will investigate and, where applicable, make the necessary corrections as promptly as possible.

To monitor your on-road safety performance, you may request a copy of your Carrier Profile on a regular basis. Send a letter, fax, or e-mail to the NSC program office requesting a copy of your Carrier Profile report.

Carrier's Safety Performance

Your NSC Carrier Profile is a record that keeps track of indicators of your on-road safety performance. These indicators are:

- * the number and type of at-fault accidents involving the vehicle(s) operating under your Safety Certificate (NSC points are removed from the profile for accidents if it can be determined that the driver was less than 50% at fault);
- * roadside (CVSA) vehicle inspections that put a vehicle or driver out-of-service;
- * contraventions (e.g. violation tickets) which have been deemed guilty; and
- * an overall total of accidents, out-of-service CVSA inspections, and contraventions.

The above items may have occurred while operating in BC or other North American jurisdictions.

Most items recorded on a Carrier Profile are assigned NSC profile points. The following chart indicates your point scores in each of the above categories.

PROFILE SCORES	FLEET SIZE	CONTRA-VENTIONS	OUT OF SERVICE CVSA	ACCIDENTS	OVERALL
SUTCO CONTRACTING LT	60.09	1.08	0.55	0.23	1.86
ANNUAL PROVIN MEDIAN	20.01 -	0.37	0.19	0.10	0.53

The chart compares your scores to the provincial average for carriers with the same or similar fleet size. Fleet size is determined by the number of days that your vehicle(s) have been operating under your NSC certificate over a 12-month period. Each 365 vehicle licenced days, or portion thereof, is considered to be one vehicle.

For your information, a copy of your Carrier Profile report is enclosed. The report shows information for each of the incidents recorded for your fleet. Please review the profile. If you find any inconsistencies, please report them to the NSC program office by mail, or by faxing a copy of the profile page(s) to (250) 952-0578. Indicate the discrepancy(s) and reason(s) why. If NSC points appear for an accident for which you were not considered to be 50% or more at fault, please provide a copy of this information from your insurance provider. The NSC program office will investigate and, where applicable, make the necessary corrections as promptly as possible.

To monitor your on-road safety performance, you may request a copy of your Carrier Profile on a regular basis. Send a letter, fax, or e-mail to the NSC program office requesting a copy of your Carrier Profile report.

All Driving Personnel;

Sutco Contracting Ltd. has taken a leadership role in conjunction with the National Safety Code to ensure accurate and reliable recording and monitoring of the driver's daily log.

The service provider we work with to provide Electronic Logs currently is working with the NSC Office to insure accurate and consistent location pin point recording through the ECM of our power units.

It should be understood, that this technology is new for our geographical area, and therefore will require on-going maintenance and development.

The Owners and Management of Sutco Contracting Ltd. fully endorse electronic recording of driver's hours of service, and therefore will work closely with both our service provider, and regulatory offices.

As our service provider updates our locations, and works collectively with regulatory offices, we have developed a plan to assist compliance personnel when they are inspecting the onboard records. This requires that driving personnel enter their location during a duty status change in the notes section.

"As per our telephone conversation, we are fine with the drivers entering the location under notes as a temporary solution. Regards, Barb"

Barb Morris
Manager, National Safety Code
Commercial Vehicle Safety and Enforcement Branch
Ministry of Transportation and Infrastructure
(250) 953-4012 (phone)
(250) 952-0578 (fax)

Please maintain this letter in the cab of all power units until further advisement.
Drivers are reminded:

An empty paper log book is required in the power unit at all times in the rare case of a system failure. Log pages when requested by an enforcement officer can be requested through the fax feature.

Visor cards as issued with your insurance documents must be available to guide enforcement officers to obtain the information they require.

All drivers have received training in electronic hours of service, and are expected to have knowledge of all screens, and recorded information.

Pre-trips/ Post-Trips are required to be recorded in your Pre-Trip book as supplied, with appropriate flags placed on your electronic log.

If you require further training or assistance please contact your Dispatch Supervisor, and appropriate training will be provided.

Yours Truly

Glen Wakefield
Director Human Resources

Subject: Letter being distributed to ALL our drivers

Good Morning Barb;

Thank-you again for your guidance. The attached letter is currently being distributed to all of our 57 power units, with instructions to place in their licensing binder. All drivers have been instructed via Satellite to notate their location in the notes when posting a duty status change.

We have tried to present the information in a positive manner to decrease the current "unrest" with our driving personnel. This is important, since driver retention is crucial. With thanks

Glen Wakefield

Subject: EBOR's
Attachments: EBOR's.pdf

A respectful request for resolution;

I accepted employment with Sutco Contracting Ltd in September 2009 with a clear mandate from the company owners to develop effective procedures and policies to improve the companies safety record with all regulatory bodies.

August 2010 Sutco Contracting Ltd. received an audit, with the resulting "Audited- Satisfactory" rating. At the time of this audit our NSC score was 2.85. As of April 2012 our current posted rating is 1.83. Whilst further improvement of this score is the goal, we take pride in our achievements, when consideration is placed on an increase of power units, approximate increase of 40 personnel and the establishment of 3 additional terminals since the date of audit.

Obviously our commitment to a safety program is evident!

However, as a component of our safety program, we adopted the usage of Electronic On Board Recording for our drivers Hours Of Service. This decision was made after careful investigation, and the endorsement of these devices from both regulatory offices and industry associations. Since our installation of the EBOR's we have found our company penalized and trapped between our service provider and local regulatory officers.

As a company we fully understand some of the valid concerns regarding required software updates, and have placed full confidence in our service provider to comply. We have worked with regulatory offices and asked our driving personnel to make additional notations to cover the current concern regarding location "pin-points". Please see attached document, reviewed by NSC office, and approved for placement in all power units.

To enable such new technology has required considerable investment in software, hardware and driver training. All requiring complete creditability in myself as a leader and the company owners. This creditability is now under serious attack!

Our driving personnel have provided documented proof of their negative encounters with local Enforcement Personnel who have challenged both my professional creditability and the companies. I chose not to document those comments, in this correspondence, as I respect all parties need for professional creditability.

Upon further investigation I was informed by the Cranbrook office that we would probably have to return to paper logs. A highly surprising request that places the ability of the driver to manipulate, and increases the possibilities for falsification when delays in auditing due to driver logistics are factored in.

Prior to contracting the services of Shaw Communications we reviewed their product in conjunction with section 37.18.03 of the Motor Vehicle Regulations

Recently the Company Owner requested a meeting with Enforcement Personnel, this has been planned for May 17th. However after a further challenge to our EBOR's yesterday afternoon to the company owner, enforcing that the drivers must be able to produce their last 14 days, hand-written when requested as a fax copy from our provider with GPS

positioning may not be acceptable, and clear reference that I personally had been warned 3 times, with direct inference to my creditability, a meeting without swift and timely resolution to the usage of EBOR's is fruitless!

I respectfully ask that all involved parties take action to either endorse EBOR's accepting that as with all software, upgrades will be required, or issue a clear mandate that requires the usage of paper logs.

Without hesitation our adoption of EDOR's has escalated a tense situation in our region, and now has threatened my ability to lead with creditability to further improve our safety score. Presenting a threat to our ability to retain drivers, promote adherence to our current safety programs, and maintain our customer confidence. This is no longer an issue isolated to Sutco Contracting Ltd. but has direct ability if not corrected immediately to threaten the stability of 120 personnel in an economically challenged region.

I implore our service provider to take what actions are required to demonstrate that all appropriate steps are being taken with ALL regulatory bodies to immediately resolve this issue. The margin of error available when a driver is asked to replicate 14 days logs creating a second log book is unacceptable.

I look forward to working with all parties for swift and timely resolution

Respectfully

Glen Wakefield
Director Human Resources
Sutco Contracting Ltd.

Subject: Further to Shaw EOBR (Shaw Tracking electronic logs)

Hello again,

Shaw Tracking has requested Sutco to, quote: "Please advise your Drivers to enter in the Location under notes. The locations they would usually enter on paper can be entered under notes. This is just a temporary solution."

The locations registered by the service are accurately recorded and reviewed by the carrier, however the displayed location at roadside is less accurate and as noted above the driver may be entering more accurate location information in the NOTES portion of the electronic log. Shaw Tracking has indicated that a database update for the firmware is due out in May which may address this situation.

Please keep in mind that the Carrier along with the service provider are addressing this situation and that the carrier has accurate records of the change in duty locations and that there may be no hours of service violations. Also it is anticipated that the database update may rectify the location discrepancy.

Thanks,

Doug

RE: Violation ticket AH53520914

Dear Jason:

On behalf of the company owners, I would like to express my sincere gratitude for your interception of our unit CVR 11 on March 22nd, 2012.

This trailer was involved in a loading incident at our Okanagan Falls loading facility. The incident was reported, and duly investigated, inclusive of a site inspection conducted March 23rd, 2012.

The pictures of the damage to the trailer were submitted to this office March 16th 2012. Upon inspection of the pictures at that date, the affected area of damage was limited to small section of the top rail. Plans were processed for the safe movement of this trailer to our Salmo facility.

Since the original report, a keen loading operator took it upon himself to "push down" the top rail, creating the structural damage as you viewed March 22nd, 2012.

As a company we have progressed in our safety programs, and therefore take full responsibility to follow up with internal staff, management and drivers to both identify the breakdown in communication and effectively seek methodology to correct our procedures to ensure ALL equipment is in sound and safe operating condition.

By your swift, professional interception we were able to avert a major tragedy!

Yours Truly

Glen Wakefield

Good Afternoon;

I would like both of you to be aware that Jason Odland desires and will receive the hard copy of the attached letter a sincere thank-you from Sutco. The trailer should never have been on the road, and could have caused a major accident. Obviously we are currently dealing with an internal review.

I am a firm believer that credit should be given, and appreciate the actions that were taken.

Thanks

Hi Doug;

Can you please review a comment on the attached Notice & Order. The comment I take exception to is:

“3rd company warning in regards to inaccurate locations on Log Book”

I can assure you that yesterday was the first time this issue was raised with myself, and I have spent some time checking with our other staff, they also were not advised of any concerns.

I believe it is obvious that we do react to issues, but our response yesterday, upon receiving advisement.

Thanks

Subject: Sutco Contracting and Shaw tracking

Hi Barb,

Jason Odland has encountered a problem with [Shaw Tracking](#) involving SUTCO CONTRACTING LTD. (200-517-247) and other carriers. Locations of change in duty status are not being recorded accurately by the system as required. Jason may correct me on this but I understand when one driver had a change in duty in Salmo BC, the Shaw tacking entered Nelson BC. This is a difference of 41 km highway or 35 minutes driving time. There are numerous other instances of this occurring documented by Jason. Jason had given a Sutco driver a written warning in December concerning the accuracy of the location entries and has written 2 more warnings recently in the Castlegar area. Are you already aware of this issue with Shaw Tracking and if not how much time should be given to Sutco Contracting and Shaw tracking to correct the inaccuracy of their electronic logs?

Once I hear from you concerning a timeline to address this concern I will contact [Glen Wakefield](#) at Sutco Contracting regarding the issue, informing him that this issue must be resolved and it is the carriers responsibility to ensure that the logs are accurate.

Sincerely,

Douglas Archibald

Subject: Sutco Ready for winter?

Chris/Glenn

I just came over the Paulson traveling east to check out things, at the Paulson bridge chain up was a Sutco vehicle Unit #1311, driver was a s22 He was laying across the seats in the cab (no sleeper on unit) and I had noticed that the maintenance contractor had to plow around him. I had gotten two complaints one from maintenance contractor and one from public in regards to the parked vehicle. I woke the driver and asked what he was doing he stated "I do not have enough chains to make it to the top, he only had one set for one drive axle, the shop hasn't had time to put more chain hangers on". I asked to look at his log book and he had logged into off duty from 2:00am to 10:00 am.

As I knew the chain up was about to be turned off I told him that if you don't have enough chains to make it to the top when in effect and one of us (peace officer) comes along I just turn them around and tell them to go back to bottom of hill and wait.

As you are aware the Paulson Bridge chain up area is very small and when trucks park there for large amounts of time it jeopardizes the safety of the public and other truck drivers.

It is probably in your company's best interest to have the right amount of chains that the driver thinks he might need while traveling on BC Highways in the winter time.

Any questions or concerns please feel to contact me by email. I did not give the driver any paperwork.

Doug,

Last week(?) a sutco truck literally cut off Rob Richardson ,he had to SLAM on his brakes. He took him to the castlegar scale .At that time he looked at his electronic log book as he was very tired even admitted it to Rob.I do believ Rob put him out of service for 10 hours, Rob asked if he had a blank copy of logs to transfer to as required by the carrier to supply. He had none. The driver came in yesterday to ask for legislation so he can give to his carrier(sutco) as they told him he was not required to have a paper log. We photocopied the legislation and showed him where he is required to do this.

I honestly think that Sutco has no idea what they are required to do/use in regards to these electronic logs.

I am getting sick and tired of this and there non compliance,yesterday I got them traveling on non approved routes for wide load bunks. Also they replaced a bunk that hit a overpass with one that did not have lights on it and told the driver to drive at night.

Everywhere we turn they are in non compliance. I will be handing out fines to drivers.

Subject: Shaw EOBR

Hello,

It seems that our customers are getting a tough time in BC. Inspectors are now asking drivers to re-create their logs on paper.

EOBR makes it impossible for drivers to cheat and keep company informed at all times when a driver is or will be in violation. It benefit enforcement officers as it is very simple and calculate drivers hours accurately. Forcing them back to paper logs will benefit no one and make it even harder for inspectors to monitor.

Can you look into this and let me know if this is necessary knowing that the EOBR has all the data required by reg. 37.18.03. Let me know if I can be of any assistance as I am willing to present our EOBR to your Group and answer all questions and concerns.

Good day Jason, I just rec'd this email from HR manager. Please read and keep this in confidence as I wanted you to have that as you perform the investigations on two of the accidents.

Glen has sent this to our safety committee for their review and I was hoping you could do the same. Your thoughts as to if anything pops out at you would be greatly appreciated.

Please call me when you get a chance as I am in the office the rest of the week.
Chris

Subject: Accident reviews for next safety meeting.
To: Sylvie Perwal <sylvie@sutco.ca>
Cc: Chris Sutherland <chris@sutco.ca>

Dear Safety Committee Members;

As members of our safety committee you are asked in confidence to review all accidents. I have attached 3 major accidents that occurred within the first week of May 2013. I submit this information with full confidence that the material attached will be viewed for the purpose of risk mitigation, without negative inference to affected drivers.

What we are looking to achieve with your review:

1. Are our training programs sufficient? If not what would you suggest be changed?
2. Are the routes taken considered "safest and most efficient for our operations? If not suggestions.
3. Can a common thread between these events be established? Day of the week, time of day, equipment, routes travelled?
4. Does driver tenure play a role?
5. Please review weather conditions/construction zones and/or delays
6. Have we communicated effectively when dispatching or monitoring?

Each accident has been reviewed from a company perspective. Equipment was found to be maintained in accordance to the company registered PMI program. Drivers HOS was not an issue.

Corrective action has been taken in respect to discipline actions from the company, as required. Please review SECTION V in your issued Health & Safety Reference Guide to assist in these reviews.

Thanks

All 2012 Freightliner Western Star Recalls recalls can be found below. It is important to complete resource for recall information, so if you know of any additional related recalls to let us know.

April 2nd, 2012

Recalled Component	SEATS
Recall Date	April 2nd, 2012
Units Effected	5,247
NHTSA Campaign Number	12V138000
Manufacturer	<u>DAIMLER TRUCKS</u> NORTH AMERICA
Manufacturer Campaign Number	FL-624
Manufactured Begin Date	December 22nd, 2011
Manufactured End Date	February 23rd, 2012
Date of Owner Notification	November 21st, 2012

Defect Summary:

DAIMLER TRUCKS (DTNA) IS RECALLING CERTAIN MODEL YEAR 2012 FREIGHTLINER CASCADIA AND WESTERN STAR 4900 VEHICLES, MANUFACTURED FROM DEC 2011, THROUGH FEBRUARY 23, 2012. THESE VEHICLES MAY BE EQUIPPED WITH NATIONAL SEAT BRAND DRIVER'S SEATS. THESE SEAT BASES MAY HAVE OUT OF SPECIFICATION WELDS THAT MAY ALLOW THE SEAT TO BUCKLE UNEXPECTEDLY.

Consequence Summary:

AN UNEXPECTED MOVEMENT OF THE SEAT COULD AFFECT VEHICLE CONTROL AND VISIBILITY, INCREASING THE RISK OF A CRASH.

Corrective Summary:

DTNA WILL NOTIFY OWNERS, AND AFFECTED VEHICLES WILL HAVE REPLACEMENT SEATS INSTALLED BY DTNA AUTHORIZED SERVICE FACILITIES, FREE OF CHARGE. AN INTERIM LETTER WAS MAILED TO OWNERS ON MAY 16, 2012. THE RECALL THE FINAL REMEDY BEGAN ON NOVEMBER 21, 2012. OWNERS MAY CONTACT DTNA AT 1-800-424-9153.

Recall Notes:

DTNA'S RECALL CAMPAIGN NUMBER IS FL-624. CUSTOMERS MAY CONTACT THE NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION'S VEHICLE SAFETY HOTLINE AT (TTY: 1-800-424-9153); OR GO TO HTTP://WWW.SAFERCAR.GOV.

See photo #1 for VIN confirmation

On the 7th day of May 2013, I performed a mechanical inspection on the above noted vehicles to ascertain the mechanical condition of the components to determine roadworthiness and compliance with the British Columbia Motor Vehicle Act and Regulations.

This vehicle was involved in a multiple vehicle crash as described below: the above vehicle was traveling North on Highway 3B when the driver failed to maintain control of the vehicle and went off road left and collided with a parked vehicle.

It was inspected at: Mario's towing yard in Castlegar

Attachments:

1. Post-Crash Vehicle Inspection Report
2. Photos in Appendix A
3. MV6020 – British Columbia Motor Vehicle Traffic Accident Police Investigation Report
4. Post-Crash Inspection Notes

***Unserviceable** (In its current state, it can not be used for its intended purpose)

***Serviceable** (capable of being used for its intended purpose)

Braking System / Components

See photo #2,3,4,5,6

Unserviceable

The truck and both trailers were equipped with air brakes having drum style brakes on all axles. The truck and both trailers were also equipped with ABS. The truck and the trailers were all inspected individually. During the inspection process I had removed the main air line off the compressor head of the truck to install an air fitting so as to charge the air system. With the air system charged and the brake pedal depressed to a 90 psi application pressure the truck brake chamber pushrods were measured for travel (*see chart below*). The glad hands on the lead trailer, which were damaged during the collision, were repaired so as to apply air to the trailer. With the lead trailer brake system charged and 90 psi application pressure applied to the service side of the air system, the brake chamber pushrods were measured for travel (*see chart below*). The glad hands on the rear trailer were intact, so the air system was charged and 90 psi was applied to the service side (*see chart below for pushrod travel*).

	Measurements in inches		
	Brake Chamber type	Left	Right
Axle 1	20 long	1.0	1.0
Axle 2	30 long	1 3/8	1 3/4
Axle 3	30 long	1 5/8	1 3/4
Axle 4	30 regular	1 1/8	1 1/4
Axle 5	30 regular	1 1/8	1 1/4
Axle 6	30 regular	1 1/4	1 3/8
Axle 7	30 regular	0	0
Axle 8	30 regular	0	0

During this inspection it was discovered that the rear trailer had no brake application when air was applied to the service side of the system. Upon further inspection I found the problem to be a kinked air line behind the glad hand bulk head. This kinked air line was in such a location that it could not have been caused by the collision but rather was more than likely a condition present prior to the collision. Once the kink in the air line was straightened out, the rear trailer brake system was retested and found to be functioning normal. The rear trailer brake push rod travel was then re-measured and found to be within specifications. The parking spring brakes were also checked and found to be working properly. Due to the amount of damage to the truck, the ABS system could not be checked. It was also noted during this inspection that the truck and lead trailer brake linings showed evidence of extreme heat exposure causing the bonding material between the friction material and the shoe backing to melt. The brake drums also showed signs of discoloration which would be consistent with severe heating. The rear trailer brakes did not show any signs of extreme heat buildup such as the others. Axle seven appeared to have had the drum and shoes recently replaced as they looked fairly new.

Steering

Unserviceable

The truck had a power assisted steering gear assembly. The steering intermediate shaft had pulled apart and this appeared consistent with impact related damage. The tie rod was also bent and this appeared to be impact related. Both tie rod end ball and socket joints were still intact and in good condition. With the front wheels off the ground a full right and left rotation of the steering input gear was performed and the wheels moved according. No excessive resistance or binding was felt. There were no power steering fluid leaks evident at the time of inspection and the power steering reservoir was almost to the full mark. The steering shaft universal joint was intact and in good condition. The steering column was still secure. The steering wheel was damaged but did rotate freely and the upper section of the intermediate shaft moved in conjunction. It appeared the steering system was function properly prior to the collision.

Suspension

Unserviceable

The truck was equipped with front leaf spring and rear air bag suspension. Both trailers were equipped with air bag suspension. The front leaf spring hangers, mounts and u-bolts were all secure and in good condition. The front shocks were intact and also appeared to be in in good condition. The left side shocks on axle two and three had pulled apart. The air bags and mounts on the truck were still intact and secure. On axle six of the lead trailer, one upper shock mount on the right had separated from the trailer frame bracket, which appeared to be impact related. One shock on the left side had separation at the rod. This all appeared consistent with impact related damage.

Tires

[See photo # 7](#)

Unserviceable

The truck was equipped with Bridgestone tires on all wheels and the trailers had a mix of different brand tires. All the tires on the truck and trailers had good tread. Axle five left outer tire tread damaged. It appeared the aluminum fender cover on the left side of the lead trailer was forced down onto the tire during the collision which was more than likely the cause of the tread damage.

See chart below for tread and pressure measurements.

	Tire tread measured in 32/inch				Pressure measured in PSI			
	Left Outer	Left Inner	Right Inner	Right Outer	Left Outer	Left Inner	Right Inner	Right outer
Axle 1	8/32	-----	-----	8/32	104	-----	-----	104
Axle 2	9/32	11/32	11/32	12/32	96	0	100	102
Axle 3	11/32	10/32	12/32	12/32	100	97	100	74
Axle 4	8/32	10/32	13/32	13/32	102	100	26	122
Axle 5	9/32	13/32	10/32	10/32	0	104	105	112
Axle 6	11/32	11/32	7/32	6/32	0	107	110	108
Axle 7	15/32	13/32	9/32	9/32	92	100	100	104
Axle 8	7/32	8/32	11/32	9/32	100	100	100	114

Wheels

Unserviceable

The truck and both trailers were equipped with factor steel wheels. All the fasteners were intact and secure. Axle two left inner tire had separated from wheel bead and the inner portion of the rim was bent. Axle six left outer wheel was also bent.

Lighting

See photo #8

Unserviceable

Due to the extent of damage to the truck during the collision, the electrical could not be properly inspected.

Seats and seat belts

Unserviceable

The driver seat base was still attached but damaged during the collision. The seat back was also pushed back and damaged. The driver seat belt was torn and damaged. This all appeared consistent with impact related damage.

Miscellaneous

The engine control module was removed from the vehicle prior to the start of the inspection and turned over to RCMP.

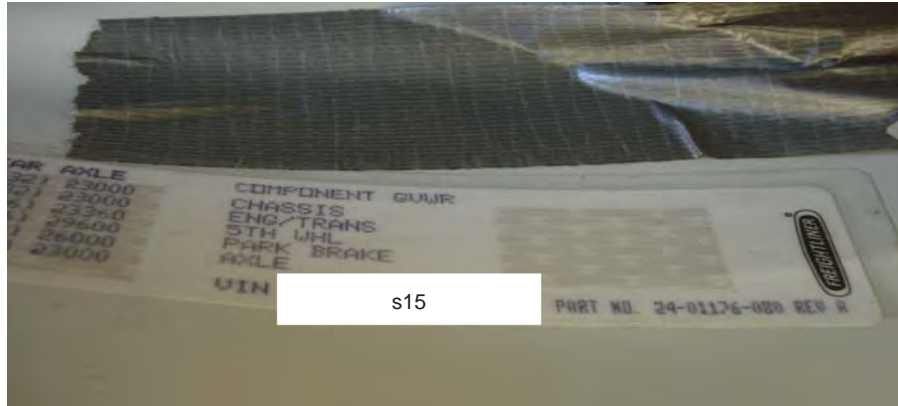

Summary

The above vehicle did not meet the standards set out in the motor vehicle act and regulations due to the kinked air line and no functioning brakes on the rear trailer.

⚠ WARNING

Normal engine operation creates highly pressurized fuel in the fuel line which will retain in the fuel line after engine shutdown. Never open the fuel system when the engine is operating. Before servicing the fuel system, always ensure the pump to cut fuel line at the top to vent the pressure. Keep hands clear of fuel line when loosening personnel injury or death.

Joanne,Ernie,Doug

Traveling from Vernon to trail load of concrete cinder blocks. Witness statements say the brakes were smoking prior to even getting to Rossland brake check down 3B.

Company Sutco Contracting out of Salmo.

There is for sure evidence at the scene of the rear trailer brakes were not as hot as trailer #1 and power unit. Fire fighters first on scene stated that the rear trailer was not even smoking so they did not deal with it as the truck brakes were on fire and trailer #1 was extreme smoke also. The glad hands between the two trailers were disconnected either before crash or during. They were not broken just disconnected ?

The grounds crew that was working the field(grey ford truck underneath trailer) saw driver standing on side step coming towards them looking like he was going to bail. He went back in cab honked air horn and pulled steering to right . The grounds crew had time to run away ,except for a minor injury to one from flying cinder block. The blue tarp in the pictures is where the drivers body ended up looking upwards.

Ernie the wreckage is at Marios Towing in Castlegar waiting there for your post crash report. When done can you send to Dave Barnhardt traffic analyst RCMP in Nelson.

I am working with Dave and MOT in trying to see if he actually bypassed the Rossland brake check by going back into the data recorded on the webcam at the 3B junction in Rossland.

Doug FYI this is Sutco's third crash in a week ,one in Bonners Ferry Idaho, April 29 rollover on #3 loaded up hill chip truck Anarchist ,and then this one.

General Inspection Comments:													

Inspector's Name **SEREDIAK, GORDON MICHAEL** Signature

The Inspector's signature above is certification that this vehicle has been inspected to the requirements of the Motor Vehicle Act and Regulations.

NOTICE: KEEP THIS VEHICLE INSPECTION REPORT WITH VEHICLE REGISTRATION

The personal information collected on this form is collected under the authority of section 216 of the Motor Vehicle Act and Division 25 of the Motor Vehicle Act Regulations. It is collected for the purpose of processing this vehicle inspection and for generally administering the Vehicle Inspection Program and the National Safety Code (e.g. regulating carriers, authorized inspectors, and designated inspection facilities). If you have any questions about the collection of this information, you may contact the Sr. Manager, NSC/VIP at the Commercial Vehicle Safety Enforcement Branch, by writing to P.O. Box 9250, Stn Prov. Gov't, Victoria, BC V8W 9J2, by e-mailing to vehicle.inspections@gov.bc.ca or calling 250-952-0577.

NOTICE AND ORDER COMPLIANCE INFORMATION

You **MUST** do the following (as indicated on Page 1):

A Notice and Order 1 has been issued to PU: ☐ T1: ☒ T2: ☐ T3: ☐

The vehicle is to be immediately removed from the highway and towed to a location of the operator's choice or place designated by the peace officer, at the owner's expense. It is to be kept from the highway until such time as it is repaired and passes an inspection performed by an Authorized Inspector at a Designated Inspection Facility.

This Notice and Order does not authorize operation of the vehicle(s) with identified defects. Non-compliance with this Notice and Order is an offence.

NOTICE

The owner may choose not to have the vehicle inspected or repaired, but rather to surrender the vehicle license and number plates to the Vice President Operations – ICBC or his/her designate. Should the vehicle license and number plates be surrendered or seized by a Peace Officer, the vehicle owner must make a separate application to ICBC or its agents for a refund.

It is the obligation of the registered owner to advise a subsequent registered owner of any outstanding vehicle inspection requirements.

NOTICE AND ORDER COMPLIANCE INFORMATION

You **MUST** do the following (as indicated on Page 1):

A Notice and Order 1 has been issued to PU: ☐ T1: ☒ T2: ☒ T3: ☐

The vehicle is to be immediately removed from the highway and towed to a location of the operator's choice or place designated by the peace officer, at the owner's expense. It is to be kept from the highway until such time as it is repaired and passes an inspection performed by an Authorized Inspector at a Designated Inspection Facility.

This Notice and Order does not authorize operation of the vehicle(s) with identified defects. Non-compliance with this Notice and Order is an offence.

NOTICE

The owner may choose not to have the vehicle inspected or repaired, but rather to surrender the vehicle license and number plates to the Vice President Operations – ICBC or his/her designate. Should the vehicle license and number plates be surrendered or seized by a Peace Officer, the vehicle owner must make a separate application to ICBC or its agents for a refund.

It is the obligation of the registered owner to advise a subsequent registered owner of any outstanding vehicle inspection requirements.

NOTICE AND ORDER COMPLIANCE INFORMATION

You **MUST** do the following (as indicated on Page 1):

A Notice and Order 1 has been issued to PU: ☒ T1: ☐ T2: ☐ T3: ☐

The vehicle is to be immediately removed from the highway and towed to a location of the operator's choice or place designated by the peace officer, at the owner's expense. It is to be kept from the highway until such time as it is repaired and passes an inspection performed by an Authorized Inspector at a Designated Inspection Facility.

This Notice and Order does not authorize operation of the vehicle(s) with identified defects. Non-compliance with this Notice and Order is an offence.

NOTICE

The owner may choose not to have the vehicle inspected or repaired, but rather to surrender the vehicle license and number plates to the Vice President Operations – ICBC or his/her designate. Should the vehicle license and number plates be surrendered or seized by a Peace Officer, the vehicle owner must make a separate application to ICBC or its agents for a refund.

It is the obligation of the registered owner to advise a subsequent registered owner of any outstanding vehicle inspection requirements.

DISPOSITION

See photo #1 for VIN confirmation

On the 7th day of May 2013, I performed a mechanical inspection on the above noted vehicles to ascertain the mechanical condition of the components to determine roadworthiness and compliance with the British Columbia Motor Vehicle Act and Regulations.

This vehicle was involved in a multiple vehicle crash as described below: the above vehicle was traveling North on Highway 3B when the driver failed to maintain control of the vehicle and went off road left and collided with a parked vehicle.

It was inspected at: Mario's towing yard in Castlegar

Attachments:

1. Post-Crash Vehicle Inspection Report
2. Photos in Appendix A
3. MV6020 – British Columbia Motor Vehicle Traffic Accident Police Investigation Report
4. Post-Crash Inspection Notes

***Unserviceable** (In its current state, it can not be used for its intended purpose)

***Serviceable** (capable of being used for its intended purpose)

Braking System / Components

See photo #2,3,4,5,6

Unserviceable

The truck and both trailers were equipped with air brakes having drum style brakes on all axles. The truck and both trailers were also equipped with ABS. The truck and the trailers were all inspected individually. During the inspection process I had removed the main air line off the compressor head of the truck to install an air fitting so as to charge the air system. With the air system charged and the brake pedal depressed to a 90 psi application pressure the truck brake chamber pushrods were measured for travel (*see chart below*). The glad hands on the lead trailer, which were damaged during the collision, were repaired so as to apply air to the trailer. With the lead trailer brake system charged and 90 psi application pressure applied to the service side of the air system, the brake chamber pushrods were measured for travel (*see chart below*). The glad hands on the rear trailer were intact, so the air system was charged and 90 psi was applied to the service side (*see chart below for pushrod travel*).

	Measurements in inches		
	Brake Chamber type	Left	Right
Axle 1	20 long	1.0	1.0
Axle 2	30 long	1 3/8	1 3/4
Axle 3	30 long	1 5/8	1 3/4
Axle 4	30 regular	1 1/8	1 1/4
Axle 5	30 regular	1 1/8	1 1/4
Axle 6	30 regular	1 1/4	1 3/8
Axle 7	30 regular	0	0
Axle 8	30 regular	0	0

During this inspection it was discovered that the rear trailer had no brake application when air was applied to the service side of the system. Upon further inspection I found the problem to be a kinked air line behind the glad hand bulk head. This kinked air line was in such a location that it could not have been caused by the collision but rather was more than likely a condition present prior to the collision. Once the kink in the air line was straightened out, the rear trailer brake system was retested and found to be functioning normal. The rear trailer brake push rod travel was then re-measured and found to be within specifications. The parking spring brakes were also checked and found to be working properly. Due to the amount of damage to the truck, the ABS system could not be checked. It was also noted during this inspection that the truck and lead trailer brake linings showed evidence of extreme heat exposure causing the bonding material between the friction material and the shoe backing to melt. The brake drums also showed signs of discoloration which would be consistent with severe heating. The rear trailer brakes did not show any signs of extreme heat buildup such as the others. Axle seven appeared to have had the drum and shoes recently replaced as they looked fairly new.

Steering

Unserviceable

The truck had a power assisted steering gear assembly. The steering intermediate shaft had pulled apart and this appeared consistent with impact related damage. The tie rod was also bent and this appeared to be impact related. Both tie rod end ball and socket joints were still intact and in good condition. With the front wheels off the ground a full right and left rotation of the steering input gear was performed and the wheels moved according. No excessive resistance or binding was felt. There were no power steering fluid leaks evident at the time of inspection and the power steering reservoir was almost to the full mark. The steering shaft universal joint was intact and in good condition. The steering column was still secure. The steering wheel was damaged but did rotate freely and the upper section of the intermediate shaft moved in conjunction. It appeared the steering system was function properly prior to the collision.

Suspension

Unserviceable

The truck was equipped with front leaf spring and rear air bag suspension. Both trailers were equipped with air bag suspension. The front leaf spring hangers, mounts and u-bolts were all secure and in good condition. The front shocks were intact and also appeared to be in in good condition. The left side shocks on axle two and three had pulled apart. The air bags and mounts on the truck were still intact and secure. On axle six of the lead trailer, one upper shock mount on the right had separated from the trailer frame bracket, which appeared to be impact related. One shock on the left side had separation at the rod. This all appeared consistent with impact related damage.

Tires

[See photo # 7](#)

Unserviceable

The truck was equipped with Bridgestone tires on all wheels and the trailers had a mix of different brand tires. All the tires on the truck and trailers had good tread. Axle five left outer tire tread damaged. It appeared the aluminum fender cover on the left side of the lead trailer was forced down onto the tire during the collision which was more than likely the cause of the tread damage.

See chart below for tread and pressure measurements.

	Tire tread measured in 32/inch				Pressure measured in PSI			
	Left Outer	Left Inner	Right Inner	Right Outer	Left Outer	Left Inner	Right Inner	Right outer
Axle 1	8/32	-----	-----	8/32	104	-----	-----	104
Axle 2	9/32	11/32	11/32	12/32	96	0	100	102
Axle 3	11/32	10/32	12/32	12/32	100	97	100	74
Axle 4	8/32	10/32	13/32	13/32	102	100	26	122
Axle 5	9/32	13/32	10/32	10/32	0	104	105	112
Axle 6	11/32	11/32	7/32	6/32	0	107	110	108
Axle 7	15/32	13/32	9/32	9/32	92	100	100	104
Axle 8	7/32	8/32	11/32	9/32	100	100	100	114

Wheels

Unserviceable

The truck and both trailers were equipped with factor steel wheels. All the fasteners were intact and secure. Axle two left inner tire had separated from wheel bead and the inner portion of the rim was bent. Axle six left outer wheel was also bent.

Lighting

See photo #8

Unserviceable

Due to the extent of damage to the truck during the collision, the electrical could not be properly inspected.

Seats and seat belts

Unserviceable

The driver seat base was still attached but damaged during the collision. The seat back was also pushed back and damaged. The driver seat belt was torn and damaged. This all appeared consistent with impact related damage.

Miscellaneous

The engine control module was removed from the vehicle prior to the start of the inspection and turned over to RCMP.

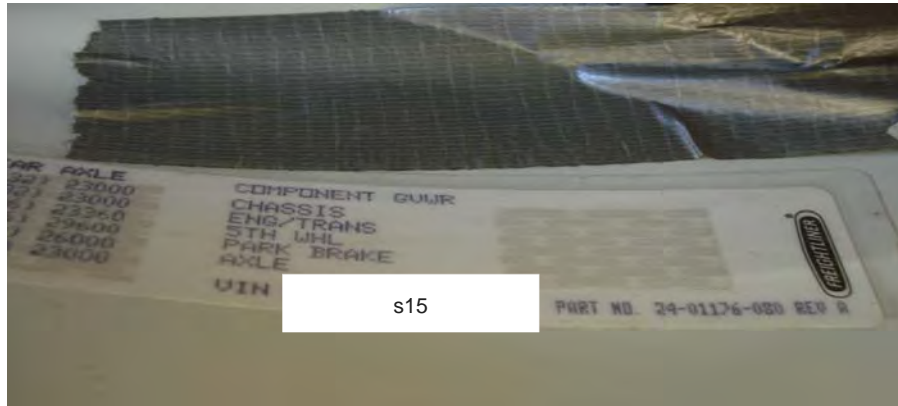

Summary

The above vehicle did not meet the standards set out in the motor vehicle act and regulations due to the kinked air line and no functioning brakes on the rear trailer.

On September 18,2013, I performed a mechanical inspection on the above noted vehicles to ascertain the mechanical condition of the components to determine roadworthiness and compliance with the British Columbia Motor Vehicle Act and Regulations.

This vehicle was involved in a single vehicle crash as described below: The above combination was travelling south bound on Hwy 33 and rolled into ditch 5km south of McCulloch Rd.

It was inspected at: Mario`s Towing, 3015 Sexsmith Rd, Kelowna, BC. This is a gated and secure yard.

On May 15 and 16, 2012, I performed a mechanical inspection on the above noted vehicles to ascertain the mechanical condition of the components to determine roadworthiness and compliance with the British Columbia Motor Vehicle Act and Regulations.

This vehicle was involved in a single vehicle crash as described below:

Vehicle was traveling southbound on Hwy #33 and rolled over into the northbound lane/ditch at 8 mile curve.

It was inspected at: Mario's Towing at 3015 Sexsmith Rd, Kelowna, B.C

This is a locked and secure compound

Attachments:

1. Photos in Appendix A

Braking System / Components

Unserviceable- There were 5 brakes out of adjustment on the trailers and 1 brake inoperative because the brake pot attachment nuts were missing/loose. See chart below.

- Brake clevises and pins worn excessively on axle #7 both sides, #8 left side, #9 right side
- Axle #8 brake linings worn below allowable thickness (3/16" actual, spec=5/16" or less)
- Axle #9 left side brake clevis pin missing cotter pin
- Axle #8 left side inner camshaft tube support bracket broken
- Axle #1 Right side brake lining worn below allowable thickness (3/16" actual, spec=3/16" or less)

Brake Adjustments

Axle #	Type	Left	Right	Adjustment limit
1	20 Regular stroke	1 5/8"	1 3/8"	1 3/4"
2	20 Regular stroke	1 1/4"	1 1/4"	1 3/4"
3	30 Regular stroke	1 5/8"	1 3/4"	2"
4	30 Regular stroke	1 5/8"	1 5/8"	2"
5	30 Long stroke	1 5/8"	1 3/4"	2 1/2"
6	30 Long stroke	1 7/8"	1 3/4"	2 1/2"
7	30 Long stroke	3"	2 5/8"	2 1/2"
8	30 Long stroke	3"	3"	2 1/2"
9	30 Long stroke	2 3/4"	0" loose brake pot	2 1/2"

Steering

Serviceable –steer axle shifted (post crash)

Suspension

Unserviceable- Axle #3 right side broken air bag pedestal

- Axle #1 rear spring bushings worn
- Axle #1 shock bushings worn
- Air line for suspension leaking on trailer #1, caused by crash

Tires

Serviceable –Axle #7 left outer tire flat and off bead, caused by crash

Wheels

Serviceable

Lighting

Not checked

Frame/Body

Unserviceable – Trailer #2 -numerous cracks in trailer frame, sub frame and cross members
- numerous loose body mounting bolts

Summary

This vehicle did not meet the standards set out in the Motor Vehicle Act and Regulations (MVAR).

- The brakes on axles #7, #8 and #9 were not in adjustment (MVAR Div #7 Schedule #24).
- The brake chamber push rod clevises and pins on axles #7, #8 left side and #9 right side were worn excessively (MVAR Div #7 Schedule #25).
- The push rod clevis pin was missing the cotter pin on axle #9 left side (MVAR Div #7 Schedule #25).
- The inner camshaft tube support bracket was broken (MVAR Div #7 Schedule #25).
- The brake linings on axle #1 right side were worn below minimum allowed (Commercial Vehicle Inspection manual –Truck tractor –Section #3A #19 (b)(ii).
- The brake linings on axle #8 were worn below minimum allowed (Commercial Vehicle Inspection manual Trailer – Section #2A #19 (b)(ii).
- The air bag pedestal was cracked on axle #3 right side (MVAR Div #7 Schedule #19).
- The rear spring pins and bushings on axle #1 were worn excessively (Div #7 Schedule #19).
- Trailer #2 had numerous cracks in frame, sub frame and cross members as well as loose body/frame bolts (MVAR Div #7 Schedule #11)

NOTICE AND ORDER COMPLIANCE INFORMATION

You **MUST** do the following (as indicated on Page 1):

A Notice and Order 1 has been issued to PU: ☒ T1: ☐ T2: ☐ T3: ☐

The vehicle is to be immediately removed from the highway and towed to a location of the operator's choice or place designated by the peace officer, at the owner's expense. It is to be kept from the highway until such time as it is repaired and passes an inspection performed by an Authorized Inspector at a Designated Inspection Facility.

This Notice and Order does not authorize operation of the vehicle(s) with identified defects. Non-compliance with this Notice and Order is an offence.

NOTICE

The owner may choose not to have the vehicle inspected or repaired, but rather to surrender the vehicle license and number plates to the Vice President Operations – ICBC or his/her designate. Should the vehicle license and number plates be surrendered or seized by a Peace Officer, the vehicle owner must make a separate application to ICBC or its agents for a refund.

It is the obligation of the registered owner to advise a subsequent registered owner of any outstanding vehicle inspection requirements.

DISPOSITION

Violation(s) corrected: Yes ☐ No ☐ Date: _____ Agency: _____

Peace Officer (Print): _____ Number: _____

WARNING

IT IS AN OFFENCE TO OPERATE A VEHICLE WHICH DOES NOT COMPLY WITH THE MOTOR VEHICLE ACT AND REGULATIONS OR THIS NOTICE AND ORDER. FAILURE TO COMPLY WITH A NOTICE AND ORDER MAY RESULT IN THE REFUSAL OF FURTHER VEHICLE LICENSE TRANSACTIONS. PENALTIES FOR OPERATING A VEHICLE IN CONTRAVENTION OF A NOTICE AND ORDER INCLUDE A FINE AND SEIZURE OF THE VEHICLE LICENSE AND NUMBER PLATES.

NOTICE AND ORDER COMPLIANCE INFORMATION

You **MUST** do the following (as indicated on Page 1):

A Notice and Order 1 has been issued to PU: ☐ T1: ☒ T2: ☐ T3: ☐

The vehicle is to be immediately removed from the highway and towed to a location of the operator's choice or place designated by the peace officer, at the owner's expense. It is to be kept from the highway until such time as it is repaired and passes an inspection performed by an Authorized Inspector at a Designated Inspection Facility.

This Notice and Order does not authorize operation of the vehicle(s) with identified defects. Non-compliance with this Notice and Order is an offence.

NOTICE

The owner may choose not to have the vehicle inspected or repaired, but rather to surrender the vehicle license and number plates to the Vice President Operations – ICBC or his/her designate. Should the vehicle license and number plates be surrendered or seized by a Peace Officer, the vehicle owner must make a separate application to ICBC or its agents for a refund.

It is the obligation of the registered owner to advise a subsequent registered owner of any outstanding vehicle inspection requirements.

You **MUST** do the following (as indicated on Page 1):

A Notice and Order 3 has been issued to PU: ☒ T1: ☐ T2: ☐ T3: ☐

Immediately correct the defect(s) or omission(s) noted and present this Notice and Order to a Peace Officer at the location indicated, within the time designated, verifying that the required defect(s) or omission(s) have been corrected.

This Notice and Order does not authorize operation of the vehicle(s) with identified defects. Non-compliance with this Notice and Order is an offence.

NOTICE

The owner may choose not to have the vehicle inspected or repaired, but rather to surrender the vehicle license and number plates to the Vice President Operations – ICBC or his/her designate. Should the vehicle license and number plates be surrendered or seized by a Peace Officer, the vehicle owner must make a separate application to ICBC or its agents for a refund.

It is the obligation of the registered owner to advise a subsequent registered owner of any outstanding vehicle inspection requirements.

DISPOSITION

Violation(s) corrected: Yes ☐ No ☐ Date: _____ Agency: _____

Peace Officer (Print): _____ Number: _____

WARNING

IT IS AN OFFENCE TO OPERATE A VEHICLE WHICH DOES NOT COMPLY WITH THE MOTOR VEHICLE ACT AND REGULATIONS OR THIS NOTICE AND ORDER. FAILURE TO COMPLY WITH A NOTICE AND ORDER MAY RESULT IN THE REFUSAL OF FURTHER VEHICLE LICENSE TRANSACTIONS. PENALTIES FOR OPERATING A VEHICLE IN CONTRAVENTION OF A NOTICE AND ORDER INCLUDE A FINE AND SEIZURE OF THE VEHICLE LICENSE AND NUMBER PLATES.

NOTICE AND ORDER COMPLIANCE INFORMATION

You **MUST** do the following (as indicated on Page 1):

A Notice and Order 1 has been issued to PU: ☐ T1: ☒ T2: ☐ T3: ☐

The vehicle is to be immediately removed from the highway and towed to a location of the operator's choice or place designated by the peace officer, at the owner's expense. It is to be kept from the highway until such time as it is repaired and passes an inspection performed by an Authorized Inspector at a Designated Inspection Facility.

This Notice and Order does not authorize operation of the vehicle(s) with identified defects. Non-compliance with this Notice and Order is an offence.

NOTICE

The owner may choose not to have the vehicle inspected or repaired, but rather to surrender the vehicle license and number plates to the Vice President Operations – ICBC or his/her designate. Should the vehicle license and number plates be surrendered or seized by a Peace Officer, the vehicle owner must make a separate application to ICBC or its agents for a refund.

It is the obligation of the registered owner to advise a subsequent registered owner of any outstanding vehicle inspection requirements.

DISPOSITION

Violation(s) corrected: Yes ☐ No ☐ Date: _____ Agency: _____

Peace Officer (Print): _____ Number: _____

WARNING

IT IS AN OFFENCE TO OPERATE A VEHICLE WHICH DOES NOT COMPLY WITH THE MOTOR VEHICLE ACT AND REGULATIONS OR THIS NOTICE AND ORDER. FAILURE TO COMPLY WITH A NOTICE AND ORDER MAY RESULT IN THE REFUSAL OF FURTHER VEHICLE LICENSE TRANSACTIONS. PENALTIES FOR OPERATING A VEHICLE IN CONTRAVENTION OF A NOTICE AND ORDER INCLUDE A FINE AND SEIZURE OF THE VEHICLE LICENSE AND NUMBER PLATES.

NOTICE AND ORDER COMPLIANCE INFORMATION

You **MUST** do the following (as indicated on Page 1):

A Notice and Order 3 has been issued to PU: ☒ T1: ☐ T2: ☐ T3: ☐

Immediately correct the defect(s) or omission(s) noted and present this Notice and Order to a Peace Officer at the location indicated, within the time designated, verifying that the required defect(s) or omission(s) have been corrected.

This Notice and Order does not authorize operation of the vehicle(s) with identified defects. Non-compliance with this Notice and Order is an offence.

NOTICE

The owner may choose not to have the vehicle inspected or repaired, but rather to surrender the vehicle license and number plates to the Vice President Operations – ICBC or his/her designate. Should the vehicle license and number plates be surrendered or seized by a Peace Officer, the vehicle owner must make a separate application to ICBC or its agents for a refund.

It is the obligation of the registered owner to advise a subsequent registered owner of any outstanding vehicle inspection requirements.

DISPOSITION

Violation(s) corrected: Yes ☐ No ☐ Date: _____ Agency: _____

Peace Officer (Print): _____ Number: _____

WARNING

IT IS AN OFFENCE TO OPERATE A VEHICLE WHICH DOES NOT COMPLY WITH THE MOTOR VEHICLE ACT AND REGULATIONS OR THIS NOTICE AND ORDER. FAILURE TO COMPLY WITH A NOTICE AND ORDER MAY RESULT IN THE REFUSAL OF FURTHER VEHICLE LICENSE TRANSACTIONS. PENALTIES FOR OPERATING A VEHICLE IN CONTRAVENTION OF A NOTICE AND ORDER INCLUDE A FINE AND SEIZURE OF THE VEHICLE LICENSE AND NUMBER PLATES.

NOTICE AND ORDER COMPLIANCE INFORMATION

You **MUST** do the following (as indicated on Page 1):

A Notice and Order 1 has been issued to PU: ☐ T1: ☒ T2: ☒ T3: ☐

The vehicle is to be immediately removed from the highway and towed to a location of the operator's choice or place designated by the peace officer, at the owner's expense. It is to be kept from the highway until such time as it is repaired and passes an inspection performed by an Authorized Inspector at a Designated Inspection Facility.

This Notice and Order does not authorize operation of the vehicle(s) with identified defects. Non-compliance with this Notice and Order is an offence.

NOTICE

The owner may choose not to have the vehicle inspected or repaired, but rather to surrender the vehicle license and number plates to the Vice President Operations – ICBC or his/her designate. Should the vehicle license and number plates be surrendered or seized by a Peace Officer, the vehicle owner must make a separate application to ICBC or its agents for a refund.

It is the obligation of the registered owner to advise a subsequent registered owner of any outstanding vehicle inspection requirements.

DISPOSITION

Violation(s) corrected: Yes ☐ No ☐ Date: _____ Agency: _____

Peace Officer (Print): _____ Number: _____

WARNING

IT IS AN OFFENCE TO OPERATE A VEHICLE WHICH DOES NOT COMPLY WITH THE MOTOR VEHICLE ACT AND REGULATIONS OR THIS NOTICE AND ORDER. FAILURE TO COMPLY WITH A NOTICE AND ORDER MAY RESULT IN THE REFUSAL OF FURTHER VEHICLE LICENSE TRANSACTIONS. PENALTIES FOR OPERATING A VEHICLE IN CONTRAVENTION OF A NOTICE AND ORDER INCLUDE A FINE AND SEIZURE OF THE VEHICLE LICENSE AND NUMBER PLATES.

NOTICE AND ORDER COMPLIANCE INFORMATION

You **MUST** do the following (as indicated on Page 1):

A Notice and Order 3 has been issued to PU: ☐ T1: ☒ T2: ☐ T3: ☐

Immediately correct the defect(s) or omission(s) noted and present this Notice and Order to a Peace Officer at the location indicated, within the time designated, verifying that the required defect(s) or omission(s) have been corrected.

This Notice and Order does not authorize operation of the vehicle(s) with identified defects. Non-compliance with this Notice and Order is an offence.

NOTICE

The owner may choose not to have the vehicle inspected or repaired, but rather to surrender the vehicle license and number plates to the Vice President Operations – ICBC or his/her designate. Should the vehicle license and number plates be surrendered or seized by a Peace Officer, the vehicle owner must make a separate application to ICBC or its agents for a refund.

It is the obligation of the registered owner to advise a subsequent registered owner of any outstanding vehicle inspection requirements.

DISPOSITION

Violation(s) corrected: Yes ☐ No ☐ Date: _____ Agency: _____

Peace Officer (Print): _____ Number: _____

WARNING

IT IS AN OFFENCE TO OPERATE A VEHICLE WHICH DOES NOT COMPLY WITH THE MOTOR VEHICLE ACT AND REGULATIONS OR THIS NOTICE AND ORDER. FAILURE TO COMPLY WITH A NOTICE AND ORDER MAY RESULT IN THE REFUSAL OF FURTHER VEHICLE LICENSE TRANSACTIONS. PENALTIES FOR OPERATING A VEHICLE IN CONTRAVENTION OF A NOTICE AND ORDER INCLUDE A FINE AND SEIZURE OF THE VEHICLE LICENSE AND NUMBER PLATES.

NOTICE AND ORDER COMPLIANCE INFORMATION

You **MUST** do the following (as indicated on Page 1):

A Notice and Order 1 has been issued to PU: ☐ T1: ☒ T2: ☐ T3: ☐

The vehicle is to be immediately removed from the highway and towed to a location of the operator's choice or place designated by the peace officer, at the owner's expense. It is to be kept from the highway until such time as it is repaired and passes an inspection performed by an Authorized Inspector at a Designated Inspection Facility.

This Notice and Order does not authorize operation of the vehicle(s) with identified defects. Non-compliance with this Notice and Order is an offence.

NOTICE

The owner may choose not to have the vehicle inspected or repaired, but rather to surrender the vehicle license and number plates to the Vice President Operations – ICBC or his/her designate. Should the vehicle license and number plates be surrendered or seized by a Peace Officer, the vehicle owner must make a separate application to ICBC or its agents for a refund.
