Comments: Abolish beef production and any other unnatural pursuits of organised crimes against nature, eating beef is a serious health hazard to humans, promulgates violence and aggressive behaviors, creates copious amounts of methane gasses, now higher than ever, corporate deliberate, concentrated cradle to grave programming to eat what ever pseudo toxic foods big ag or big pharmacide delivers to the mainstream c plus average if you're bloody lucky these days, idiot's unconsidered ill conceived dinning habits from the dark ages. Once again for profit biz attacks the natural world successfully spinning the fictions they are provided by their corporate defacto unlawful dictators in Provincial/ Federal Legislatures sucking up the life blood of the people, their wealth, freedoms and sanity, leaving a conscienceless moronic credit addicted gimme gimme mommy or I tantrum lunatics with degrees in uselessness.

So say the Association of the Deans of Universities, of their once brightest, now grasping products of corporate brainwashing via corrupted co opted curriculums and democracy of fictions and corporate lobbist fixed elections.

Once again the beercrats all classically educated in corporate cowering, power mongering, play their mindless parts in the Papist corporatization of the planet, which spells death to the planet, dumbed down, divorced from reality, unnaturopathically assisting in their OWN eventual enslavement to macro Vatican created Corporate BANKSTERISMS globally, that corporate created, deluded, self centered, suicidal, megalomaniacal species of destruction, death dealing, polluting, warring, pillaging, fascistic, crap where they stand, throw it out the window littering, lala land dwelling, reality tv hypnotised, God Fearing (?? sic) thoughtlessly conforming religiously fanatical miscreant mindless majority of sub humanity.

Like the Ugly Sisters of Cinderella infamy, no matter how you try to put your fat foot into that delicate natural "shoe" the one size does NOT fit all, you fat ugly greedy repressed sadistically stupid bitches !

Clear enough ? Embeciles.!

Better to kill all the wandering dogs off neighboring farms starving for want of care and feeding and stop putting crap on the natural world that has more sense, more entitlement to exist than Israel ! I know I have seen and shot many of those feral canines blood soaked and

furtive eyed skulking home in the dawn light. Dog packs. Coy dogs not wolved killing live stock.

Privacy ? Hell no ! Show the world what I know to be absolute truth of the matter regardless to how unteachable the "world" demon staitis itself to be.!

Retrain the animal abusing husbandman into a new line of natural life complimenting economic pursuits if at all possible ! The majority is ALWAYS wrong damn it.!

Rise up you gutless mindless sheep or you will be on a big agg meat hook next. Or worse ! This NWO under the Vatican's insane self claimed right to fine imprison and put to death all who will not accept their fictionalised Jesus as Savior will be the blackest, darkest most muderous lunacy ever seen on this planet again dwarfing even the quasi Israeli crimes against reason and humanity !

Ban all corporate systems immediately and give man back his soveignty before the human race is reduced to 0 for profit. ! Then what. A few hundred ultra rich psychopaths enjoy the entire polluted planet to themselves ??

Madness.!

What would Tsung Su say about this. :)

Comments: What is the difference between extremists who burn down buildings as eco - terrorists, and extremists who torture, brutalize, poison, trap, luring from safety and year round hunts for the sole apparent purpose to extinct a species? Isn't torture and killing of animals a formative behaviour for serial killers?

Comments: Does the grey wolf need managing? It seems to many that it is the out of control trappers and shooters that need managing - and prosecuting in many cases for gratuitous cruelty! I really don't see any point in submitting serious comments regarding this, because I know this draft management plan is nonsense. You will kill the wolves as long as you are permitted to do so, regardless of whether or not it is a wise thing to do. The civilised world just looks on in horror and amazement that you are slaughtering this beautiful species out of existence, mainly on behalf of cattle ranchers and so-called 'sportsmen'. Pathetic!

I too am an aspiring blog writer but I'm still new to the whole thing. Do you have any helpful hints for first-time blog writers? I'd certainly appreciate it.
