### Countries - Help Card

#### Column Definitions

##### Countries

If the Webtrends GeoTrends Database is turned on for this profile, the country is determined by looking up the visitor's IP address in this database. If GeoTrends is not enabled, the country will be determined from the domain name.

##### Visits

Number of visits from the specified country. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

##### %

Percentage of total visits from the specified country.

##### Unknown Country

The country associated with the visitor's domain name could not be determined.

#### Report Descriptions

This information can help you meet the needs of your target audience as well as discover new audiences. Consider how you can make the content comprehensive and relevant to an international audience.

**Note:** Use this information carefully because it is based on Internet registration, and may not always be an accurate identifier of the visitor's actual location.

### Countries - Help Card

#### Column Definitions

##### Countries

If the Webtrends GeoTrends Database is turned on for this profile, the country is determined by looking up the visitor's IP address in this database. If GeoTrends is not enabled, the country will be determined from the domain name.

##### Visits

Number of visits from the specified country. A visit is a series of actions that begins when a visitor views their first page from the server, and ends when the visitor leaves the site or remains idle beyond the idle-time limit. The default idle-time limit is thirty minutes. This time limit can be changed by the system administrator.

##### %

Percentage of total visits from the specified country.

##### Unknown Country

The country associated with the visitor's domain name could not be determined.

#### Report Descriptions

This information can help you meet the needs of your target audience as well as discover new audiences. Consider how you can make the content comprehensive and relevant to an international audience.

**Note:** Use this information carefully because it is based on Internet registration, and may not always be an accurate identifier of the visitor's actual location.

## Referring Domain - Help Card

### Column Definitions

#### Referring Domain

A web site that refers a visitor to your site by linking to it.

#### Domain

Top-level domains to which belong the web sites which refer visitors to your site by linking to it.

#### Visits

Number of times the specified domain referred visitors to your site.

#### %

Percentage of referrals that came from the specified domain.

#### Direct Traffic

Represents traffic to the web site with no referrer as one of the following: 1) the visitor typed the domain name directly into their browser, 2) the visitor bookmarked the site, 3) the visitor clicked on an email, shortcut, or other direct link, 4) Firewalls and/or proxies stripped out the referrer and replaced it with a dash "-".

Note: If "Direct Traffic" is 100% of all your traffic, then you are probably not logging the "referrer" field in your log files. Please see your manual or the Webtrends Knowledgebase to enable extended logging on your web servers.

#### Hidden-Referrer

A value indicating that Internet security software such as Zone Alarm Pro, Symantec's Norton Internet Security, or a proxy server modified a web request to mask the referring URL.

#### Unknown

Represents traffic for which a referrer was logged, but the referring domain was blocked or otherwise could not be resolved to a valid domain.

### **Report Descriptions**

You can use this page to determine which domains are referring the most visitors to your site. This can help when considering the most effective ways and places to attract visitors.
