In discussions with the LNG tax legislative drafting team this week regarding s13, s17 and consultation process, a couple of issues have arisen that will affect the timing of the drafting and the process.

s13, s17

Proponents are expecting s13 in about two weeks (end of August). However, because the legislation is still in a state of flux with respect to some of the key features of the tax and at the moment it looks like Pat will not be able to put resources on these two items until September.

s13, s17

however, some proponents are keen to know as much as possible about how the tax operates as soon as possible.

Steve & Peter,

To avoid confusion and/or mixed messages I'm only sending this to you two. This is a VERY draft "policy concept paper" document that was started as per Steve's request last week to have something for CWG. In case it helps with generic messaging. Piece will evolve in the next few days, but might help for now. Many of the concepts will require direction.

This is the issues list, including some tax related, which we are hoping to discuss with lawyers today at 330pm. I've sent to both of you as I understand ministers meeting might mean Paul can't join the call. Melissa can flip the dial in and meeting notice to you Pat.
