Permit File: 11200-30/2014-0028

*fax: (250) 656-4789 [SD#271]*

Shane Bond  
Stantec  
Suite 11, 2042 Mills Road  
Sidney, BC V8L 5X4

Dear Shane Bond:

**Application for Permit (Application file # 11200-30/13A0257): Archaeological impact assessment of EnBridge Gateway Pipeline's proposed RoW development and ancillary facilities extending from the British Columbia - Alberta border south of the Wapiti River west to the town of Kitimat**

Further to your June 5, 2013, Application for Permit under the *Heritage Conservation Act*, I am pleased to enclose Permit 2014-0028 with application attached. Please keep this copy for your records; the original will be retained in the Archaeology Branch permit file.

The results of your inspections are to be presented in the permit report (hard copy preferred to be **double-sided**; electronic copy to be as noted in Permit Condition #2) due by December 31, 2015. Please ensure that site inventory forms are submitted separately and detailed site access information is not included in the report text. If site forms are included in the report, they will be removed by Branch staff.

An effort should be made to contact individuals and organizations with knowledge of archaeological resources in the study area in order to compile information concerning the location, distribution and significance of archaeological sites. These efforts are to be documented in the permit report.

Please note that Branch acceptance of permit reports only acknowledges the fulfillment of permit terms and conditions. Such acceptance does not bring with it an obligation by the Branch to accept report recommendations as they relate to impact assessments or impact management requirements.

An additional 79 pages of maps that accompanied the application can be emailed to you.

Please contact Steven Acheson, Archaeologist, telephone (250) 953-3306, to request maps or to answer any questions you may have with respect to this permit.

Sincerely,

Doug Glaum  
Manager

DG/mv/Encl.

(See back for *Conditions*)

## GENERAL TERMS AND CONDITIONS OF PERMIT

1. Permits shall be valid for the term stipulated on the front of the permit unless otherwise suspended or cancelled. Extensions to the term of the permit, or other amendments, will be considered upon submission of an application to the Archaeology Branch at least 30 days prior to the expiry date of the permit.
2. For projects other than oil and gas projects in northeastern BC, the permit-holder shall provide the Archaeology Branch with one (1) bound copy and one (1) electronic copy in PDF format of a written report, in accordance with the standards required by the Minister, outlining the work carried out under the terms of the permit. For oil and gas projects in northeastern BC, the permit-holder shall provide the Oil and Gas Commission with one (1) electronic copy in PDF format for review and acceptance prior to submitting one (1) bound copy and one (1) electronic copy in PDF format to the Archaeology Branch.
3. The title page of all reports must indicate the name(s) of the copyright owner(s) and, where agreed to, a Grant of License statement completed and signed by the copyright owner(s).
4. A person appointed by the branch may at any time inspect any aspect of a project conducted under the terms of this permit. To further their inspection, the appointee may conduct excavations within the study area. Notwithstanding the expiration or earlier termination of the term of the permit this provision will remain and continue in full force and effect.
5. Upon completion of any inspection or investigation involving excavations, the permit-holder shall make reasonable efforts to ensure all sites are restored as nearly as possible to their former condition.
6. The permit-holder shall arrange for a secure repository to curate any materials recovered under authority of the permit.
7. Heritage objects and associated materials recovered under authority of the permit may not be sold or exchanged for financial gain. Any other transfer of heritage objects, materials and records, or changes to the conditions identified under the "Disposition of materials collected..." section of the permit, may only be carried out with prior consent of the Minister.
8. The permit-holder shall conform to all requirements that may be imposed by the institution or organization named in the "Disposition of materials collected..." section of the permit.
9. Notwithstanding expiration or earlier termination of the term of the permit, provisions with respect to the "Disposition of materials collected ..." section shall remain and continue in full force and effect.
10. The permit-holder shall utilize any site recording forms, formats or systems required by the Minister. All sites must be recorded on a BC Archaeological Site Inventory Form and submitted to the Archaeology Branch.
11. A permit issued under section 14(2) does not authorize entry onto land or into a building without the permission of the owner or occupier.
12. For heritage inspection permits, the permit-holder shall submit spatial information (as a shape file in accordance with the standards required by the Minister) of all study areas that were the subject of in-field inspections.
13. Any other conditions that may be specified in the permit.

OTHER CONDITIONS: Continued on page 3

.../3

OTHER CONDITIONS:

14. Notification of Work for New Study Areas – Pipeline realignments and infrastructure changes may result in the identification of new areas requiring archaeological inspection. Where the need for an archaeological impact assessment is identified, First Nations with an interest in the new study areas and the Archaeology Branch must be notified at least 15 calendar days in advance of field work being conducted. Should First Nations identify a potential infringement to an aboriginal right, they can contact the Archaeology Branch Permit and Assessment Section Supervisor, Dr. Steve Acheson (250) 953-3306 to discuss the nature of the aboriginal right, potential for infringement and possible methods of accommodation. Should aboriginal rights issues be raised, the field inspection cannot proceed until the Archaeology Branch has investigated
15. Project Study Area - The project study area is defined as a 1 km. wide corridor centered on the proposed pipeline right of way, for the length of the project within British Columbia and the Kitimat Terminal area
