

Connecting Citizens Grant Program
Round One (2008/09)

Assessment Criteria

Category	Description	Overall Score (%)
Locale	- The application meets one of the funding priorities identified in the application. - The need for connectivity has been clearly demonstrated in the application.	25
Technical	- The proposal is technically feasible. - The solution will provide high-speed broadband.	15
Financial	- Funds have been reasonably allocated for infrastructure and project management within the submitted budget. - Percentage of total project to be funded by the CCGP grant. - Total number of households that will benefit from the project. - The application is for a project that has not already been completed.	25
Corporate Capability	- The Internet service provider named in the application is currently in operation (not a start-up). - The Internet service provider named in the application has existing infrastructure in the area and local resources to complete the project.	10
Overall Quality of Application	- The probability of the project being completed within one year based on the information provided in the application. - The applicant and/or service provider is legally able to receive provincial funding.	25
Total Possible Points=		100

Connecting Citizens Grant Program

Round Three (2010/11) Program Guide

Assessment Criteria

Applications will be adjudicated by an independent team of evaluators.

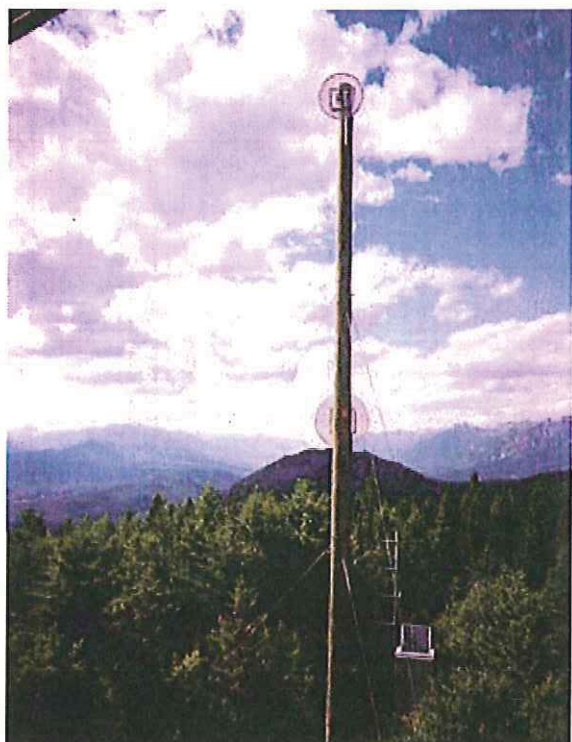

Applications will be assessed against the criteria in the table below and prioritized on the basis of their weighted score.

Name	Description	% of Overall Score
Locale	• The application defines the unconnected locale(s) to be served. • The application describes the number of unconnected citizens who will get service as a result of this project. • The application demonstrates local government and community support. Current letters of support must be included in the application package. • The application provides evidence that the proposed deployment of Internet services to homes and businesses is based on a realistic assessment of community needs and anticipated benefits. • The application describes the impact that high-speed Internet services will have on the local economy.	30 %
Technical	• The application confirms there is an Internet gateway, PoP or other backhaul capability in place in order for the project to proceed. • The technical solution describes the type of network being installed, the type of technology to be deployed, where it will be used and how it will be installed. • The technical solution adequately serves the projected number of subscribers (i.e., the connectivity supplied to the end user meets the definition of broadband). • The solution can be scaled and supported to address future needs of the locale(s).	20 %
Financial	• The applicant has demonstrated that figures presented in the Project Budget and Financial Operating Plan are realistic; revenue and expenditure projections are reasonable. • Total requested program funding has been identified and a detailed breakdown of eligible costs presented. • The applicant has demonstrated all funding has been acquired for a timely start and completion of project. • The number of users and the monthly rates have been identified.	20 %

Connecting Citizens Grant Program

Round Three (2010/11) Program Guide

Name	Description	% of Overall Score
Corporate Capability	- The applicant has demonstrated they have selected or are an experienced Internet service provider with the expertise and qualifications to implement the project. - The applicant has demonstrated project management expertise and experience with overseeing broadband projects. - The project is able to start quickly. - The applicant has addressed rights of ways and permits in the timelines of the project. - The Internet service provider is local or regional and can leverage existing infrastructure. - The project milestones are reasonable.	20 %
Overall Quality of Application	- Applicant has provided a quality proposal. - The proposal gives confidence that the project can and will succeed.	10 %
