**Subject:** RE: McBride CFA Remediation Order Status

As of June 14<sup>th</sup>, two (2) of the sixteen (16) Standard units [blocks CP 059-T59 and CP 500-MV500] were not adequately entered into RESULTS therefore the remediation order was deemed to be incomplete Both of the SUs still did not have any forest cover information. In addition, there were a number of other blocks within the Remediation Order that had minor issues that did not appear to be consistent with the reporting requirements (i.e. well spaced sph that did not use M values).

At this time (June 14<sup>th</sup>, 2013) a Notice of Investigation letter was sent that outlined the deficiencies to the licensee [McBride Community Forest] and stated there was an alleged contravention of Section 112 FRPA [failure to comply with an Order]. This action created a new investigation and casefile.

As of July 9, 2013, CP 059-T59 has had the forest cover information updated and CP 500-MV500 is still outstanding. Communications with MCFC has indicated that a stocking survey is necessary to gather the required information. The outstanding block was partial cut. The other minor issues noted appear to have been adequately addressed.

Therefore the Remediation Order is still not entirely complete.

Ian Brown  
Natural Resource Officer Supervisor

**Subject:** McBride CFA Remediation Order Status

I just finished speaking with Chris Mosher with the Forest Practices Board. The Board panel is meeting tomorrow Wednesday July 10<sup>th</sup> at 10:30 to discuss the audit report for MCF and they would wish to know any available information on the status of the December 16, 2012 remediation order which was to be completed by June 1, 2013.

Thanks
