Other Spill Type :

Equipment Failure

Accidents:

Sector: Industrial

Cause :

Reports ozone depletion substance from dehumidifying unit was lost when they had trouble with the blower which caused vibrations resulting in a leak. Machine failed on the Saturday and it was turned off at the time.

Response :

New blowers, bearings and shaft have been replaced. The original piping was replaced with stainless steel and copper.

Advised he received an update from [REDACTED] s.22 The leak was detected early due to a chemical leak detection device in the immediate area of the leak and will be repaired tomorrow (very small leak). There was no temperature loss in the rack refrigerant area that would lead to potential food spoil, therefore Health authority will not require notification.
