Gregg:

To the best of my knowledge they are still in production. I have no record of any changes to their established mode of operation. They do not work over the winter but leave a watchman on site.

Subject: RE: Anyox

I would suggest helicopter from Rupert via VIH. Otherwise I would suggest the boat out in the morning back in the afternoon - less weather dependent.
The boat we use is a really fast aluminum crew boat which is fully equiped, fast and very comfortable.

Brian Robin could arrange the boat and has told me that I could go along (subject to timing).

I am thinking of going into Anyox soon to provide the Director and some staff a better perspective on the site.

Can you recommend the best access to the site. Helicopter from Stewart or Terrace? Or other

Subject: FW: Anyox travel logistics

I spent some time on the phone this afternoon with s.22 as well as yesterday with Brian Robin. The below options for getting into Anyox are what Brian recommends and we can work these into our and Brian Clarke's schedules. The wildcard is the camp which Brian suggested he fly in a cook for us. I think we can cook on our own and we don't need the expense of a cook. I spent several weeks in an abandoned mining camp in s.22 and I'd prefer "roughing it" on our own (if you can call living in a fully stocked camp as roughing it). Not sure Brian Clarke was as keen for the camp idea so if the weather is fine we can fly out same day.

Let's discuss further on Monday and I can brief you on the remaining options and my preferences.

Note boat and truck and camp costs are free.

Geoff

Subject: RE: Anyox travel logistics

We can arrange the boat to be flexible on the 21st and 22nd.

Weather dependent Scenarios:

Scenario 1

- Fly in AC to Prince Rupert
- Take Helicopter from airport to site
- Arrive 11:00 ish.
- Leave latest 3:30 get back to Rupert at 4:30 ish

Scenario 2 – Weather dependent

- Fly in AC to Prince Rupert
- Message will be left relative to weather
- Take taxi to the airport ferry dock on Digby Island.
- Boat will pick you up at the airport ferry dock.
- Travel to Anyox arrive 12:30 -1:00
- Day light runs out at 6:00-6:30
- Stay at Camp (given the lack of definitive logistics it may be a but rustic but dry and warm, with hot water)
- Return to Rupert the following day.
- If the weather clears the helicopter could come over and take you out (approximately 1 hr each way).

Truck is available.

Geoff,
I just got an Invoice from VIH for a day helicopter visit from Rupert. Cost was in the order of \$4k.

We run a boat in and out of Anyox on Tuesdays and Fridays. We also have a truck at Anyox. The problem is you cannot get to the pit areas.

Give me a call and we can discuss your options.

Hi s.22

I work with Gregg Stewart and will be teeing up the Anyox trip shortly. Can you provide more details on the boat option you mentioned to Gregg? i.e., name, cost, who to contact, etc. The boat is out of Rupert right?

Also, you mentioned to Gregg a helicopter option out of Kitsault. Is that with VIH?

Thanks,
Geoff

Hi Mike -

Apparently this project is taking place on an old mine site of approximately 500 hectares. The proponent is interested in subdividing the land as it will only use around 20 hectares and it would remediate those 20 hectares.

Is this something that MoE would consider?

Subject: Anyox

Hello RJ. I thought I'd send you a note with a quick update on the Anyox file. As you may know a few of MAL's representatives are visiting the site on Tuesday the 21st and Wednesday the 24th. I think the group going is comprised of Brian Clarke, Greg Stewart and Geoff Sinnott. We think this a positive step and are appreciative of their efforts.

As we discussed one of our goals is to put forth a credible bid in the up coming BC Hydro RFP. The bid date is approaching quickly (Nov 25th), and we are hoping to get an indication / agreement on how we can go forward on the Anyox file. We have had general positive talks with the MAL group, however we need to move this to more concrete discussions on the options. s.22 and could come to Victoria during that time if you thought it would help move things along.

Thanks for your help on this RJ, and we hope to hear from you.
