**Re: Request for Access to Records
Freedom of Information and Protection of Privacy Act (FOIPPA)**

I am writing further to your request received by the BC Coroners Service. Your request is for:

Regarding the March 7, 2023 news release (2023PSSG0013-000275) on the 211 deaths in January 2023 from toxic drugs, and the Jan. 31, 2023 news release (2023PSSG0008-000109) on the 2,272 deaths from toxic drugs for the 2022 calendar year, I seek anonymized location data for each of the fatalities, specifically the name of the municipality and the first three characters of the postal code where each fatality occurred. Please send by machine readable spreadsheet. (Date Range for Record Search: From 1/1/2022 To 3/7/2023)

In order to provide you with a response in an Excel spreadsheet, the information that is required to be redacted under section 22 of FOIPPA (Disclosure harmful to personal privacy) has been noted as "Suppressed". A complete copy of FOIPPA is available online at:

BC Coroners Service (BCCS) has advised that they currently have a small number policy to limit any risk of re-identification of individuals. Release of counts for a given stratum depends on the number of deaths in the area at the given time. For small geographic areas, such as the municipality or first 3 characters of the postal code, the risk of re-identification can be high in areas where there are few deaths. BCCS relies on BC Vital Statistics for counts of all deaths by region. BC Vital Statistics publishes counts at the Community Health Service Area (CHSA) and Local Health Area (LHA) geographic level. Based on this, we would be unable to determine if counts at the municipality or first 3 characters of the postal code would meet our small number policy as these geographic regions do not match with BC Vital Statistics. Note that BCCS is unable to report by CHSA as their

current system does not record at that level. The lowest geographic area that BCCS can release for all of BC is at the LHA level. BCCS does release data for certain municipalities that have large populations.

Please see the link to our website below which contains a dashboard with the data that is releasable for illicit drug toxicity deaths:
