Date: Friday, March 23, 2018 4:55:37 PM

Hi Arif,

Heads up - Myron was asked to do a review via ASP, we talked this afternoon and I told him to respond via them and copy me.

Apparently James asked him to respond directly to MoE which he has now done (David Morel).

s.13

Let me know if you have any questions.

Thanks,

Matt

David,

My apologies for the delay getting back to you. As I'm sure you can appreciate, it's a tricky time of year with a lot of year-end reporting that is piling up.

With respect to the Pesticide Use In Aquaculture Scientific Review and the associated Interim Policy, I am currently reviewing both documents but will need a little more time to complete this work satisfactorily. s.13

s.13

s.13

I have spoken to both James Mack and Matt Austin (my Director) should you wish to follow up with them.

Best regards,
Myron

Thanks Myron –
To keep things timely, work directly with MOE on your comments and let me know if there are any problems

Hi James,

I reviewed the policy document yesterday and have some comments that I will try to get to you today.
With respect to the Scientific Review, I spent over an hour with the author (Oliver Krupke) last on the 14th and send him some key references. I haven't seen the document until now. If I don't get to it today, I will have a look at this evening.

Cheers,
Myron

Greetings,

As discussed on today's call I am circulating the most recent draft of the *Scientific Review of Pesticide Use in Aquaculture* for your review and feedback.

The draft was developed with input from Ministry of Agriculture Staff, our Regional Operations Branch Integrated Pest Management staff, and the aquaculture industry.

Thank you,

Graham Knox

Hi James,

This works for me. I will be working on the paper today and Wednesday and will commit to having this wrapped up by Thursday.

Cheers,
Myron

Myron,

Thanks for your advice on this. I spoke with ADM Morel today on the issue of whether the updated guidance started to get into DFO's mandate. We had a good discussion through this and I felt comfortable with their approach so think that part is okay.

They'll take more time on the scientific paper in order to incorporate your comments but would like to move quickly so whatever you can do on that would be great.

Let me know how that goes.
thanks

Subject: : Draft Pesticides in Aquaculture Documents

Hi James,

Please find attached a copy of the scientific review we conducted into pesticide use in aquaculture as well as our explanatory note (i.e. factsheet) for industry, First Nations, and stakeholders. They provide an overview of our new guidance for Statutory Decision Makers in their review of pesticide use applications for aquaculture (both still draft). Our staff have previously sought input and shared earlier versions of both the scientific review document and the policy document itself (vs. the explanatory note) with staff in your ministry.

Industry has requested copies of both of the documents. s.13

s.13

s.13

However, prior to posting the documents on the internet we wish to ensure there are no outstanding concerns from you and your staff. We look forward to receiving any additional feedback you and your staff may have on these documents and are available to discuss further as required.

Thank you,

David Morel
