Health Management Plan -

Veterinarian : s. 3

Identification - We will not house several animals at one time, we have indoor animal enclosures (5) that we can use to separate the animals into categories, we will have them microchipped or tagged somehow whichever our vet thinks is the best way.

Vaccination and treatment protocol - as per our Veterinarian

Mortality rate tracker - a log will be kept with microchip info/id tag info whichever our veterinarian says is best.

Isolation - any signs of illness, we have multiple rooms / areas of the barn we can transfer sick animals, to make sure there isn't any transfer to other animals until our veterinarian can come take a look.

Euthanasia - Our veterinarian will be taking care of all of that.
