Ref. 38166

File: 25000-25/ Tsetsaut Skii km Lax Ha

Chief Darlene Simpson/Skii km Lax Ha
Tsetsaut Skii km Lax Ha

s.22

Dear Chief Skii km Lax Ha:

I am writing to inform you that the Province has updated its Consultative Areas Database (CAD) to include the Tsetsaut Skii km Lax Ha's full asserted territory. The Province would like to take this opportunity to reiterate that the CAD is a repository for data that geographically depicts where a First Nation has established or is asserting treaty or Aboriginal rights and title, which informs government staff regarding where the duty to consult may be triggered. Inclusion or treatment of an asserted territory in CAD does not amount to recognition or determination of Aboriginal rights and title. CAD is one tool used by staff to identify which First Nation to consult.

In determining the appropriate approach to consultation, staff will be informed by assessments of the *prima facie* strength of any claims (SOC) of Aboriginal rights and title and seriousness of potential impacts of the proposed activity/project on those claimed or established rights. Such assessments may be revised during the consultation process as new information becomes available or if case law changes.

The Province's inclusion of any particular spatial boundary into CAD does not imply that the Province will share resource revenues or enter into agreements with the First Nation making the territorial assertion. The Province may consider a range of factors in determining when and how much revenues to share with First Nations, including strength of claims, nature of the entity asserting the claim, degree of impact of an activity, distance to project, and population of First Nation community.

Yours truly,

Linda Robertson
Manager, Skeena Region

Darlene Simpson

s.22

Dear Darlene Simpson:

On behalf of the Honourable Michael de Jong, Minister of Aboriginal Relations and Reconciliation, and the other addressees, I am pleased to respond to your letter of April 1, 2008, regarding your request to enter the new Skii km Lax Ha asserted traditional territory boundary map into the provincial Consultative Area Database (CAD). I have also been asked to respond for our minister to your letter of May 7, 2008, on the same subject.

This letter is to acknowledge receipt of the new Skii km Lax Ha asserted traditional territory boundary map and to inform you that the Province will incorporate the new map into the CAD.

The CAD, as an internal database, depicts the provincial government's interpretation of geographic areas where First Nations have requested they be consulted on Crown activities involving land and resources. It is one of the resources available to provincial government employees to help them determine the boundaries of First Nations' traditional territories. The CAD is not accessible to outside agencies, and I recommend that you continue to communicate with the local agencies in your area.

... /2

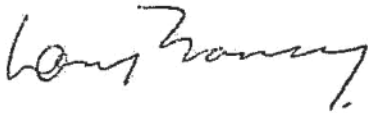

Darlene Simpson

-2-

Each statutory decision-maker will continue to be responsible for determining the appropriate level of consultation with the Skii km Lax Ha according to the circumstances of the decision in question.

Bobby Love, Strategic Issues Forester at the Integrated Land Management Bureau, will inform you when the CAD has been updated to include the Skii km Lax Ha asserted traditional boundary territory.

Yours truly,

Lorne Brownsey
Deputy Minister

March 24, 2010

Darlene and George Simpson
s.22

Dear Ms. and Mr. Simpson:

The purpose of this letter is to propose an approach for provincial agencies to consult with the *Wilp* Skii km Lax Ha for proposed projects and activities and provincial government decisions that may potentially affect areas historically used by Skii km Lax Ha at the time of contact and at 1846 when the Crown asserted sovereignty.

First I would like to summarize a number of key factors which have been considered in the development of the proposed approach. These include:

- The Province takes its duty to consult seriously.
- *Wilp* Skii Km Lax Ha was previously a member of, and represented by the Gitksan Chiefs Office.
- On May 20, 2003 a request was made by you, on behalf of the Skii km Lax Ha, for the province to consult with Skii km Lax Ha separately from the Gitksan Hereditary Chiefs and this request included the assertion of a territory much larger than the house boundary depicted by the Gitksan Hereditary Chiefs.
- Currently the Gitksan Chiefs Office does not represent the *wilp* Skii Km Lax Ha.
- Over the past approximately six years the Province has engaged with you to develop a better understanding of the claims you assert including where and how *wilp* Skii km Lax Ha are to be consulted.

The research and information exchange has revealed that there are differing views and conclusions that can be drawn from the ethno historic records. The Provinces views are:

- s.16

-

In conclusion, and for the purpose of finding a way to meaningfully consult with *wilp* Skii Km Lax Ha, it is proposed that the Province will consult directly with you on decisions and activities that may potentially affect aboriginal interests within the Awiiiii territory.
s.16

I trust that this letter has been clear and informative as to the provinces position regarding consultation with the Skii km Lax Ha. If you have any questions you can contact me at (250) 847-7535.

Yours truly,

Geoff Recknell
Manager, Skeena Region

s.16

Consultative Areas Database

The Province is reviewing how Tsetsaut Skii Km Lax Ha's territorial assertions are recorded and assessed in response to your concerns. For your information I provide a brief summary of what CAD is and how it is used within government.

Ministry of Aboriginal Relations
and Reconciliation

Mailing Address:
Box 9100 Stn Prov Govt
Victoria BC V8W 9B1

Website: www.gov.bc.ca/arr

The CAD is a repository for data that geographically depicts where the duty to consult may be triggered. Inclusion or treatment of a territory in CAD does not amount to recognition or determination of Aboriginal Rights and Title. CAD is one tool used by staff to identify which First Nations to consult. In determining the appropriate approach to that consultation, staff will be informed by assessments of the *prima facie* strength of claim (SOC) and potential impacts of the proposed activity/project. Such assessments may be revised during the consultation process as new information becomes available or if case law changes.

The Province's inclusion of any particular spatial boundary into CAD does not imply that the Province will share resource revenues or enter into agreements with the First Nation making an assertion of a particular territory. The Province may consider a range of factors in determining when and how much revenues to share with First Nations, including strength of claims, nature of the entity asserting the claim, degree of impact of an activity, distance to project, and population of First Nation community.

To assist our CAD review process we request that TSKLH:

- Provide Brad Cope the primary source materials you reference.
- Provide a spatial file to myself depicting your asserted territory. While I do have previous spatial files I want to be certain we are using the most current version.
- Advise the Province whether TSKLH has discussed this territorial assertion with neighboring First Nations.
- Confirm if you would like your asserted territory to be publicly available (for example at the request of proponents).

Our next steps in the review process include:

- Reviewing the primary source materials and concerns raised at the December 29th meeting.
- Sharing our assessment and perspective with Tsetsaut Skii km Lax Ha on this new material including implications for previous Provincial reports and assessments.
- This updated information will inform our CAD review and update process including sharing information with Provincial staff.

I will be your primary point of contact through this process, and will continue to work with our provincial colleagues to ensure awareness and consistency within Provincial agencies.

Linda, draft for your review. As you'll see below I'm well past three sentences. I feel there is value in more detail but will defer to your judgement.

Marc, some context re: Tsetsaut Skii Km Lax Ha:

- CAD review process for Skii Km Lax Ha's territorial assertions (named changed to Tsetsaut Skii Km Lax Ha/TSKLH at their request in 2014) has been underway for last 9 months following discussion initiated during the Brucejack EA process with updates and input from Skeena Cross Agency Aboriginal Relations Team and legal and policy advisors.
- The Province of BC has a decade long history with TSKLH at that includes detailed ethnohistoric research, communication and exchange of information and consideration of inclusion of their territorial assertions in CAD.
- The recent addition of TSKLH's boundary to CAD was made with the aim of consistency of treatment of assertions within CAD and not with a change to BC's assessment of *prima facie* strength of claim (SOC) or change in understanding on TSKLHs relationship to the Gitksan nation.
- We have communicated to TSKLH the following message during the CAD update process:
 - "The CAD is a repository for data that geographically depicts where the duty to consult may be triggered. Inclusion or treatment of a territory in CAD does not amount to recognition or determination of Aboriginal Rights and Title. CAD is one tool used by staff to identify which First Nations to consult. In determining the appropriate approach to that consultation, staff will be informed by assessments of the *prima facie* strength of claim (SOC) and potential impacts of the proposed activity/project. Such assessments may be revised during the consultation process as new information becomes available or if case law changes. "
 - "The Province's inclusion of any particular spatial boundary into CAD does not imply that the Province will share resource revenues or enter into agreements with the First Nation making an assertion of a particular territory. The Province may consider a range of factors in determining when and how much revenues to share with First Nations, including strength of claims, nature of the entity asserting the claim, degree of impact of an activity, distance to project, and population of First Nation community."

Darlene Simpson
Skii km Lax Ha

s.22

Dear Darlene Simpson:

On behalf of the Honourable Michael de Jong, Minister of Aboriginal Relations and Reconciliation, and the other addressees, I am pleased to respond to your letter of April 1, 2008, regarding your request to enter the new Skii km Lax Ha asserted traditional territory boundary map into the provincial Consultative Area Database (CAD). I have also been asked to respond for our minister to your letter of May 7, 2008, on the same subject.

This letter is to acknowledge receipt of the new Skii km Lax Ha asserted traditional territory boundary map and to inform you that the Province will incorporate the new map into the CAD.

The CAD, as an internal database, depicts the provincial government's interpretation of geographic areas where First Nations have requested they be consulted on Crown activities involving land and resources. It is one of the resources available to provincial government employees to help them determine the boundaries of First Nations' traditional territories. The CAD is not accessible to outside agencies, and I recommend that you continue to communicate with the local agencies in your area.

Great, thanks Bobby.

We have tried to convert everywhere possible in CAD to just saying 'Chief and Council' instead of identifying a specific person as the contact. This reduces maintenance. Do you think that's acceptable in this case?

We would still include Darlene's email address and contact information.

Sent: Tuesday, June 26, 2012 9:01 AM
To: Westlake, Doug NRTS:EX
Subject: RE: Skii km Lax Ha Boundary Change - Notification

Doug, any correspondence on the CAD SharePoint site in this document library s.15
s.15 relates to the last boundary change. So that
Skii km Lax Ha correspondence from 2010 has been implemented.

Note the dated subfolders contain the CAD boundary that was retired on that date. For example
'Retired Boundary 20100714' is the Skii km Lax Ha boundary that was retired on that date and
replaced by the current Skii km Lax Ha CAD boundary.

The recent request is a separate action. Robin as the regional PUG representative should
inform us when local consultation is completed so we can carry out the HQ review and provide
me the new shape file to implement in CAD.

Hi Heath.

Re the SKLH boundary change(item 2 in Aaron's June 18 email) I did fwd to him your comment
earlier this week that you were waiting for the okay from him and Robin. However, I found
this (below) in the CAD folder. Did you complete your July 2010 action to put implement a
revised boundary (is this the okay from Aaron/Robin that you referred to?).

Or is this recent request a separate action to remove the boundary?

Doug

SKLH is a unique story and a bit of background will be helpful.

s.13,s.14,s.16

This leads us to today and the final step which is to get these changes reflected in CAD and the consultation advice updated. In short, the process has been different given the complexity of this file but we have met all the requirements for a boundary update.

Thanks for your help with this.

To: Love, Bobby FLNR:EX
Subject: RE: Skii km Lax Ha

Bobby, no they cannot access or see the CAD boundaries.

They can get into the BCeID version of iMapBC and launch the CAD theme but they will not be able to see the CAD layer as it is restricted to IDIR user's access only. They would be able to see the SOI layer but for consultation purposes that is not as useful as CAD.

Heath:

I understand through discussion with Heather that access to the CAD is internal to government. Based on 10 your note can stakeholders (e.g. mineral development companies) access information on FN claimed boundaries through imap? Thanks for your speed in getting this done.

To: Moon, Heather ABR:EX
Cc: Love, Bobby ILMB:EX; Ricketts, Glenn ABR:EX; Dorrian, Brian J AG:EX; Lewis, Stu ABR:EX
Subject: CAD: Skii km Lax Ha

Heather, the Skii km Lax Ha boundary has now been implemented in the CAD database, LRDW layer, and key map. The metadata is also loaded to the CAD SharePoint site and linked to the boundary.

The CAD layer file and business theme will need to be updated so the boundary name will show up in the iMapBC legend. This can take over a month to be migrated through ILMB infrastructure environment. But this should not be an

impediment to staff accessing the new boundary through most normal workflows. Although the boundary name will not be shown in the iMapBC legend the boundary will be visible and it will show up in any queries.

I will inform you when the layer file and business theme are updated.
