Notes added for clarity:

Assessment Business Day Column: Represents the number of business days between when an application is received by the Registry and when it is assessed (e.g., applications assessed on October 1, 2021 were received by the Registry on September 10, 2021, 16 business days earlier). If the submitted application is complete and the Registry is able to verify information (e.g., reference checks), a decision regarding the application is made the day it is assessed. If the submitted application is incomplete, applicants would receive written notification of the outstanding documentation that same day.

Data Entry Business Day Column: Represents the number of business days between when an application is received by the Registry and when it is data entered and placed in the assessment queue (e.g., applications data entered on October 1, 2021 were received by the Registry on September 17, 2021; 11 business days earlier).

Business Day Span: Represents the number of business days between when an application is data entered and when it is assessed.
