Proof of health status: a global concern

European Union

Implementing a verifiable Digital Green Certificate by summer 2021 to serve as proof of vaccination, testing or recent recovery

United Kingdom

Piloting the use of COVID-19 health status certificates (vaccination, test status or recent recovery)

United States

Developing standards for COVID-19 health credentials.

New York State has implemented a proof of COVID-19 health status for domestic use cases

Drivers for acceleration

Border crossings

Provide domestic and international border authorities proof of vaccination or test results prior to arriving at border control, or at the border control location

Air travel

Share proof of vaccination or test results during the process of purchasing tickets, check-in, obtaining a boarding pass, or boarding for domestic and international travel

Continuity of care

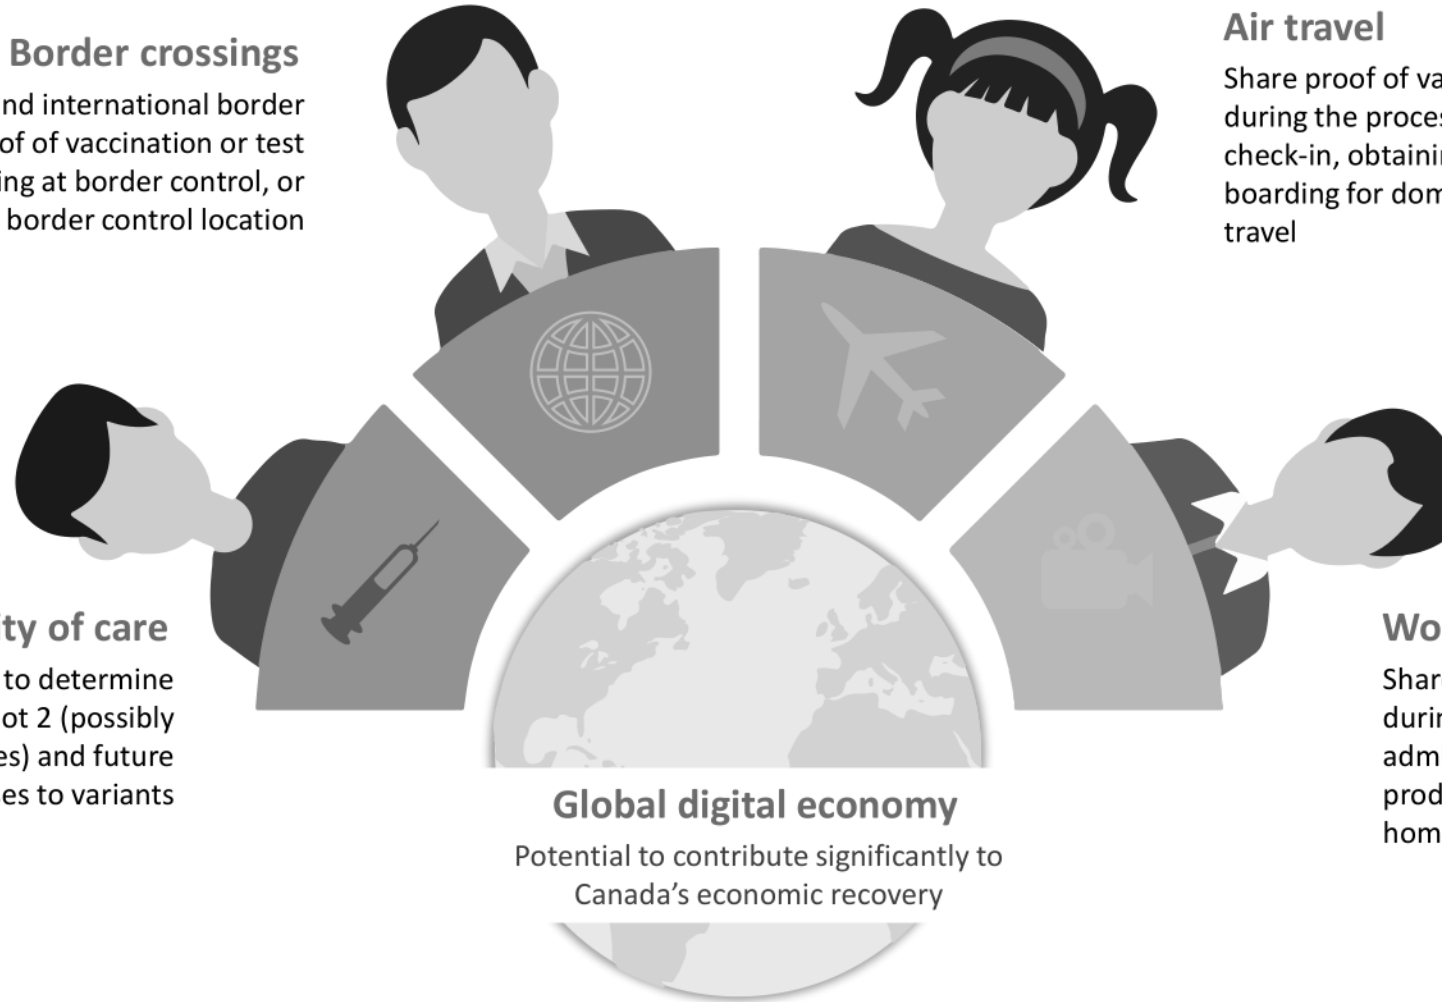

Share immunization records to determine eligibility for shot 1, shot 2 (possibly from different provinces) and future responses to variants

Global digital economy

Potential to contribute significantly to Canada's economic recovery

Workplaces or facilities

Share proof of vaccination or test result during scheduling a visit or on arrival to gain admittance to places such as film production, work camps or long-term care homes

Digital Proofs of COVID-19 Health Status

BACKGROUND

Countries around the world have implemented, announced or are studying the use of verifiable proofs of COVID-19 health status to support a return to normal day-to-day activities. Canada and BC have not yet established public policy in this area.

European Union

Implementing a verifiable Digital Green Certificate by summer 2021 to serve as proof of vaccination, testing or recent recovery to facilitate travel across member states.

United Kingdom

Piloting the use of COVID-19 health status certificates (vaccination, test status or recent recovery) for international travel and domestic uses cases like sports and music events.

United States

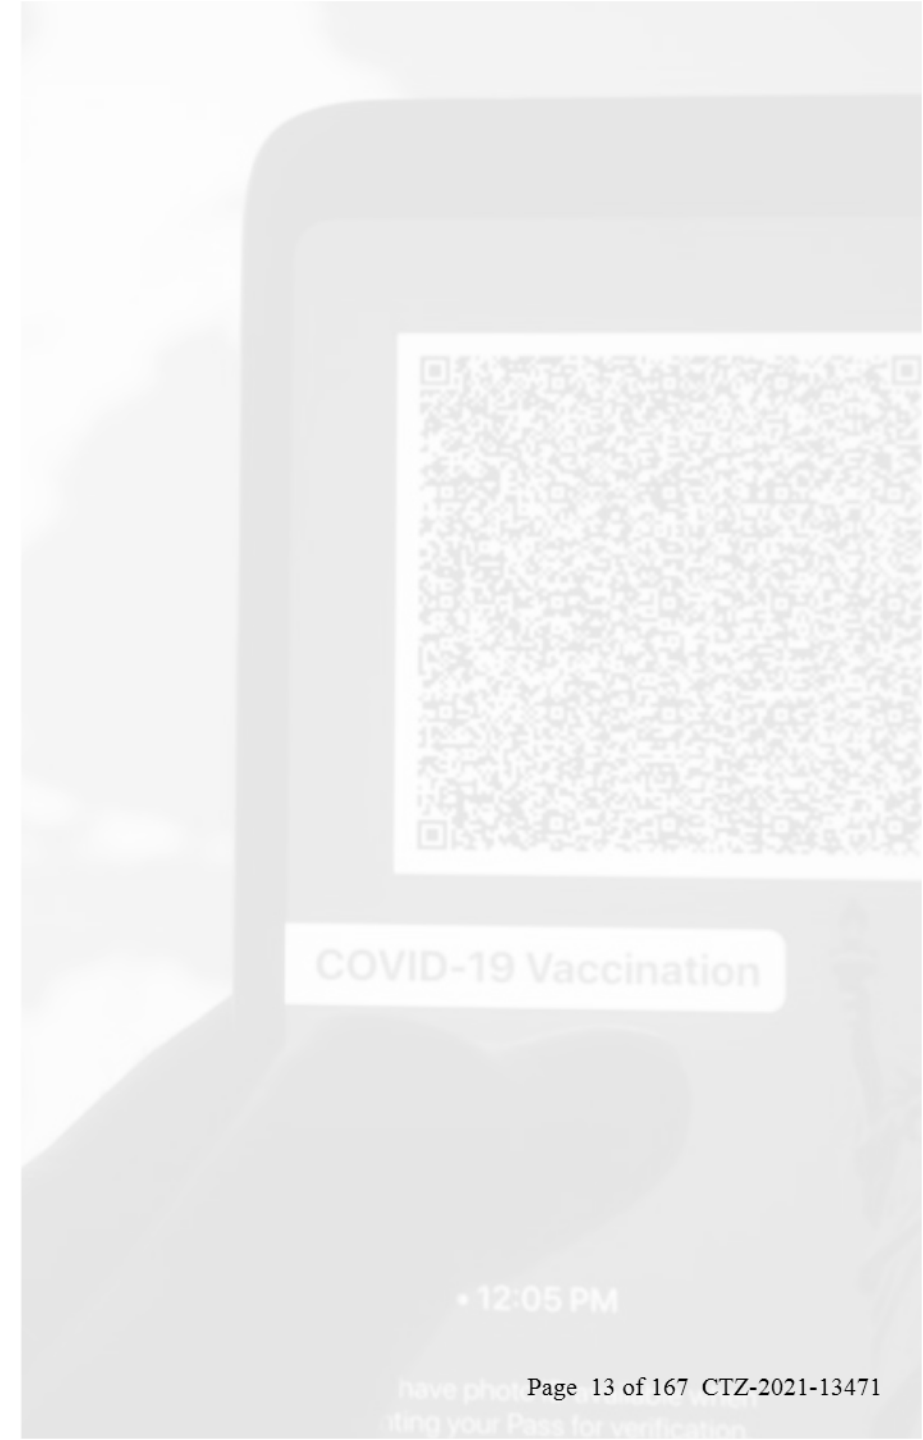

U.S. government is developing standards for COVID-19 health credentials. State of New York has already implemented a proof of COVID-19 health status for domestic use cases (e.g. sports and music events).

CHALLENGE

Currently, British Columbians are issued a paper receipt with vaccination details once they have been vaccinated.

These paper receipts can easily be forged. Around the world, false and stolen vaccine certificates and negative test results are already available for purchase by people who wish to avoid restrictions or quarantine requirements.

Verifiable proofs of COVID-19 health status are widely seen to prevent this issue.

TECHNICAL READINESS

The Province, through its Digital Trust Program and Health Gateway, is well positioned to respond to a potential need for verifiable proofs of COVID-19 health status if Government determines it is required.

In anticipation of this potential need, HLTH and CITZ are working with Canada, Ontario, Quebec and Nova Scotia to align on a shared technical approach and build the technical readiness to issue verifiable proofs of COVID-19 health status.

Overview of how people could obtain a digital or paper proof of COVID-19 vaccination for Outbound Air Travel.

1

Get vaccinated

- Person arrives at vaccination site.
- Healthcare worker verifies identity.
- Healthcare worker administers vaccine.
- Healthcare worker records vaccination.

2

Print or Download

- Person logs into BC Health Gateway.
- Person requests proof of vaccination.
- QR Code is generated.
- Person saves QR code to mobile wallet or prints it.

3

Share health status

- Person checks in for flight (online or F2F)
- Airline requests proof of vaccination.
- Person shows printed proof with ID or shares using mobile wallet.
- Airline verifies the proof of vaccination.

Discussion

BRIEFING NOTE

Proof of COVID-19 Health Status Technical Readiness Briefing

April 30, 2021

Briefing Note

What:

Verifiable proofs of vaccination

Who:

- The Honourable Lisa Beare, Minister of Citizens' Services
- Shauna Brouwer, Deputy Minister of Citizens' Services
- Premier's Office (TBD)

Executive Summary:

The Province is well positioned to implement proofs of COVID-19 health status, such as vaccination status or negative test results.

Background:

Countries around the world widely view COVID-19 vaccination as a key element in preventing disease spread and reopening the global economy. Accordingly, several jurisdictions have either implemented or announced the use of proofs of COVID-19 health status, to support a return to day-to-day activities. Examples include:

- The EU is implementing a 'Digital Green Certificate' to serve as proof of vaccination, testing or recent recovery to facilitate travel between member states.
- The UK is piloting COVID-19 health status certificates for inbound and outbound international travel and certain domestic use cases, such as sports and music events.
- The US is developing standards for COVID-19 health credentials and the State of New York State has implemented a proof of COVID-19 health status for domestic use cases like sports and music events.

Today, British Columbians are provided with a paper receipt when they get vaccinated. These paper receipts are easy to falsify and difficult for authorities like border agencies to verify. To avoid these issues, many jurisdictions are implementing *verifiable* proofs of COVID-19 health status to minimize fraud.

BRIEFING NOTE

Proof of COVID-19 Health Status Technical Readiness Briefing

April 30, 2021

Canada and British Columbia have not yet established public health policy direction in this area.

s.13; s.16

s.13; s.16

Despite continued discussions regarding the health policy challenges, British Columbians may require government-issued proofs of COVID-19 health status to support use cases like inter-provincial and international travel.

The Ministry of Citizens' Services has been leading international and Pan-Canadian efforts to build technical platforms that can issues these types of verifiable proofs and credentials since 2016.

s.13; s.16
s.13; s.16

s.13; s.16

If

implemented, British Columbians will be able to use their BC Services Card to log into the Health Gateway¹ and either print or save a proof of COVID-19 health status to their smartphones.

Recommendations:

Ministries of Health and Citizens' Services continue building the technical readiness to implement proofs of COVID-19 Health Status in case Government determines these will be required.

¹ The [Health Gateway](#) is a Ministry of Health initiative which provides British Columbians with secure online access to health data like prescriptions, immunization records, health visits and COVID-19 test results.

BRIEFING NOTE

Proof of COVID-19 Health Status Technical Readiness Briefing April 30, 2021

Briefing Note

What:

Briefing on the technical readiness work underway to issue verifiable proofs of vaccination or negative test results to British Columbians if required.

INFORMATION NOTE

Advice to Minister Beare

Date: February 22, 2021

CLIFF#: 114706

ISSUE: Ministry of Citizens' Services (CITZ) support to Ministry of Health (HLTH) Immunization Rollout

BACKGROUND:

The Province of British Columbia has been in a state of emergency since March 18, 2020, in response to the global COVID-19 pandemic. An essential part of B.C.'s response is to make COVID-19 vaccinations available, free of charge, to everyone living in B.C.

Two COVID-19 vaccines, Pfizer and Moderna, will be used in B.C. Both have been approved for use by Health Canada after a rigorous scientific review of the available medical evidence. Both vaccines require two doses of vaccine per person.

Based on expert advice and guidance from the National Advisory Committee on Immunization (NACI), B.C.'s COVID-19 Immunization Plan will roll out with four phases.

- **Phase 1 and Phase 2: High-risk population immunization.** Vaccination for those most vulnerable to severe illness will be vaccinated first from December 2020 to March 2021.
- **Phase 3 and Phase 4: General population immunization.** Vaccination for the general population runs April to September 2021. Vaccines will primarily be distributed in five-year age cohorts, starting with the 79 to 75 age group.

Getting immunized happens in steps:

- **Register:** people will be invited to register their intent to be vaccinated online or by phone.
- **Make an appointment:** people will be able to select a location, date and time for their first dose. This can be done online or by phone.
- **Receive first dose:** on the appointment day people will attend the vaccination site and receive their first dose.
- **Receive second dose:** after receiving their first dose, people will be notified when they are eligible to book an appointment for their second dose. Again, booking will occur online or by phone and people will be asked to attend the selected vaccination site at the appropriate time.

In late January 2021, HLTH requested support from Service BC (SBC) in providing contact centre, front counter and identity solutions to support B.C.'s immunization rollout. Initially, SBC support was asked to focus on Phase 3 and 4 roll out. On February 23, SBC was asked to consider expansion of project scope to include Phase 2 roll out (pending decision by Cabinet). Phase two includes seniors aged 80 and over who are not immunized in Phase 1 and Indigenous (First Nations, Métis, and Inuit) seniors age 65 and over, Elders and additional Indigenous communities not immunized in Phase 1. Readiness issues with the Health online booking system has since surfaced a critical concern that this option will result in a possible three week vaccination delay to this Phase two high risk group. HLTH has indicated that other models (outside of SBC response) are now being explored that will mitigate the vaccination delay.

To support the original HLTH request, CITZ quickly mobilized staff from across the ministry to work in five major workstreams: governance and communications; contact centre; service delivery (in-person support); identity solutions; and privacy (see Appendix A). CITZ has worked in close collaboration with HLTH to ensure that the citizen journey is integrated, smooth and consistent; one province, one response.

SBC remains on track to provide telephone and online registration support to HLTH commencing March 8, 2021 with immunization booking starting on March 23, 2021 for phase three and four.

NEXT STEPS:

CITZ will continue to work with HLTH to ensure a successful launch of the registration system on March 8, and the subsequent launch of the online booking system. CITZ will monitor volumes and capacity to determine if additional staffing measures or infrastructure improvements are required to support B.C. residents during this unprecedented time.

Attachment(s): Appendix A – CITZ's Detailed Response
Contact: Bev Dicks, ADM Service BC Tel.: (250) 818-4674
Sophia Howse, Tel.: (250) 213-7855

APPENDIX A - CITZ's DETAILED RESPONSE

Governance and Communications

- Joint governance tables have been established at the ADM and working levels, ensuring key issues and questions are quickly escalated and resolved.
- There is active collaboration with GCPE (HQ and HLTH), GDX, HLTH and SBC communication leads to ensure people will receive the same message, whichever channel they choose.
- Post-launch monitoring, data analysis and reporting processes being developed.
- MoU between SBC and HLTH is being developed.

Contact Centres

- The existing 1-888-COVID19 will be the primary point of contact for telephone enquiries.
- People will be able to register and book appointments by phone, for both themselves and on behalf of others.
- Enquiries will be routed to Maximus, the existing provider of contact centre services for 1-888-COVID19, and TELUS, the existing provider for some COVID-19 Health Authority contact centres.
- The infrastructure and staff model will increase to support the expected high volume demand as the vaccination program rolls-out. Maximus and TELUS have provided estimates for additional staff and have started to recruit and train for the start of registration. Maximus is projecting an additional 90 staff by March 1, 150 by March 15 and another 100 by end of April. TELUS is targeting 125 by the end of March.

Service Delivery in Service BC Offices

- Staff in the SBC Offices will be able to assist people to register for Vaccination and book their specific immunization appt.
- It is expected that the mobile BC Services Card will be an option for people logging in to register, book and access digital immunization records. SBC is, therefore, expecting an increase in the volume of "Send Video" transactions that will allow people to activate a mobile card.

Identity Solutions

- Health has developed an online booking system called Salesforce. This program is the underlying system that will be used to support registrations and bookings, both on line and by the contact center. The mobile BC Services Card is being integrated with Salesforce to provide people the option of using a mobile card to authenticate. This will provide a high degree of confidence that the person is who they say they are and will reduce the amount of information that has to be manually entered at time of immunization appt.
- Other opportunities to support the on-site vaccination process are being explored, including scanning the barcode on the back of a physical BC Services Card, allowing identity to be confirmed.

Privacy

- The CITZ privacy team is working closely with HLTH to ensure that Privacy Impact Assessments are complete and the Office of the Information and Privacy Commissioner is briefed before program launch

 Sophia Howse, Tel.: 250 213-7855

Proof of COVID-19 Health Status

June 3, 2021

Ministry of
Citizens' Services

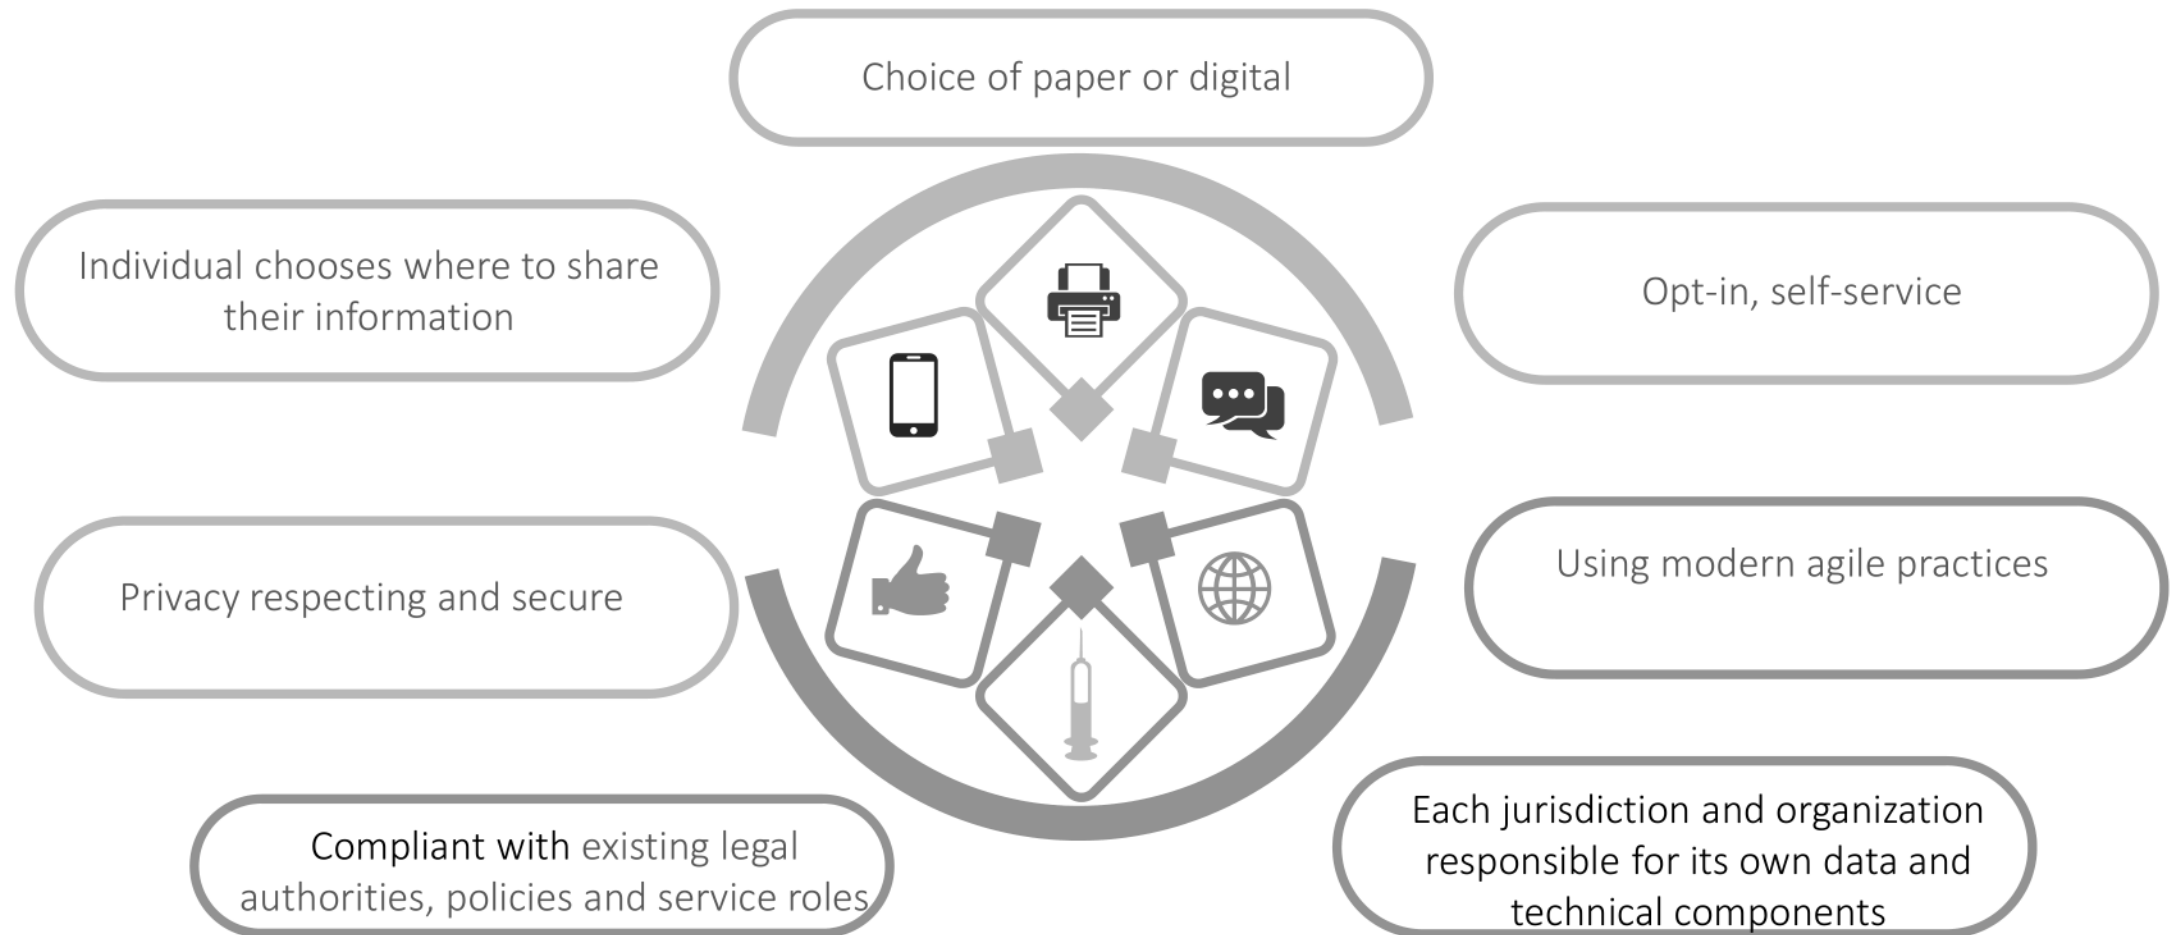

Proof of health status may be required to support international travel.

If this is required, Canadian governments will need to provide people with proofs of COVID-19 health status.

The federal government along with other provinces and territories are exploring a pan-Canadian technical solution for proof-of-COVID-19-health status.

B.C. is well positioned to enable British Columbians with proof of COVID-19 health status if required.

Subject: Vaccine Passports
Attachments: s.12

Hi all,

I've attached a final background paper and a draft ppt for your review and consideration. The material has been updated s.12; s.13 to clarify a few areas.

s.12

We would welcome comments, questions and feedback in advance of our meeting Thursday. Final material will go in end of week.

We can discuss Thursday, but would also good to have your respective Ministers queued up to comment on a few areas as needed, including:

s.12; s.13

I also have time with Richard tomorrow to check in and walk him through our deliberations to date.

Many thanks,
Silas

ADVICE TO MINISTER

<p>CONFIDENTIAL ISSUES NOTE</p> <p>Ministry: Citizens' Services Date: May 28, 2021 Minister Responsible: Lisa Beare</p>	<p>Vaccine passports/credentials</p>
--	---

ADVICE AND RECOMMENDED RESPONSE:

Problem:

- As countries around the world get closer to restarting day-to-day activities, some are requiring digital or paper proof of COVID-19 health status.
- We are working with the federal government and other provinces to ensure that people can travel internationally knowing their privacy is protected.

Solution:

- We are exploring a solution with the federal government and other provinces and territories for a pan-Canadian proof-of-COVID-19-health status, with the federal government as the lead.
- We are looking at a prototype that lets people control when to supply their COVID-19 health status to a third party, while also meeting certification needs for travel abroad.
- The prototype maintains provincial and territorial jurisdiction over health information and is expected to be flexible to adapt to future needs.
- Technical details are still being designed to ensure alignment across jurisdictions and policy is still being developed.
- B.C. is leader on trusted identification credentials in Canada and we will ensure that any approach will be built in a way that protects British Columbian's privacy.

Benefit:

- We are making sure that B.C. is prepared, and that British Columbians can travel with the knowledge that their privacy is protected.

If asked what steps the province has already taken:

- **On May 25, B.C.'s Government Chief Information Officer briefed B.C.'s Privacy Commissioner on the proof-of-vaccination work currently being explored.**
- **The briefing emphasized work being done collaboratively by all provinces and the federal government for a single, pan-Canadian vaccine passport approach from all provinces and territories with the federal government as the lead.**
- **It also included the privacy principles considered for any proposed technical solutions.**
- **We will continue to brief B.C.'s privacy commissioner and seek advice as a solution is developed through pan-Canadian discussions.**

If asked policy on private companies being able to require vaccination passports to attend big events and domestic vaccine passports:

- **We know this is on people's minds and we are in the early days of exploring a privacy-protective approach that supports British Columbians to travel overseas in the event that it's needed.**
- **While there are some signals that a proof of COVID-19 vaccine may be required to travel internationally, B.C. is not currently considering this for public services and events.**
- **We understand there are questions about companies requesting vaccine status from individuals in other jurisdictions – New York, for instance, requires vaccination proof to attend a New York Knicks game.**
- **B.C. is not exploring a similar approach and will be guided by the public health orders of Dr. Henry and the advice of our Information and Privacy Commissioner.**
- **We will continue to brief B.C.'s privacy commissioner and seek feedback from his office on any solutions proposed.**

ADVICE TO MINISTER

KEY FACTS:

Federal, territorial and privacy commissioners have warned that vaccine passports carry a significant privacy risk and should only be used when necessary to prevent the spread of COVID-19.

On May 27, 2021, Premier Horgan said in the media that he supports the idea of vaccine passports for international travel, but that British Columbians will not have to show proof of vaccination to attend a local concert or sporting event.

On May 25, 2021, Dr. Bonnie Henry said that the pandemic has shown us and exacerbated inequities in our society. She suggested that a while a vaccine passport will be necessary for international travel, requiring one for services or public access in B.C. would further exacerbate these inequities and advised against their use for public services. B.C. Ombudsperson Jay Chalke echoed this sentiment on May 27, 2021.

On May 18, 2021, during Ministry of Citizens' Services Estimates, a member asked if a vaccine passport was being worked on in B.C. and what form it would take. This question was echoed in a media request from a member of the press gallery the following day.

England has issued a vaccine passport for travel, the European Union is requiring proof of vaccination for travel there and the University of Washington is requiring proof of vaccination to attend classes in the fall, unless students can claim medical, religious or philosophical exemption.

B.C.'s privacy commissioner is concerned about the prospect that vaccine passports could force people to disclose personal health information about their vaccine or immunity status in exchange for access to goods and services, for example, restaurants, sporting events and air travel. He's also concerned vaccine passports could be used to track people's movements. Ministry staff met with the commissioner May 25, 2021, to brief him and discuss the issue. The commissioner is expected to speak on the panel at the upcoming national Identity North Annual Summit on June 3. The topic of vaccine passport is expected to be explored.

The mandate for international travel is within federal jurisdiction, and the federal government has consulted and is working with provinces and territories on this topic.

On May 26, 2021, the Public Health Agency of Canada convened a meeting for a "Focused Discussion on Proof of Vaccination Credentials for International Travel". B.C.'s representatives were B.C.'s Government Chief Information Officer and the Ministry of Health's Chief Information Officer.

Prototype solution:

The Public Service Chief Information Officer (CIO) Council, under its mandate on digital identity, has established a prototype for a Pan-Canadian proof of health status solution.

The approach addresses the need for a solution that meets both the needs of the Government of Canada and its requirements in certifying Canadians travelling abroad as well as provincial and territorial needs to restart their respective economies. It maintains the provinces' and territories' jurisdiction over health information while also enabling the Government of Canada to do its job at the border.

The solution was developed in a way that ensures citizens control their data – they decide when to supply their COVID-19 health status to a third party. And the solution was built using privacy by design principles of minimum shared data – it provides an authority with proof a person was vaccinated or recently tested rather than also providing detailed information on the person and their health record.

Given international travel requirements and the need for economic restarts in cities and towns across the country, and the fact Canadians will be travelling from province to province in the coming months, it is critical that any solution be pan-Canadian, satisfying federal, provincial and territorial requirements. Finally, a critical component of the current approach is flexibility to adapt to future needs, whether that is related to showing proof of booster shots, COVID-19 tests or other use cases.

There are still technical details that need to be designed to ensure alignment across jurisdictions, involving information systems affecting and within health services, service delivery and digital domains. Although work on the technical solution has occurred, the policy work has not yet been addressed.

Media Interest: High – Members of the press gallery have already made inquiries. More interest is expected if jurisdictions around the world start requiring a vaccine passport to travel internationally.

ADVICE TO MINISTER

CONFIDENTIAL ISSUES NOTE Ministry: Citizens' Services Date: May 31, 2021 Minister Responsible: Lisa Beare	Vaccine passports/credentials
---	--------------------------------------

ADVICE AND RECOMMENDED RESPONSE:

Problem:

- As countries around the world get closer to restarting day-to-day activities, some are requiring digital or paper proof of COVID-19 health status.

Solution:

- We are working with the federal government and other provinces and territories on what a vaccine passport will look like for Canadians.
- We are taking a pan-Canadian approach with privacy at the core.

Benefit:

- We are making sure that B.C. is prepared, and that citizens will be able to travel with the knowledge that their privacy is protected.

Secondary messaging:

- We are exploring a solution with the federal government and other provinces and territories for a pan-Canadian proof-of-COVID-19-health status, with the federal government as the lead.
- We are looking at a prototype that lets people control when to supply their COVID-19 health status to a third party, while also meeting certification needs for travel abroad.
- The prototype maintains provincial and territorial jurisdiction over health information and is expected to be flexible to future needs.
- This work is underway.
- B.C. is leader on trusted identification credentials in Canada and we will ensure that any approach will be built in a way that protects British Columbian's privacy.

If asked what steps the province has already taken:

- **On May 25, B.C.'s Government Chief Information Officer briefed B.C.'s Privacy Commissioner on the proof-of-vaccination work currently being explored.**
- **The briefing emphasized work being done collaboratively by all provinces and the federal government for a single, pan-Canadian vaccine passport approach from all provinces and territories with the federal government as the lead.**
- **It also included the privacy principles considered for any proposed technical solutions.**
- **We will continue to brief B.C.'s privacy commissioner and seek advice as a solution is developed through pan-Canadian discussions.**

If asked policy on private companies being able to require vaccination passports to attend big events and domestic vaccine passports:

- **We know this is on people's minds and we are in the early days of exploring a privacy-protective approach that supports British Columbians to travel overseas in the event that it's needed.**

ADVICE TO MINISTER

<p>CONFIDENTIAL ISSUES NOTE</p> <p>Ministry: Citizens' Services Date: March 9, 2021 Minister Responsible: Lisa Beare</p>	<p>CITZ support for BC's Vaccination Plan</p>
---	--

ADVICE AND RECOMMENDED RESPONSE:

- We understand this is a difficult time for many people.
- Our ministry is proud to support the Ministry of Health in the delivery of phases 3 and 4 of its COVID-19 vaccination plan.
- We are committed to supporting everyone going through those phases of the vaccination program and making sure it runs as smoothly as possible.
- The provincial contact centre will support the telephone line using call centre provider MAXIMUS so people just need to call one number.
- We are increasing the number of call centre agents in anticipation of high call volumes for phases 3 and 4.
- The Ministry of Health is also launching an online booking system, which is expected to significantly reduce call volumes.
- My ministry is increasing government's technological infrastructure to support online registration and booking.
- And again, the Ministry of Health is encouraging people to only register for their vaccinations when they're eligible to do so.

If asked how registration and booking will work:

- By April, people will be able to register online or by calling the Contact Centre (1-888-COVID19) up to four weeks before they are eligible to book their appointment.
- Once registered, they will receive an email, text or phone call (if they don't have email or text) to let them know that they can book their

appointment for their first dose.

- **When eligible, people can book their appointment online or by phone.**
- **A reminder will be sent by email or text when the appointment is coming up.**

KEY FACTS:

The Ministry of Citizens' Services (CITZ) is supporting the Ministry of Health to provide vaccination registration and booking online and through the provincial contact centre for phases 3 and 4 of the vaccination plan.

The provincial contact centre will be supporting the telephone line and has increased the number of agents in anticipation of high call volumes for phases 3 and 4. To achieve this, CITZ has added additional capacity to the existing contact centre contract with MAXIMUS.

The Ministry of Health is currently developing the online booking system. It is expected to be ready by the end of March. CITZ has a team convened to help ensure all interdependencies between systems are mapped and tested to ensure the stability of the online system. These tests will confirm that the increased information management/information technology (IM/IT) infrastructure already in place will handle the anticipated potential two million hit volumes. People will be encouraged via messaging to register and book online first before calling.

Service BC has also increased technical capacity to support increased volume of mobile BC Services card activations.

Vaccine strategy

Vaccinations for COVID-19 are underway in BC and the Immunization Plan contains four phases. The focus in phases 1 and 2 is to protect those most vulnerable to severe illness. This is happening from now until the end of March. After phase 1 and 2, immunization begins in the general population in phases 3 and 4.

Vaccines will primarily be distributed by age, starting with the oldest. People with certain underlying conditions will also be included.
