

All applications under the Dormant Sites Reclamation Program Increment 2 were evaluated at a well site and work activity level based on the criteria posted on the program website at: <https://www2.gov.bc.ca/gov/content/industry/natural-gas-oil/responsible-oil-gas-development/dormant-sites-reclamation-program/funding-increments>

Each application, and work activity listed within that application, was treated using a standard evaluation process. Applications were evaluated and scored based on the following listed criteria with weighting applied to priorities of Indigenous participation, well locations in relation to Indigenous land/cultural areas and wells with higher environmental risk factors such as older wells and nearness (50 m) to streams.
