Attachments: Incomappleux_summary_agencyreview.docx
Good morning,

The Ministry of Environment and Climate Change Strategy is preparing OICs respecting the proposed protection of a portion of the Incomappleux Valley as a Conservancy under the *Park Act*, with a resource road corridor proposed to be protected as a Protected Area under the *Environment and Land Use Act*.

I am writing to give your ministry an opportunity to review and comment on our proposal. We would appreciate comments back to us by end of day, **Friday October 28th, 2022** to enable us to move forward with materials in preparation for cabinet committee meetings. Please let me know ASAP if you have concerns with this timeline.

Comments, questions and requests for additional information should be directed to Jennifer Eliason (Jennifer.Eliason@gov.bc.ca).

REVIEW MATERIALS:

Project Summary:

To assist with your review I have attached a project summary which details the background, consultation and other relevant details.

Spatial Information:

We also have a shapefile available for the proposed Conservancy. The shapefile can be loaded in iMap, ArcDesktop or Google Earth Pro to visualize spatially the proposed approximate area. The shapefile can be found at this link (link expires Oct 26th). Any questions or clarification on the spatial files can be directed to Glenna Erlandson (glenna.erlandson@gov.bc.ca). : <https://www.env.gov.bc.ca/perl/soft/dl.pl/20221012100515-14-gp-0e3c3024-018f-478e-bb43-b529bc67?simple=y>

MINISTRY CONTACTS

Please let me know as soon as possible if you are not the correct person to receive this request:

- AFF – Arlene Anderson
- FLNROD – John Whitworth
- EMLI – Lindi Anderson
- MIRR – Frank Costa
- MUNI – Lynne Tang
- TRAN – TBC
- TOURISM- Jason Gabitous

Thank you,

Jennifer Eliason
Senior Parks and Protected Areas Planner
BC Parks, Recreation Sites and Trails Division
Ministry of Environment and Climate Change Strategy
Phone: 778-974-4354
Email: Jennifer.Eliason@gov.bc.ca

Purpose of OICs: Protection of approximately 58,000 hectares (ha) of Crown land as the **Incomappleux Conservancy** and approximately 315 ha of land as the **Incomappleux Protected Area**.

Background: In 2020, old-growth harvest was deferred in a 40,194-ha area of the Incomappleux Valley under Part 13 – Designated Areas of the *Forest Act*. The Nature Conservancy of Canada, Interfor and the Province (represented by ENV, EMLI, FOR and LWRS) have recently come to an agreement that sets out the terms and conditions under which Interfor has agreed to amend the boundary of TFL 23 to exclude approximately 75,762 hectares of the Incomappleux Valley, subject to required approvals having been obtained and legislative steps taken. The agreement identifies that the Province’s intention is to seek approval to:

- a. permanently protect the northern part of the Incomappleux Valley as a conservancy or similar under the *Park Act*;
- b. allow for deactivation of the identified forest roads within the Incomappleux Valley;
- c. establish a no registration reserve over the Incomappleux Lands pursuant to Section 22 of the *Mineral Tenure Act*;
- d. establish a designated area over the southern area of the Incomappleux Valley, pursuant to part 13 of the *Forest Act*.

The Province now intends to move forward with a decision to establish the Conservancy. The resource road network within the Conservancy is proposed to be protected as a 315 ha Protected Area corridor under the *Environment and Land Use Act* to allow for deactivation of the roads. ENV intends to put forward a Treasury Board request to fund expropriation of the mineral claims within the Conservancy boundary. If funding is not approved, the mineral claims will be excluded from the boundary. ENV is working closely with EMLI, FOR and LWRS on this proposal.

Consultation with Indigenous Peoples:

The area overlaps the territories of the Adams Lake Indian band, Ktunaxa Nation Council, Little Shuswap Lake Band, Lower Similkameen Indian Band, Neskonlith Indian Band, Okanagan Indian Band, Penticton Indian Band, Shuswap Indian Band, Splatshin First Nation, Tk’emlups te Secwepmc, Upper Nicola Band and Sinixt (Lakes Tribe – Colville Confederated Tribes). Consultation has included a series of engagement letters, as well as a multi-Nation workshop to discuss the proposed designation as well as long-term management of the area. Several of the Indigenous Nations consulted have indicated support for the proposed conservancy designation provided that the Province commits to a government- to-government process to develop a collaborative management framework for the area. No Indigenous Nations have voiced concerns about the proposed Conservancy and Protected Area.

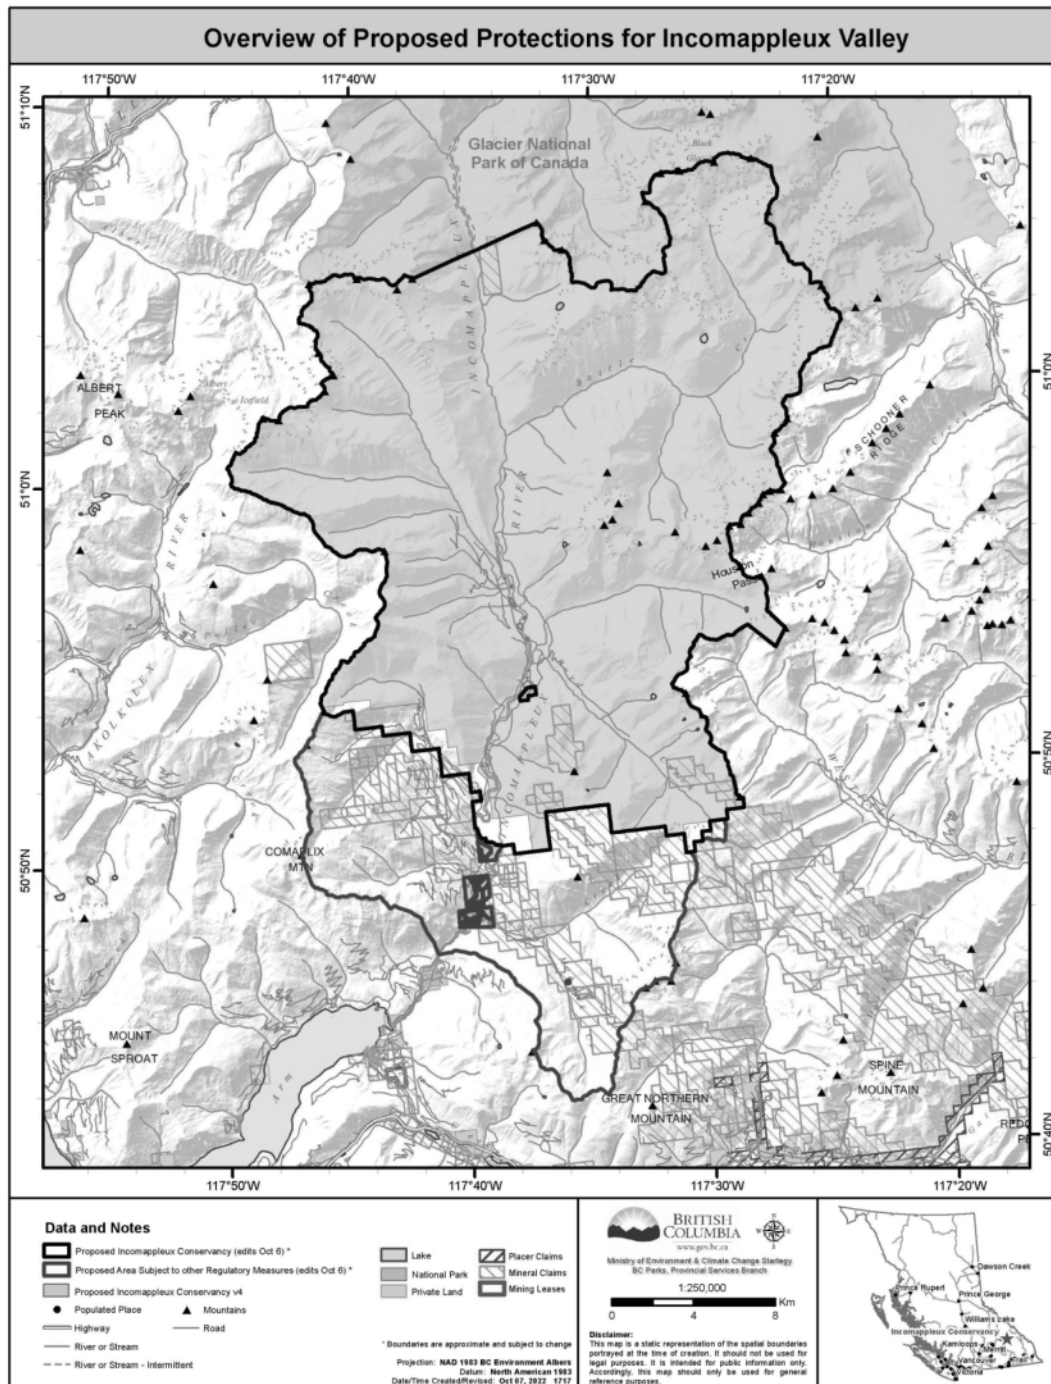

The consultation summary is currently being reviewed by MAG’s Indigenous Legal Relations, Solicitors Unit.

Public, Stakeholder & Other Consultation: Stakeholder and inter-agency consultation is scheduled for October. The Columbia-Shuswap Regional District, Regional District of Central Kootenay, the City of Revelstoke and the Village of Nakusp as well as any affected tenure/interest holders in the area will be

CONFIDENTIAL

notified of the intention to establish the Conservancy and Protected Area. No broad public consultation is planned.

Sent: October 28, 2022 2:16:15 PM PDT
Attachments: Propsed_BC Parks OIC_OGC Comment letter.pdf, image001.png
Hello Jennifer, thank-you for providing EMLI divisions the opportunity to review the OIC for Incomappleux.

EMLI, the Oil and Gas Commission have reviewed the Parks OIC for Incomappleux. Please see a letter from OGC attached providing support for this OIC. Below are a few general comments from division leads:

- A comment (EMLI staff and ENV staff are aware) that before/during deactivation, MCAD regional staff need to be kept informed and aware so that they can participate in restoration activities for some of the abandoned mine sites.
- Has there been any concerns from the Colville Confederated Tribes?
- Would just flag (ENV staff are aware) that consultation cannot occur until an NRR is established over the entire protected area.

Please note I am still waiting on a response from BC Hydro. They are working rush to review the OIC and will be replying by EOD today or early next week. Thank-you for understanding.

Sincerely,

Lindi Anderson
Senior Policy Analyst, Strategic and Indigenous Affairs Division
Ministry of Energy, Mines and Low Carbon Innovation
Phone: 236-478-0236

I respectfully acknowledge the Lekwungen People, known today as the Esquimalt and Songhees Nations, and all Indigenous Peoples of British Columbia, on whose territories I gratefully live, work and play.

Re: Review of BC Parks OIC Project.

Dear Lindi Anderson,

Thank you for the opportunity to comment on BC Parks OIC Project as the **Incomappleux Conservancy** and the **Incomappleux Protected Area**.

The Commission has reviewed the proposal, including associated maps, and has no concerns at this time regarding the proposed locations. This area is not located in proximity to oil and gas activities and does not intersect any current and planned oil and gas activities in the area.

Please feel free to contact me at 250-794-5303 or mahesh.khadka@bcogc.ca if you have any questions.

Sincerely,

Mahesh Khadka
Environmental Specialist
BC Oil and Gas Commission

Hi Jennifer, please note that BC Hydro has no existing assets of infrastructure in the proposed conservancy or protected area. However, BC Hydro's Hydrology group has commented that it might be of value to install hydrometeorologic monitoring stations in the future in this area and provisions for such monitoring would be appreciated.

Thank-you for the opportunity for this agency review.

Sincerely,
Lindi Anderson

Good afternoon Lindi,

Thank you for the opportunity to review and comment on the above-referenced BC Parks OIC application in the Incomappleux Valley South of Glacier National Park.

Upon review by various business groups within BC Hydro, we have determined that there are no existing BC Hydro assets or infrastructure in the proposed conservancy and protected areas, nor have we identified any specific future plans at this time to utilize the area by BC Hydro. However, BC Hydro's Hydrology group has commented that it might be of value to install hydrometeorologic monitoring stations in the future in this area and provisions for such monitoring would be appreciated.

Sincerely,
Joan

Hi Lindi,

Thanks for the email. I understand that BCH was given an extension. I've cc'd Joan on this email as she's been working very diligently on this request.

Ideally, BC Hydro needs more time for these types of reviews as we have to engage with other business groups across the corporation and 10 days isn't enough time for us or for other business groups.

Joan, are you able to give Lindi an update on when we'll be able to respond?

Subject: BC Parks OIC project review request - by October 28th

Good morning,

The Ministry of Environment and Climate Change Strategy is preparing OICs respecting the proposed protection of a portion of the Incomappleux Valley as a Conservancy under the *Park Act*, with a resource road corridor proposed to be protected as a Protected Area under the *Environment and Land Use Act*.

I am writing to give your ministry an opportunity to review and comment on our proposal. We would appreciate comments back to us by end of day, **Friday October 28th, 2022** to enable us to move forward with materials in preparation for cabinet committee meetings. Please let me know ASAP if you have concerns with this timeline.

Comments, questions and requests for additional information should be directed to Jennifer Eliason (Jennifer.Eliason@gov.bc.ca).

REVIEW MATERIALS:

Project Summary:

To assist with your review I have attached a project summary which details the background, consultation and other relevant details.

Spatial Information:

We also have a shapefile available for the proposed Conservancy. The shapefile can be loaded in iMap, ArcDesktop or Google Earth Pro to visualize spatially the proposed approximate area. The shapefile can be found at this link (link

expires Oct 26th). Any questions or clarification on the spatial files can be directed to Glenna Erlandson (glenna.erlandson@gov.bc.ca). : <https://www.env.gov.bc.ca/perl/soft/dl.pl/20221012100515-14-gp-0e3c3024-018f-478e-bb43-b529bc67?simple=y>

MINISTRY CONTACTS

Please let me know as soon as possible if you are not the correct person to receive this request:

- AFF – Arlene Anderson
- FLNROD – John Whitworth
- EMLI – Lindi Anderson
- MIRR – Frank Costa
- MUNI – Lynne Tang
- TRAN – TBC
- TOURISM- Jason Gabitous

Thank you,

Jennifer Eliason

This is something we will likely be involved in. Lindi is assisting Gabby on the tenure compensation side but we will likely get involved or lead the flip side which is about finding development opportunities (albeit limited) in IPCAs or adjacent areas.

Chat more about this

Thx

Mark

Hi Peter,

A meeting was scheduled for next Wednesday (November 23) to review the workplan but given the recent shift in direction we're trying to set something up before the end of the week.

In the meantime, we're working on an outline for the cab sub, and are inquiring about committee dates to inform our timelines and the path to Cabinet before the end of the year.

Thanks,
Gabby

Subject: Compensation Workplan

Hi Peter and Simon,

Attached for your review is the early draft of the compensation workplan. The workplan includes the deliverables we discussed in our first meeting as a group, which were also outlined in the 'overview of mineral tenure framework compensation challenges' briefing note.

Please note, the majority of the deliverables included within the workplan have fairly tight timelines to align as best as possible with the LUP submissions advancing to Cabinet in the new year. Given the tight timelines, review of the workplan at your earliest convenience (noting that Peter provided early support for some of the deliverables last week) to advise whether we're on the right track with the deliverables identified will help inform how we move forward with this work.

In the meantime, we will get a meeting in calendars for us to review the workplan in detail and work through addressing some of the actions identified (i.e., establishment of an Executive Advisory Committee).

Thanks,
Gabby

Hi Peter,
s.12; s.13

Amy and I are working on the letters that will be sent to the impacted tenure holders to notify them of the proposed Conservancy. The letters and other forms of communication will be rolled out once the NRR over the area is established (anticipating the end of the month or early December). As discussed, we can reach out to Kendra prior to the letters are sent out to advise her off the next steps – please let us know if this is a discussion you'd like to be part of.

If and when Cabinet approves the OIC for the proposed conservancy, a subsequent letter will be sent to impacted tenure holders to inform them their tenure has been expropriated. **Mark**, do you have letters to this effect that have been sent in the past that could be shared with Amy and I?

Thanks,
Gabby

Cc: [Graham, Mark EMLI:EX](#)
Subject: REQUEST for Information: Conservation Interests & Opportunities for Nature Agreement
Date: June 2, 2021 8:48:00 AM
Attachments: [FLNR Inventory Example.docx](#)
[image002.png](#)

Good morning Paul,

EMLI is working to coordinate an inventory for the BC and Government of Canada Nature Agreement (currently being discussed). Specifically, we are looking for:

1. Conservation interests or interest areas raised by Indigenous Nations and the approx. geographic location and scope (if available) and whether these are already identified in scope of an existing LUP process; and
2. Agreements that have notable conservation components to them that are anticipated to be implemented in the coming years (lands transferred for protection/ conservation purposes etc.).

Paul, are you aware of any offsetting/ conservation /protection area discussions happening with Indigenous Nations by BC Hydro, or other agency partners? If so, can you please fill out the information in the table attached and send it to my ED Mark Graham. **Please note:** Attached is a rough estimate on a few files from FLNR to give you an idea of what we are looking for in relation to estimates on conserved lands. **Not for distribution** please, but if we can at least get a rough idea this week that would be great (don't worry about quantifying socio-economic costs).

Please see background and full request below for more information.

.....
.....
Background:

On February 25, 2021, BC and the Government of Canada announced their commitment to strengthening conservation and stewardship province wide by launching the development of a new bilateral Nature Agreement. Canada committed to protect 25% of lands, freshwater and oceans by 2025, and 30% by 2030, and has indicated a willingness to enter into bi-lateral agreements and provide funding to incentivize the establishment of additional protected and conserved areas in Provinces and Territories. BC has demonstrated leadership nationally in area-based conservation, having the highest percentage (19.5%, of which 15.5% is in parks and protected areas, and 4% in various "Other Effective Conservation Measures (OECMs)") of its lands and freshwater area conserved to international standards. OECMs may include conservation initiatives that make use of protection measures that do not include the establishment of a park. For example, Old Growth Management Areas (both spatial and aspatial), Ungulate Winter Range, and Wildlife Habitat Areas. BC has also recently introduced a modernized land use planning process through which the province has committed to partnering with Indigenous Nations in the development of land use plans. Indigenous Protected and Conserved Areas (IPCAs) are a driver for reconciliation and key component of several of the current LUP tables.

BC is currently seeking to clarify the mandate for negotiations of the Nature Agreement and is seeking information to help support that request.

Request:

- To inform BC's approach/ mandate request, DMs have requested an assessment of known conservation interests and potential opportunities that could be considered as a pathway to future additional conservation and protected areas to help meet the federal targets. FLNRORD is canvassing the regions for information and insights, however, as conservation, environmental protection and stewardship are often interests of Indigenous Nations, IRR has also been asked to provide any information / key flags to help identify:
 3. Conservation interests raised by Indigenous Nations and the approx. geographic location and scope (if available) and whether these are already identified in scope of an existing LUP process
 4. Agreements that have notable conservation components to them that are anticipated to be implemented in the coming years (lands transferred for protection/ conservation purposes etc.).
 5. Whether/where MIRR thinks we could use/leverage federal funds under a Nature Agreement to advance resolution of key Indigenous conservation issues/interests on the landbase

Thank-you.

Sincerely,

Lindi Anderson

Hi Simon:

Thanks again for the great conversations. Attached is our agreement on Incomappleux.
s.12; s.13

s.12; s.13

We are extending our agreement, which expires at the end of December, to now go to end of January. He feels there is low risk to the tenures being developed (we would agree given that MoF has closed the only access road because it is unsafe).

I hope I have characterized the current situation accurately – it is a bit confusing...

Thanks for any advice you may have,

Nancy

Hi Nancy and Stuart,

I am looking for your approval, via email, indicating you are okay with replacing the map in the recently signed Incomappleux Agreement, dated for reference September 1st, 2022 with the map attached here (2022.09.01 Incomappleux map_rev.pdf)

This was the map NCC updated for the first version of the agreement that you signed, but unfortunately the old map re-appeared in the revised version circulated for signing. Ministers have signed off on this version of the map. The key difference is that the colours of the boundary match

the colours indicated within the agreement.

Apologies for the confusion. If you can indicate you are okay with the slip page for the map, we can pull together a fully executed agreement for distribution.

Thank you,

Subject: RE: request for EMLI support: review existing mineral rights

Hi Kathie,

Someone will need to look into the following permits:

- a. 2 of the placer NOWs are closed, but 1 is still "Operating"
 - Mine No. 0500102
- b. Teddy/Spider: I didn't do the map that Kai requested, but someone will need to pull the permits and piece that all together in order to provide the Map that he wants on this

*There is a NEW notice of work currently in the system that Mike M. is working on. Western Star Resources have done recent exploration work on their claims and have drilling planned for this year.
NOW Western Star 20000545-2021-01

Kai originally sent a list of all the tenure holders. I've reattached it here.

In addition to Western Star Resources and Jazz Resources, Origen Resources has a large land holding and is actively exploring their tenures.

With the large number of tenures in this area, and since a Mineral Tenures does give the holder the right to explore for minerals, I'm thinking that Mineral Titles, and Mark Messmer should likely be brought in on this discussion at some point also, sooner than later?

Let me know if you need anything else from me on this, but I'm thinking the next step would be to bring in Mark Messmer for this discussion?

Hi Kai,

Sorry to miss the meeting next week. See below for a few quick comments to your questions, and attached maps.

I can do more work on this after next week, if required.

*Fiona Katay, P.Geo,
Regional Geologist, Southeast*

Hi Kathie,

I am not sure exactly which claims you are referring to. Do you have claim numbers and a map?

Is this part of a cab sub or TB sub?

Hi Kathie, thanks for the map.

I think the answers to your questions lie with whatever mandate exists to create the new park area.
Do you have the cabinet decision or Minister's mandate?

The only legislative provision for compensation is Section 17.1 of the Mineral Tenure Act, which is only triggered by an expropriation order under the Park Act.

s.13

I have cc'd Brett Hudson and he may be able to provide some insight as to the mandate for park creation in this area.

Cheers,
Mark

Hi Kathie,

There is no one in EMLI that has the expertise to do mineral title valuation.

We usually hire an expert which is ridiculously expensive. If you have contract \$ I can recommend a couple valuers who have the expertise.

All we can do is compile a history of work and cash registered on the claims and the history of exploration work, if any. We can do this much if you send me the claim numbers.

Cheers,
Mark

Hi Mark. NCC is interested in moving forward with a contract to get the mineral tenure valuation for the claims in the Incommapleux. I am wondering if you have a short list of a few firms who do this work. I know about SLR, but are there others you would suggest? NCC will run the procurement and contract for the project.

Let me know if you have any questions.

Thanks

Brett

Hi Brett,

A few other possibilities are:

Pat Stephenson from AMC consultants.

Watts Griffis and McOuat Limited (Ross Lawrance),

Bruce MacKnight,

Ross Glanville,

Most if not all of the above individuals are semi or possibly fully retired.

There may be others that I am not aware of. I would recommend they contact the Canadian Institute of Mainlining (the keeper of the CIMVal standards) to see if they have a more current list of geologists who specialize in valuation work. I am sure there are many more who have such expertise.

Hi everyone. NCC would like to know if we (i.e. Prov Govt) have any comments on this. Also might help inform your thoughts on approaches to MC evaluation for southern 1/3 if you decide to proceed with that work.

Let me know if you have any comments/concerns about the draft report you would like me to convey to NCC.

Thanks

Brett

Hi everyone. NCC would like to know if we (i.e. Prov Govt) have any comments on this. Also might help inform your thoughts on approaches to MC evaluation for southern 1/3 if you decide to proceed with that work.

Let me know if you have any comments/concerns about the draft report you would like me to convey to NCC.

Thanks

Brett

Good morning Brett and Jennifer,

Attached is the draft mineral tenure valuation for Incomappleux.

Please let me know if you have questions or feedback, in which case I will direct it to the valuation team at SLR.

Thanks,

Jon Kelly

Subject: Incommapleux Agreement.

Hi everyone. Please find attached for your review some proposed revisions from the Province to the tri-partite agreement respecting potential conservation designations for the Incommapleux Valley. The word doc is a clean copy, the PDF shows tracked changes.

Due to the stat holiday, our next regularly scheduled meeting is not until June 6. We will set aside time to discuss the agreement then, but if you would like to discuss it before that, please let me know and we can try to find some time.

Regards,

Hi everyone. NCC would like to know if we (i.e. Prov Govt) have any comments on this. Also might help inform your thoughts on approaches to MC evaluation for southern 1/3 if you decide to proceed with that work.

Let me know if you have any comments/concerns about the draft report you would like me to convey to NCC.

Thanks

Brett

Subject: Incomappleux Mining Interests and Liabilities Report

Hello everyone.
Please find attached the report providing an overview of the mining interests in the lower Incomappleux watershed. Everyone cc'd here has either reviewed the report or had discussions on (thank you) and been promised a copy.

There are some small but important changes from any previous draft you may have seen, mostly to separate the access and bridge condition from the conservancy discussion and make clear that the two are not related.

While I believe work on the Conservancy deliberations is proceeding separately for the moment, this report will provide technical information to inform future decisions.

If you have any questions or comments, please don't hesitate to ask.

Thank you

Howard

Thanks for letting me know Amy. Nothing needed from EMLI at that meeting. We are having meetings this week with a couple of the First Nations, so we will likely be reporting out on those discussions on Monday, and talking about the 3-way agreement.

Brett

Hi everyone. With my apologies for the earlier confusion, please find attached two documents:

1. Compare 2022.03.23 and Province May 27 22 Incommappleux Purchase Agreement, which is a blackline of the comparison between the 2022.03.23 version sent to us by NCC and the Province's May 27 22 proposed version.
2. Incommappleux Agreement Province May 27, 22, a clean copy of the Province's May 27 22 proposed version.

Our next call is not until June 6, so if there are comments or concerns in the meantime, perhaps we can review by email, or give me a call at the number below.

Thanks very much.

Hi Mike, hope you have been keeping well.

I am cc'ing Amy and Gabby who have taken over the file.

Claims can be checked with Mineral Titles to see whether they are still in good standing. Most likely they are, meaning that a park would require compensation. There have been discussion on this already with Brett leading. I can't elaborate further since I'm not up to date with any discussions between EMLI and FOR. Gabby and Amy can assist I'm sure.

Best regards

Howard

I have both! Do you have the valuation report? That has some maps with the tenures associated (and obviously the estimated values, etc.). NCC contracted this work in Feb 2022.

I have also attached the shapefiles for the proposed conservancy.

Let me now if you need anything else.

Jen

Subject: Incomappleux shapefiles

Hi Jen,

I am wondering if you have any recent maps that show the mining tenures associated with the conservancy? Or if you are able to share the shapefiles for Incomappleux (that show the conservancy) so I can work with our GIS folks to determine the associated mining tenures?

Thanks so much!

Hi all, as previously discussed, I am proposing a field day into the Incomappleux valley with FN reps, BC staff and partners who have worked so diligently on this initiative. Trying to keep the list fairly manageable so apologies to those who we may not be able to invite.

I am working on a final list of FNs to invite and targeting one rep/FN.

The targeted date is Aug 17th based on aircraft availability. I suspect some folks here may be deployed on fires but for now, let's blue sky plan.

My plan is to fly any FN reps out of Revy into the valley and then our group stages near the bridge and we do quick flips in to join the first group. I will talk to folks who know the valley but I am thinking we could explore for 1-2 hours then flip our group back to the staging area and finally flip the FN reps back to Revy.

Please let me know if you are interested/available and I will plan accordingly. Thanks

Grant

Hi Peter,

As discussed, please find attached for your review and approval the package of materials regarding challenges with LUP implementation. The following materials are included:

1. DN - Addressing Challenges with BC's Mineral Compensation Framework
 - a. Appendix A – Proposed Land Use Planning Map
 - b. Appendix B – Current and Expected Land Use Planning Projects in BC
 - c. Appendix C – Compensation Issues Graphic
2. BN – Limitations with Interim Protection Measures for Mining Activity

As an FYI, the following staff have reviewed and provided input into the note: Peter W., Jenn M., Jen S., Mark M. (review limited to the DN and supporting appendices), and MAG (Tim Sheaff). We provided the materials to Colin and David but did not receive any feedback. I plan to follow-up by sending them the updated materials as an FYI.

Please let us know if you'd like to set up a meeting to discuss any changes that need to be made before the package advances to Fazil, as well as whether a briefing with Fazil is needed in advance of a briefing with MBR.

Thanks so much to Amy and Emily for their hard work on tackling this expansive topic!

Many thanks,
Gabby

Incomappleux Valley

Background:

The Incomappleux Valley is east of Revelstoke and contains a portion of B.C.'s inland temperate rainforest. The inland rainforest is the wettest form of Interior Cedar-Hemlock biogeoclimatic zone. The old-growth forest in the valley is dominated by Western Redcedar and Western Hemlock, and includes trees that are 500-1,000 years old. The Incomappleux Valley is an area of great biodiversity,

Photo credit: Paul Zizka

providing habitat for grizzly bears and historically for mountain caribou and, and contains many species of rare plants and lichens. The Incomappleux River is a major tributary of the Columbia River.

In 2020, the province suspended all forest harvesting in 40,194 hectares of old growth forest in the Incomappleux Valley. The old-growth deferral area was one of nine areas set aside under Part 13 – Designated Areas of the *Forest Act* to suspend harvest while the Province developed longer term plans. There has been no logging in the valley for over 15 years, in part due to access constraints.

Photo credit: Paul Zizka

Protection through Partnerships:

An agreement between the Province of BC, Interfor and the Nature Conservancy of Canada, signed in September 2022, initiates steps towards long term protection of this remarkable area. As a key negotiator, the Nature Conservancy of Canada facilitated and assisted in funding the agreement to permanently remove forestry tenures in this landscape. Interfor has agreed to release approximately 75,762 ha from Tree Farm Licence (TFL) 23.

By signing the agreement, the Province has committed to seek approvals for permanent protection of the Northern Incomappleux Lands (approximately 57,000 ha) as a conservancy. The forestry roads within the proposed conservancy, which are all closed, are proposed to be deactivated and restored as needed. The Province has also proposed to apply a *Forest Act* designation to the Southern Incomappleux Lands that will eliminate all forestry activity. Existing mineral claims in the southern third of the valley will not be affected by the proposed

Incomappleux Valley

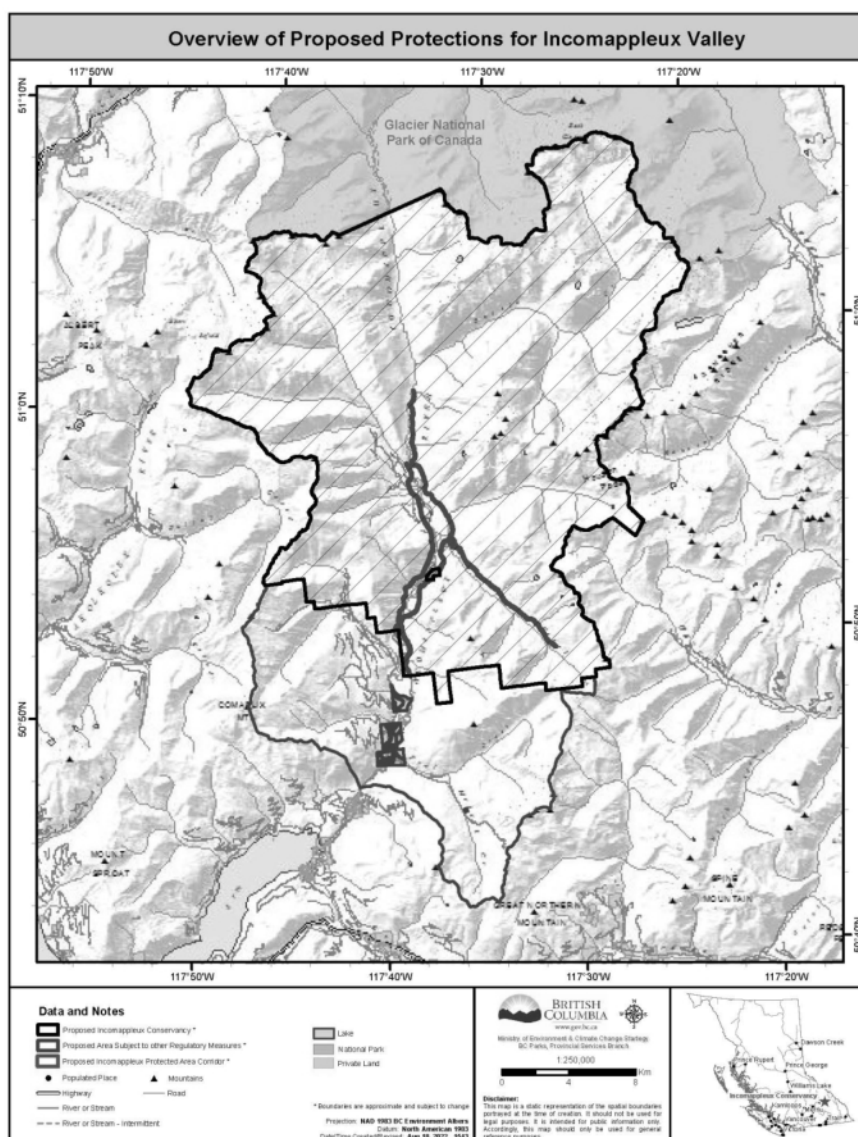

designations. These protection measures are all subject to further decisions by Cabinet.

Information Sharing and Engagement

Information about the proposed protection measures for the Incomappleux Valley is being shared with industry, interest groups and local governments.

The Province is actively consulting with Indigenous Nations and will continue to engage with all interested Nations on the development of a collaborative management framework for the Incomappleux Valley.

By working in partnership with industry, Indigenous governments, and the Nature Conservancy of Canada, the Province will achieve protection for a rare inland rainforest with high conservation values.

Subject: BC Parks OIC project review request - by October 28th

Good morning,

The Ministry of Environment and Climate Change Strategy is preparing OICs respecting the proposed protection of a portion of the Incomappleux Valley as a Conservancy under the *Park Act*, with a resource road corridor proposed to be protected as a Protected Area under the *Environment and Land Use Act*.

I am writing to give your ministry an opportunity to review and comment on our proposal. We would appreciate comments back to us by end of day, **Friday October 28th, 2022** to enable us to move forward with materials in preparation for cabinet committee meetings. Please let me know ASAP if you have concerns with this timeline.

Comments, questions and requests for additional information should be directed to Jennifer Eliason (Jennifer.Eliason@gov.bc.ca).

REVIEW MATERIALS:

Project Summary:

To assist with your review I have attached a project summary which details the background, consultation and other relevant details.

Spatial Information:

We also have a shapefile available for the proposed Conservancy. The shapefile can be loaded in iMap, ArcDesktop or Google Earth Pro to visualize spatially the proposed approximate area. The shapefile can be found at this link (link expires Oct 26th). Any questions or clarification on the spatial files can be directed to Glenna Erlandson (glenna.erlandson@gov.bc.ca). : <https://www.env.gov.bc.ca/perl/soft/dl.pl/20221012100515-14-gp-0e3c3024-018f-478e-bb43-b529bc67?simple=y>

MINISTRY CONTACTS

Please let me know as soon as possible if you are not the correct person to receive this request:

Hey Gabby,

I have had a chance to review these. I had no comments on the communications plan but did have some input, comments, and flags on the other two documents.

I am wondering with respect to the FAQs if it would be helpful to get Mark and Kathie to review and see if there are anticipated questions with respect to mining that we should include (I have included a couple additional ones).

Thanks!

Amy

Subject: Finalizing communications/engagement plan and materials

Hello team Incomappleux,

Brett and I have chatted with Heather and Grant about engagement, as well as our GCPE officer. We are trying to finalize a comms. plan (and some basic outreach materials) that will meet our needs but that is realistic in terms of our very tight timelines and capacity. Heather, the attached is a bit pared back from what we discussed, but we only have a few weeks to pull this off, so really hoping this will suffice! Grant has agreed to have conversations with local government folks sooner than later, due to pending elections. For other interest groups, we are planning to primarily use mailouts and Bang the Table (an online engagement platform) to provide information.

If anyone has serious concerns with the approach outlined in the attached plan, I can set up a meeting to discuss. Otherwise, I would appreciate review and a bit of input on the FAQs, particular around messaging re: roads and minerals claims. Input/suggestions on the communications plan are welcome too.

Thanks!

Amy,
Thanks for reaching out, unfortunately it is tough timing for having a detailed discussion as I too am headed out tomorrow afternoon. If it is possible to wait for Kathie's return that would be the best option. If there is something immediately important for tomorrow, I can attempt to assist you, beyond that Michael Daigle will be covering until Kathie's return.

Really Kathie is most informed on this topic.

Cheers,
Glen

Hi Jen,

Thanks for the opportunity to review and provide input into the TB sub.

I've gone through and addressed the questions specific to mining – Mark Messmer (cc'd) has yet to review but including him on this thread in case he has anything to add. As noted, Peter Wijtkamp, ED of our Policy Branch, has reviewed the responses back to TBS.

Please let us know if there are any further questions.

Thanks so much for your work on this,
Gabby

Hi Mark and Peter,

Hope your week is off to a great start.

Attached is the Treasury Board submission for mineral tenure compensation within the proposed Incomappleux Conservancy. ENV has held the pen on the submission and has just received initial comments back from TBS. I've taken the first kick at responding to the questions but am sending along to you both based on your experience with mineral tenure compensation and valuation, in hopes you can review what I've provided, and correct it or build on it, if needed.

s.12; s.13

Thanks for your help with this matter! Please let me know if any further information is needed.

Thanks,
Gabby

Hi Amy, I have attached the most recent shapefiles for the proposed Conservancy boundary: IncomappleuxCVA_v5_20221103.

The shapefile for the southern area of the valley, outside of the conservancy, is currently being finalized. The most recent one I have is attached, but with a caveat that it is not final and there may be some tweaks (FOR/LWRS leading that work). I think the southern area is of interest to EMLI as well, because it is also impacted by the road closure and proposed deactivation. Incom_South_20221007. (Erika Carswell is developing the final mapping for the Part 13 over the southern area.)

Hi

If there are just mineral claims, then there will not be any security held on them. If there are NoW attached, there could be. If they have past mining permits issued from Major mines then there is a possibility depending upon the age of them. From what I remember of the status, these are all mineral claims. There was one NoW but I would have to check on that and if there was any securities held.

Hey Amy,

Thank you for putting this together for us!

The current language looks good, but I'm wondering if it's possible to build it out a bit to speak more to the purpose of establishment of the Incomappleux Valley in terms of protecting important values (old growth, caribou, etc) in the region.

I've attached a letter that was sent to impacted tenure holders by the IMA as an example (sorry I didn't provide it earlier!) it has some good language I think we can steal.

Let me know if you have any questions.

Thanks again,
Gabby

Subject: RE: Draft letters for Incomappleux Tenure holders

Thanks Amy!

In addition to this expropriation letter, which goes out immediately after the OIC to establish the Conservancy is approved (mid-Jan), we will also need a letter from EMLI to these same tenure holders giving them a "heads up". The letters will only be sent out once the NRR is approved, so I think they could say government "intends" to expropriate, if establishment of the Conservancy is approved.

The attached can accompany the letters, for background. Notes these are still draft, pending GCPE review.

Can you prepare that draft letter as well?

Let me know if you have any questions.

Thanks, Jen

Hi Sam,

Here are the shapefiles, hoping to get a spreadsheet of the tenures included in the conservancy and southern portion (including all relevant info, tenure good to date, work completed etc.) as well as the map.

I will confirm what the mine numbers are for the historic mines.

Thanks!

Subject: Mine numbers for historic mines in the Incomappleux Valley

Hi Kathie,

I hope you are doing well!

We are working on getting an updated map of the Incomappleux Valley along with information on the mining tenures. Our GIS folks have asked for the mine numbers for the historic/legacy sites (Teddy Glacier, Goldfinch, Criterion-Oyster, Lucky Jack, Meridian, Spider and Gilman Mines, and the Camborne Mill) I am waiting for access to CORE now. I am wondering if you might have these handy and could provide them to me?

Many thanks,

Amy Kleinschmidt (she/her/hers)

To: Kleinschmidt, Amy EMLI:EX <Amy.Kleinschmidt@gov.bc.ca>
Sent: November 25, 2022 2:38:25 PM PST
Hey Amy,

I've got a map draft and a spreadsheet for the Mining activity in the Incomappleux Valley. Please find the links to the data and some information below.

PDF: \\spatialfiles.bcgov\work\em\vic\mtb\Local\projects\landuse\parks\Incomappleux_Proposed_Park\pdf\MiningActivityInIncomappleux_Valley_85x11L_2022Nov25.pdf

Spreadsheet: \\spatialfiles.bcgov\work\em\vic\mtb\Local\projects\landuse\parks\Incomappleux_Proposed_Park\spreadsheets\Incomappleux_Proposed_Park_Title_Details_2022Nov25.xlsx

Information

PDF Map

- Mines
 - As per Sam's communications, we've added Teddy Glacier, Goldfinch, Lucky Jack, EVA/Meridian, Meridian, Spider Mine, Gilman, & Camborne.
- Roads
 - We've displayed the active forest roads, however we're unsure about the accuracy of the data as we don't know how often this layer is updated
- Bridges
 - There doesn't seem to be data available for forest road bridges in this area.

Spreadsheet

- Hectares
 - There are two hectare columns, Original Tenure Hectares describes the original size of the tenure, and Overlapping Hectares describes the area that is overlapping either one of the park areas or outside the park boundary
- Tenures
 - There can be duplicates or triplicates of each Tenure ID along the rows of the spreadsheet, which will show portions of the tenure that fall into one or both park boundaries and/or outside the park.
 - There are only mineral claims, no leases or placer titles.
- Park Name
 - The park name is either Incomappleux Conservancy or Incomappleux Conservancy South. If this is blank then the area falls outside of the park boundary.

Please feel free to reach out with any questions, comments or concerns! Also as an fyi, myself and the rest of the GIS are attending the GIS CoP next week, so we will be unavailable until Friday at the earliest.

Cheers,

Dan McKelvey

Hi Gabby,

I think most if not all of the abandoned mine liabilities that Bev may be investigating are to the south of the current proposed Incomappleux conservancy boundary, but perhaps you can confirm that with her directly. See the map in Howard's attached report.

Cheers and Thanks,
Mark

Subject: Proposed conservancy

Hi Mark and Howard,

Diane mentioned to me that she wanted me to look at a proposed conservancy near Nakusp. I'm supposed to be looking at outstanding abandoned mines liabilities (I believe there is a mill remaining on one of the sites) and possible expropriations.

Diane said that both of you were involved in the project so I thought I would touch base with you before beginning. Does the project have a name and is there an outline of the proposed area?

Thanks
Bev

Subject: Incomappleux Valley Conservancy

Hi Grant,

I've recently joined the Ministry of Forests as a Public Affairs Officer and I'm working on the proposed Incomappleux Conservancy file.

The Ministry of Environment and Climate Change Strategy communications team is working on their internal key messages and questions/answers document ahead of a meeting with industry and NCC early next week. The ENV GCPE team had some questions for Forests that they were hoping to have clarified. I was hoping you could look at their document and confirm the questions they have, as well as take a general look over for any errors on things that fall under the Forests umbrella (or should I say canopy). It's a bit of a working document so there are some comments directed to different ministries, but I've tried to flag the questions that would be relevant to Forests.

ENV also flagged a media article from last year that I'm hoping you may be able to provide some insight on. It is a Narwal article that claims: "When Valhalla Wilderness Society examined the government's old-growth deferral area in the Incomappleux Valley east of Revelstoke, an inland rainforest with trees up to 1,500 years old, the society found only one-fifth of the 40,000-hectare deferral area consisted of old-growth." <https://thenarwhal.ca/bc-forests-old-growth-impacts-map/>

Are you also able to clarify if there are any additional issues/concerns which are not included that should be flagged? I'll also be sending this over to the engineering branch for their input on Forest Service Roads.

I'm hoping to get this back by **Monday EOD** at the latest, if that is possible?

Let me know if you have any questions or concerns!

Thanks!

Hi Chris,

Thanks for the email.

That is correct – I've been involved in the review of the proposed Incomappleux Conservancy since I came back to EMLI in early June. Because of staff turnover and movement, the management of this file has switched hands a few times (which could be a contributing factor to why a branch may have been unintentionally excluded in any review associated with the proposed conservancy).

Kirk – if it's be helpful, I'm happy to provide an overview of the work to date, as well as the next steps heading into the new year.

Thanks,
Gabby

Hi Gabby,

Jenn mentioned that you might have been involved in the review of Incommappleux Park.

Kirk brought this park to my attention last week with concerns that his team was left out of the review process.

Do you know if any analysis was done on mineral potential and impact to tenures?

Thanks,
Chris

Subject: "Proposed" park - just landed December 01, 2022

Hi Christopher,

Here is the magically appearing park: Incommappleux Park [covers Incommappleux River, southeast of Revelstoke.

From MTO: Site # 1006962; BC-Regulation # 0251-22, Review date (???) 27 Sept 2024.

Based on the review date, I'd hazard a guess this has been in the works for a while. This park has been dropped on Private lands, Crown Grants and Mineral titles. Road access is already gated [with "the biggest gate I've ever seen" – a person familiar with the area). Something is up and it sure seems like the consultation process has been utterly bypassed. Any way, let's see what we can find. This kind of thing is not supposed to happen, especially if we've been left out of whatever loop was used, and the public at large has certainly been excluded so far. Thank you.

Sincerely,

Kirk Hancock, P.Geo.

Hi Brett and Jen,

Nice to chat with you today!

Just wanted to let you know that we received an FOI request today, our team is working to determine cost estimate but will likely recommend that it also be sent to FOR, ENV, and WLRS. So you may be receiving this at some point in time. I am not sure who requested but it is for: **"Description: Records related to Incomappleux Park (Date Range for Record Search: From 1/1/2017 To 12/12/2022)"**

Gabby and I wanted to give you a heads up.

Thanks!

Hi Mark,

Are you able to share the rationale behind amending the NRR shape to rescind the southern portion that's currently included? It's my understanding that the mandate in question is provided through the approved Cabinet Submission which references the southern portion being covered by an NRR.

Any insight or legal advice you're able to share on this is much appreciated.

Thanks,
Gabby

Hi everyone. Just thinking a little further about this project.

Our immediate need is to launch public notification/information about the proposed protections in the valley. We have to do that in the next day or so.

Hi All,

The attached map is with the leg drafters. The current NRR is being amended to this shape. It may be a couple more weeks before the amended regulation is signed.

If in future a mandate is approved to incorporate a larger area into a Conservancy or Park, this shape and the NRR may be amended accordingly.

Thanks for your patience.

.....
.....
Background:

On February 25, 2021, BC and the Government of Canada announced their commitment to strengthening conservation and stewardship province wide by launching the development of a new bilateral Nature Agreement. Canada committed to protect 25% of lands, freshwater and oceans by 2025, and 30% by 2030, and has indicated a willingness to enter into bi-lateral agreements and provide funding to incentivize the establishment of additional protected and conserved areas in Provinces and Territories. BC has demonstrated leadership nationally in area-based conservation, having the highest percentage (19.5%, of which 15.5% is in parks and protected areas, and 4% in various “Other Effective Conservation Measures (OECMs)”) of its lands and freshwater area conserved to international standards. OECMs may include conservation initiatives that make use of protection measures that do not include the establishment of a park. For example, Old Growth Management Areas (both spatial and aspatial), Ungulate Winter Range, and Wildlife Habitat Areas. BC has also recently introduced a modernized land use planning process through which the province has committed to partnering with Indigenous Nations in the development of land use plans. Indigenous Protected and Conserved Areas (IPCAs) are a driver for reconciliation and key component of several of the current LUP tables.

Re: Review of BC Parks OIC Project.

Dear Lindi Anderson,

Thank you for the opportunity to comment on BC Parks OIC Project as the **Incomappleux Conservancy** and the **Incomappleux Protected Area**.

The Commission has reviewed the proposal, including associated maps, and has no concerns at this time regarding the proposed locations. This area is not located in proximity to oil and gas activities and does not intersect any current and planned oil and gas activities in the area.

Please feel free to contact me at 250-794-5303 or mahesh.khadka@bcogc.ca if you have any questions.

Sincerely,

Mahesh Khadka

Hi Lindi,

Thanks for the email. I understand that BCH was given an extension. I've cc'd Joan on this email as she's been working very diligently on this request.

Ideally, BC Hydro needs more time for these types of reviews as we have to engage with other business groups across the corporation and 10 days isn't enough time for us or for other business groups.

Joan, are you able to give Lindi an update on when we'll be able to respond?

Good morning,

We have been contacted by ENV for a for an agency review for an Order In Council (OIC) for protection of approximately 58,000 hectares (ha) of Crown land as the **Incomappleux Conservancy** and approximately 315 ha of land as the **Incomappleux Protected Area**.

Spatial Information:

We also have a shapefile available for the proposed Conservancy. The shapefile can be loaded in iMap, ArcDesktop or Google Earth Pro to visualize spatially the proposed approximate area. The shapefile can be found at this link (link expires Oct 26th). Any questions or clarification on the spatial files can be directed to Glenna Erlandson (glenna.erlandson@gov.bc.ca). : <https://www.env.gov.bc.ca/perl/soft/dl.pl/20221012100515-14-gp-0e3c3024-018f-478e-bb43-b529bc67?simple=y>

Can you please review the attached review, which includes a map, and send your comments to me by EOD October 27.

Thank you for the opportunity to review and comment on the above-referenced BC Parks OIC application in the Incomappleux Valley South of Glacier National Park.

Upon review by various business groups within BC Hydro, we have determined that there are no existing BC Hydro assets or infrastructure in the proposed conservancy and protected areas, nor have we identified any specific future plans at this time to utilize the area by BC Hydro. However, BC Hydro's Hydrology group has commented that it might be of value to install hydrometeorologic monitoring stations in the future in this area and provisions for such monitoring would be appreciated.

Sincerely,
Joan

Joan Hornby

Good morning Lindi,

I understood from the attached email that we had a few days extension to respond. I have received responses from a number of BC Hydro's business groups and have followed up with the others. At the earliest I expected we would have until the end of business day tomorrow, based on Jennifer Eliason's email (highlighted below).

Thank you,
Joan

Hi Lindi,

Thanks for the email. I understand that BCH was given an extension. I've cc'd Joan on this email as she's been working very diligently on this request.

Ideally, BC Hydro needs more time for these types of reviews as we have to engage with other business groups across the corporation and 10 days isn't enough time for us or for other business groups.

Joan, are you able to give Lindi an update on when we'll be able to respond?

Regards,

Jane Holdaway, MBA | Senior Manager, Property Rights Management

Good morning,

We have been contacted by ENV for a for an agency review for an Order In Council (OIC) for protection of approximately 58,000 hectares (ha) of Crown land as the **Incomappleux Conservancy** and approximately 315 ha of land as the **Incomappleux Protected Area**.

Spatial Information:

We also have a shapefile available for the proposed Conservancy. The shapefile can be loaded in iMap, ArcDesktop or Google Earth Pro to visualize spatially the proposed approximate area. The shapefile can be found at this link (link expires Oct 26th). Any questions or clarification on the spatial files can be directed to Glenna Erlandson (glenna.erlandson@gov.bc.ca). : <https://www.env.gov.bc.ca/perl/soft/dl.pl/20221012100515-14-gp-0e3c3024-018f-478e-bb43-b529bc67?simple=y>

Can you please review the attached review, which includes a map, and send your comments to me by EOD October 27.

Sincerely,

Lindi Anderson (she, her)

Good morning,

s.12; s.13

Jen

Purpose of OICs: Protection of approximately 58,000 hectares (ha) of Crown land as the **Incomappleux Conservancy** and approximately 315 ha of land as the **Incomappleux Protected Area**.

Background: In 2020, old-growth harvest was deferred in a 40,194-ha area of the Incomappleux Valley under Part 13 – Designated Areas of the *Forest Act*. The Nature Conservancy of Canada, Interfor and the Province (represented by ENV, EMLI, FOR and LWRS) have recently come to an agreement that sets out the terms and conditions under which Interfor has agreed to amend the boundary of TFL 23 to exclude approximately 75,762 hectares of the Incomappleux Valley, subject to required approvals having been obtained and legislative steps taken. The agreement identifies that the Province’s intention is to seek approval to:

- a. permanently protect the northern part of the Incomappleux Valley as a conservancy or similar under the *Park Act*;
- b. allow for deactivation of the identified forest roads within the Incomappleux Valley;
- c. establish a no registration reserve over the Incomappleux Lands pursuant to Section 22 of the *Mineral Tenure Act*;
- d. establish a designated area over the southern area of the Incomappleux Valley, pursuant to part 13 of the *Forest Act*.

The Province now intends to move forward with a decision to establish the Conservancy. The resource road network within the Conservancy is proposed to be protected as a 315 ha Protected Area corridor under the *Environment and Land Use Act* to allow for deactivation of the roads. ENV intends to put forward a Treasury Board request to fund expropriation of the mineral claims within the Conservancy boundary. If funding is not approved, the mineral claims will be excluded from the boundary. ENV is working closely with EMLI, FOR and LWRS on this proposal.

Consultation with Indigenous Peoples:

The area overlaps the territories of the Adams Lake Indian band, Ktunaxa Nation Council, Little Shuswap Lake Band, Lower Similkameen Indian Band, Neskonlith Indian Band, Okanagan Indian Band, Penticton Indian Band, Shuswap Indian Band, Splatshin First Nation, Tk’emlups te Secwepmc, Upper Nicola Band and Sinixt (Lakes Tribe – Colville Confederated Tribes). Consultation has included a series of engagement letters, as well as a multi-Nation workshop to discuss the proposed designation as well as long-term management of the area. Several of the Indigenous Nations consulted have indicated support for the proposed conservancy designation provided that the Province commits to a government- to-government process to develop a collaborative management framework for the area. No Indigenous Nations have voiced concerns about the proposed Conservancy and Protected Area.

The consultation summary is currently being reviewed by MAG’s Indigenous Legal Relations, Solicitors Unit.

Public, Stakeholder & Other Consultation: Stakeholder and inter-agency consultation is scheduled for October. The Columbia-Shuswap Regional District, Regional District of Central Kootenay, the City of Revelstoke and the Village of Nakusp as well as any affected tenure/interest holders in the area will be

notified of the intention to establish the Conservancy and Protected Area. No broad public consultation is planned.
