The Mine Manager is required to provide a written response within 15 business days of receiving the inspection report. The Manager's response must outline the remedial steps taken by a specified date and the work still outstanding. A copy must be provided to the inspector, and in the case of health and safety matters, the occupational health and safety committee and the local union. Appeals to a decision, order or ruling must made in writing to the Chief Inspector within 30 days after the issue date of the inspection report. In this document, Code means Health, Safety and Reclamation Code for Mines in British Columbia.

# Introduction

This inspection report is the result of a health and safety compliance verification at Westside pit on May 12th, 2021

# **Preamble**

During this inspection I, Jerrold Jewsbury inspector of mines was accompanied by Inspector Haley Kuppers. Together we were following up on a number of residential complaints that have occurred over the years and more over the recent weeks as projects start their seasonal work. At site we met up with Mr. Rokosh and Mr. Leroy to discuss current operations and the up coming summers activity.

## Area Inspected 1: The gravel pit and surrounding stock piles

# Latitude/Longitude:

#### Northing/Easting/Zone:

It was observed at the time of the visit there was no active crushing plant on site, through discussion with the site manager it was stated there will not be anymore crushing activity at the Westside S&G pit and only material will be removed from the existing stockpile until they are exhausted. Once complete, managers will work with the permitting groups over the next approx. 3 year period with the reclamation process.

Current operations will see the stockpiles sprained with an organic compound to mitigate dust from migrating off the piles as well the roads that are required will be sprayed with Mag-chloride to help suppress the dust off the roads that will be travelled by haul trucks as they are loaded and leaving site. Delineation barriers will be place in locations to minimize wide use of the site and minimize dust.

# Introduction

An inspection of mine # 1620313 (Westside Pit) was conducted by the Ministry of Energy, Mines and Low Carbon Innovation on September 22, 2021. This was a planned inspection conducted by Joel Woodfin-Inspector of Mines and Matthew Rota-Inspector of Mines. This report contains observations made by the inspectors. There are no outstanding requirements of the Permittee and/or Mine Manager at this time.

General Area Observations: The entire mine site

# Latitude/Longitude:

### Northing/Easting/Zone:

The site was in active and in good condition. Pit walls and stockpiles were sloped appropriately. Signage was in place and there were appropriate access controls in place. The weather was rainy and dust was not a concern on site.

# Introduction

This report is the result of a health and safety compliance verification conducted at the (Terus Construction) West side Pit on Mionday, May 9th, 2022

#### **Preamble**

During the inspection I, Jerrold Jewsbury inspector of mines met up with the mine manager (Jordan LeRoy) to discuss the summers activities regarding hauling from stock piles, Fugitive dust management and activity in the newly permitted area closest to the main road.

# General Area Observations: Entrance to the operation

# Latitude/Longitude:

#### Northing/Easting/Zone:

It was observed:

- 1. Terus has moved the weight scale closer to the entrance of the operation to encompass both operations that material could be leaving. It was discussed to ensure the Cranbrook office is made aware of the move in case there could be possible issues with the permit and a amendment is required.
- 2. Trees in the newly permitted area have been fallen and piled up for removal
- 3. The plan as discussed for dust control will be calcium being put down in the areas of travel. This will be happening as soon as possible when the site gets a break from the rain.

#### Introduction

An unannounced inspection of the Westside Pit, Mine #1620313, was conducted by the Ministry of Energy, Mines & Low Carbon Innovation on June 8th, 2022. This inspection was conducted by Matthew Rota-Inspector of Mines, Joel Woodfin-Inspector of Mines and David Mark-Sr. Geotechnical Inspector, with the purpose of regulating the health, safety and compliance of the Mines Act, the Health Safety and Reclamation Code and the Permit conditions issued to the permittee. The following Advisories and Request are the result of this inspection.

General Area Observations: The entire site was inspected.

#### Latitude/Longitude:

#### Northing/Easting/Zone:

No crushing or screening equipment was located on site. Stockpiles and dig faces were actively being loaded out at the time of inspection.

### Advisory 189898-S1-A1

Start/Stop notice:

Be advised that the HSRC places expectations on the manager to notify this Ministry regarding the Start or Stop of work at a mine site. To be clear; the intermittent removal of stockpiled material does not warrant a Start notification.

Pursuant to Section 6.2.1 of the HSRC; the manager shall give 10 days notice to an inspector of intention to start work in, at, or about a mine, including seasonal reactivation.

Pursuant to Section 6.2.2 of the HSRC; the manager shall give notice to an inspector of intention to stop work in, at, or about a mine, permanently, indefinitely, or for a defined period.

The Start/Stop notification can be sent to MMD-Cranbrook@gov.bc.ca or 250-417-6134

| Advisory Response:   |
|--|
| Respond Date:  |
| Advisory 189898-S1-A2  |
| The height of a few of the stockpiles are nearing the point where it is beyond 2 meters of the reach of the equipment on site  |
| Surface Mine Faces and Bench Heights: HSRC Section 6.23.3 - No part of a face or wall of a surface mine shall overhang. HSRC Section 6.23.4 - Where material is being worked or removed, the vertical component of the mining face shall not be greater than 2 meters beyond the reach of the loading equipment. |

Copies to

The Mine Manager is required to provide a written response within 15 business days of receiving the inspection report. The Manager's response must outline the remedial steps taken by a specified date and the work still outstanding. A copy must be provided to the inspector, and in the case of health and safety matters, the occupational health and safety committee and the local union. Appeals to a decision, order or ruling must made in writing to the Chief Inspector within 30 days after the issue date of the inspection report. In this document, Code means Health, Safety and Reclamation Code for Mines in British Columbia.

# Introduction

During the inspection I was accompanied by Chris LeClair- Senior Inspector of Mines, Cynthia Robinson- Inspector of Mines in training.

#### **Preamble**

- Site was gated but unlocked upon our arrival to site.
- Notice to this effect signage was in place and clearly visible. (at the gate and posted around the entire perimeter of the site)
- Scales at the front gate for measuring the weigh of trucks as they leave site.
- Speed limit signs were in place and radio communication channel
- · Site was very clean and organized
- · all stock piles were well sloped, free flowing and at rest
- Only one piece of equipment on site at the time of inspection (CAT 950F Loader) Loader being used by truck drivers as they load themselves when they arrive to the sites stockpiles
- Met with Truck driver s.22

from Elite Excavation as he arrived to load his truck.

# General Area Observations: General Pit Inspection

# Latitude/Longitude:

#### Northing/Easting/Zone:

During the Inspection the inspector Noted

- Areas of the site lacked code compliant shoulder barriers / Berms
- 950 Cat Loader on site without a handheld fire extinguisher

| Inspector        | Manager Initials | Report Date: 2023-01-25 | Westside Pit                                   |
|------------------|------------------|-------------------------|--|

|                  |                  |                         | Page 15 o <b>PageN</b> II <b>0120</b> 23-30970 |

- 950 Cat Loaders Pre op book was outdated to Sept 2021 (inspector intervened with Elite Excavation arrived and asked for a pre trip inspection to take place)

Status: Closed

- Loaders back up alarm and Horn does not work / Missing articulation lock out pin and the secondary egress safety ladder is broken off.
- Truck driver was not wearing code compliant PPE. (Inspector intervened and had discussion on site)

### Order 196456-S1-O1 (Inspection Mines):

Issued Pursuant To: Mines Act Section 15(4)

Section 6.9.1, Health, Safety and Reclamation Code for Mines in BC (MA), Haulage Road Width

#### Observation of Contravention:

During the inspection the Inspector Noted that there were areas that needed shoulder barriers / berms in place.

HSRC 6.9.1 The manager shall prepare a plan pursuant to section 10 (1) of the Mines Act which

- (1) Shows the type and method of construction for haulage roads that are to be constructed at the mine site.
- (2) Except for roads constructed prior to 1990, the manager shall ensure that haulage roads are designed, constructed and maintained to provide
- (a) a travel width where dual lane traffic exists, of not less than 3 times, or where single lane traffic exists, of not less than 2 times the width of the widest haulage vehicle used on the road, and
- (b) a shoulder barrier
- (i) at least 3/4 of the height of the largest tire on any vehicle hauling on the road,
- (ii) of a construction or a specification that is in general conformance to accepted engineering practice,
- (iii) located and maintained along the edge of the haulage road wherever a drop-off greater than 3 m exists, and
- (iv) incorporating breaks that do not exceed the width of the blade of the equipment constructing and maintaining the breaks to allow for drainage and snow clearance.
- (3) For the purpose of subsection
- (2) (a), the width of the barrier referred to in subsection
- (2) (b) shall be excluded from the travel width.

#### Remedial Action/Results To Be Obtained:

order Pursuant to HSRC 6.9.1 (b) a shoulder barrier

- (i) at least 3/4 of the height of the largest tire on any vehicle hauling on the road,
- (ii) of a construction or a specification that is in general conformance to accepted engineering practice,
- (iii) located and maintained along the edge of the haulage road wherever a drop-off greater than 3 m exists, and
- (iv) incorporating breaks that do not exceed the width of the blade of the equipment constructing and maintaining the breaks to allow for drainage and snow clearance.

To be rectified by Sept 24 -2022 Photo required upon completion

(Inspector reached out to manager Jordan Laroy and discussed areas of concerns and sent photographs).

# Order 196456-S1-O5 (Inspection Mines):

Issued Pursuant To: Mines Act Section 15(4)

Observation of Contravention:

During the inspection the inspector note that the horn and backup alarm was not working on the Cat 950f loader.

#### Back-up Alarm

HSRC 4.9.1 (1) The manager shall ensure that every unit of rubber tired mobile equipment in regular use at a mine in excess of 7000 kg gross vehicle weight is equipped with a back-up alarm which meets the requirements of SAE J-1446 and SAE J-994. Underground mobile equipment designed for bi-directional use shall be excluded from this requirement.

- (2) The alarm shall be clearly audible above the background noise at the workplace and it shall continue as long as the equipment is moving in reverse.
- (3) Mobile equipment operating in a mine may use a visual back-up alarm in place of an audible back-up alarm providing that the visual back-up alarm complies with the following criteria:
- (a) the light shall be clearly visible above the usual daily light levels,
- (b) actuation of the alarm shall be completely independent of the operator, and
- (c) the light shall flash as long as the vehicle transmission is in the reverse position.

#### Remedial Action/Results To Be Obtained:

order pursuant to HSRC 4.9.1 (1) The manager shall ensure that every unit of rubber tired mobile equipment in regular use at a mine in excess of 7000 kg gross vehicle weight is equipped with a back-up alarm which meets the requirements of SAE J-1446 and SAE J-994. Underground mobile equipment designed for bi-directional use shall be excluded from this requirement.

#### Advisory 196456-S1-A1

During the inspection the Inspector noted that the contractor on site was not wearing the code compliant PPE for a mine site. Please be advised to have a PPE discussion with contractors.

Workers Responsibility

HSRC 1.8.2 All persons shall wear the personal protective equipment as required by the code.

Protective Hat

| Jerrold Jewsbury |                  |                         | Mine No. 1620313 |

Status: Closed

HSRC 1.8.3 A protective hat complying with the relevant requirements of CSA Standard Z94.1-M 1977 Industrial Protective Headgear, and suitable for the type of work or activity being performed, shall be worn by persons where there is a risk of head injury or where required by the manager or an inspector. Where conditions may cause the hat to be accidentally dislodged

- (1) a device shall be incorporated into the hat and worn in order to prevent the hat being dislodged during a fall, and
- (2) in the case of underground work, a chin strap and hearing protection muffs attached to the hat shall be worn.

#### Protective Footwear

HSRC 1.8.4 Protective footwear complying with the relevant requirements of CSA Standard Z195-M1984 Protective Footwear, and suitable for the type of work or activity being performed, shall be worn by persons where there is a risk of foot injury or where required by the manager or an inspector.

#### Eye Protection

HSRC 1.8.5 Properly fitting goggles, face shields, or other eye protective equipment complying with the relevant requirements of CAN/CSA Standard Z94.3-M88 Industrial Eye and Face Protectors, and suitable for the type of work or activity being performed, shall be worn by a person who

- (1) is handling or is exposed to any material which is likely to injure or irritate the eyes,
- (2) is engaged in any work in which there is a risk of eye injury,
- (3) has 20/200 vision or is blind in either eye, or
- (4) is working or passing through an area which the manager or inspector has designated as requiring such protection
