

Mines Briefing

Date Aug 24/17

* What would a one-window mining permit project mgt look like? Not same as OCA b/c of smaller & more operators.

* Working to EAO for an UNDRIP framework. Doing a lot of work on building relations and partnership.

- Prospector Assistance program > BC used to have, Yukon, ON, QC. To restart requires gov & industry.

* We need greater technical expertise to review professional reliance > it will speed up permitting & result in better projects. Also prof reliance needs stronger regulatory association.
