Hi Susan,

I apologize if this has already been addressed. We have received about 200 of these messages. I believe they are likely sending to all MLAs as they are not our constituents. Will someone be responding to these emails centrally?

Thanks,

Amber Armstrong

Subject: Keep another dam out of the Peace Valley

Today I'm writing your government because I'd like you to cancel the Site C dam.

While the economic arguments are also important to me, today I wish to remind you that the wildlife and environmental impacts from this dam are unprecedented in the history of environmental assessment in Canada. No other project even comes close.

The valley bottom ecosystem in the Peace is unique and irreplaceable. There is no way to mitigate or compensate for the impacts of Site C. Fish, birds, wetlands and rare plants would all be affected. The islands moose and deer need for calving would be drowned. Other species — such as fishers — that rely on valley-bottom habitat would simply lose their habitat. The few remaining fish would be contaminated with mercury.

Fish and wildlife are about food security, for First Nations in particular. Please do not allow this project to go through. There is too much to lose for a project that we don't even need. B.C. deserves better.

The MAs in Energy, Mines and Petroleum Resources now have this in their hands; you do not have to respond to it and please do not set up a meeting for your MLA.

Or you can respond and thank s.22 for writing and let her know that the materials and meeting request have been send to the MO.

Thanks.

Seems our office wasn't the only popular one, that she wants to meet with many others. Have attached Susan to this list for her information.
Thanks everyone.
Gord

Subject: New UBC report compares employment from Site C vs the alternatives: Stopping Site C will create a larger number of sustainable jobs in BC

Dear Mr Farnworth

s.22

s.22 reports on Site C, and our work was extensively quoted by the BCUC in its recent Site C Inquiry Report.

Our team has done a new report comparing employment from Site C versus the alternatives. Significantly more jobs will be generated by the alternative portfolios, many of those jobs in the Peace Region.

I would welcome a meeting with you in order to brief you on our findings. The key reason I am reaching out is because of the importance of making a fact-based decision on Site C.

Please find attached three documents (also available at: http://watergovernance.ca/projects/sitec/):

1. UBC Briefing Note: Comparative Employment Assessment of Site C versus Alternatives

2. UBC Spreadsheet Analysis: Comparative Employment Assessment of Site C versus Alternatives

3. UBC Critique of Allied Hydro Council "Response to BCUC Report on Site C"

Below is a brief summary.

A new UBC report compares employment numbers from Site C versus the alternatives, and concludes: stopping Site C will create a larger number of sustainable jobs in the province, including in the Peace Region.

UBC's Program on Water Governance has conducted a detailed comparison of employment generated by Site C versus the alternative portfolios put forward by BC Hydro and the BCUC.

· *Our analysis indicates that terminating Site C and pursuing the alternatives results in modest job losses in the short term, and substantial job gains in the medium and long-term.*

· *These sustainable jobs are generated by remediation, conservation, and alternative energy projects.*

· *Terminating Site C and pursuing either alternative portfolio creates a higher number of sustainable jobs in the province, including in the Peace Region.*

· *Site C provides the least jobs per dollar spent.*

Feel free to get in touch with any questions.

Best,

s.22

Supply-side resource notes:

BC Hydro alternative presented in F-1-1, Appendix Q, p.8 of 28
All supply-side employment data quoted from 2013 IRP Appendix 3a-4 RODAT
Portfolio is adusted to create approximately the same 1132 MW and 5286 GWh/year as Site C
Pumped storage assumed to be Blinch - Stave in Lower Mainland, adjusted to 666 MW to keep
Pumped storage energy is negative as it is a net energy consumer; consumption based on 500 M
Pumped storage construction employment spread evenly over five years prior to operations
Revelstoke 6 omitted as this is a planned resource common to all portfolios

Site C Terminate notes:

Site C terminate employment related to remediation estimated as cost ratio of Site C constructi
Site C terminate employment related to monitoring presumed at same rate as Site C completio
Two years to remediate site, then 10 years to monitor site from BC Hydro submission to Site C I
Costs to terminate and remediate estimated at $1.8 billion from BCUC Final Report F-23 p.128,

DSM resource notes:
BC Hydro alternative portfolio does not include additional DSM resources

Employment Summary - Site C Terminate (Remediate and Monitor)

Resource	Capacity (MW)	ELCC (MW)	Energy (GWh/year)	Remediation Direct (p-years)
Site C Terminate	0	0	0	2106
TOTALS				

Site C Continue	1132	1132	5286	9754

Supply-side resource notes:

BC Hydro alternative presented in F-1-1, Appendix Q, p.8 of 28
All supply-side employment data quoted from 2013 IRP Appendix 3a-4 RODAT
Portfolio is adusted to create approximately the same 1132 MW and 5286 GWh/year as Site C
Pumped storage assumed to be Blinch - Stave in Lower Mainland, adjusted to 666 MW to keep
Pumped storage energy is negative as it is a net energy consumer; consumption based on 500 M
Pumped storage construction employment spread evenly over five years prior to operations
Revelstoke 6 omitted as this is a planned resource common to all portfolios

Site C Terminate notes:

Site C terminate employment related to remediation estimated as cost ratio of Site C constructi
Site C terminate employment related to monitoring presumed at same rate as Site C completio
Two years to remediate site, then 10 years to monitor site from BC Hydro submission to Site C I
Costs to terminate and remediate estimated at $1.8 billion from BCUC Final Report F-23 p.128,

DSM resource notes:
BC Hydro alternative portfolio does not include additional DSM resources

Employment Summary - Site C Continued

Resource	Capacity (MW)	ELCC (MW)	Energy (GWh/year)	Construction Direct (p-years)	Construction Indirect (p-years)
Site C Continue	1132	1132	5286	9754	27997
TOTALS					

Site C resource notes:

All employment data derived from 2013 IRP Appendix 3a-4 RODAT

Site C energy and capacity adjusted to 2017 values of 1132 MW and 5286 GWh/year

Site C employment assumed to be spread equally over remaining construction period

FORCE OF NATURE

GIVE THE PEACE A CHANCE!

THANK YOU FOR KEEPING YOUR PROMISE TO SEND SITE C TO THE BCUC!

I appreciate that our new government has limited the harm of the ongoing construction by putting a hold on evictions, new contracts, and hiring while the BCUC review takes place. However, BC continues to spend $2 million every day on this unnecessary project.

We are calling on British Columbia's elected officials to:

A) Stop wasting taxpayers' money; halt construction of the project while the BCUC review and cabinet decision are pending,
B) Respect UNDRIP; require that the project obtain the free, prior and informed consent of all affected First Nations, and
C) Ensure that the final decision on Site C by cabinet is timely and is based on a thorough understanding of Indigenous rights, environmental consequences, food security, and other important issues that won't be included in the BCUC report.

Subject: Site C information

Hello. The BC Utilities Commission report on Site C will be delivered to government today and will become public shortly. MLAs have been advised to not take meetings on this issue during the time that government is deliberating on the report and preparing our response – which is expected by the end of this year. Please find attached key messages and questions & answers as well as a suggested template letter to assist in responding to communication coming in about the report and the issue. Please remember that this information is not for distribution beyond this list. It is being distributed to you to assist in responding to the issue. Feel free to get in touch if you need more information or have questions. Thanks, Roseanne.

Roseanne Moran | Executive Director | New Democrat BC Government Caucus

QUESTION AND ANSWERS (MLAs)
SITE C REVIEW – FINAL REPORT
Nov. 1, 2017

Government Caucus/Ministry of Energy and Mines

- Our government initiated the BCUC review of Site C to assist us in making the best decision to keep BC Hydro rates affordable for people.

- When it comes to both hydro and ICBC, bad BC Liberal political decisions, made hastily and without proper scrutiny, resulted in jacked up rates for people across BC.

- This is an important decision, and will take time.

- The BCUC's findings are based on 620 written and 304 oral submissions from individuals and organizations, and thousands of pages of information on the project provided to the BCUC and made available to the public.

- Now it is our turn, as government, to determine whether Site C is in the best interests of British Columbians, after considering the BCUC's findings and other issues outside the scope of this review.

- We don't want to pre-judge the decision in anyway, so I will not be commenting or taking meetings on the specific findings in the final report at this time, but I would encourage everyone to go to the BCUC website and read it.

If asked about timing of decision:

- This will be an extremely difficult decision – we inherited a project that was advanced by the previous government without proper regulatory oversight and that is now more than two years into construction, employs more than 2,000 people and on which about $2 billion has already been spent.

- We are going to take the time we need to make a decision on Site C that works for B.C. families, businesses and the sustainability of our environment and economy.

- As part of our decision-making process, this month the Minister of Indigenous Relations and the Minister of Energy, Mines and Petroleum Resources will be meeting with Treaty 8 First Nations impacted by the project. We will also be taking other First Nation interests expressed during the Site C review and other processes into account.

- Given the complexity of the issues involved and the significant and long-term impacts for our province, this is a decision we take very seriously. We anticipate a decision by the end of the year.

Questions and Answers

1. What do you think of the BCUC's findings?

The BCUC's findings are based on 620 written and 304 oral submissions from individuals and organizations, and thousands of pages of information on the project provided to the BCUC and made available to the public.

Now it is our turn, as government, to determine whether Site C is in the best interests of British Columbians, after considering the BCUC's findings and other issues outside the scope of this review.

I don't want to pre-judge that decision in anyway, so I will not be commenting or taking meetings on the specific findings in the final report at this time, but I would encourage everyone to go to the BCUC website and read it.

2. When can we expect a decision from Government on Site C?

We are going to take the time we need to make a decision on Site C that works for B.C. families, businesses and the sustainability of our environment and economy.

As part of our decision-making process, this month the Minister of Indigenous Relations and the Minister of Energy, Mines and Petroleum Resources will be meeting with Treaty 8 First Nations

impacted by the project. We will also be taking other First Nation interests expressed during the Site C review and other processes into account.

Given the complexity of the issues involved and the significant and long-term impacts for our province, this is a decision we take very seriously. We anticipate a decision by the end of the year.

3. **After rushing the BCUC through an expedited review process, why aren't you committing to a quick decision?**

This will be an extremely difficult decision. We inherited a project that was started by the previous government without independent oversight by the province's energy regulator and that is now more than two years into construction, employs more than 2,000 people and on which about $2 billion has already been spent.

We recognize that lives are on hold pending our decision – especially in the Northeast. However, given the complexity of the issues involved and the significant and long-term impacts for our province, this is a decision we take very seriously.

We are going to take the time we need to make a decision on Site C that works for B.C. families, businesses and the sustainability of our environment and economy.

As part of our decision-making process, this month the Minister of Indigenous Relations and the Minister of Energy, Mines and Petroleum Resources will be meeting with Treaty 8 First Nations impacted by the project. We will also be taking other First Nation interests expressed during the Site C review and other processes into account.

4. **Why are you allowing construction to continue at a cost of about $2 million per day while you take the time to make a decision?**

Construction is slowing down with winter approaching but there are still over 2,000 people working at Site C. We don't think it is fair to those workers and their families to stop construction while we are still deciding whether or not to continue with the project.

5. **What will be the most important factor for Government in making your decision on the project?**

Ultimately, our decision on Site C will be based on keeping rates affordable for B.C. families and businesses in the long term.

Background on Review:

6. What did you ask the BCUC to do in its review of Site C?

Under the terms of reference for the review the BCUC was asked to confirm whether or not BC Hydro is on target to complete Site C on time and on budget, and provide advice on implications for ratepayers associated with:

- Proceeding with the project,
- Suspending the project, while maintaining the option to resume construction until 2024, and
- Terminating the project, remediating the site and proceeding with other resource portfolios that provide the same level of benefits at the same or lower costs as Site C.

7. How did the BCUC conduct its review?

The BCUC determined the process for the review.

The first phase of the review consisted of fact gathering to inform a preliminary report. In addition to BC Hydro's submission, the BCUC received submissions from over 160 individuals and organizations. The BCUC also engaged Deloitte LLP, a consulting firm, to produce independent analysis on questions raised in the terms of reference for the review. The BCUC released its preliminary report on September 20th.

Following the release of its preliminary report, the BCUC held a series of 11 community input sessions and three First Nations input sessions around the province to gather comment.

The BCUC's findings are based on 620 written and 304 oral submissions from individuals and organizations, and thousands of pages of information on the project provided to the BCUC and made available to the public.

The BCUC delivered its final report on November 1, 2017 and posted it to its website.

Background on Site C:

8. What is Site C?

Site C is a third dam and hydroelectric generating station on the Peace River in northeast B.C. approximately 7 kms from Fort St. John. The other two dams are the W.A.C Bennett dam (1968) and the Peace Canyon dam (1980).

Site C will provide 1,100 megawatts of capacity, and produce about 5,100-gigawatt hours per year, the amount of energy needed to power the equivalent of 450,000 homes per year.

In December 2014, the project received approval from the previous government to proceed to

construction. Construction commenced July 27, 2015 with a targeted completion date of 2024.

9. How many people are working on Site C?

As with any construction project, the number of workers — and the proportion from any particular location — will vary month-to-month and also reflects the seasonal nature of construction work.

For example, this fall the main civil works contractor Peace River Hydro Partners (PRHP) has laid off approximately 300 workers due to the completion of roller-compacted concrete work for the season, the stoppage of work on the left bank of the project and PRHP's ongoing workforce management.

BC Hydro's latest employment statistics from August 2017 show that there were 2,357 total workers on the Site C project. Of the total workers, 1,900 were from British Columbia, or 81%. There were 626 workers on site from the Peace River Regional District — that's 32% of the construction and non-construction contractor's workforce.

10. How much has BC Hydro spent on Site C to date?

As of December 31, 2017 approximately $2.1 billion will have been spent on the project.

TEMPLATE MEETING REQUEST/LETTER/EMAIL RESPONSE
SITE C REVIEW – FINAL REPORT
Oct. 27, 2017

Ministry of Energy and Mines

Thank you for writing about the Site C dam.

As you may be aware, on August 2, 2017, the Government directed the BC Utilities Commission (BCUC) to undertake a review of the Site C project and provide advice on ratepayer impacts should the project be continued, cancelled or suspended. Our Government initiated the BCUC review of Site C to ensure we make the right decision for B.C. families and keep BC Hydro rates affordable in the long-term.

The BCUC has completed the review and their work has been informed by technical experts, a broad range of stakeholders, hundreds of members of the public and First Nations. The level of participation shows just how important the issue of Site C is to everyone and supports our decision to send the project to the BCUC. This is an important decision, and the Government appreciates and thanks all who participated and shared their views.

We will now take the time we need to consider the findings and other issues that are outside the scope of the review and make a decision on whether or not Site C is in the best interests of British Columbians. Given the complexity of the issues involved and the significant and long-term impacts for our province, this is a decision we take very seriously. We anticipate a decision by the end of the year.

Once again, thank you for taking the time to contact my office. I appreciate you reaching out to share your perspective with me.

Sincerely,

xx

Hi Susan;
For distribution.
Here is some background, lines on the SCC/Jumbo ruling yesterday and an article with MDD comments. They are minimal;

- The proponent of the Jumbo resort is still out of compliance with the BCEAO. We await the decision of the courts on this issue.

s.13

ADVICE AND RECOMMENDED RESPONSE:

Ruling in favour of the Province -

s.13

Key Facts Regarding the Issue:

On Nov. 2, 2017, the Supreme Court of Canada unanimously dismissed the Ktunaxa appeal of the Province's approval of the master development agreement for Jumbo Glacier Resort.

On May 2, 2014, the Ktunaxa filed an appeal asking the Court of Appeal to set aside the April 2, 2014 B.C. Supreme Court decision which upheld the March 20, 2012 approval of the Master Development Agreement for Jumbo Glacier Resort.

On May 29, 2014, the B.C. BC Court of Appeal sat to hear the above appeal by the Ktunaxa regarding the Master Development Agreement. The hearing ended May 29th with the judgement being reserved.

On Oct. 1, 2015, the Province was served with a Notice of Application for Leave to Appeal and Memorandum of Argument from the Supreme Court of Canada, seeking leave to appeal from the Aug. 6, 2015, unanimous reasons of the BC Court of Appeal, in which the appeal of the Ktunaxa was dismissed.

On March 17, 2016, the Supreme Court of Canada indicated it would hear the Ktunaxa's appeal. The hearing date was set for Dec. 1, 2016 and oral submissions were presented.

Background:
On June 18, 2015, the Minister of Environment determined that the Jumbo Glacier Resort project had not been substantially started and as a result, the Environmental Assessment Certificate (EAC) expired on Oct. 12, 2014. With the expiration of the EAC, the Master Development Agreement holder, Jumbo Glacier Resorts is unable to develop the project's current Master Plan unless it undergoes a new environmental assessment review process and achieves a new EAC. The Master Development Agreement remains in effect, however, and allows Glacier Resorts to submit a revised Master Plan.

In July 2015, Jumbo Glacier Resorts notified the Province of its intention to submit a modified resort Master Plan. The Province has not formally accepted a Revised Master Plan at this time and has instructed Jumbo Glacier Resorts on what the legal, contractual and policy requirements of a revised Master Plan are. They were also instructed a Revised Master Plan will require First Nations Consultation and agency and stakeholder review.

On Nov. 30, 2012, the Ktunaxa Nation Council filed a petition for judicial review with the B.C. Supreme Court seeking to have the Court set aside the Jumbo Glacier Resort Master Development Agreement approved by the Minister of Forests, Lands and Natural Resource Operations, the named respondent. Rallies were held in both Vancouver and Cranbrook the same day.

The petition was subsequently amended on Feb. 22, 2013 and Glacier Resorts Ltd. was added as a respondent via a consent order entered on September 13, 2013. The province filed its response in August 2013. A 10-day hearing was held in B.C. Supreme Court in January 2014. On April 2, 2014, the B.C. Supreme Court dismissed the Ktunaxa's petition for a judicial review of the Minister's decision.

On Nov. 20, 2012 the Minister of Community, Sport and Cultural Development approved the incorporation of Jumbo as a mountain resort municipality. The Minister of Community, Sport and Cultural Development also appointed a municipal council for a term ending Nov. 30, 2014. An interim corporate officer was also named and served until the first council meeting of the new municipality. A separate petition for judicial review was filed on February 13, 2013, by the West Kootenay Community Ecosociety seeking to quash the Letters Patent issued November 19, 2012 incorporating the municipality. The council's term has been extended to December 3, 2018.

On March 20, 2012 the Minister of Forests, Lands and Natural Resource Operations approved the Jumbo Glacier Resort Master Development Agreement, allowing the resort to proceed. The decision included approval to build a 6,250-bed-unit ski resort in the headwaters of the Jumbo Creek valley, in the Purcell Mountains, 57 km west of Invermere. The resort was to be built on the site of an old sawmill and at the former Mineral King mine, which operated there until 1991. At full build-out, private capital investment was projected to total $900 million. The project was estimated to provide 3,750 person years of construction employment, and 750-800 permanent direct jobs.

Consultation was completed by the Province with both the Ktunaxa Nation Council and the Shuswap Indian Band. The Shuswap were supportive of the project and have subsequently entered into a benefits agreement with the resort developer. Following consultation, which focused largely on potential impacts to grizzly bears and other wildlife, the Ktunaxa declared that they were adamantly opposed to the resort proposal, and have said that the approval of Jumbo would be a "declaration of war."

From 2009 forward, the Ktunaxa Nation Council claimed that the Jumbo Valley area is the physical centre of its spiritual relationship with the grizzly bear and as a result that there was no "middle ground" with respect to their acceptance of

the Jumbo Glacier Resort. On Nov. 15, 2010, members of the Ktunaxa Nation travelled to the provincial legislature and presented a declaration claiming the entirety of the Toby-Jumbo watershed as part of Qat'muk [GOT MOOK], unilaterally establishing refuge and buffer areas and invited other governments and stakeholders to participate in developing a management plan for Qat'muk [see Qat'muk IN].

s.13,s.16

Ministry of Environment indicated potential impacts to grizzly bears had been addressed through the conditions of the *Environmental Assessment Act* certificate and measures incorporated in the Resort Master Plan and Master Development Agreement.

Subject: Jumbo Wild

Dear Katrine

I was devastated to learn that the Supreme Court has dismissed the case of local first nations people who are fighting to protect Jumbo glacier and keep Jumbo Wild.

Now that we have a progressive government in the Legislature who respects First Nations rights and interests, will your government take action to stop the permanent destruction that will take place if foreign interests get to build that much hated ski resort. There are already so many other abuses besides environmental attacks that should be a concern, such as the owners of the project declaring themselves a city council in order to obtain provincial funding or considerations that real towns and cities are entitled to.

Surely there is a way for our new responsible government to treat this potential destruction of pristine natural land with the same urgency as you have shown to intervene against pipelines. That is true leadership.

I hope this matter will form part of the government's action and I'm sure it should gain the support of the Green Party allies.

I look forward to your reply

Sincerely, s.22

Melissa – please see Hilary's note below. Will you send me something today specifically for the constituency offices to use across the board, or should CAs create their own responses using key messages and the press release?

To: Vasilev, Susan <Susan.Vasilev@leg.bc.ca>

Do we have any direction on sending out replies to all the Site C emails we've been receiving, once the decision is made public?

The messaging we've gotten so far will be useful, but I'm wondering if there will be an official coordinated response, if we're encouraged to contact people or hold off on contacting them, etc.

Subject: response from the COs - Site C
Attachments: Site C - CO response- December 11, 2017.xlsx; Dec 11 Site C calls- Premier Horgon Co.docx

Roseanne and Melissa – only heard from one third of the offices but in most cases it has been less negative response than anticipated. There will probably a bunch of calls on the CO answering machines overnight.

We will continue updating this document and get a sense of how things are overall tomorrow on the con call at 11:30am.

I've also attached the calls to PJH's constituency office.

Susan

Comments/ Notes
Received several emails from people outside of our riding who are upset with go ahead of Site C. They claim they will not support NDP and a few of them were donors and members and will stop doing so.
Same volume as over the last three weeks, approx 85% against the project and 15% for the project. All i
Office was quiet in terms of constituents who called and walked in, there were significantly more people calling last week. Only 4 left voicemail messages opposing the decision They also received little

A lot of the sentiment has been that people feel betrayed and disheartened. A lot of people saying they will never vote NDP again. A few people saying they regret donating and volunteering on NDP campaigns. The ones most upset are the long-time NDPers who have volunteered, etc.
We have had a much slower day then we had anticipated. Less people are calling compared to last week.
No Phone calls or walk-ins.
Less contact than expected. All calls were opposed and all angry and some using very profane language. Emails are mixed boiler plate to all MLAs/the premier and individual constituent notes. Again all opposed and angry.
112 non-constituent emails against Site C decision today. About 25 calls and walk-ins total, most fairly angry.
Many have said they will be cancelling their memberships or will not vote NDP again.

Dissappointed, some want more explanation
Post-announcement there was two calls, both unhappy. 11 emails specifically in reaction to the decision, and all have expressed disappointment. They have all been individually addressed and
Shared the Premier's video on Facebook and it has had lots of comments (about 40), mostly negative, but some neutral or positive.
They had a flurry of emails over the weekend against the project but none today. Only one person serio

usly uset on the phone. The others seemed to understand the reasoning behind the decision.

Dec 11 Site C calls:

No name: cancel site c or will never vote for NDP again (20 something)

Alisma

Apologies that I was away last week and did not see this request. I am copying Melissa Sanderson and Tim Howlett to see if there is any new messaging on Site in the last month; it would be good to send out to all constituency offices as MLAs are spending more time there now.

Dear Minister Chen,

Please see attached a meeting invitation regarding an upcoming FortisBC project that will be of interest to your constituents.

We would appreciate the opportunity to brief both you and your constituency staff on project details and timelines.

Best Regards,

William Hyde

The Honourable Katrina Chen, M.L.A.
Minister of State for Child Care
MLA for Burnaby - Lougheed

Sent via email to: Katrina.Chen.mla@leg.bc.ca

Dear Minister Chen,

As you may know, we're preparing to replace 20 kilometres of existing natural gas line in Coquitlam, Burnaby and Vancouver in 2018 in order to increase capacity, improve the reliability of our system and facilitate easier access for ongoing maintenance so we can best meet the current and future needs of our customers.

We would appreciate the opportunity to brief you and your constituency office staff on upcoming construction details, the anticipated construction schedule, and what resources we have made available to them should they receive feedback from constituents related to the project. We are happy to meet at a time and place of you and your staff's convenience.

We look forward to working with you on initiatives and programs that help provide clean, reliable and affordable energy to the people of British Columbia.

Sincerely,

William Hyde
Community Relations Liaison
FortisBC
