Subject: Bill for PM signature
Importance: High

Good morning,

I am advised that Minister Mungall is the current Presiding Member of the Executive Council.

Please be advised that Presiding Member signatures are required today for one Bill, which will be uploaded to the Minister's iPad momentarily.

Note that two documents require signatures in the following places:

- **Bill 11 complete (sign page 1)**
- **Bill 11 covers (sign pages 1 and 2)**

These documents will be accessible on the Minister's iPad in PDF Expert in the "Signing" folder (please note that the Minister will need to do a Full Sync in order to retrieve the item – and "push changes" and "full Sync" once the Bill has been signed).

Please let me know as soon as possible if you have any questions or anticipate any delays in signing.

Thank you,

Byron Plant | Manager and Registrar, Official Documents

Hi Lucy,

Minister Mungall and Chief Jim had a conversation last week and he suggested that he might be able to come down to Victoria to meet with the Minister.

I'm reaching out to you in the hopes of setting up a meeting ASAP.

The following dates I'm able to offer Victor Jim:

- April 16th at 3PM
- April 17th at 3:30PM
- April 19th at 2PM.

Please advise.

Thanks kindly

Subject: Arranging a meeting

Hello Lucy,

I would like to help Hegus (Chief) Clint Williams of Tla'amin First Nation (just outside Powell River) get a meeting with Minister Mungall about the interesting proposal described in the attached document.

"The sooner the better" were the words of the Hegus when I asked about the urgency of the request.

Could you ensure this gets into the right track? I will be happy to help arrange things.

Thanks,

Nicholas

Kootenay Lake Chamber of Commerce
Box 120, Crawford Bay, BC V0B 1E0
www.kootenaylake.bc.ca info@kootenaylake.bc.ca

March 30th, 2018

Honourable Michelle Mungall;

The business community along the East Shore of Kootenay Lake would like to provide more input on the Kootenay Lake Ferry Project. A high percentage of year-round users of the Kootenay Lake Ferry are either East Shore business customers or residents who cross the lake for business & personal reasons. Particularly for a business with supply lines, viability and competitiveness can be negatively impacted. We are very appreciative that upgrades are proceeding, and that real consultation is coming to the east as well as the west shores.

At our last Chamber of Commerce meeting (representing more than 70 businesses and associations) along the East Shore of Kootenay Lake) a motion was passed to: **“request to the Ministry of Transportation & Infrastructure to suspend action on the Kootenay Lake Ferry Project until the project fully addresses all land and marine safety issues and also the project addresses all anticipated cumulative costs to the Ministry as well as the detrimental economic impacts to the travelling users, including public, industry and community.”**

The SNC Lavalin report stated: “The results of the study indicated that the relocation of the Balfour ferry terminal to Queens Bay North was not only technically feasible, it was a superior choice when critically compared under the categories of safety, service, community/stakeholder impact, environmental impact, and financial.” This is a project for the future and needs more intensive understanding and consideration. Surely we can work with our neighbours in Balfour/Queen's Bay to come up with solutions that work for us all.

We invite the ministry to suspend their project and continue to work with community and business representatives, on *both* shores of the lake, so we can identify potential improvements, lessen impacts and potentially make things more efficient. We would be pleased to facilitate future conversations.

On Behalf of over 70 East Shore Businesses and Associations

Subject: MEDIA REQUEST - CBC - BCH Rates/affordability (short deadline)
Importance: High

Hi Melissa/James,

Would the Minister be interested in a pre-tape before this segment takes place today (before noon –so short deadline). The actual show is booked but pre-tape option is open. We would just need to get call-in detail. Alternative is to provide the statement about the BCUC decision – the CBC producer said it could be referenced. It's attached.

Reporter

Bridgette Watson, Producer
CBC - Vancouver
Bridgette.watson@cbc.ca
604-662-6982 c: 604-220-5862

Deadline ASAP**Request**

CBC BC Almanac called. They are doing a segment today from noon to 12:30 on affordability in BC. CBC wants to talk to MMM before the broadcast to find out what's happening with BCH rates.

Recommendation: Schedule time for the Minister to pre-tape (key messages below) or provide statement.

- Government is disappointed the BCUC did not approved BC Hydro's request for a one-year rate freeze.
- A 3% rate increase means the average residential customer's electricity costs will increase by around \$23 per year. This is about \$2 more per month. Small commercial customers like small offices and restaurants will pay about \$5 more per month.
- We completely understand the affordability crisis so many families face, and will be taking action quickly to address the need to reduce electricity costs for those who need it most.

Lifeline Rate:

- Government will work with BC Hydro and customer groups on a lifeline rate program. The program could mean that people who have demonstrated need would have access to a lower rate for their electricity.

Other affordability measures:

- In addition, starting in May, BC Hydro residential customers who find themselves in an emergency – such as loss of employment, unanticipated medical expenses or pending eviction for example – will be eligible for a grant toward their outstanding BC Hydro bill. The grant is up to \$600 and does not need to be repaid.
- In February, BC Hydro announced enhanced measures to help customers manage higher winter bills, including a winter payment plan giving customers the option to spread bill payments over a six-month period, and increased funding for low-income energy conservation programs.
- To lower electricity costs for B.C. businesses and industries, we are phasing out the PST on electricity. Following the 50% reduction that started on Jan. 1, 2018, government will completely eliminate the PST on non-residential electricity on April 1, 2019. Residential use of electricity is already PST-exempt.

- Eliminating the PST on electricity will translate into savings of more than \$150 million annually for B.C. businesses. This will help them create more jobs for British Columbians, expand into new markets, and reinvest in new technologies.

BC Hydro review:

- Our government will also undertake a comprehensive review of BC Hydro to make it work for people.
- The review will identify changes and cost savings to keep rates low while ensuring BC Hydro has the resources it needs to continue to provide clean, safe and reliable electricity.

BCUC:

- We respect the BCUC's work and diligence as British Columbians' independent regulator. Although disappointed with their decision, we understand their concerns and will work to address them while implementing ways to make life more affordable for B.C. families.

Request

Via CBC request: We are hoping Minister Michelle Mungall can join us for an interview to respond to some of the concerns raised by Mr. Parfitt about what he says is a continued lack of oversight of oil and gas development in BC. We're wondering how the BC NDP are dealing with 92 dams allegedly built without approval.

Time slots available for a 6 to 8 minute live interview with the Minister this week:

Wed at 8:10 a.m.
Thurs at 6:50 a.m. OR 8:10 a.m.
Fri at 8:10 a.m.

Recommendation

- The protection of British Columbia's environment is a priority for the new government. We are monitoring this, and all oil and gas operations, closely to ensure that the industry is acting responsibly and in accordance with our regulations.
- Oil and Gas Commission staff, along with other ministries have conducted site visits and inspections and are continuing to monitor the dams to ensure they don't pose a threat to the environment.
- The companies are now going through the process they should have completed before to apply for water licenses. No water is permitted to be used from the dams until that process is complete.
- The Commission has also issued compliance orders requiring companies to reduce water levels by half, or in some cases to drain the water completely.

- The Commission has new staff and new procedures to ensure this can't happen again.
- The provincial government will continue to monitor the situation closely to ensure the environment and public safety is protected.

92 dams:

- The BC Oil and Gas Commission is responsible for bringing the 51 dams on crown land into compliance.
- The Ministry of Forests, Lands, Natural Resource Operations and Rural Development oversees the implementation of the dam safety regulation under the Water Sustainability Act on private land – and has designated BC Oil and Gas Commission staff as Dam Safety Officers to ensure all industry dams are compliant.
 - The Ministry of Forests, Lands, Natural Resource Operation and Rural Development is responsible for bringing the 41 identified dams on private land into compliance.

Attention: Honourable Michelle Mungall, Minister of Energy, Mines & Petroleum, MLA Nelson-Creston
Re: Kootenay Lake Ferry Terminal Relocation

Dear Madam,

In the waning days preceding the last BC provincial election a decision was made by the then Minister of Transportation and Infrastructure, the Honourable Todd Stone, to shelve Marine Branch investigations into the feasibility and advisability of relocating the Kootenay Lake western ferry terminal from Balfour

to Queens Bay North. It was a political decision not based upon merit or the best interests of BC citizens.

Mr. Stone's decision was made against the backdrop of an escalating local protest by Balfour and vicinity residents which threatened to become an embarrassment to the incumbent BC Liberal government at a delicate pre-election moment.

The MoTI Marine Branch public consultation process preceding the decision was biased and gave disproportionate weight to the expressed preferences of residents and businesses in the Balfour/Queens Bay area. This failure in process effectively denied equal opportunity and voice for East Shore business and resident counterparts, the principal year round users of the ferry, to have their social, economic, and public safety concerns heard and taken into account in the Ministry decision.

The Balfour terminal site had been identified by three successive MoTI commissioned studies as unsafe from both a marine and highway perspective, requiring costly initial and recurrent dredging of the Balfour navigation channel, and requiring an expensive replacement of the aging MV Balfour . The last and most comprehensive feasibility study by SNC Lavalin in 2016 concluded "The results of the study indicated that the relocation of the Balfour ferry terminal to Queens Bay North was not only technically feasible, it was a superior choice when critically compared under the categories of safety, service, community/stakeholder impact, environmental impact, and financial." In its recommendation SNC Lavalin, a globally renowned engineering corporation, was explicit, unreserved and unambiguous.

MoTI Marine Branch is now in the last days of the post-decision public consultation. It is seen as meaningless by East Shore Kootenay Lake citizens. Trying to overcome an ill-conceived politically motivated bureaucratic bungle is hopeless unless those in power in our present government step forward. We elected an NDP government because we believe that you place the welfare and safety of all BC citizens paramount, because you demand that taxpayer money be spent wisely, because you will not tolerate environmentally irresponsible actions, and because you will not support the self-serving political machinations of the previous Liberal government.

I ask that you familiarize yourself with the enclosed commentary which develops the concerns referred to above. Please recommend to the Honourable Claire Trevena, Minister of Transportation and Infrastructure, that she instruct the Marine Branch to suspend further progress on Balfour terminal improvements, including dredging, until a comprehensive review of the present decision and alternatives to it can be performed.

Respectfully,

Hi, I wasn't sure who to send this to for approval. I'll need it back by 1:00 p.m. tomorrow (April 4) please. It has to go to the editors before 3:00 p.m.

News release for Thursday afternoon announcing new FrontCounter location in Nelson for review and approval.

"The opening of a FrontCounter BC in Nelson is great news," said Mungall. "It means residents and businesses will have the tools and support they need to grow and expand, and it means more services for our community." TBC

"By expanding FrontCounter BC services into Nelson, government is following through on its commitment to help strengthen economic development opportunities in rural communities," said Donaldson. "This new office provides a one-stop location for a wide array of government services, including natural resource authorizations." TBC

(I'll have speaking notes and itinerary ready for you tomorrow.)

Thank you,
Lindsey

Lucy,

My name is Suzanne Goldberg and I am the Director of Public Policy for ChargePoint in Canada – [ChargePoint](https://www.chargepoint.com) is the leading provider of electric vehicle charging solutions, with over 46,000 charging points in North America, of which over 800 charging points are located in BC. In addition to our over 800 charging points, we have a number of employees and contractors in BC who sell, distribute and install ChargePoint stations across the province. We are encouraged by the Government's current electric vehicle supportive programs and would like to engage the Minister on how additional policies like BC's low carbon fuel standard could be leveraged to further support electric vehicle adoption and fund investment in electric vehicle charger deployment. We would like to schedule a meeting with Minister Mungall at her earliest convenience in March to discuss this topic.

Thank you, Please advise if you need any additional information from us.

-Suzanne

To: EMPR FOI EMPR:EX
Subject: Call for Records EMP-2018-81879 Due March 29, 2018 Analyst Bradley Cranwell

Your Ministry has received a formal request made under the *Freedom of Information and Protection of Privacy Act* (FOIPPA). The request is for:

All communication between Sonia Furstenuau and the Minister or the staff of the Minister's Office. (Date Range for Record Search: From 09/01/2017 To 02/28/2018) – Date Format: MM/DD/YYYY

The following public bodies have also received this FOI request: TRA, TAC, MSD, PSS, OOP, MAH, MHA, LBR, JTT, IRR, HTH, FNR, FIN, MOE, EMP, EDU, CTZ, CFD, MAG, AGR, and AED.

Please complete the attached Call for Records form.

- If search and retrieval time is anticipated to exceed 3 hours and/or the total volume of records exceeds 200 pages, complete **only** sections 1 & 2 of the Call for Records form as we may be in a position to issue a fee estimate. Return the form to IAO by **March 21, 2018**. Please await further instruction from IAO as the records will not be required until the fee estimate process has been completed. Once fees have been paid or waived, IAO will contact you to continue the call for records process.
- **If no fees apply** then complete the attached Call for Records form and return it to IAO by **March 29, 2018**.
- Send records via email in **PDF format**. Before you turn emails into PDFs, ensure that you have included all attachments. If email is not possible, please put the records on the **File Share** and notify IAO that the records are available.

You should be aware that *FOIPPA* obligates us to assist the applicant and to respond without delay, openly, accurately, and completely. In the event that your Ministry must defend the adequacy of its search to the Information and Privacy Commissioner at Inquiry, those involved in searching for records may be required to sign affidavits confirming they have conducted an adequate search for relevant records.

Please do not hesitate to contact IAO to discuss: whether the records may be routinely releasable; whether the information is being prepared for public release or is already publicly available; ways in which an applicant may want to narrow/focus their request to reduce potential fees; and/or any other questions or concerns relating to this request.

Thank you for your assistance,

Resource Team

Return the form to IAO by **March 21, 2018**. Please await further instruction from IAO as the records will not be required until the fee estimate process has been completed. Once fees have been paid or waived, IAO will contact you to continue the call for records process.
- **If no fees apply** then complete the attached Call for Records form and return it to IAO by **March 29, 2018**.
- Send records via email in **PDF format**. Before you turn emails into PDFs, ensure that you have included all attachments. If email is not possible, please put the records on the **File Share** and notify IAO that the records are available.

You should be aware that *FOIPPA* obligates us to assist the applicant and to respond without delay, openly, accurately, and completely. In the event that your Ministry must defend the adequacy of its search to the Information and Privacy Commissioner at Inquiry, those involved in searching for records may be required to sign affidavits confirming they have conducted an adequate search for relevant records.

Please do not hesitate to contact IAO to discuss: whether the records may be routinely releasable; whether the information is being prepared for public release or is already publicly available; ways in which an applicant may want to narrow/focus their request to reduce potential fees; and/or any other questions or concerns relating to this request.

Thank you for your assistance,

Resource Team

Subject: Call for Records EMP-2018-81944 Due March 29, 2018 Analyst Marc Everitt

Your Ministry has received a formal request made under the *Freedom of Information and Protection of Privacy Act* (FOIPPA). The request is for:

All emails between the Minister/Premier's Office and Roseanne.Moran@leg.bc.ca (Date Range for Record Search: From 06/30/2017 To 03/12/2018) – Date Format: MM/DD/YYYY

The following public bodies have also received this FOI request: TRA, TAC, MSD, PSS, OOP, MAH, MHA, LBR, JTT, IRR, HTH, FNR, FIN, MOE, EMP, EDU, CTZ, CFD, MAG, AGR, and AED.

Please complete the attached Call for Records form.

- If search and retrieval time is anticipated to exceed 3 hours and/or the total volume of records exceeds 200 pages, complete **only** sections 1 & 2 of the Call for Records form as we may be in a position to issue a fee estimate. Return the form to IAO by **March 21, 2018**. Please await further instruction from IAO as the records will not be required until the fee estimate process has been completed. Once fees have been paid or waived, IAO will contact you to continue the call for records process.
- **If no fees apply** then complete the attached Call for Records form and return it to IAO by **March 29, 2018**.
- Send records via email in **PDF format**. Before you turn emails into PDFs, ensure that you have included all attachments. If email is not possible, please put the records on the **File Share** and notify IAO that the records are available.

Subject: FW: For MO review/approval - draft quotes for Columbia Basin Trust Kootenay Lake Fibre News Release re: project completion Kaslo

Hi Rob,

Please see the attached draft News Release and quote below for the Columbia Basin Trust project along with some background. I thought your GCPE staff were going to forward it but turns out it's me.

Let me know if this works for your Minister or if there are some edits. Can we get the final quote back by Friday? Does that work for you?

Thanks so much,

Karl

“High-speed internet is a game changer for families and workers in the communities of Kaslo and northern Kootenay Lake,” said Minister of Energy, Mines and Petroleum Resources Nelson-Creston MLA Michelle Mungall. “The completion of this project will help our residents grow their businesses and stay connected with the world. The positive effects of this work will be felt in the communities for many years to come.” DRAFT NOT APPROVED

Summary:

- Announcement of project completion of an underwater fibre optic cable connecting 36 kms along northern Kootenay Lake.
- Project proponent is Columbia Basin Trust and their subsidiary Columbia Basin Broadband Corporation.
- Project includes a \$433,650 investment from Connecting British Columbia. Columbia Basin Trust contributed an additional \$445,160 for a total investment of \$878,810.
- The project will bring high-speed internet access to approximately 700 - 800 rural households and businesses in the area.
- Northern Kootenay Lake communities benefitting from this investment include Ainsworth, Argenta, Cooper Creek, Fletcher Creek, Johnsons Landing, Kaslo, Lardeau, Mirror Lake, Pineridge, Schroeder Creek, Shuttly Bench, Woodbury Creek Resort and Woodbury Village.
- Although there are no FN communities directly benefitting, Ainsworth Hot Springs is completely owned by the Lower Kootenay Band.

Subject: Call for Records EMP-2018-81954 Due March 27

Hi Robert,

Please see the call for records request below and advise by **March 21st**

- a) Whether or not you have records; and
- b) If you believe it will take more than three hours to gather the material

To request a fee estimate, please include the Call for Records form with your response.

If you have responsive records, please fill out the attached Call for Records form and send it and the records:

- a) with harms reviewed (*except for MO and DMO*) and
- b) compiled into one PDF document

to me by **March 27th**

If you feel that I have forgotten to include a program area/office, please let me know.

Request:

*All emails between the Minister's Office and Susan.Vasilev@leg.bc.ca.
(Date Range for Record Search: From 06/30/2017 To 03/12/2018) – Date Format: MM/DD/YYYY*

Original email from IAO included below but please ignore the dates and use the ones above. This allows us time to ensure all materials are compiled, reviewed and submitted to IAO correctly.

Hi Kate,

Another follow up on this one. ☺

The program area has had some trouble reading portions of the scanned pages of the Minister's Notebook.

Is it possible to get another scan that the writing might be darker on or is the pencil just light on the actual page? I notice that the pencil on the third page appears dark but, that may be that the writing is actually darker on the page.

Thanks,

To: Hill, Robert EMPR:EX
Cc: EMPR FOI EMPR:EX
Subject: Call for Records EMP-2018-81744 Due March 23

Hi Robert,

Please see the call for records request below and advise by **March 19th**

- a) Whether or not you have records; and
- b) If you believe it will take more than three hours to gather the material

To request a fee estimate, please include the Call for Records form with your response.

If you have responsive records, please fill out the attached Call for Records form and send it and the records:

- a) with harms reviewed (*except for MO and DMO*) and
- b) compiled into one PDF document

to me by **March 23rd**

If you feel that I have forgotten to include a program area/office, please let me know.

Request:

Scanned images of all pages in all notebooks used by the Minister. (Date Range for Record Search: From 08/01/2017 To 08/31/2017) – Date Format: MM/DD/YYYY

Original email from IAO included below but please ignore the dates and use the ones above. This allows us time to ensure all materials are compiled, reviewed and submitted to IAO correctly.

Thanks,

 **Farrah Wiltshire** | FOI Analyst | Executive Operations Branch, Deputy Minister's Office | Phone: 778 698 4766

Sent: Tuesday, March 13, 2018 2:24 PM
To: EMPR FOI EMPR:EX
Subject: Call for Records EMP-2018-81744 Analyst Bradley Cranwell

Your Ministry has received a formal request made under the *Freedom of Information and Protection of Privacy Act* (FOIPPA). The request is for:

Scanned images of all pages in all notebooks used by the Minister. (Date Range for Record Search: From 08/01/2017 To 08/31/2017) – Date Format: MM/DD/YYYY

The following public bodies have also received this FOI request: TRA, TAC, MSD, PSS, OOP, MAH, MHA, LBR, JTT, IRR, HTH, FNR, FIN, MOE, EMP, EDU, CTZ, CFD, MAG, AGR, and AED.

Please complete the attached Call for Records form.

- If search and retrieval time is anticipated to exceed 3 hours and/or the total volume of records exceeds 200 pages, complete **only** sections 1 & 2 of the Call for Records form as we may be in a position to issue a fee estimate. Return the form to IAO by **March 19, 2018**. Please await further instruction from IAO as the records will not be required until the fee estimate process has been completed. Once fees have been paid or waived, IAO will contact you to continue the call for records process.
- **If no fees apply** then complete the attached Call for Records form and return it to IAO by
- Send records via email in **PDF format**. Before you turn emails into PDFs, ensure that you have included all attachments. If email is not possible, please put the records on the **File Share** and notify IAO that the records are available.

You should be aware that *FOIPPA* obligates us to assist the applicant and to respond without delay, openly, accurately, and completely. In the event that your Ministry must defend the adequacy of its search to the Information and Privacy Commissioner at Inquiry, those involved in searching for records may be required to sign affidavits confirming they have conducted an adequate search for relevant records.

Please do not hesitate to contact IAO to discuss: whether the records may be routinely releasable; whether the information is being prepared for public release or is already publicly available; ways in which an applicant may want to narrow/focus their request to reduce potential fees; and/or any other questions or concerns relating to this request.

Thank you for your assistance,

Resource Team

Hi Rob,

This e-mail and letter came to Claire's MLA e-mail. I talked to s.22 recently. s.22 in Kyuquot. s.22 He did mention that there seems to be broad support in the community for BC Hydro to own the transmission capabilities into Kyuquot to try and put them on an equal footing with the rest of the province. He said he will arrange to have letters of support sent from the Band, Community Association and RD of Strathcona in the next few weeks.

I told s.22 I would forward the letter and concerns to the Minister's office.

Thanks,

Fred

Hi Claire - Congratulations on your re-election and posting to cabinet!

With the NDP forming government there has been hopeful yet cautious optimism in Kyuquot that discussions on BC Hydro taking over the Kyuquot Power Ltd powerline can be re-kindled. I've attached a letter that hopefully summarizes the general state of things in a page and a half. You may have a better recollection as to where things ended up as I recall that you and your staff were very helpful at the time.

s.22

s.22 I don't have any official connection to KCFN but had a good chat with Cindy a month or two ago and she is very supportive of BC Hydro coming to Kyuquot, however she is very busy. I'm happy to put energy into this and contribute in whatever way I can as long as it makes sense.

Thanks for your time and hope all is well with you!

What about this? My suggestions:

Thank you for the invitation to join you at the 2018 BCWF Annual General Meeting & Convention. Please accept my regrets for not being able to join you in attendance.

Doug Donaldson, Minister of Forests, Lands and Natural Resource Operations, and Rural Development will be joining you, and he will be able to relay the provincial government's commitment to environmental oversight and protection. I look forward to hearing from him and others after the event concludes.

I recently met with your President, Harvey Andrusak, and relayed my appreciation for the work and commitment of your organization. **The BC Wildlife Federation has been part of our communities for over 60 years in the Kootenays and across British Columbia and your members play an important role in the conservation and preservation of the natural environment we all call home.**

I look forward to working with your organization moving forward and I hope to join you on the next available opportunity.

Warm Regards, Michelle Mungall

Hi Rob,

Please see the attached draft News Release and quote below for the Columbia Basin Trust project along with some background. I thought your GCPE staff were going to forward it but turns out it's me.

Let me know if this works for your Minister or if there are some edits. Can we get the final quote back by Friday? Does that work for you?

Thanks so much,

Karl

“High-speed internet is a game changer for families and workers in the communities of Kaslo and northern Kootenay Lake,” said Minister of Energy, Mines and Petroleum Resources Nelson-Creston MLA Michelle Mungall. “The completion of this project will help our residents grow their businesses and stay connected with the world. The positive effects of this work will be felt in the communities for many years to come.” DRAFT NOT APPROVED

Summary:

- Announcement of project completion of an underwater fibre optic cable connecting 36 kms along northern Kootenay Lake.
- Project proponent is Columbia Basin Trust and their subsidiary Columbia Basin Broadband Corporation.
- Project includes a \$433,650 investment from Connecting British Columbia. Columbia Basin Trust contributed an additional \$445,160 for a total investment of \$878,810.
- The project will bring high-speed internet access to approximately 700 - 800 rural households and businesses in the area.
- Northern Kootenay Lake communities benefitting from this investment include Ainsworth, Argenta, Cooper Creek, Fletcher Creek, Johnsons Landing, Kaslo, Lardeau, Mirror Lake, Pineridge, Schroeder Creek, Shutty Bench, Woodbury Creek Resort and Woodbury Village.
- Although there are no FN communities directly benefitting, Ainsworth Hot Springs is completely owned by the Lower Kootenay Band.

Subject: FW: For MO review/approval - draft quotes for Columbia Basin Trust Kootenay Lake Fibre News Release re: project completion Kaslo

Hi Rob,

Please see the attached draft News Release and quote below for the Columbia Basin Trust project along with some background. I thought your GCPE staff were going to forward it but turns out it's me.

Let me know if this works for your Minister or if there are some edits. Can we get the final quote back by Friday? Does that work for you?

Thanks so much,

Karl

"High-speed internet is a game changer for families and workers in the communities of Kaslo and northern Kootenay Lake," said Minister of Energy, Mines and Petroleum Resources Nelson-Creston MLA Michelle Mungall. "The completion of this project will help our residents grow their businesses and stay connected with the world. The positive effects of this work will be felt in the communities for many years to come." DRAFT NOT APPROVED

Summary:

- Announcement of project completion of an underwater fibre optic cable connecting 36 kms along northern Kootenay Lake.
- Project proponent is Columbia Basin Trust and their subsidiary Columbia Basin Broadband Corporation.
- Project includes a \$433,650 investment from Connecting British Columbia. Columbia Basin Trust contributed an additional \$445,160 for a total investment of \$878,810.
- The project will bring high-speed internet access to approximately 700 - 800 rural households and businesses in the area.
- Northern Kootenay Lake communities benefitting from this investment include Ainsworth, Argenta, Cooper Creek, Fletcher Creek, Johnsons Landing, Kaslo, Lardeau, Mirror Lake, Pineridge, Schroeder Creek, Shutty Bench, Woodbury Creek Resort and Woodbury Village.
- Although there are no FN communities directly benefitting, Ainsworth Hot Springs is completely owned by the Lower Kootenay Band.

Subject: Meeting request from ChargePoint for Minister Mungall

Lucy,

My name is Suzanne Goldberg and I am the Director of Public Policy for ChargePoint in Canada – [ChargePoint](https://www.chargepoint.com) is the leading provider of electric vehicle charging solutions, with over 46,000 charging points in North America, of which over 800 charging points are located in BC. In addition to our over 800 charging points, we have a number of employees and contractors in BC who sell, distribute and install ChargePoint stations across the province. We are encouraged by the Government's current electric vehicle supportive programs and would like to engage the Minister on how additional

policies like BC's low carbon fuel standard could be leveraged to further support electric vehicle adoption and fund investment in electric vehicle charger deployment. We would like to schedule a meeting with Minister Mungall at her earliest convenience in March to discuss this topic.

Thank you, Please advise if you need any additional information from us.

-Suzanne

Yes. James reached out to me so I'm looking into it. My understanding is that this is a larger issue than an individual's water being turned off.

When I look at the CLIFF history, it says:

Referrals: EAED-Team Writer – Minister Mungall’s Signature – Active .

I’m wondering if you know anything about this? Is there a letter going out to the individual?

Hi Lisa and Connie,

Can we please look at the week of April 16th for a joint meeting between all three Ministers. It's re: the Wet'suwet'en nation. The Minister may visit their territory in May – TBD.

Here is MMM's availability:

- April 16th between 3 and 4PM
- April 17th between 3:15 and 430PM
- April 19th between 130 and 3PM.

I'm leaning more towards the first two options.

Can you please advise ASAP.

Thanks kindly

Subject: RE: ADVICE FOR MEETING REQUEST: Energy Services Association of Canada

Hi Marlene,

Yes the Minister will do the meeting. We will need a BN — Les suggested a joint BN for MoE and EMPR together.

Thanks kindly

p.s. I am still finding out the time of the meeting

Subject: ADVICE FOR MEETING REQUEST: Energy Services Association of Canada

Hi Robert. Please see the bullets below regarding this meeting request. Please advise if Minister will attend and if you will need staff and a formal BN. Thanks.

Marlene Cochrane
Executive Coordinator | Deputy Minister's Office
Ministry of Energy, Mines and Petroleum Resources
Victoria | British Columbia
Phone (778) 698 7254

- Minister Heyman has accepted a meeting with Stuart Galloway, CEO of the Energy Services Association of Canada, and has inquired whether Minister Mungall would be interested in attending. Minister Heyman is targeting the week of April 16th for the meeting.
- The Energy Services Association of Canada represents energy service companies (ESCOs) including Ameresco, Honeywell, Johnson Controls, Siemens, etc.
- The Energy Services Association of Canada's primary mission is to advocate for government policies, regulations and programs that support or enable greater use of energy service performance contracts (ESPCs).
- ESPCs use anticipated future energy savings from a retrofit project to finance the capital costs of energy efficiency projects.
- An ESPC is a contract between an energy user (typically a building owner) and an ESCO for evaluation, recommendation, implementation and measurement/verification of one or more energy efficiency measures.
- There are two types of ESPCs: (1) contracts are structured such that energy savings are guaranteed by the ESCO to meet or exceed total annual contract payments; and (2) contracts are structured so costs are shared with payments based on energy savings and a stipulated maximum energy consumption level over the life of the contract.

- The Energy Services Association of Canada estimates that contracts worth about \$300 million are signed every year in Canada with about 85-90% of these with public sector organizations (governments at all levels, universities/colleges, schools and hospitals). Projects typically range in size from \$1-50 million.
- ESPCs have had the most traction in the public sector as they can offer a compelling business case at the building portfolio-level scale.
- The Energy Services Association of Canada is likely seeking provincial government recognition of EPSCs as a financing tool for public sector energy efficiency retrofits.
- Energy Efficiency Branch staff advise the Ministry of Energy, Mines and Petroleum Resources can play a role in working with the Ministry of Citizens' Services and Climate Action Secretariat to better understand barriers and potential applications of ESPCs in the core and broader public sector.

Subject: Briefing on Tulsequah Chief mine and request for meeting

Dear Mr. Donaldson,

I am writing to you on behalf of Rivers Without Borders to formally request a meeting with you regarding the controversial Tulsequah Chief mine. We recently had a positive meeting with MLA Sonia Furstenau, and she suggested we reach out to you to seek advice on best next steps for resolving this decades long issue.

As you know, the abandoned Tulsequah Chief mine located on a tributary of the Taku River, in your constituency, continues to be of great concern to folks on both sides of the border. For 60 years the mine has been pouring toxic, heavy metal laden mine drainage into the Taku watershed, the region's most productive salmon river. This is in violation of the Canadian Fisheries Act, BC mine permits and water quality standards, and an agreement with the Taku River Tlingit First Nation. As you may know, an Aquatic Ecological Risk Assessment released by the BC government in July 2017 documents "unacceptable risks" from the ongoing acid mine drainage from Tulsequah Chief.

Now is the best opportunity in two decades to ensure the cleanup of the mine site and its proper closure. This will be good for Taku salmon and for the communities that depend on this resource. Developing a cleanup plan and permanently closing the site will also be good for BC- Alaska relations and will help improve trust in BC's mine regulatory system.

If needed, to bring you further up to date on the issue, I have attached a short memo including several informative articles. We would be pleased to meet with you while you're here in Victoria to further discuss this crucial and time sensitive matter, and to explore ways in which we could work together to solve this problem.

Please note that I will be out of the office until April 13th, so please direct any correspondence to our Executive Director, Will Patric, and our Alaska Campaign Director, Chris Zimmer, both cc'd on this email.

Thank you for your consideration, Mr. Donaldson, and for the good work that you're doing. We look forward to hearing from you and hopefully meeting you in person.

Sincerely,

Jenafor

Subject: gravel pits

Michelle

I would like the opportunity to discuss the (gravel) aggregate and stone industry in BC. There is approximately 2600 licensed gravel operations in BC employing 3,000 to 5,000 personnel. These pits are controlled under the mines act, but require their own rules and regulations. Although there are some similarity to the operation there are a lot of different aspects that do not fit well with the current mines rules and regulations the biggest difference is the size and type of equipment used. I look forward to discussing this with you.

Regards

Given the ministers' meeting this afternoon on Wet'suwet'en engagement, I wanted to raise your email below and the planning for a meeting in May with Chief Jim. We haven't prepared a draft agenda yet but easily could do so after today's meeting with ministers. We focused on the briefing powerpoint, which hopefully the Minister has for today's meeting (attached).

In preparation for Dan George being our new contract negotiator, we would also consult with Dan on the agenda for a meeting with Chief Jim. Please let us know when you'd like the draft agenda and when the meeting may be set.

Thanks,

Simon Coley

Subject: Tour/Meeting with Wet'suwet'en in May
Importance: High

Hi Dave & Simon,

Minister Mungall had a phone call with Chief Victor Jim from the Moricetown First Nation band on March 20th. She also had a phone call with Debbie Pierre – ED of the Wet'suwet'en Nation on the same day.

Both suggested meeting with Minister Mungall – preferably in their territory so that she can meet with the hereditary chiefs.

She suggested possibly going up to Smithers in May. We are bringing this up with her again in our staff meeting this afternoon.

I want to get the ball rolling on a potential agenda for if the Minister goes up there in May. Is this possible? Can something be put together?

Additionally, Victor Jim suggested he could come to Victoria sooner rather than later to meet with the Minister.

Thanks kindly

Hi Minister Dix,

I'm sending this letter to remind your office about your promise during your campaign that you are going to reduce the amount of opt-out fees for those of us that kept our digital/analogue electric meter. Me, my family and friends voted for you so you can give us hope that we did not have with the liberals. We know that you are very busy but please take another look at this important matter.

Regards,

Duncan, Kate EMPR:EX

Good morning scheduler (Alison does have a way with words).

Just FYI on the update Alison provided yesterday for Borealis' Valemount project. They did have Kinder Morgan as a supporter on a recent call with us, but have backed off promoting that.

Les

Subject: NRCan website created for Borealis project

<https://www.nrcan.gc.ca/energy/funding/icg/20923>

Hi Les,

I heard from the Minister's scheduler today that her calendar is still too full to meet with us. Honestly, with everything going on in the energy world in BC these

days, I was surprised to even get a call from her office. I realize that your team is exceptionally busy right now as well.

I would have liked to personally provide a project brief now that NRCan has decided to promote the project and invite the Minister to participate in the upcoming media opportunities. However, I know that your team continues to provide updates to the Minister and I thank you for that.

If I had been able to speak with the Minister, I would have wanted her to see the new website that NRCan has created. Project photos will be added shortly. When the time is ready for you to advise that the BC gov't/BC Hydro could be listed as a Project Partner, we would all welcome that. This is a good news energy story, at a time when it may be helpful to have one. We hope that our project can be of use to the Ministry in addition to the Simpcw First Nation and those in the Valemount area. You won't see any mention of Kinder Morgan on our website or from us and we have treated the infographic you saw as confidential and aspirational, to the extent the opportunity presents itself.

I'm not sure if you also know of the significant assistance and input we receive from the other Ministries as well - Forestry for a great deal of our permits, Environment for the discussion about an Environmental Assessment and carbon credits that may be created at the project, and Indigenous Relations and Reconciliation who are a good sounding board for us with our relationship with the 4 First Nations. All of this speaks directly to one of the NRCan objectives of the project:

- enhance geothermal protocols aimed at reducing the costs associated with geothermal development.

I hope that all of this activity is not lost on NRCan and I'll do my best to ensure that they are aware of the great effort that the Province has put into this project and industry by providing us with internal resources.

I'm attaching our socio-economic summary that we have recently completed for the NRCan proposal due next week. While we believe that commercial power can be developed, even wells that are not good enough for power can be used in a heat

park for myriad applications, including reducing the electrical heating load in the area and thus further freeing up the electrical grid.

	Temporary Positions during Construction (for the one year construction stage)	Permanent Positions	Total Person*Years^[1] Created (Assuming 20 year life)
20 MW Power Plant			
Direct Employment (Construction, Operation and Maintenance of the Power Plant)	80 positions for one year ^[2]	34 FT permanent positions ^[3]	760 person*years
Total Direct, Indirect and Induced Employment	320 person*years ^[4]	85 FT permanent positions ^[5]	3,400 person*years
Heat Park			
Employment from Heat Park	60 positions for one year ^[6]	96 FT permanent positions ^[7]	1,980 person*years
Power Plant and Heat Park combined			
Total Employment from Canoe Reach Project	460 person*years	215 FT permanent positions	5,380 person*years

^[1] Statistics Canada, 2016 Census

² Person*year corresponds to the employment of one person during one year.

³ Electric Power Research Institute, *Renewable Energy and Jobs – Employment Impacts of Developing Markets for Renewables in California, and based on California Renewable Technology Market and Benefits Assessment*, (November 2001) findings that (a) direct employment (construction and maintenance during construction phase) results in 1.7 full time positions and 6.4 person*years per megawatt of geothermal power (b) induced and indirect impacts were calculated assuming a multiplier of 2.5; for a total direct, indirect, and induced employment impact of 4.25 full-time positions and 16 person*years per megawatt.

⁴ Ibid Electric Power Research Institute

⁵ Western Governors Association, *Western States' Near-Term Geothermal Potential and Resulting Employment and Economic Contribution*, summarized by the Geothermal Energy Association

⁶ Ibid Geothermal Energy Association

⁷ Greenpeace International, GWEC, EREC (2013), *Energy [R]evolution 2012*, Greenpeace International, Global Wind Energy Council, European Renewable Energy Council, report, 4th edition 2012 world energy scenario.

⁸ GREBE, *Svartsengi Resource Park Project Reykjanes Peninsula* (September 2017)

With the delay in the Valemout Glacier Destinations project and the uncertainty around the pipeline expansion, I know that the Region is looking forward to the economic impact our project would deliver.

We'd like to keep on trying to move the project forward and hope that our proposal to NRCan for follow on support after the demo, is compelling to them. Your continued support, as our host Ministry, is greatly appreciated.

Warm Regards,

alison

Honorable Michelle Mungall, MLA, Minister of Energy, Mines and Petroleum

Please consider the signatures we have collected in objection to the Notice of Work May & Jennie, when reviewing project file # 98771222- 004.

In a few days we have collected 44 signatures from community members and, as of 9pm on April 10, 2018, we have gathered 119 online signatures from concerned citizens wanting to protect clean drinking water. We hope the community opposition to any form of gold exploration, is clearly expressed through the names attached to this petition.

Thank you for your time.

Sincerely,

Humans who believe in clean water for all

Content of Petition, both online and hard copies are identical.

Stop Exploratory Gold Mining on 49 Creek

Target: Honorable Michelle Mungall, Minister of Energy, Mines and Petroleum Resources

An application has been submitted to initiate exploratory gold mining processes above 49 Creek, accessed via May & Jenny Rd, in the community of Blewett BC. There are over 70 water licenses issued on 49 Creek and many other community users dependent on surface wells to provide safe drinking water to their families. Blewett residents are concerned for Aquifer 511 as corporate greed, drought, and climate change have already put increased pressure on its supply. This permit will negatively impact our community in the following ways:

- Cutting down trees, digging trenches and drilling holes on steep slopes, contribute to increased landslide susceptibility with our historical heavy rainfalls. The slope stability in the proposed area was rated as Potentially Unstable, Level IV. This rating indicates it is not recommended to excavate this site without having an engineer preform an on-site assessment. The permit has been submitted without a site visit being performed.
- Unearthing rock can result in acid rock drainage which contributes to increased acidity and ability of water to hold dissolved metals. The process can create hostile conditions in our creek which will endanger fish and aquatic life. Noise pollution, vibrations, physical and chemical contaminants, would affect animals that live or travel through this untamed corridor.
- Property value decreases on parcels near work-site and along access road. In the event of water contamination, there would be a drastic drop in value of all property dependent on the watershed, and hefty costs would ensue for cleanup or restoration efforts.
- The proposed application is missing vital information, especially regarding emergency plans and safety measures. This community will not accept mining in our watershed and we are willing to take action to stop this project from starting. Please add your name to show support for clean drinking water. The future of our community depends on it.

Copyright

Signed by 163 concerned citizens as of 9pm, April 10th 2018.

This support was gathered in only 3 days to meet the April 11th deadline for comment.

The hard copy of the petition signatures could not be sent as an attachment. They will be submitted to the office of Michelle Mungall, at 433 Josephine Street, Nelson BC.

The online petition is still posted. The 119 signatures, and growing, are available at <https://www.ipetitions.com/petition/stop-exploratory-gold-mining-on-49-creek>

Subject: Next Quarterly Column - May

Importance: High

Hi David/Darren & Team,

I spoke with the Minister yesterday. She would like the next QC submission to the local paper to be about “a day in the life of the Minister” in the Legislature.

We would like to get out the QC by the end of May; however, I’m going to give a May 10th deadline on a draft to the Minister.

In particular, she would like discussed this idea of ‘looking back’ – highlights of session, how it has been a massive learning curve, what her days look like, meetings we’ve taken and issues we’ve tackled, including challenges (a brief mention of Site C and how it was a tough decision – again, a BRIEF touch on this).

Again, she wants a very personal tone throughout the article as she has a personal relationship with her constituents. She suggested starting off with something like “It has been such a privilege being the Minister of Energy and Mines since July 18th...”

I believe I’ve sent past columns to your team. If you need these again, let me know.

Thanks kindly

Follow Up Flag: Follow up
Flag Status: Completed

Hi s.22

The Ministry replied as follows:

- The Liquor Control and Licensing Branch will launch an online application portal for individuals and businesses who are interested in applying for a non-medical cannabis retail licence in the coming weeks.
- When the portal first opens, it will explain the requirements of the application process. It will also include an assessment tool to help you determine how ready you are to submit your application and identify any steps you need to take to be more prepared.
- The portal will also allow you to subscribe to email updates about non-medical cannabis policy and application developments.
- Specific timelines regarding when the assessment process will begin are dependent on the passing of related legislation, which will be introduced in the spring legislative session.

Subject: MEDIA REQUEST: Nelson Star on mining exploration...

Approved by Peter.

Reporter: Bill Metcalfe, Nelson Star

Deadline: Noon, Monday, April 16.

Request: I need to talk to someone about the permitting and public consultation process for mining exploration. In this case a company intends to do exploration work in a watershed, and the water users don't want this. I need to know what the process is. When the ministry of mines approves something like this, what criteria do they look at? Do the residents' opinions hold any weight at all, and if so, through what process or channel? If you could find me someone to talk to about this that would be great. I do not expect to them to comment on any specific project.

This is a mining exploration permit granted to Kelly Funk, the owner of some claims at 49 Creek near Nelson. A Ministry of Mines period for public consultation just ended this week. I am not asking for comment on Mr. Funk's plans or the status of them, but rather my question is about process:

Once the ministry has received such an application, like the one from Mr. Funk, and received feedback from other levels of government and the public, which it has done, what are the ministry's options? Can it refuse the application altogether? Can it suggest changes to what the proponent intends to do, and to what degree? Are there limits to what changes it can ask for?

Again, I am not asking for comment on the merits of Mr. Funk's plans but about how much power the ministry has in a situation like this. Once its comment period has ended, which it did this week, what are its options?

Recommendation: Have GCPE provide information on background by email.

Response:

- The Ministry of Energy, Mines and Petroleum Resources undertakes to consider and weigh all relevant information and perspectives, and takes all applications very seriously.
- For all such applications, ministry staff and statutory decision makers are committed to conducting a thorough and comprehensive review based on input from First Nations, local governments, and other affected stakeholders and agencies.
- Statutory decisions under the Mines Act and Mineral Tenure Act are made in accordance with the legislation such that statutory decision makers are independent and are not subjected to political interference or influence.
- Under the Mines Act, statutory decision makers are required to review all applications for Mines Act permits.
- Following a thorough review, statutory decision makers may authorize a permit, reject the application, or authorize the permit subject to site-specific conditions – specific requirements the proponent must undertake prior to, during and/or after any and all work authorized under the terms of the permit.

Subject: Invite- Opportunity is Knocking - ILMA 2018 Convention

Dear MLA Mungall

The Interior Lumber Manufacturers' Association is holding our annual convention this year at the Revelstoke Mountain Resort on June 11 & 12. We would like to officially invite you (along with senior staff) to attend on behalf of your region.

As you are aware, the ILMA is comprised of small and mid-sized, family-owned, and independent companies across the southern interior, from Merritt to Midway to Grasmere and all points in-between. In addition to our 12 Member companies, we also have more than 100 Associate Members, in industries ranging from silviculture, software development, harvesting, trucking and more.

This year, we're excited to welcome Premier John Horgan as he delivers a keynote address. Forests Minister Doug Donaldson will provide a detailed update about his Ministry's vision for the future and the processes needed to get there.

Of particular interest to local elected officials will be our special guest keynote presentation from Doug Griffiths, former Alberta MLA and Minister, and author of the book "13 Ways to Kill Your Community". Doug has turned the book into a fascinating series of presentations about strategy, change leadership, community development, and more. Visit www.13ways.ca to learn more.

Our members represent \$112-million in payroll for more than 1500 employees in your communities. The ILMA is comprised of small and mid-sized, family-owned, and independent companies across the southern interior, from Merritt to Midway to Grasmere and all points in-between. In addition to our 12 Member companies, we also have more than 100 Associate Members, in industries ranging from silviculture, technology, harvesting, trucking and more.

Our convention theme is 'Opportunity is Knocking', and we will have presentations about the challenges and opportunities facing the independent, family-owned companies like ours in the forest industry, including technology, value-added production, and more.

The event will begin on Monday, June 11 with your choice of an optional 9-hole golf tournament, or a hosted x-country mountain bike ride. The convention officially opens on the evening of the 11th, and will be wrapped by 3:30 p.m. on Tuesday the 12th.

Due to the anticipated demand for this event with our three keynote speakers, we require an RSVP as there is limited seating.

To register, visit our website, www.ilma.com, and click the 'Convention 2018' link. When you select your category of ticket ('Local Elected Official'), be sure to click the link at the top of the page to enter your promotional code. The code **Government** will apply a 100% discount, giving you a free delegate pass for convention rather than the \$300 full-price fee

A block of hotel rooms has been set aside at the Sutton Place Hotel (1-250-814-5000), under the group name "ILMA". Rates start at \$169, and are available for dates both immediately before and after the convention if you would like to stay and enjoy some of the great hospitality and tourism opportunities that Revelstoke has to offer.

We look forward to seeing you in Revelstoke, and if you have any questions, please feel free to contact our event planner, Judith Barnaby, directly at 250-858-3466, or barnaby.judith@gmail.com

Importance: High

Hey Everyone,

Just from looking at the flights below, it looks like the Air Canada 1:20PM flight to Terrace or the TUESDAY 2:45 PM flight to Smithers are our best options.

Thanks

Vancouver → Terrace:

AIR CANADA

Monday April 30th:

- 8:50AM → 10:25 AM NON-STOP
- 1:15 PM → 2:50 PM NON- STOP

Tuesday May 1st:

- 8:50AM → 10:25 AM NON-STOP
- 1:20PM → 2:45PM NON-STOP

WEST JET

Monday April 30th & Tuesday May 1st:

- 8:15AM → 9:48 AM NON-STOP
- Next flight not until after 5PM on both days

CENTRAL MOUNTAIN AIR

Monday & Tuesday:

- 7:35 AM → 10:40AM ONE LAY OVER IN PRINCE GEORGE

Vancouver → Smithers

CENTRAL MOUNTAIN AIR

Monday & Tuesday:

- 7:35AM → 10:50AM ONE LAY OVER IN PRINCE GEORGE

AIR CANADA

Monday & Tuesday:

- 7:40 AM → 9:25AM NON-STOP
- Tuesday flight ONLY: 2:45PM → 4:30PM NON STOP

Subject: RE: gravel pits

Hi Laurie

The issue is, much of the act is to do with the large open pit mines with different equipment. There are several items that are not compatible with small gavel extraction i.e.; road grades and width among other items. s.22

s.22

s.22

I will give Paul a call and see what else we had discussed several years back. We have the Mines Act and the Resource Road Act conflicting rules. My thought is it may be a good chance for them to look at reviewing the acts.

Thanks

Dear s.22

Thank you for your email. I trust you are well and getting ready for some warm weather to arrive. I'm wondering if you have specific concern about a gravel pit in our riding? Or are your concerns about the industry in general? If the latter then I could forward your questions over to the ministry to try to get some answers for you. Unfortunately, the MLA won't be available in the riding for meetings again until after session is over at the end of May. If there is anything we can do to have your concerns answered before then we will do our best.

Sincerely,

Laurie Langille

Subject: gravel pits

Michelle

I would like the opportunity to discuss the (gravel) aggregate and stone industry in BC. There is approximately 2600 licensed gravel operations in BC employing 3,000 to 5,000 personnel. These pits are controlled under the mines act, but require their own rules and regulations. Although there are some similarity to the operation there are a lot of different aspects that do not fit well with the current mines rules and regulations the biggest difference is the size and type of equipment used. I look forward to discussing this with you.

Regards

Hi Marlene,

I understand that Peter Robb is away but hoping that we can get this request done as soon as possible as the Minister plans to travel to Smithers/Terrace April 30th/May 1st.

The Minister would like to tour Brucejack. The ideal plan is to have her fly into Terrace on the 30th of April. She will arrive around 3PM. Our hope is that she might be able to get a helicopter to Brucejack for a tour there and then have them fly her to Smithers afterwards.

Is there someone can that work on this request and reach out to Brucejack ASAP?

Thanks kindly

Subject: NDP vs Green for supporting renewable energy

Hello Ms. Popham,
I am a resident of Saanich and have a question... and a comment or 2 . :)

One of the reasons I vote NDP is the platform on renewable energy. I support the stance taken on pipelines and look forward to a (hopefully soon) greener lifestyle.

I am wondering if and when some action will be taken on beefing up our movement towards green energy sources... like solar panels for home and

industry rooftops, EV Car purchasing, and building code changes to support solar ready houses. I would love to invest the money in solar on my roof with (years later to save up) the purchase of an EV Car but the cost is just out of reach presently. A subsidy towards these green choices would move us forward and begin the breaking of oil consumption habits.

Thank you for your hard work on our behalf.

Subject: bc hydro for kyuquot

Hi Claire - Congratulations on your re-election and posting to cabinet!

With the NDP forming government there has been hopeful yet cautious optimism in Kyuquot that discussions on BC Hydro taking over the Kyuquot Power Ltd powerline can be re-kindled. I've attached a letter that hopefully summarizes the general state of things in a page and a half. You may have a better recollection as to where things ended up as I recall that you and your staff were very helpful at the time.

s.22

s.22 . I don't have any official connection to KCFN but had a good chat with Cindy a month or two ago and she is very supportive of BC Hydro coming to Kyuquot, however she is very busy. I'm happy to put energy into this and contribute in whatever way I can as long as it makes sense.

Thanks for your time and hope all is well with you!

Hello Reamick, we received the following request from a constituent:

"Hi, I am a student^{s.22} and I am doing a project on solar panels to power an entire classroom. Is there any way you can help us?"

Would the Ministry have any information on solar panels, or are there any educational tools for students in school on solar energy from the Government?

Thanks for your assistance.

Good Morning,

Please find attached a permit that was approved by your Ministry and the below email thread which contains concerns from s.22 and Municipal departments. Concerns seem to stem from the location (rural residential) and the noise/blasting taking place.

Any information you can provide me about this permit would be much appreciated. Alternatively if someone from the Ministry can reach out to the below constituent s.22 to discuss concerns it may be helpful as it seems they will also be pursuing contact with the Ministry as well.

Regards,

Jim Dunkley, Mines Inspector, of the Ministry of Mines & Resources (387-4825) is in charge of Permit No. G-8-358 issued on the subject property here in Cedar, BC. I am writing on behalf of s.22 affected by the subject permit issued on a residential/rural property. I have copied previous email communiques with elected and regional district personnel for your information/background. We seek to have the Permit G-3-358 cancelled/annulled before the owner resumes operations and/or invests further expense.

Just after the Nanaimo River Bridge, Cedar Road s.22 turns right up the hill and crosses the Duke Point Highway. s.22
s.22 At the bridge, Cedar Road becomes Harmac Road where the subject
1805 property is located. s.22
s.22 which may be why we were not
consulted in the Permit application/approval process. Whatever the reason, we are all seriously most displeased at the end result.

While local RDN staff pursue the Temporary Use Certificate/Zoning issues with the owner any assistance you may be able to afford in the cancelation of the Permit G-3-358 will be gratefully appreciated by all of us.

Good morning, s.22 Imagine my surprise when I read the permit. I've suggested to RDN staff that we need to discuss this with the Minister as well as the local MLA – something that you could also bring to Doug Routley's attention. Essentially the issuance of the permit indicates that the Ministry would allow quarrying/mining on any residential lot without regard to zoning, lot size or location.

I've forwarded this to you in an unabridged fashion in the interest of transparency.

Armet, Tom <TArmet@rdn.bc.ca>

Subject: RE: DRILLING AND DYNAMITE BLASTING - RESIDENTIAL 1805 HARMAC ROAD

Hi s.22,

I am responding on Tom's behalf as I am aware the details of this property, particularly with regard to the TUP issue and the *Mines Act* approval. I understand Bylaw Enforcement staff have reached out to the s.22, but have not heard back from them. Bylaw Enforcement staff will follow-up with the s.22 in response to their email below.

As you noted, a TUP was one option discussed to legalize the use of the property on a temporary basis. There are provisions in your OCP to allow rezoning of property following demonstration of the appropriateness of a land use through a TUP. Staff have advised the property owner regarding the requirements for a TUP application, however, the property owner has not submitted an application. As they have not brought the property into land use compliance and have not pursued options (such as a TUP application) to legalize the use of the property, this remains a land use enforcement issue.

As an update to the quarry permit issue, despite RDN opposition, the Inspector of Mines approved the attached permit G-8-358 under the *Mines Act*, which allows "blasting and crushing of quarry rock material". The permit places limitations on the volume of extraction (10,000 tonnes per year), hours of operation (7:30 am to 6:00 pm Monday through Friday), and limits on hydraulic rock breaking (max 2 hours per day, not more than 30 minutes uninterrupted without a 15 minute break). While these conditions are not likely to fully address neighbour's concerns, they do limit some of the activities that are causing concern and put the onus of compliance enforcement on these terms with the province. Staff can communicate these conditions to complainants and ensure they have appropriate contact to follow-up with at the province regarding any concerns about violations of these conditions.

While the property has rural residential zoning, generally speaking, mineral extraction approved under the *Mines Act* overrides local governments regulatory authority. We will need to factor the issuance of this permit into consideration of enforcement action with regard to the use of the property. We will also need to seek advice on the extent of our authority to address rock crushing, which would be considered "primary processing" under Bylaw 500. We would assert that "primary processing" should be subject to our regulatory authority, however, we would need advice based on the specifics of this permit and the activities on this property.

Tom will advise you of our findings and enforcement options.

Regards,
Jeremy

Hi Tom. I understood that when Milestones applied for a quarry permit the RDN opposed it. That was in or about October 2017. Did the province issue one over our objection and ignore the residential zoning in place? The RDN also was to approach the property owner about obtaining a TUP coincident with an application for rezoning. Perhaps you can respond to the s.22 and bring them up to date on the situation. Thank You, s.22

Subject: DRILLING AND DYNAMITE BLASTING - RESIDENTIAL 1805 HARMAC ROAD

During 2016-17 the subject property, RDN advised was residential, conducted “rock breaking” using heavy equipment based Rock Breaker Hammer, from dawn to dusk, an incessant annoyance to all of us^{s.22}, and were pleased that with the RDN By-law enforcement folks intervention, the owner respected the hours limited by the By-law.

The owner , who told them he had consulted ^{s.22} did not contact us then, nor ever, before commencing hammering then, nor drilling and blasting of late. The rationale he used then was that he was building a home with a workshop and need to clear the land. Since then, a number of MILLSTREAM CO trucks and equipment have been using the site/marshalling ground daily. The drilling goes on daily in preparation for the 1600-1700 Blast Signal, Blast and All Clear signals. The real problem is with the shock waves from the blasts which shake the house, doors, dishes, etc.

Even more problematic is the Notice of Application for a SAND & GRAVEL PIT which I happened to notice when I was on Harmac Road. It seems inane to me that such an operation could even be considered in a RESIDENTIAL neighborhood! We are requested write to Millstream, copy to Energy, Mines & Resources, regarding the application, which I will be doing. Surely the RDN must be a party to any such application, and liaise with Mines & Resources where their jurisdiction is involved? The secondary concern we have, more serious than the simple-to-fix noise pollution issue, is the drastic effect such activity has on adjacent (albeit across the highway) property values, assessments and taxation.

A voicemail message left at the RDN telephone number on 10 April 2018 has as yet gone unanswered, and we would appreciate your enquiring of them of the current status of this property’s activities and attempting to quash it at the earliest.

Thank you for your kind attention to this matter.

Subject: Call for Records EMP-2018-82817 Due April 27, 2018 Analyst Tyler Barbon

Your Ministry has received a formal request made under the *Freedom of Information and Protection of Privacy Act* (FOIPPA). The request is for:

All communication between Andrew Weaver and the Minister or their staff. Date Range: 10/01/2017 to 03/31/2018 – Date Format: MM/DD/YYYY

This request is part of XGOV request XGR-2018-82751. It was sent to all Ministries and the Office of the Premier.

Please complete the attached Call for Records form.

- If search and retrieval time is anticipated to exceed 3 hours and/or the total volume of records exceeds 200 pages, complete **only** sections 1 & 2 of the Call for Records form as we may be in a position to issue a fee estimate. Return the form to IAO by **April 19, 2018**. Please await further instruction from IAO as the records will not be required until the fee estimate process has been completed. Once fees have been paid or waived, IAO will contact you to continue the call for records process.
- **If no fees apply** then complete the attached Call for Records form and return it to IAO by **April 27, 2018**.
- Send records via email in **PDF format**. Before you turn emails into PDFs, ensure that you have included all attachments. If email is not possible, please put the records on the **File Share** and notify IAO that the records are available.

You should be aware that *FOIPPA* obligates us to assist the applicant and to respond without delay, openly, accurately, and completely. In the event that your Ministry must defend the adequacy of its search to the Information and Privacy Commissioner at Inquiry, those involved in searching for records may be required to sign affidavits confirming they have conducted an adequate search for relevant records.

Please do not hesitate to contact IAO to discuss: whether the records may be routinely releasable; whether the information is being prepared for public release or is already publicly available; ways in which an applicant may want to narrow/focus their request to reduce

potential fees; and/or any other questions or concerns relating to this request.

Thank you for your assistance,

Resource Team

Hi Reamick,

I am wondering if your office receives emails similar to this Saanich South constituent. [s.22](#) is asking if there are any resources that individuals can use towards green energy sources (ie solar panels, etc). Do you know where I can find more information on this?

Happy Friday!

Kim Copeland
Constituency Assistant to MLA Lana Popham

Subject: NDP vs Green for supporting renewable energy

Hello Ms. Popham,
I am a resident of Saanich and have a question... and a comment or 2 . :)

One of the reasons I vote NDP is the platform on renewable energy. I support the stance taken on pipelines and look forward to a (hopefully soon) greener lifestyle.

I am wondering if and when some action will be taken on beefing up our movement towards green energy sources... like solar panels for home and industry rooftops, EV Car purchasing, and building code changes to support solar ready houses. I would love to invest the money in solar on my roof with (years later to save up) the purchase of an EV Car but the cost is just out of reach presently. A subsidy towards these green choices would move us forward and begin the breaking of oil consumption habits.

Thank you for your hard work on our behalf.

Hi Monika,

This is what I received back from our Ministry:

- Before April 1, 2018 the carbon tax on natural gas was \$1.4898 per gigajoule (effective since July 1, 2012)
- Effective April 1, 2018, the carbon tax rate on natural gas is \$1.7381 per gigajoule
- The increase is \$0.2483 per gigajoule

Subject: Minister Mungall column

Hi Rob,

I am starting to draft the minister's upcoming Nelson Star column, which is going to be a look at a typical day in her working life. The idea, as I understand it, is that this column will serve as an update from the column she did two years ago about a day in her life as an MLA and part of the Official Opposition.

To help get me started, are you able to give me a few details of what her days at the Leg tend to look like, e.g.

What time does she arrive at the Leg?

Has she already started work before arriving (reading the clips, etc.)?

How much of her day tends to be devoted to attending meetings and briefings as minister?

Are there any other notable things that are different about her daily routine as minister, in contrast to opposition MLA?

What time does her work day end?

Does she tend to take work home with her?

Anything you can provide would be greatly appreciated, either by email or, if you prefer, we could arrange a time to chat on the phone.

Thanks

Hi Robert,

Please see the call for records request below and advise by **March 22nd**

- a. Whether or not you have records; and
- b. If you believe it will take more than three hours to gather the material

To request a fee estimate, please include the Call for Records form with your response.

If you have responsive records, please fill out the attached Call for Records form and send it and the records:

- a. with harms reviewed (*except for MO and DMO*) and
- b. compiled into one PDF document

to me by **March 29th**

If you feel that I have forgotten to include a program area/office, please let me know.

Request:

*All emails between the Minister/Premier's Office and LP003@gov.bc.ca
Date Range: 06/30/2017 - 03/12/2018 – Date Format: MM/DD/YYYY*

Original email from IAO included below but please ignore the dates and use the ones above. This allows us time to ensure all materials are compiled, reviewed and submitted to IAO correctly.

Please see below

Dear s.22 :

Thank you for your April 10, 2018 email concerning the mining application for a Notice of Work regarding the claim May & Jennie located near the Forty Nine Creek.

The Ministry of Energy, Mines and Petroleum Resources (Ministry) is conducting a thorough and comprehensive review based on input from affected stakeholders and agencies. The process includes considering impacts on communities and the environment by the proposed activity.

Due to the concerns from the local community and domestic water users, the Ministry is planning an open house with this applicant and other exploration companies working in the area along with other relevant agencies, such as the Ministry of Health, to hear the concerns and find solutions. At this open house, impacted water users may talk directly with the proponents to understand the scope of their operations and the effect these activities may have in the watershed. Once a date has been set, the Ministry's regional office in Cranbrook will notify you and the community watershed representatives of the location and time. Please contact the Regional Director, Kathie Wagar, for more information at Kathie.Wagar@gov.bc.ca.

Once again, thank you for writing. I appreciate the opportunity to hear from you about this important issue. It helps inform my work within the Ministry, and your engagement is crucial to our democracy.

Sincerely,

Michelle Mungall
Minister of Energy, Mines and Petroleum Resources

Hi Marlene,

The Minister would like correspondence to reply to this group but have the letter be FROM the Minister. She would like to see the letter before it goes out. Essentially, the letter should state how the Minister cannot intervene in this.

Can we please put a priority on this?

Also, please email Kate and I when the letter is ready in e-approvals.

Thanks kindly

Robert (Rob) Hill | Executive Assistant to the Honourable Michelle Mungall | Minister of Energy, Mines and Petroleum Resources | C: 250-208-7363 | E: Robert.Hill@gov.bc.ca

Honorable Michelle Mungall, MLA, Minister of Energy, Mines and Petroleum

Please consider the signatures we have collected in objection to the Notice of Work May & Jennie, when reviewing project file # 98771222- 004.

In a few days we have collected 44 signatures from community members and, as of 9pm on April 10, 2018, we have gathered 119 online signatures from concerned citizens wanting to protect clean drinking water. We hope the community opposition to any form of gold exploration, is clearly expressed through the names attached to this petition.

Thank you for your time.

Sincerely,

Humans who believe in clean water for all

Stop Exploratory Gold Mining on 49 Creek

Target: Honorable Michelle Mungall, Minister of Energy, Mines and Petroleum Resources

An application has been submitted to initiate exploratory gold mining processes above 49 Creek, accessed via May & Jenny Rd, in the community of Blewett BC. There are over 70 water licenses issued on 49 Creek and many other community users dependent on surface wells to provide safe drinking water to their families.

Blewett residents are concerned for Aquifer 511 as corporate greed, drought, and climate change have already put increased pressure on its supply. This permit will negatively impact our community in the following ways:

- Cutting down trees, digging trenches and drilling holes on steep slopes, contribute to increased landslide susceptibility with our historical heavy rainfalls. The slope stability in the proposed area was rated as Potentially Unstable, Level IV. This rating indicates it is not recommended to excavate this site without having an engineer preform an on-site assessment. The permit has been submitted without a site visit being performed.
- Unearthing rock can result in acid rock drainage which contributes to increased acidity and ability of water to hold dissolved metals. The process can create hostile conditions in our creek which will endanger fish and aquatic life. Noise pollution, vibrations, physical and chemical contaminants, would affect animals that live or travel through this untamed corridor.
- Property value decreases on parcels near work-site and along access road. In the event of water contamination, there would be a drastic drop in value of all property dependent on the watershed, and hefty costs would ensue for cleanup or restoration efforts.
- The proposed application is missing vital information, especially regarding emergency plans and safety measures. This community will not accept mining in our watershed and we are willing to take action to stop this project from starting. Please add your name to show support for clean drinking water. The future of our community depends on it.

Copyright

Signed by 163 concerned citizens as of 9pm, April 10th 2018.

This support was gathered in only 3 days to meet the April 11th deadline for comment.

The hard copy of the petition signatures could not be sent as an attachment. They will be submitted to the office of Michelle Mungall, at 433 Josephine Street, Nelson BC.

The online petition is still posted. The 119 signatures, and growing, are available at <https://www.ipetitions.com/petition/stop-exploratory-gold-mining-on-49-creek>

Please see below

Dear ^{s.22}

Thank you for your April 10, 2018 email concerning the mining application for a Notice of Work regarding the claim May & Jennie located near the Forty Nine Creek.

The Ministry of Energy, Mines and Petroleum Resources (Ministry) is conducting a thorough and comprehensive review based on input from affected stakeholders and agencies. The process includes considering impacts on communities and the environment by the proposed activity.

Due to the concerns from the local community and domestic water users, the Ministry is planning an open house with this applicant and other exploration companies working in the area along with other relevant agencies, such as the Ministry of Health, to hear the concerns and find solutions. At this open house, impacted water users may talk directly with the proponents to understand the scope of their operations and the effect these activities may have in the watershed. Once a date has been set, the Ministry's regional office in Cranbrook will notify you and the community watershed representatives of the location and time. Please contact the Regional Director, Kathie Wagar, for more information at Kathie.Wagar@gov.bc.ca.

Once again, thank you for writing. I appreciate the opportunity to hear from you about this important issue. It helps inform my work within the Ministry, and your engagement is crucial to our democracy.

Sincerely,

Michelle Mungall
Minister of Energy, Mines and Petroleum Resources

Subject: I call for an inquiry into fracking

This is a message from your constituent, [s.22](#), at postal code: . To reply directly, e-mail: [s.22](#)

I am writing to add my voice to the call on the provincial government to establish a formal Public Inquiry that would investigate the risks and harms associated with fracking.

The ecological, human health and safety, and climate costs associated with fracking in BC are tremendous and poised to get worse.

The BC NDP's campaign commitment to appoint a scientific panel to review fracking in BC is a start—but it does not go far enough.

A formal Public Inquiry should address whether provincial agencies adequately oversees fracking operations, ensuring that companies comply with existing laws and regulations, respect Indigenous rights and title, safeguard public health, and protect the environment.

The Inquiry should have powers and sufficient funds to: compel legal testimony, commission professional research, and hold public hearings across BC.

BC is long overdue for a thorough, public, transparent review of how natural gas is produced in this province.

Subject: Proposed Gravel Pit - Euston Road, Hornby Island

Hi Rob,

We have been contacted by some constituents in regards to a proposed gravel pit on Euston Road on Hornby Island. The applicant is Helen Grond and the proposed gravel pit would be placed on her property at Lot A, Section 2, Euston Road.

The constituents who have contacted us are concerned with the 30 days that they have to get their opposition heard. They are saying that the application was not placed in a local paper, and s.22 were left off an email which informed them about the proposed gravel pit.

They are also concerned about the potential effects on the local watershed, the roads and the property values.

Our office is requesting information on the proposed gravel pit and the application process and how the constituents can register their opposition to this project.

Cheers,

Andrea McDonald | Constituency Assistant

Hello Kate,

Thank you for taking the time to accommodate your meeting request.

Unfortunately, Mr. Andrusak will decline to meet Les Maclaren as his agreement with Minister Mungall in Nelson last month was that she would gladly meet with him to discuss the issues at hand in Victoria.

Please advise when she will be available for this meeting.

Thank you!

Hello Rob,

Please see attached background letters for Minister Mungall's consideration. As for topics of discussion for the meeting, please see below:

1. Change the current FWCP model so that a third party administers it and that the BCWF appoint a member to each FWCP program
2. Flaws in Clause O of Site C Water License and time to try a new model.

Hi Michelle,

Thanks for your patience while I inquired about a longer meeting. Unfortunately, due to fairness in accommodating other groups that have also been waiting to meet with Minister Mungall, I am unable to offer Harvey more than a 30 minute meeting.

To confirm: March 28th at 1PM for a 30 minute meeting.

Could you also fill me in again on what Harvey was wanting to speak to Michelle about?

Thanks kindly

Thanks Megan.

I thought I may drive my own vehicle so that the Minister and I have a way to get back (especially if she ends up staying longer in Creston for MLA duties). I thought it might be neat to have someone in the car with her to explain things about the vehicle, take pictures, etc.

But I'm good either way 😊

To answer all your questions – yes!

I am coordinating the pick up – Fortis has two electric Bolts, and we have two of our EV Ambassadors coming over the pass too. I am just finalizing the availability of those options. Perhaps you two can travel together? I think there may be one MEM staff coming as well, not sure if it's appropriate to go all together or not, but we can work that out.

We will have an 'EV 101' session at the station, and will have the hoods popped on cars to let folks check them out and see the battery. We will also do a demonstration on the charging station. We can ABSOLUTELY get video of the Minister driving and lots of photos – we'll have a dedicated person on that for the day. There will be some great promo opportunities coming out this 😊

Teck will also be there as a recent new funder, which ties nicely to the announcement the Minister recently made around the mining task force for renewable energy opportunities in Canada.

More detail to come..

Hi Megan,

Yes, you can 😊

I think I emailed you about a month ago when we firmed up plans looking to see what your idea was for the Minister to drive an electric car over the pass. Where will the car pick her up? Who will be in the car with her? Is there an opportunity for video of her driving the car? Will there be someone on hand in the car to explain everything to her?

Thanks kindly

Hi Megan,

I'm hoping that you can provide me with an update on the details of the May 25 event in Creston.

It would be helpful to have the latest itinerary of the event, particularly details that pertain to Minister Mungall's involvement.

Also, have you developed the news release yet? We'd love to have a quote from the Minister in it.

Lastly, it would be helpful if you could outline the main points that the Minister should address specifically about the Accelerate Kootenays project – I'd like to keep her comments from overlapping with other officials as much as possible.

Looking forward to hearing from you,

Subject: Require Response to Multiple Letters

s.22

25 April 2018

Hon. George Heyman
Minister of Environment and
Climate Change Strategy
Room 112 Parliament Buildings
Victoria, BC V8V 1X4

Hon. Michelle Mungall
Minister of Energy, Mines and
Petroleum Resources
Room 301 Parliament Buildings
Victoria, BC V8V 1X4

Dear Hon. G. Heyman and Hon. M. Mungall:

We are writing once more to seek a reply to our letters of 14 August and 11 November, 2017. Mine waste affecting not only s.22 a large area of the Salmo Valley degrades water and air quality as well as preventing the use of hectares of agricultural land. As per our previous correspondence we have not had any direct action by the Regional District of Central Kootenay or Teck to address the concerns afflicting s.22 The failure of the Province to follow up on its promises regarding investigation and remediation by the polluters only exasperates the situation and allows continued damage to s.22 . We are seeking a reply to our letters, an outline as to the plans the Province has to ensure the numerous promises provided towards investigation and remediation of s.22 s.22 by the polluters are fulfilled and confirmation that the planned closure works of the HB Mine tailings impoundment will prevent further offsite migration of contamination from the RDCK site reaching s.22

Our family is extremely disappointed that a party professing environmental credentials will not even in all reasonableness reply to our concerns. We find ourselves excluded as a stakeholder in discussions between the Province, RDCK and Teck regarding water quality from the RDCK site even though it directly affects s.22 Salmo River. Rather than a transparent and shared environment we are forced to seek information through the *Freedom of Information and Protection of Privacy Act* and sidelined, left to interject our comments without solicitation. Too many times we have had to raise issues of obvious errors and failures by the RDCK and Province in following policies and procedures. We had expected and requested to be included in the discourse, unfortunately this continues to not be the case.

While we wait to see the final plan that the RDCK outlays for closure of the HB Mine tailings impoundment and whether it will be funded, we have concerns that it may not prevent the further migration of contaminants offsite from both the landfill and tailings impoundment to s.22

s.22 Unless the RDCK stops polluting s.22 Please confirm that the Province will ensure the prevention of offsite migration of contamination onto s.22 from the RDCK site will be a requirement of the closure plan. Other assurances and actions that the Province provided us have still not been complied with by the RDCK and they include:

-assurances that the RDCK would complete a proper Detailed Site Investigation as per Section 59 of the CSR to include offsite migration;

-that the RDCK would implement consultant's recommendations including measures to mitigate or prevent contamination of s.22 by leachate or mine tailings. These include a riparian area between the landfill and TSF, discontinue septage disposal, improve landfill surface water outflow to prevent TSF erosion, a tailings impoundment perimeter ditch, stilling pool at the base of the spillway and a settling pond situated above Highway 3/6;

-failure of the RDCK to comply with its Operating Certificate. Landfill leachate migrates beyond the boundary of the permitted landfill area and enters the tailings pond and aquifer. Surface water contaminated by leachate erodes the tailings surface and contributes to the pollution finding its way to s.22

-the investigation and remediation of the damage caused by the unpermitted pumping of the millions of liters of contaminated effluent onto s.22 during the dam failure event in 2012 would be the responsibility of the RDCK.

Your ministries have provided numerous assurances and promises that the RDCK and/or Teck would cease polluting s.22 and investigate and remediate any contamination caused by their activities. We've been stalled for decades by both parties and see no sincere interest by either to reach a solution. The Province advised that should remediation not take place that it would address the high-risk contamination on s.22 . As there has been no progress made by the RDCK or Teck in remediating the contamination we request that discussions begin on actioning remediation by the Province.

Protection of air and water should be a basic tenant of good governance. As farming continues to grow in the Salmo Valley s.22 due to the contamination from the RDCK site. The Province allows for the contamination to continue and allows the well-funded polluters (Teck and the RDCK) to argue over who is responsible without any progress towards actually tackling the contamination. That this has gone on for over 20 years is inexcusable. We look forward to a fulsome response from both ministries.

Sincerely,

<clip_image002[2].jpg>

Subject: RE: Require Response to Multiple Letters

I was told back in December that the Ministry would be drafting a letter to them. I just reached out to Peter Robb now about this. The points I got were for informational purposes only. But I was told that the points would be used to draft a response to them.

I've also emailed Reamick Lo – the EA in ENV.

Subject: Require Response to Multiple Letters

s.22

25 April 2018

Hon. George Heyman
Minister of Environment and
Climate Change Strategy
Room 112 Parliament Buildings
Victoria, BC V8V 1X4

Hon. Michelle Mungall
Minister of Energy, Mines and
Petroleum Resources

Dear Hon. G. Heyman and Hon. M. Mungall:

We are writing once more to seek a reply to our letters of 14 August and 11 November, 2017. Mine waste affecting not only s.22 a large area of the Salmo Valley degrades water and air quality as well as preventing the use of hectares of agricultural land. As per our previous correspondence we have not had any direct action by the Regional District of Central Kootenay or Teck to address the concerns afflicting s.22 The failure of the Province to follow up on its promises regarding investigation and remediation by the polluters only exasperates the situation and allows continued damage to s.22 . We are seeking a reply to our letters, an outline as to the plans the Province has to ensure the numerous promises provided towards investigation and remediation of s.22 by the polluters are fulfilled and confirmation that the planned closure works of the HB Mine tailings impoundment will prevent further offsite migration of contamination from the RDCK site reaching s.22

Our family is extremely disappointed that a party professing environmental credentials will not even in all reasonableness reply to our concerns. We find ourselves excluded as a stakeholder in discussions between the Province, RDCK and Teck regarding water quality from the RDCK site even though it directly affects s.22 Salmo River. Rather than a transparent and shared environment we are forced to seek information through the *Freedom of Information and Protection of Privacy Act* and sidelined, left to interject our comments without solicitation. Too many times we have had to raise issues of obvious errors and failures by the RDCK and Province in following policies and procedures. We had expected and requested to be included in the discourse, unfortunately this continues to not be the case.

While we wait to see the final plan that the RDCK outlays for closure of the HB Mine tailings impoundment and whether it will be funded, we have concerns that it may not prevent the further migration of contaminants offsite from both the landfill and tailings impoundment to s.22 s.22 Unless the RDCK stops polluting s.22 Please confirm that the Province will ensure the prevention of offsite migration of contamination onto s.22 from the RDCK site will be a requirement of the closure plan. Other assurances and actions that the Province provided us have still not been complied with by the RDCK and they include:

-assurances that the RDCK would complete a proper Detailed Site Investigation as per Section 59 of the CSR to include offsite migration;

-that the RDCK would implement consultant's recommendations including measures to mitigate or prevent contamination of s.22 by leachate or mine tailings. These include a riparian area between the landfill and TSF, discontinue septage disposal, improve landfill surface water outflow to prevent TSF erosion, a tailings impoundment perimeter ditch, stilling pool at the base of the spillway and a settling pond situated above Highway 3/6;

-failure of the RDCK to comply with its Operating Certificate. Landfill leachate migrates beyond the boundary of the permitted landfill area and enters the tailings pond and aquifer. Surface water contaminated by leachate erodes the tailings surface and contributes to the pollution finding its way to s.22

-the investigation and remediation of the damage caused by the unpermitted pumping of the millions of liters of contaminated effluent onto ^{s.22} during the dam failure event in 2012 would be the responsibility of the RDCK.

Your ministries have provided numerous assurances and promises that the RDCK and/or Teck would cease polluting ^{s.22} and investigate and remediate any contamination caused by their activities. We've been stalled for decades by both parties and see no sincere interest by either to reach a solution. The Province advised that should remediation not take place that it would address the high-risk contamination on ^{s.22}. As there has been no progress made by the RDCK or Teck in remediating the contamination we request that discussions begin on actioning remediation by the Province.

Protection of air and water should be a basic tenant of good governance. As farming continues to grow in the Salmo Valley ^{s.22} due to the contamination from the RDCK site. The Province allows for the contamination to continue and allows the well-funded polluters (Teck and the RDCK) to argue over who is responsible without any progress towards actually tackling the contamination. That this has gone on for over 20 years is inexcusable. We look forward to a fulsome response from both ministries.

Subject: NDP vs Green for supporting renewable energy

Hello Ms. Popham,

I am a resident of Saanich and have a question... and a comment or 2 . :)

One of the reasons I vote NDP is the platform on renewable energy. I support the stance taken on pipelines and look forward to a (hopefully soon) greener lifestyle.

I am wondering if and when some action will be taken on beefing up our movement towards green energy sources... like solar panels for home and industry rooftops, EV Car purchasing, and building code changes to support solar ready houses. I would love to invest the money in solar on my roof with (years later to save up) the purchase of an EV Car but the cost is just out of reach presently. A subsidy towards these green choices would move us forward and begin the breaking of oil consumption habits.

Thank you for your hard work on our behalf.

To: Button, Judy LASS:EX
Subject: RE: Pelkey, Steve - 250-541-1234 - Solar panel rebates for businesses from Province BC
- Case file 1803-C-2522

Importance: High

Hi Judy,

To answer the questions from Mr. Pelkey below:

Overview

- The Province's electricity supply is highly reliable, low cost and currently 98.4% of electricity generation comes from large hydro-electric facilities and other clean, renewable resources, namely wind, solar, run-of-river and storage hydro-electricity, biomass and other alternative resources. Therefore, installing a solar energy system would have limited greenhouse gas emissions benefits.
- As such, neither the Province, nor the utilities, offer incentives, grants or discounts for the purchase and/or installation of other types of alternative energy generation, such as solar panels.
- Both Fortis BC and BC Hydro offer net metering programs whereby if the consumer invests in their own electricity generation equipment (e.g., solar panels), any excess power is purchased from you by the utility. Both programs require that you notify the utility in advance and apply for approval.
- However, energy efficiency projects are often more cost effective for homeowners than net metering, as the payback period for installing solar panels is approximately 20 years, depending how much electricity is generated.
- BC does provide a provincial sales tax exemption on certain renewable energy equipment, including solar energy equipment.

Utility Net Metering Programs and Other Incentives

BC Hydro (<https://www.bchydro.com/work-with-us/selling-clean-energy/net-metering.html>)

The Net Metering Program is designed for those who generate electricity for their own use. When the consumer generates more than needed, they sell it back to BC Hydro. When they don't generate enough to meet their needs, the consumer buys electricity from the utility. When the consumer sells to BC Hydro, it generates a bill credit towards future electricity use. If the consumer still has an excess credit at the anniversary date of joining the program, BC Hydro will pay for the electricity at the rate of 9.99 cents per kilowatt hour (kWh).

Other rebates and incentives offered by BC Hydro (<https://www.bchydro.com/powersmart/residential/savings-and-rebates/current-rebates-buy-backs.html>)

- Save on select ENERGY STAR lighting and smart home products
- Energy efficient appliance rebates
- Home renovation rebates for greater energy efficiency

Fortis BC (<https://www.fortisbc.com/Electricity/CustomerService/NetMeteringProgram/Pages/default.aspx>)

Fortis BC has defined net metering as the metering and billing practice that allows for the flow of electricity both to and from a customer through a bidirectional meter. This program allows for residential and commercial customers to offset part or all of their own energy. Fortis BC will credit customers for net energy they produce at their existing retail rate; however the program is not intended for customers who generate electricity in excess of their annual requirements.

For a list of other rebates and incentives offered by Fortis BC, please visit their website

(<https://www.fortisbc.com/Rebates/RebatesOffers/Pages/default.aspx>) for specific details about the categories below for your area:

- Home renovation
- New home construction
- Connect to gas

- Natural gas fireplaces
- Natural gas water heaters
- Natural gas furnaces and boilers

Sent: April 27, 2018 2:49 PM
To: Sanderson, Melissa EMPR:EX
Subject: RE: Letter from BC Wildlife Federation re FWCP

Hi Melissa,

The meeting with Harvey Andrusak in the Minister's constituency was initially booked and a BN was sent to us for the Minister's weekend binder outlining two things that Mr. Andrusak wanted to speak about: 1) Clause O of the Site C Water License; and 2) Changing the current FWCP model so that a third party administers it and that the BCWF appoints a member to each of the Peace, Coastal and Columbia FWCP Boards.

Upon reviewing this briefing note, the Minister called me to mention that a letter had already been sent to Mr. Andrusak (from the MO in November) outlining these matters and that she had no new information to give him/update him on. The Minister also mentioned that she didn't have the appropriate staff in her constituency to meet with Mr. Andrusak to discuss the above two matters. As well, the Minister was under the impression that she was meeting with Mr. Andrusak for an update on Kootenay Lake and other local matters. Therefore, I called Michelle Galang and advised her of this – letting her know that should Mr. Andrusak want to meet with the Minister in Victoria re: the above matters, he could make that request. However, I did mention to Ms. Galang that the Minister did still want to meet with him in her constituency re local matters— and Mr. Andrusak gladly accepted.

My understanding is that the meeting went well and was productive.

Thanks kindly

Dear Hon. G. Heyman and Hon. M. Mungall:

We are writing once more to seek a reply to our letters of 14 August and 11 November, 2017. Mine waste affecting not only s.22 a large area of the Salmo Valley degrades water and air quality as well as preventing the use of hectares of agricultural land. As per our previous correspondence we have not had any direct action by the Regional District of Central Kootenay or Teck to address the concerns afflicting s.22. The failure of the Province to follow up on its promises regarding investigation and remediation by the polluters only exasperates the situation and allows continued damage to s.22. We are seeking a reply to our letters, an outline as to the plans the Province has to ensure the numerous promises provided towards investigation and remediation of s.22 by the polluters

are fulfilled and confirmation that the planned closure works of the HB Mine tailings impoundment will prevent further offsite migration of contamination from the RDCK site reaching^{s.22}

Our family is extremely disappointed that a party professing environmental credentials will not even in all reasonableness reply to our concerns. We find ourselves excluded as a stakeholder in discussions between the Province, RDCK and Teck regarding water quality from the RDCK site even though it directly affects^{s.22} Salmo River. Rather than a transparent and shared environment we are forced to seek information through the *Freedom of Information and Protection of Privacy Act* and sidelined, left to interject our comments without solicitation. Too many times we have had to raise issues of obvious errors and failures by the RDCK and Province in following policies and procedures. We had expected and requested to be included in the discourse, unfortunately this continues to not be the case.

While we wait to see the final plan that the RDCK outlays for closure of the HB Mine tailings impoundment and whether it will be funded, we have concerns that it may not prevent the further migration of contaminants offsite from both the landfill and tailings impoundment to ^{s.22} Unless the RDCK stops polluting^{s.22}

^{s.2} Please confirm that the Province will ensure the prevention of offsite migration of contamination onto^{s.22} from the RDCK site will be a requirement of the closure plan. Other assurances and actions that the Province provided us have still not been complied with by the RDCK and they include:

-assurances that the RDCK would complete a proper Detailed Site Investigation as per Section 59 of the CSR to include offsite migration;

-that the RDCK would implement consultant's recommendations including measures to mitigate or prevent contamination of^{s.22} by leachate or mine tailings. These include a riparian area between the landfill and TSF, discontinue septage disposal, improve landfill surface water outflow to prevent TSF erosion, a tailings impoundment perimeter ditch, stilling pool at the base of the spillway and a settling pond situated above Highway 3/6;

-failure of the RDCK to comply with its Operating Certificate. Landfill leachate migrates beyond the boundary of the permitted landfill area and enters the tailings pond and aquifer. Surface water contaminated by leachate erodes the tailings surface and contributes to the pollution finding its way to^{s.22}

-the investigation and remediation of the damage caused by the unpermitted pumping of the millions of liters of contaminated effluent onto^{s.22} during the dam failure event in 2012 would be the responsibility of the RDCK.

Your ministries have provided numerous assurances and promises that the RDCK and/or Teck would cease polluting^{s.22} ^{s.22} and investigate and remediate any contamination caused by their activities. We've been stalled for decades by both parties and see no sincere interest by either to reach a solution. The Province advised that should remediation not take place that it would address the high-risk contamination on ^{s.22}. As there has been no progress made by the RDCK or Teck in remediating the contamination we request that discussions begin on actioning remediation by the Province.

Protection of air and water should be a basic tenant of good governance. As farming continues to grow in the Salmo Valley^{s.22} due to the contamination from the RDCK site. The Province allows for the contamination to continue and allows the well-funded polluters (Teck and the RDCK) to argue over who is responsible without any progress towards actually tackling the contamination. That this has gone on for over 20 years is inexcusable. We look forward to a fulsome response from both ministries.

Sincerely,
s.22

Subject: Itinerary and guiding speaking notes for May 25th events

Good morning,

I have attached the draft itinerary and guiding speaking points for your delegates attending and speaking at the Accelerate Kootenays celebration and luncheon in Creston on May 25th.

There will be only minor adjustments to this itinerary moving forward, and I will provide a final one closer to the date. The start time and luncheon is firm.

I have provided a map of the venues in the document, and have also provided some speaking points that you are very welcome (and encouraged) to refine. Please let me know if you require assistance in the messaging. The comments should be kept to under 5 minutes, preferably closer to 3-4 so that we can keep on schedule.

Please let me know if you have any questions. Press release to follow for approval.

Just wanted you to have this – it can be put in the May 18th weekly binder. There are some speaking notes in there too that I'll mention in a future staff meeting.

Hi Robert,

Thank you for your prompt response.
The phone call is about NDP caucus briefing on May 9th(9:00-10:00am).
David would like to share the contents with the Minister that will be presented and also to see if the Minister is also able to attend.

Grace
