The Look Ahead is an edited product of the BC Government Corporate Calendar system and is published daily between 4:15 to 4:45pm whenever possible.

Executive Summary: What is the Corporate Calendar?

The Corporate Calendar provides a bird’s eye-view of all communications activities across ministries and major agencies. The purpose is to:

- *Inform senior government officials of all government activities.*
- *Prevent scheduling conflicts within government departments.*
- *Improve efficiencies within the organization.*
- *Streamline the business process of planning and executing government activities.*

Recently Published News Releases can be found here:

BCGov Newsroom: <https://news.gov.bc.ca>

News Archive: <https://archive.news.gov.bc.ca/>

CORPORATE CALENDAR LINK (RESTRICTED ACCESS):

s.15

MO & Comm Shops – Important Process

Reminders:

For a number of reasons, **ALL** events and releases are to be scheduled Corporately as far in advance as possible.

- Final news releases, statements and info bulletins etc. are to be sent for final processing **at least 24-48hrs ahead of publishing time (wherever possible)**, unless otherwise arranged. Please keep approvals moving and don’t hold them up.
- Significantly **more lead time** is needed if **translation** is required, per recent emails from HQ Exec on this topic.

- Send all finals to the larger '**GCPE Editors' list** (NOT the Editorial Services list please). Include the approved publishing date, time and Corp Cal ID # in that email.

This email is intended solely for the person or entity to which it is addressed and may contain confidential and/or privileged information. Any review, dissemination, copying, printing or other use of this email by persons or entities other than the addressee is prohibited. If you have received this email in error, please contact the sender immediately and delete the material from any computer.

Subject: Heads up: Sonia Furstenau is coming to the Kootenays next week

Susan V. gave me a call just now to give us a heads up that Sonia Furstenau had notified us of her plans to come to the constituency next week- specifically July 10 and July 11. Susan said she was not here on any particular issue but was visiting as a part of her summer tour and had no more details to add.

I looked on the BC Greens facebook and noticed 3 events in the constituency this week:

Tuesday July 9: Climate Action Town Hall in Creston

Wednesday July 10: Climate Action Town Hall in Kaslo

Thursday July 11: Climate Action BBQ at Lakeside Park in Nelson.

Subject: correspondence Nlaka'pamux Chiefs

Hello Lisa

This one is approved with the edits in the highlighted paragraph. I'll send it to you in eApps.

Dear Nlaka'pamux Chiefs:

Thank you for your December 10, 2018 letters regarding Nlaka'pamux Aboriginal title and rights interests. We are writing on behalf of the Province in response to these letters, and apologize for the delay in response.

The Province is committed to transforming its relationship with Indigenous peoples by adopting and implementing the United Nations Declaration on the Rights of Indigenous Peoples (UNDRIP), the Truth and Reconciliation Commission's Calls to Action, and relevant case law. The Province remains committed to the constructive and cooperative relationship we have developed with the Nlaka'pamux. The Province acknowledges that the Nlaka'pamux should be supported to make their own decisions regarding resource development within Nlaka'pamux territory, and that meaningful engagement through Crown consultation processes is an effective pathway forward for both Nlaka'pamux and Crown decisions.

Understanding the nature of rights interests and how those interests may be impacted is part of the consultation process, however, these processes are not rights-determining. By consulting First Nations on a proposed project, the Province does not create or confirm the existence of rights protected under section 35 of the *Constitution Act, 1982*, nor determine the extent of those rights. Likewise, Economic and Community Development Agreements (ECDAs) are also not rights-determining agreements.

To inform the Province's approach to consultation on the Highland Valley Copper Mine project, the Province has considered information currently available about the historic and traditional use of this area, which includes Nlaka'pamux historic and traditional use.

The Province also must ensure that it fulfills its duty to consult with any other Indigenous group who asserts rights in this area, or where there is the potential for downstream impacts to their rights. The Province is committed to meeting its constitutional obligations, where they are triggered, and in this way, strives to make durable decisions that support reconciliation.

The Province recognizes that there is no single entity that represents the Nlaka'pamux, and will continue to engage with the various member communities or tribal associations that make up the Nlaka'pamux in its entirety.

I understand that provincial staff are already working with member communities of the Nlaka'pamux towards collaborative engagement on the Highland Valley Copper project. I am hopeful that these collaborative efforts will result in positive outcomes.

Once again, thank you for writing.

Sincerely,

Michelle Mungall

Subject: BMO Travel card program updates
Attachments: Guidebook - Cardholders FINAL_JUNE 28.pdf; Corporate Travel Entertainment Program Insurance Certificate FINAL.PDF

To: *BMO Travel cardholders*

On the weekend of July 12, 2019, BMO will be upgrading their card processing platform and rolling out new features and changes to the card program.

BMO Spend Dynamics online will be unavailable between Saturday July 13th, 2019 @ 9pm and Monday July 15th @ 9pm.

Please review the attached documents which outline the updates:

- 1) **Guidebook** with all of the changes to the Travel card program. Please note there are changes noted in this guidebook that apply to the BMO purchase card and BTA, please disregard.
- 2) **Corporate Travel Entertainment Program Insurance Certificate** – This is a new Certificate of Insurance for all Travel cardholders.

There were a few questions that BMO has answered:

Q: Will new and existing BMO Travel cardholders have this new insurance?

A: Yes, effective July 12/19, the current travel insurance changes to the “Corporate Travel & Entertainment Program” Insurance

Q: Will cardholders be using Mobile Wallets?

A: This is in the works at BMO and they are exploring what the implications are for the Province of BC.

Q: For the new PIN reset feature by phone, what questions will BMO ask the cardholder to confirm identity?

A:

- Cardholders full name,
- Name of Corporation and Activation code (this is the information you would have used to activate your card)
- Your address on file with BMO (where you receive your monthly statements)

Q: How does a cardholder go about making a claim with the new Insurance?

A: Cardholders will phone the Insurance provider – phone number on the back of the card. They will assist with processing the claim and if the claim is valid, they would apply the credit back to your card/account.

Let me know if you have any further questions.

Thank You.

Subject: gas tax revenue

Hello Marlene

Do we have any messaging or info that we can provide for the question below?

Thanks!

At the Electric Vehicle Car Show event in Kamloops a person asked the question, "...if everyone transitions to full electric vehicles, and they aren't buying gas, diesel, oil, then there won't be all of the tax revenue from that source anymore, which probably all or part of it goes into building and maintaining our roads and highways in BC and Canada, and the related infrastructure, so he is wondering how that will be covered in the future or where the money comes from for roads etc. currently.

Cheers,

Danika

Hello Ms. Mungall,

We would like to invite you to a special event this week in Nelson. (see below and attachement)
This project was made possible with the financial support of the Province of British Columbia through the B.C. Fund for French Language Services.
We hope to see you there.
Thanks.
We can also organize a visit on another date if you would like.
Let's stay in touch.

To: Bains.MLA, Harry <Harry.Bains.MLA@leg.bc.ca>
Subject: RE: EV rebate for B.C.

Hello Jasmeet

Here are some bullets for your use.

- B.C. has the highest uptake of new electric vehicles in Canada and our recent incentive program has seen huge success – more than we anticipated.
- The revised structure will ensure that more British Columbians can take advantage of both the federal and provincial incentives and get as much as \$8,000 off the purchase of an affordable zero-emission vehicle.
- At this stage, adjusting the eligibility threshold to make only the lower cost ZEVs eligible for the incentive, and moderate demand on the vehicle incentive program, is a measure to extend the funds to more potential buyers.
- With the new incentive structure, we expect approximately 3,800 additional vehicles will be able to access an incentive.
- The majority of incentives have been allocated to individuals, not fleets. We are seeing unprecedented demand in the incentive program due to a combination of factors: success of our CEV Program investments in incentives, infrastructure and public awareness; the introduction this year of the federal incentive on eligible vehicles; the introduction of our ZEV Act; and automakers making more numbers and models of ZEVs, with longer ranges, available in B.C. at more affordable prices.
- Buyers who have purchased (a sale is deemed completed and consummated when the purchaser of the vehicle has paid the purchase price, or, in lieu thereof, has signed a purchase contract or security agreement and taken

physical possession or delivery of the vehicle) before June 22, 2019 will be covered by the former incentives and rules.

- Buyers who reserved their vehicles before June 22, 2019 (evidenced by either their dealers submitting an OEM Order application to the CEVforBC Program to reserve their incentive prior to June 22, 2019, or by a vehicle order with deposit made before June 22, 2019) will be covered by the former incentives and rules, including the 90-day limit for reservations (supporting documents including proof of deposit, vehicle tracking number and purchase order are required).

As for your constituent's problems at the dealership, I believe he should be able to receive the \$5000. Do you know which dealership he is going to?

Thanks

Danika

From: s.22
Sent: Monday, June 24, 2019 11:05 AM
To: Bains.MLA, Harry <Harry.Bains.MLA@leg.bc.ca>
Subject: EV rebate for B.C.

Honorable Mr. Bains,

On June 14, 2019 I put a down payment of \$3,200, for a Tesla Model 3 to take advantage of the \$5,000 EV incentive, as per the CEVFORBC website. I received a confirmation that my car was reserved with a Reservation Number s.22

I took a picture of the CEVFORBC website on June 17th where it clearly states that **“A vehicle OEM order will be considered the day the order is accepted by the OEM and a deposit has been placed by customer to allow reservation of the vehicle incentive amount. Incentive amounts will be reserved for up to 90 days for OEM order vehicles.”**

I am including this picture as an attachment.

On June 22nd the provincial government reduced the Ev rebates to \$3,000 for this car, also saying that vehicles purchased or reserved under the previous program would still get the higher, \$5000 rebates.

I am now being told by the dealership that the original \$5,000 does not apply and only the \$3,000 amount will apply! What happened? Why the discrepancy?

Could you please address this problem for myself and all the really annoyed people who put in a reservation for a vehicle to get the \$5,000 rebate and now are being told that they are only getting \$3,000.

Thanks in advance

>> I spoke with the organizer. It is more of a grand opening than a funding announcement but there is an opportunity for you to speak if you want to go. Let me know if you want to go.

>>
>> They are expecting about 50-100 guests. Mostly local artisans and francophone community.

>>
>> Speakers are: Vincent from SDECB and Liz from Lillie & Cohoe

>>
>> The event is on Thursday from 5-7 pm. They are flexible as to the start time for the speeches to accommodate your schedule if you are able to come.

>>
>> They would be very happy to have you speak at the event which is the launch of the "Economusee" at Lillie & Cohoe. The concept of an economusee started in Nelson's twin city in Quebec Baie- Saint Paul and it is basically a business that has a small section explaining the history of their product or business contained within it. It makes the business more interesting to tourists. Economusee's are spreading from Quebec to BC and there are now more and more in BC, especially in the Okanagan, Vancouver Island and Kootenays.

>>

>> Liz at Lillie & Cohoe has transformed her space with the support of the Economusee network. This network was funded by the BC government through the B.C. Fund for French Language Services as well as funding from the province of Quebec and The Société de développement économique de la Colombie-Britannique (SDÉCB).

>>

>> The BC government has given \$25,000 in funding to the Economusee project through SDECB. This funding has supported SDECB to assist local businesses like Liz to develop an economusee with design expertise and advice. It also helped to pay for some bilingual signage at the visitors centre.

Thanks Seamus.

Minister Mungall was keen to participate in the announcement. She did suggest that the first week of September would be better since students are back in town and there is a campus party/celebration going on.

She also strongly recommended visiting the satellite campus in Grand Forks^{s.13}

Subject: Minister Mungall Nelson Event July 4, 2019

Hi Alison,

I'm the Manager of the BC Gov Francophone Affairs Program. I believe you are the Communication Manager for MEMP .

There is an event tomorrow in Nelson and I was just informed that Minister Mungall is scheduled to attend (see attached). The event organiser asked how much the BC gov had contributed towards the Économusée-Nelson project. The organiser said he would add the information to the Minister's notes (?!), or would relay the information himself if the Minister has a last minute change of schedule.

I thought you should know what I sent as you are likely the liaison to the Minister's office.

This is the text:

Depuis l'année fiscale 2015 – 2016, le gouvernement de la Colombie-Britannique a contribué un soutien financier de 66 000 \$ à Économusée - Nelson par le biais de l'Entente Canada-Colombie-Britannique relative aux services en français.

Since the 2015-2016 fiscal year, the Government of British Columbia has financially supported Économusée - Nelson to the amount of \$66,000 through the Canada-British Columbia Agreement on French-Language Services.

Don't hesitate to contact me if you have any questions.

Subject: conference line

Hello Dean

This afternoon at 3pm I need to set up a conference line. Our EMPR line will be in use.

I was trying to figure out how to use my number when I set up an "online meeting" but it requires a leader's code which I don't have.

Do you have any information on what the code might be or know how I can use another line?

Thanks

Danika

Subject: RE: BULLETS: Ecofitt

That's odd, it works for me. I also found it through google.

I can go through their website a bit on my own.

I take it from the lack of information now that the Ministry has not dealt with ecofitt previously in any capacity or through any programs?

Thanks,

Danika

Please do not email the GCPE Corporate Calendar mailbox

Phone: 778 698-3498

The Look Ahead is an edited product of the BC Government Corporate Calendar system and is published daily between 4:15 to 4:45pm whenever possible.

Executive Summary: What is the Corporate Calendar?

The Corporate Calendar provides a bird's eye-view of all communications activities across ministries and major agencies. The purpose is to:

- *Inform senior government officials of all government activities.*
- *Prevent scheduling conflicts within government departments.*

Subject: Protect the Skagit Headwaters from Mining!

Dear Rob Fleming,

Re: Protect the Skagit Headwaters from Mining!

I am emailing you to request that the BC Government deny a proposed mining permit in the area of crown land known as the “donut hole” between Manning and Skagit Valley Provincial Parks. This unprotected area of crown land was not included in the BC Parks System at the time of the establishment of Skagit Valley Provincial Park due mineral claims.

Mining development in the Skagit headwaters has the potential to affect fish and wildlife habitats essential to the survival and recovery of local populations of salmon and trout, grizzlies and spotted owls. The Skagit River is well-loved for its high-quality rainbow trout fly fishing. Bird enthusiasts know that over 200 species of birds are found here.

Protection of this area is important not just for British Columbia wilderness, but for the aquatic habitat downstream in Washington State. The Skagit River supports a large run of chum salmon, as well as threatened steelhead and chinook salmon.

The company applying for a permit to mine in this unprotected area of the Skagit headwaters, Imperial Metals, was responsible for the infamous Mount Polley mine disaster of 2014, which spilled more than two billion gallons of toxic sludge into the Fraser River watershed. Imperial Metal’s proposed mining activities for the Skagit headwaters including creating access roads, conducting surface exploration drilling with the associated water supply and catchment sumps, and mechanical trenching over five years of continued disturbance.

Mining is not an appropriate activity given the context of this area and surrounding protected landscapes. Please protect this crown land from mining development by Imperial Mines by saying no to their application.

Thank you for putting British Columbia’s fish, wildlife and wilderness first.

Respectfully,

s.22

To: Schmidt, Cathy A EMPR:EX <Cathy.Schmidt@gov.bc.ca>
Subject: RE:s.22 PHONE CALL: Smart Meter caller

My thought is that no additional information will persuade ^{s.22} to change his mind. As the telephone response form indicates, ^{s.22} wants to retain his old meter, and Measurement Canada's seal is expiring, so that his meter must be replaced.

My suggestion is to continue to forward these requests to BC Hydro and if the person refuses a new meter, that person is refusing electric service and BC Hydro should begin the disconnection process.

Phone (778) 698 7254

Good Afternoon,

Our Customer Metering staff contacted s.22 this afternoon.

s.22 has been in communication with our Customer Metering department several times over the past few years regarding smart meters. Michael Gagnon from our office previously spoke with s.22 on this issue in August 2018 at the request of the Minister's office. Attached is the direct response completed at that time.

During today's call s.22 advised he was concerned the smart meter would cause a fire, Micheal addressed his concerns and explained the meter installation process. He appeared to be more receptive to the exchange this time around and asked if an arrangement is possible. He was advised exchanges in his area will begin the week of July 8, 2019. s.22 said he'd want to make sure his power is off, we advised we are willing to arrange a date and time. He asked for Michael's direct phone number and said he'd contact him later.

If you have any questions or require more information, please let us know.

Subject: Smart Meter caller
Importance: High

Hi Marlene,

I had a caller who has some questions about being switched over to a Smart Meter, but they want to keep their analogue meter. I think they have some questions about our government's stance on the issue because they apparently were opposed to them while in opposition, but they're now being phased in. BC Hydro has also told the individual that they don't have anymore analogue meters to replace the current one. Could someone please give s.22 a call back at s.22 before 2PM today? They don't have voicemail so whoever calls cannot leave a message if they're not around.

Thank you,

Lisa Pommelet

Subject: Inquiry re: Constituent^{s.22}

Hi Danika,

I hope this email finds you well!

I am writing to see if we can possibly do something for this constituent s.22 who has reluctantly agreed to pay \$123/month to pay off a large bill. The bill is due to her having higher usage than her equal payments plan was billing her for during the winter. Unfortunately, the \$123/month is really outside of her means, as she is a pensioner and (she asked me to stress this) a senior. I'm hoping we might be able to have this spread out even further than the 11 months she has agreed to pay this amount for so we can reduce the amount she is paying to a more manageable number for her, or find some other way in which we can reduce the amount she is owing. Currently, as I understand it, at the end of the 11 months she and BC Hydro are planning on reviewing her usage and attempting to re-establish her equal payments plan. I believe she is owing \$692 to BC Hydro currently.

There is the possibility that some of the numbers mentioned here are incorrect – the s.22 and was having some difficulties finding all of their paperwork. They also conducted the agreement for \$123/month over the phone, and thus has no exact paperwork they can share on this issue. I apologize for any confusion this may cause in advance – I really appreciate your help!

Thanks so much in advance,
Chris

Subject: lithium mining information
Attachments: 195-214 Vol 9 4Q2018_9811_Simandl.pdf

Hello Tessa

Here is some information about lithium mining. If you need more information let me know.

Firstly, there is no lithium currently mined in BC. Dr. George Simandl of the BCGS is the Ministries resident expert. If the request is more specific, we can provide more information.

Here is a brochure that BCGS released last year that may be of interest:

http://cmscontent.nrs.gov.bc.ca/geoscience/PublicationCatalogue/InformationCircular/BCGS_IC2018-11.pdf

Also, attached is a recent study Dr. Simandl published on formation waters.

To: Hammond, Danika S EMPR:EX
Subject: RE: Question about Plug In BC

Hi Danika,

Just a question about what you were able to find out, specifically about:

“Applicants that had placed deposits on vehicles that were removed from the eligibility list prior to September 21, 2018 had their applications honoured and received the incentive. Applicants who did not place deposits or complete a vehicle sale prior to September 21, 2018 are not eligible to receive the SUVI program incentive.

The applicant was denied the SUVI incentive in this case as the invoice was dated January 18, 2019 which is beyond the September 21, 2018 requirement”

On June 1, Mason Lift wrote up the terms and conditions of the order, also stating that the balance would be due on delivery of the vehicle. Papasan signed this form on July 19, 2018 and created a Purchase Order (PO) on July 26, 2018. It stated on the terms and conditions that delivery would be between 21-23 weeks; however, it was delivered at 31 weeks and Papasan were officially invoiced at 33 weeks – January 18, 2019.

It stated on the terms and conditions proposal that signing it constitutes as an order. I am just curious if this signed proposal would constitute as confirmation of an order, even though mason lift did not officially invoice them until after the vehicles were delivered?

Please let me know if you need any more information! Thanks ☺

Hello Krystine

I have been in Victoria and tomorrow is a travel day for me.

Any chance you can send over your questions in an email? I may need assistance from staff as this is a very specific case. Then we can possibly schedule a call for Thursday, Friday or next week.

Thanks

Danika

Subject: RE: Question about Plug In BC

Hello Krystine

This is what we were able to find out on our end.

In September 2018, the Ministry reviewed the Specialty-Use Vehicle Incentive (SUVI) Program vehicle eligibility list as the intent of the program is to support the adoption of hydrogen fuel cell and plug-in electric vehicles in sectors that have not fully shifted to electrification. As a result of this review, the forklift category of the program was adjusted on September 21, 2018 to only include vehicles that are four-wheel sit-down counterbalance forklifts or three wheel sit down counterbalance forklifts. This resulted in several models being removed from the program. This program change was communicated to vehicle dealers and manufacturers, so they could inform their customers regarding orders that were no longer eligible.

Applicants that had placed deposits on vehicles that were removed from the eligibility list prior to September 21, 2018 had their applications honoured and received the incentive. Applicants who did not place deposits or complete a vehicle sale prior to September 21, 2018 are not eligible to receive the SUVI program incentive.

The applicant was denied the SUVI incentive in this case as the invoice was dated January 18, 2019 which is beyond the September 21, 2018 requirement.

I hope this helps. If you have any other questions please don't hesitate to ask.

Kind regards,

Danika

Subject: RE: Question about Plug In BC

Hi Danika,

Apologies for not getting back to you sooner –

Papason Trucking purchased two units from Masonlift Ltd. to build for them. The two units at the time were listed as an eligible vehicle under the SUVI program (Toyota 8HBW23). They received approval and Plug in BC emailed them requiring that they would just need the VIN and proof of payment. When Papason did submit the required information after the two machines were built, there application was denied and they were told that the vehicle was no longer eligible for the SUVI program.

Please let me know if you would like me to attach the approval or denial letters – or if this is enough information to determine if it would be a concern of the Fraser Basin Council.

Thank you!

Hi Danika,

I just finished speaking with the constituent further and it sounds like his concern involves the Specialty-Use Vehicle Incentive Program through Plug-In BC. It looks like they were initially approved to receive the rebate then the application was denied as the model was no longer shown under the eligible vehicles.

Would this be something that would go through the Ministry? If so, I will send in all the information regarding the constituent and consent.

Let me know ☺ I can provide more information if needed.

Subject: Question about Plug In BC

Good afternoon Danika,

I have a constituent who has called saying he has a concern with Plug In BC. I looked at the Plug In BC (pluginbc.ca) website but it doesn't show that the Ministry manages it – only says that, "Plug In BC is a program of the Fraser Basin Council and works in collaboration with **government**, industry, academic institutions, EV owners, NGOs and utilities. The program lays the groundwork for plug-in electric vehicles and related charging infrastructure in British Columbia." Sounds like he should be directed towards the Fraser Basin Council for assistance but just wanted to confirm with you first if that would be the proper route.

Please let me know – give me a call if you have any questions about my request!

Thank you,

To: Osborn, Lynn LASS:EX
Subject: RE: Electric vehicle rebates

Hello Lynn

Here are some bullets as well.

- B.C. has the highest uptake of new electric vehicles in Canada and our recent incentive program has seen huge success – more than we anticipated.
- The revised structure will ensure that more British Columbians can take advantage of both the federal and provincial incentives and get as much as \$8,000 off the purchase of an affordable zero-emission vehicle.
- At this stage, adjusting the eligibility threshold to make only the lower cost ZEVs eligible for the incentive, and moderate demand on the vehicle incentive program, is a measure to extend the funds to more potential buyers.
- With the new incentive structure, we expect approximately 3,800 additional vehicles will be able to access an incentive.
- The majority of incentives have been allocated to individuals, not fleets. We are seeing unprecedented demand in the incentive program due to a combination of factors: success of our CEV Program investments in incentives, infrastructure and public awareness; the introduction this year of the federal incentive on eligible vehicles; the introduction of our ZEV Act; and automakers making more numbers and models of ZEVs, with longer ranges, available in B.C. at more affordable prices.
- Buyers who have purchased (a sale is deemed completed and consummated when the purchaser of the vehicle has paid the purchase price, or, in lieu thereof, has signed a purchase contract or security agreement and taken physical possession or delivery of the vehicle) before June 22, 2019 will be covered by the former incentives and rules.
- Buyers who reserved their vehicles before June 22, 2019 (evidenced by either their dealers submitting an OEM Order application to the CEVforBC Program to reserve their incentive prior to June 22, 2019, or by a vehicle order with deposit made before June 22, 2019) will be covered by the former incentives and rules, including the 90-day limit for reservations (supporting documents including proof of deposit, vehicle tracking number and purchase order are required).

If you need anything else please let me know.

Cheers

Subject: RE: Electric vehicle rebates

Hello Lynn

From my understanding the rebate is being reduced because the Provincial funding is being exhausted at a much higher rate than anticipated. To ensure more people can access funding and to stretch out the funding, the amount has been reduced.

Anyone who reserved or ordered before this announcement should still be able to get the initial discount but they need particular paperwork. I am just collecting the details and any other messaging I can provide now.

Cheers

Danika

Subject: Electric vehicle rebates

Hello Danika, we've had 2 emails today from constituents who are dismayed that the Province CEV rebates have been reduced to \$3000. I have read the June 24/19 press release and I guess I'm thick, but the way it reads (to me) is that the Federal Gov is implementing a \$5000 rebate and the Prov Gov has reduced the rebate payment to \$3000 for a collective \$8000 rebate. Is that correct? Has the prov rebate been reduced because of the fed rebate?

Thanks,

Subject: Nanaimo-North Cowichan - Proposed Gravel Pit

Hello Marlene

MLA Routley has a constituent concerned about the proposed gravel pit on Nanaimo River/Boulder Creek. He is going to be meeting with the constituent and the staff have asked if we can get them more information on where the application is at, in regards to being processed, and any other information that would assist MLA Routley for the meeting.

Here is the constituent's letter. Thanks!

On behalf of the Southforks/ Nanaimo River Community located in South Nanaimo we write you on behalf of our community to announce our adamant opposition to the proposed Lafarge gravel pit mine on the Nanaimo River & Boulder Creek at 1975 Nanaimo River Road.

As a community we have been put in a very difficult position as a large national corporation Lafarge/ Hub City is seeking a mine permit from the province to operate a gravel pit mine on Nanaimo River in the

community of Southforks/ Nanaimo River. The community met and unanimously voted to oppose the gravel pit that Lafarge Hub City wishes to operate in our community.

We discussed and have concluded that bottom line gravel pits should not be located in a residential community, especially in such an environmentally sensitive area. Gravel pits pose a serious health, safety, and environmentally dangerous proposition for our community. The property at 1975 Nanaimo River Rd while zoned for resource extraction, it was done so over 25 years ago when our community had eight residential homes, fast forward to 2019 and our community has 80 homes and families, these families and their livelihood will be directly impacted if a gravel pit permit is issued by the province.

The proposed location for the gravel pit, which was formerly a residential residence is directly above Nanaimo River and adjacent to Boulder Creek and contains an artesian well, which are sensitive areas that directly impact endangered species of fish such as steelhead and salmon. We believe that having a gravel pit in this location has the potential to negatively impact fish bearing habitat, in which the governments seem very eager in protecting these days. According to the community's sources we have learned that gravel/ rock crushers, which are proposed for this location, require over a gallon of oil for their gears, oil and contaminants that can potentially leach into our rivers and streams.

These gravel pits do not have invisible barriers protecting people, fish, animals and the local ecosystems, this dust and increase of trucks and pose a significant health hazard from dust particles. The killer dust particles are the ones you cannot see, the fine particulates otherwise known as Crystalline Silica a harmful carcinogen, that can cause Silicosis, lung cancer, tuberculosis increased lung irritation. There is no cure for Silicosis. This area is very windy, and winds can move these harmful dusts a long ways in our residential community. There are families with small children, seniors, animals such as deer, bears, reptiles, fish, rabbits, and other animals that live all around these gravel pits. Gravel pits should not be in residential areas and pose a significant risk to the health of our community.

The Regional District and province have over the past 25 years allowed developers and forest companies such as Couverdon to develop property adjacent to 1975 Nanaimo River Rd, and all around this area and community known as Southforks/ Nanaimo River. The Regional District of Nanaimo & Province of BC have collected significant revenues from development fees and taxes and continue to do so all in a residential community. These homes are generally the communities biggest personal investment, if the RDN and Province of BC allow a mine to operate and then collect permit fess for a mine in a residential community neighborhood the perception is of a conflict of interest.

Our community did our own traffic survey based on Hub City's gravel pit down the road and we have determined the gravel pit would add over 200 or more trucks per day to our community. The same community that is on a school district 68 bus route, where elementary (age 5-12) and high school (age 12-18) take the school bus. These kids often walk along the road and on the road because there are no sidewalks in our community. Its even worse when there is snow on the roads, which happens frequently as we are higher in elevation. Would a child's death from a gravel truck driver "making time" be enough to stop the gravel pit?

Having a gravel pit in our community will significantly reduce the value in our homes. Who would want to live in a community next to a gravel pit? Having a gravel pit operating with heavy equipment from 7am for potentially the next 10-50 years and adding over 200 more trucks on our roads will decrease our property value. This decrease in value is quantifiable and when you add 80 homes the loss is significant. Is Hub City/ Lafarge, the province, or RDN going to reimburse property owners with the loss of value in their homes? It wont take much to research to investigate and support the loss of property value this gravel pit will bring.

There are many recreation users in this area from bikers (bicycles), motorcycles, horse back riders, swimmers, hikers, and residences who all use this area. It is the community's opinion that economic drives such as tourism are much more sustainable and provide a better long-term benefit to everyone.

Nanaimo, the Regional District and our community are much smarter and understand the importance of developing long term sustainable economies, ones that are much more environmentally friendly.

Our climate is changing, our salmon are disappearing, our forests are burning, our creeks/ rivers are drying up, the solution is not a gravel pit on Nanaimo River and Boulder Creek. We need to do a better job protecting our green spaces and our water, we cannot mortgage short term large corporate profit for negative long term environmental impact and a significant decrease of quality of life of our citizens.

Our water is one of our most valuable resources and a gravel pit on Nanaimo River and Boulder Creek is not the way we protect our land. We need to wake up and look around us and if we don't take hard stance against environmental degradation, we run a serious risk of economic collapse due to climate change and most importantly risk the future of our children and grandchildren.

The Federal Government of Canada are telling us we need to protect or salmon and fish and wild resident orcas are dying from a lack of salmon. Nanaimo River has provided a source basic essential need such as food for Snuneymuxw First Nations and residences of Nanaimo much longer than any gravel pit was in our community. When the gravel runs out Lafarge moves on, what happens when the fish and salmon are gone? Both Boulder Creek and Nanaimo river are fish bearing, im sorry but 15 meter setbacks is nowhere near enough.

When Lafarge put on "info session" the feedback we received was the ministry of mines "do not have to consult with local first Nations" such as Snuneymuxw. We reminded the representative of BC mines that yes the province and industry has a duty to consult as Canada has committed to a renewed, nation-to-nation relationship with Indigenous peoples based on recognition of rights, respect, co-operation and partnership, and rooted in the principles of the United Nations Declaration on the Rights of Indigenous Peoples. When we spoke to a representative of the RDN we were told that residential should have never been allowed to develop in this area in the first place. Well guess what RDN, you allowed a lot of homes, families and lives to be development in this area!

The government classify gravel pits as interim use of land, but gravel pits are not interim, they strip the vegetation, topsoil, push out animals and biodiversity, but also the surrounding ecosystems as are negatively impacted as well. Most gravel pits end up turning into desert like conditions, including the one just down the road. Where was the remediation on the gravel pit a few kilometers down Nanaimo River at Yellow Gate/ Pink Rock? When is the last time you saw a properly re-mediated gravel pit?

Last year local residences were on a fire evacuation alert, operating heavy equipment in this area and turning this land into a desert isn't going to contribute the reducing the risk of forest fires in the area.

The problem is Lafarge has deep pockets and have the resources to hire all the consultants and do all the studies to prove they are environmentally responsible, but who holds them accountable? The government says there are laws and rules, but for so long we have witnessed such degradation of our land and our resource management that the public has lost a lot of trust in environmental protection in the name of profits and economy. We see how our forests are managed by "industry regulated" and for anyone who has spent time in the back country we see the severe degradation of our forests and waterways and now we are experiencing mill shutdowns and closure because of lack of lumber, poor resource management.

The Southforks/ Nanaimo River community understands business, the importance of economy, providing jobs and supplying gravel into our community, but gravel pits should not be in a residential community, they should be much farther away that around residential homes. We need to think long term sustainable economies, not short term!

Gravel pits bottom line should not run the risk of harming our community and our resources such as rivers, streams, biodiversity, salmon habitat and risking the quality of life and increasing the risk of severe health problems for citizens in Nanaimo, especially not for short term profit for large multinational corporations.

Dear Minister Mungall,

Re: 2019 Northeast British Columbia Community Coal & Energy Forum
September 11 & 12, 2019 in Tumbler Ridge, British Columbia

The Districts of Tumbler Ridge and Chetwynd would like to invite you to attend the 14th Annual Northeast British Columbia Coal & Energy Forum that will take place in Tumbler Ridge on September 11 & 12, 2019.

At this year's forum, we will explore trends in the coal and energy sectors that are predicted to shape the workforce of the future and key skills that will become increasingly in demand. This in turn will help industry and educators to better prepare the next generation of coal and energy sector workers, specialists, entrepreneurs and innovators to fulfill the changing technological, environmental and servicing needs of the sector.

Over the two days together, there will be opportunities to forge new relationships, gain an appreciation of the common interests of all energy sectors and strengthen existing ties through informative presentations and an abundance of networking opportunities.

September 11th will be a day of experiencing the splendour of the Tumbler Ridge area. Tours will be available to places of interest around the area and the evening will conclude with a special dinner celebrating the positive interrelationship between our geopark and our resource industries.

September 12th will involve information sessions, a tradeshow, and keynote speakers. Please visit our website www.CoalForum.ca in the coming weeks as we add details to the agenda and itineraries and to register.

We hope that you will find time in your busy schedule to join local government and industry leaders from the Peace Region in Tumbler Ridge in September! If you have any questions and to RSVP, please contact Chairperson of the Organizing Committee, John Powell at (250) 242-4242 or email coalforum@dtr.ca.

Keith Bertrand *Keith Bertrand* *Keith Bertrand*

Keith Bertrand, Mayor – District of Tumbler Ridge

Hello Danika,

I'm hoping you can help me....Why is BC Hydro forcing ppl to change out their analog meters, in particular with those that have cancer? I was under the impression that we will allow ppl to continue to have their analog meters and to pay the fees required for meter reading, etc.

Do you have any information on this?

Regards,

Leanne

To: Leonard.MLA, Ronna-Rae <Ronna-Rae.Leonard.MLA@leg.bc.ca>

Subject: Requesting your assistance

To Ronna Rae Leonard, MLA:

Please find attached my latest letter regarding my continuing effort to retain a legacy meter due to my medical condition. Any assistance you may give me as my MLA in this effort would be greatly appreciated. If you need to see BC Hydro's unsatisfying response to my May 13 letter (also attached here), I will glad to send it to you.

It is disheartening to be told that no governmental or other agency has any say over BC Hydro's smart meter program once it had been approved. Does the public really have no recourse outside of BC Hydro for appealing a forced meter exchange in the face of legitimate health concerns?

Sincerely,

s.22

Andrew Cuddy

Ministerial Assistant to the Honourable Michelle Mungall
Minister of Energy, Mines and Petroleum Resources

- B.C. has the highest uptake of new electric vehicles in Canada and our recent incentive program has seen huge success – more than we anticipated.
- The revised structure will ensure that more British Columbians can take advantage of both the federal and provincial incentives and get as much as \$8,000 off the purchase of an affordable zero-emission vehicle.
- At this stage, adjusting the eligibility threshold to make only the lower cost ZEVs eligible for the incentive, and moderate demand on the vehicle incentive program, is a measure to extend the funds to more potential buyers.
- With the new incentive structure, we expect approximately 3,800 additional vehicles will be able to access an incentive.
- The majority of incentives have been allocated to individuals, not fleets. We are seeing unprecedented demand in the incentive program due to a combination of factors: success of our CEV Program investments in incentives, infrastructure and public awareness; the introduction this year of the federal incentive on eligible vehicles; the introduction of our ZEV Act; and automakers making more numbers and models of ZEVs, with longer ranges, available in B.C. at more affordable prices.
- Buyers who have purchased (a sale is deemed completed and consummated when the purchaser of the vehicle has paid the purchase price, or, in lieu thereof, has signed a purchase contract or security agreement and taken physical possession or delivery of the vehicle) before June 22, 2019 will be covered by the former incentives and rules.
- Buyers who reserved their vehicles before June 22, 2019 (evidenced by either their dealers submitting an OEM Order application to the CEVforBC Program to reserve their incentive prior to June 22, 2019, or by a vehicle order with deposit made before June 22, 2019) will be covered by the former incentives and rules, including the 90-day limit for reservations (supporting documents including proof of deposit, vehicle tracking number and purchase order are required).

The motion, which passed 7-4, points to a B.C. government report that projects the City of Vancouver will have to spend \$1 billion this century to mitigate rising sea levels. The motion says the city will send letters to 20 of the world's largest oil, gas and **coal** companies with its demand. The city also says it will ask the B.C. and Canadian governments to enact laws to confirm the responsibility of fossil fuel companies to pay their share of costs.

Vancouver says it is the 24th community in British Columbia to pass such a motion since 2017. The city says those municipal governments represent about one-third of all B.C. residents. [Link to Story](#) [top](#)

BC Government Corporate Calendar

GCPE Strategic Communications | Events & Corporate Planning Unit

Please do not email the GCPE Corporate Calendar mailbox

Phone: 778 698-3498

The Look Ahead is an edited product of the BC Government Corporate Calendar system and is published daily between 4:15 to 4:45pm whenever possible.

Executive Summary: What is the Corporate Calendar?

The Corporate Calendar provides a bird's eye-view of all communications activities across ministries and major agencies. The purpose is to:

- *Inform senior government officials of all government activities.*
- *Prevent scheduling conflicts within government departments.*
- *Improve efficiencies within the organization.*
- *Streamline the business process of planning and executing government activities.*

Recently Published News Releases can be found here:

BCGov Newsroom: <https://news.gov.bc.ca>

News Archive: <https://archive.news.gov.bc.ca/>

CORPORATE CALENDAR LINK (RESTRICTED ACCESS):

s.15

MO & Comm Shops – Important Process

Reminders:

For a number of reasons, ALL events and releases are to be scheduled Corporately as far in advance as possible.

- Final news releases, statements and info bulletins etc. are to be sent for final processing **at least 24-48hrs ahead of publishing time (wherever possible)**, unless otherwise arranged. Please keep approvals moving and don't hold them up.
- Significantly **more lead time** is needed if **translation** is required, per recent emails from HQ Exec on this topic.
- Send all finals to the larger '**GCPE Editors' list** (NOT the Editorial Services list please). Include the approved publishing date, time and Corp Cal ID # in that email.

This email is intended solely for the person or entity to which it is addressed and may contain confidential and/or privileged information. Any review, dissemination, copying, printing or other use of this email by persons or entities other than the addressee is prohibited. If you have received this email in error, please contact the sender immediately and delete the material from any computer.

Subject: RE: request from Ralph Sultan for a telephone call

It is actually 3 bridges in the Toodoggone. There are 16 different parties, including 2 First Nations, involved in mineral exploration projects. The repairs are on hold because the expectation is the government will pay for the repairs.

I believe Ralph would like to speak to the Minister because it is a rather complicated issue with the potential for consequences that may be bigger than 3 small bridges.

Thank you for considering Ralph's request.

Subject: Program objective: Reconnaissance Benthic Survey Salmo Area
Attachments: Map Benthic Survey Salmo Watershed.pdf; Benthic Study Objective.docx

Hi Gerry,

I apologize for my tardiness on getting a response back to your request for a program objective. Attached for your review and response is a proposal to conduct a reconnaissance benthic survey in a number of streams in the Salmo area . The objective of the survey is to identify if certain streams are being impacted by historic mine workings. The locations selected for sampling are picked such that they represent sites above and below historic mine areas, however, I do recognize actual locations will need to be field fit depending on the terrain etc.

I look forward to hearing back from you and hopefully a proposal.

Subject: RE: Meeting with^{s.22} and MLA Routley July 5th

Hello Sarah

Here are some bullets for you.

- A Statutory Decision has been made to issue an amended permit to Hub City paving. The permit should be issued during the first week of July.
- A Mines Act permit has been in effect over this site since 1991
- There is a treed buffer in excess of 150m between the proposed works and Nanaimo River Road
- There is a 30m treed buffer between any excavation and Boulder Creek
- There is a 165m treed buffer between any excavation and the Nanaimo River

- Consultation with First Nations has concluded (The EMPR inspector has never stated consultation is not required; it was stated that it is a legal obligation)
- The residents traffic study grossly over-estimates the number of trucks potentially coming to the site as it does not consider the maximum production of the site

If you or MLA Routley need additional information please let me know.

Kind regards,

Danika

Subject: RE: July 12th

Good morning Danika,

I have heard back from the GCPE folks and have more details.

We have confirmed that the event will occur on 9.30am with Selkirk college, and they've suggested having the event at the new student commons building on the Nelson campus. Likely attending will be someone from Columbia Basin Trust, as well as the mayor and council. They're also hoping to find some kids to join the event, but that's to be confirmed.

I think Paula mentioned that this was flagged for your office a few weeks ago? Not sure on the details on that however.

As for media the GCPE person has told me that: "We would send our media advisory our regionally to media in the area, then we'll aim to call the local paper – it looks like this would be the Nelson Star. We're happy to approach others if the MLA has an existing relationship or you have any further suggestions for direct outreach."

Let me know if you have more questions. 😊

Cheers,
Edena

Here are more of the details:

To: Cochrane, Marlene EMPR:EX <Marlene.Cochrane@gov.bc.ca>
Subject: RE: Follow up Request: Prince George-Valemount -- Plug In BC

Hello Marlene

The constituency assistant has provided the additional following information for this case file.

Regarding the part - "Applicants that had placed deposits on vehicles that were removed from the eligibility list prior to September 21, 2018 had their applications honoured and received the incentive. Applicants who did not place deposits or complete a vehicle sale prior to September 21, 2018 are not eligible to receive the SUVI program incentive. The applicant was denied the SUVI incentive in this case as the invoice was dated January 18, 2019 which is beyond the September 21, 2018 requirement"

On June 1, Mason Lift wrote up the terms and conditions of the order, also stating that the balance would be due on delivery of the vehicle. Papasan signed this form on July 19, 2018 and created a Purchase Order (PO) on July 26, 2018. It stated on the terms and conditions that delivery would be between 21-23 weeks; however, it was delivered at 31 weeks and Papasan were officially invoiced at 33 weeks – January 18, 2019.

It stated on the terms and conditions proposal that signing it constitutes as an order. I am just curious if this signed proposal would constitute as confirmation of an order, even though mason lift did not officially invoice them until after the vehicles were delivered?

Do you know of anything else that can be done for the applicant in this situation? Or if there is an answer to this question?

Many thanks,

Danika

Phone (778) 698 7254

1. Question from Prince George-Valemount Constituent on SUVI Program:

Papason Trucking purchased two units from Masonlift Ltd. to build for them. The two units at the time were listed as an eligible vehicle under the SUVI program (Toyota 8HBW23). They received approval and Plug in BC emailed them requiring that they would just need the VIN and proof of payment. When Papason did submit the required information after the two machines were built, their application was denied and they were told that the vehicle was no longer eligible for the SUVI program.

In September 2018, the Ministry reviewed the Specialty-Use Vehicle Incentive (SUVI) Program vehicle eligibility list as the intent of the program is to support the adoption of hydrogen fuel cell and plug-in electric vehicles in sectors that have not fully shifted to electrification. As a result of this review, the forklift category of the program was adjusted on September 21, 2018 to only include vehicles that are four-wheel sit-down counterbalance forklifts or three wheel sit down counterbalance forklifts. This resulted in several models being removed from the program. This program change was communicated to vehicle dealers and manufacturers, so they could inform their customers regarding orders that were no longer eligible.

Applicants that had placed deposits on vehicles that were removed from the eligibility list prior to September 21, 2018 had their applications honoured and received the incentive. Applicants who did not place deposits or complete a vehicle sale prior to September 21, 2018 are not eligible to receive the SUVI program incentive.

The applicant was denied the SUVI incentive in this case as the invoice was dated January 18, 2019 which is well beyond the September 21, 2018 requirement.

Hi Danika. Please see the response below. Thank you.

Marlene Cochrane
Executive Coordinator | Deputy Minister's Office
Ministry of Energy, Mines and Petroleum Resources
Victoria | British Columbia
Phone (778) 698 7254

The specialty-use vehicle incentive is managed by the Fraser Basin Council on the Ministry's behalf. Without knowing the exact context of the application the constituent should follow up with the program. However, we can provide bullets if the applicant can supply some further information regarding the issue.

To: Cochrane, Marlene EMPR:EX
Subject: Prince George-Valemount -- Plug In BC

Hello Marlene

We have the following question from Prince George-Valemount

They have a constituent who has a concern with Plug In BC. But based on the website it doesn't show that the Ministry manages it – only says that, "Plug In BC is a program of the Fraser Basin Council and works in collaboration with **government**, industry, academic institutions, EV owners, NGOs and utilities. The program lays the groundwork for plug-in electric vehicles and related charging infrastructure in British Columbia."

Should the constituent be directed towards the Fraser Basin Council for assistance? Or can we assist with anything?

I don't know the constituent's actual concern at this time.

Thanks

Danika

From: Employee News PSA:EX
Sent: July 5, 2019 10:16 AM
Subject: Executive Message from Okenge Yuma Morisho and Donna Evans: New Social Media Guidelines

Executive Message

New Social Media Guidelines

Social media plays an expanding role in the everyday lives and work of public service employees. Our social media activity, whether as an individual or in an official capacity, can impact public trust and confidence. Our use of social media in official capacities also impacts the quality and responsiveness of service we provide for citizens.

As employees, we are responsible to ensure our social media activities comply with the Oath of Employment, [Standards of Conduct](#) and other policies and regulations we follow as public service employees.

To help understand these obligations and support you in making informed choices, new personal-use and updated government-use guidelines have been developed.

Personal use

The BC Public Service Agency is launching the new [Social Media Guidelines for BC Public Service Employees](#) to inform your personal use of social media as a public servant. While the guidelines for personal use are new, the expectations they reflect are not. They focus on the principles that will help you make informed choices about your online activity that won't conflict with your commitments to the BC Public Service. They don't prevent you from using social media – they are just intended to help you ensure you're using social media consistent with the Standards of Conduct and other corporate policies.

If you have questions about appropriate professional or personal use of social media, [review the resources available on MyHR](#), and then talk to your supervisor or your ministry ethics advisor.

Government use

Government Communications and Public Engagement has updated the [Guidelines for Government Use of Social Media by B.C. Public Servants](#). The revised guidelines focus on official government use of social media like setting up and

managing social media accounts and engaging in citizen consultations. In addition, the guidelines establish clear processes and best social media practices for supporting key priorities across government.

Thank you for your attention to this very important matter.

Okenge Yuma Morisho
Deputy Minister
BC Public Service Agency

Subject: correspondence - on behalf of MSF to^{s.22}

Hello Andrew

Lisa sent me the following correspondence. It's sitting with me in eApps right now.

I wasn't involved in the direction but from what it looks like MSF's team asked us to respond on his behalf.

Were you involved in directing it? Just wanting to know if it was looked at before being drafted.

Also do you have any thoughts on the letter before I send it to MMM?

Thanks

Danika

Danika Hammond
Executive Assistant to the
Honourable Michelle Mungall
Minister of Energy, Mines and Petroleum Resources

Subject: Balfour Days

s.22 is the organizer she can be reached at s.22 or by cell at s.22 . Pancakes are being served from 10:00 am to 12:00 pm

Michelle has confirmed she will help flip pancakes from 10:30 – 11:30 and I called s.22 to leave a message with that information just now.

There are sponsorship opportunities still available, the MLA would be recognized in the thank you they put in the local paper after the event. Contact s.22 next week to confirm. Put on the staff meeting to discuss with MM once you get all the info. I told s.22 that we would likely be in for next year but we are too late to get recognition on the posters etc. for this year.

Subject: RE: Automatic reply: Rebate

Hello Glenn

This is what I've found out. Dealers are being asked to follow the submission process for these cases detailed on the CEVforBC website, such that they can provide the appropriate incentives to their customers. Dealers who aren't certain of the process can contact the CEVforBC team directly through their regular channels, and the team will work with them to clarify the process they need to follow.

I suggest that s.22 follow-up with the Hyundai dealer in the coming days regarding the case. The CEVforBC team will also be monitoring the transition between the old and new rules, and working with the automakers and dealers to help make the transition as smooth as possible for customers.

If I could see this fine print requiring delivery by September that would be great as well.

Thanks

Danika

Hi Glen,

Thank you for delivering this good news. I just spoke to the sales representative I'm dealing with at Port Coquitlam Hyundai's.22 and he has been told that there is "fine Print" requiring delivery of the vehicle by September. I was told when I made my deposit that I would have to wait maybe into January. I have asked him to check his facts on his end. Are you aware of a delivery date caveat in the regulations?

thanks again

Subject: Fwd: Automatic reply: Rebate

Hi again Mike,

I've just talked to my dealer and discovered that their understanding of the regulations affecting the reduction in the rebate for EVs is that a "locked down deal" means you must have a VIN attached to the deal. Obviously this is impossible in the situation that I face as the vehicle itself is on back order. There is no car yet available. Otherwise I would already have it. I hope this isn't the case. In my view the fact that I have signed a deal and made a down payment must constitute a commitment to purchase and therefore qualify for the full debate. The reduced rebate should only apply to new deals negotiated and agreed to after the end of June. I hope theses the case as it only seems fair. I committed to purchase this EV and am arranging financing to cover the cost with the full rebate.

Thanks Mike,

Subject: RE: Electric Vehicle Incentive

Hello Andrew

Here are some bullets for you.

- B.C. has the highest uptake of new electric vehicles in Canada and our recent incentive program has seen huge success – more than we anticipated.
- The revised structure will ensure that more British Columbians can take advantage of both the federal and provincial incentives and get as much as \$8,000 off the purchase of an affordable zero-emission vehicle.
- At this stage, adjusting the eligibility threshold to make only the lower cost ZEVs eligible for the incentive, and moderate demand on the vehicle incentive program, is a measure to extend the funds to more potential buyers.
- With the new incentive structure, we expect approximately 3,800 additional vehicles will be able to access an incentive.
- The majority of incentives have been allocated to individuals, not fleets. We are seeing unprecedented demand in the incentive program due to a combination of factors: success of our CEV Program investments in incentives, infrastructure and public awareness; the introduction this year of the federal incentive on eligible vehicles; the introduction of our ZEV Act; and automakers making more numbers and models of ZEVs, with longer ranges, available in B.C. at more affordable prices.
- Buyers who have purchased (a sale is deemed completed and consummated when the purchaser of the vehicle has paid the purchase price, or, in lieu thereof, has signed a purchase contract or security agreement and taken physical possession or delivery of the vehicle) before June 22, 2019 will be covered by the former incentives and rules.
- Buyers who reserved their vehicles before June 22, 2019 (evidenced by either their dealers submitting an OEM Order application to the CEVforBC Program to reserve their incentive prior to June 22, 2019, or by a vehicle order with deposit made before June 22, 2019) will be covered by the former incentives and rules, including the 90-day limit for reservations (supporting documents including proof of deposit, vehicle tracking number and purchase order are required).

I hope this helps with drafting a response to your constituent. If you need anything else please let me know.

Kind regards,

Danika

Subject: Electric Vehicle Incentive

I was very disappointed today to read that the incentive for purchasing an EV has been reduced by \$2000 from \$5000 to \$3000. I would love to purchase an electric vehicle, and to this end I've been reading all about the technology, the various models available, pricing out the options and considering what's possible. I came to two conclusions:

One, the current up front cost, even with incentives, was *just a little* too much for me. Decisions like this are made on the margins, and I couldn't help but think of the superior incentives in Quebec (\$8000) California (equivalent to \$6600cad) or the \$14000 formerly offered in Ontario. I can't speak for others, but any of these amounts would likely have been enough, and the generous amount offered in Ontario pre-Ford would have made it a slam dunk.

Two, vehicle availability is key. Not all EVs models are actually sold in BC, and those that are have significant availability issues leading to long waits. If the government wants BC motorists to adopt EVs in large numbers, then it's crucial that the proper supply is actually available. I was personally disappointed to learn that the ID.3, Volkswagen's new electric vehicle and replacement for the soon to be discontinued e-Golf, will not even be sold in North America. I thought to myself that a *greater* purchase incentive could help the government when working with auto manufacturers to ensure there is sufficient supply to meet the government's own goals.

Decreasing the incentive makes it unlikely I'll purchase an electric vehicle. If it was just out of reach yesterday, it's that much further today. But it's worse than that. Why would I make a point of saving for such a vehicle and continuing to closely follow the development of these cars if I have no idea if the existing incentives are even going to stay? Yesterday I was hopeful that I could save, and maybe in a year the incentive would be higher and then I'd buy! Now I feel like there's just no point. Maybe next year I've got a few thousand put aside - and the incentive will be completely gone, thereby leaving me in the exact same position.

I'll also say that the cost of gasoline and carbon pricing are obviously an issue. People talk about it. I'm one who's never complained about either. I *want* to do my part. I don't want to burn fossil fuels. And I'm a rational

person responsive to price signals. But the current situation is basically electric vehicles (and lost cost power available exclusively to homeowners!) for some, and carbon pricing for those unable to afford the change. If the alternate is priced beyond your means, then it's not a signal to change behaviour - it's the just tax on working people that it's opponents have labeled it.

As a constituent, as well as a party member, I hope you raise these concerns and help chart a better way forward. I care deeply about climate change. But I care about it both as an abstract and as a practical matter in my life. For me, climate policy is transportation and housing policy. If I can't afford to live in a walk-able neighborhood, or a neighborhood well served by transit, or a neighborhood with safe cycling infrastructure, AND I can't afford a zero emission vehicle, then I'm really not sure what I'm supposed to do.

You're not in opposition, you're the government. Stop being timid. It's time to lead.

Thank you,

s.22

To: Cochrane, Marlene EMPR:EX
Subject: RE: BULLETS: new EV rebate

Hello Marlene

In the bullets

- From your email, it sounds like your EV purchase would fall under the pre-June 22nd rules. Dealers are being asked to follow the submission process for these cases detailed on the CEVforBC website, such that they can provide the appropriate incentives to their customers. Dealers who aren't certain of the process can contact the CEVforBC team directly through their regular channels, and the team will work with them to clarify the process they need to follow.
- I suggest that you follow-up with your dealer in the coming days regarding your case. The CEVforBC team will also be monitoring the transition between the old and new rules, and working with the automakers and dealers to help make the transition as smooth as possible for customers. If you have any further questions or concerns, please do not hesitate to contact me.

Who is it that they should contact? Their MLA's office? Or do we have a contact? Can they contact Nick Clark who prepared the bullets?

Thanks

Subject: new EV rebate

Hello Marlene

I have received a few emails from CAs about constituents who signed up to purchase an EV before the rebate changed. Most have slightly different situations, but I expect to receive more similar files.

Here is one example from Port Coquitlam

s.22 went to purchase an EV but there was a significant backlog and she was told there was a significant backlog and a vehicle wouldn't be available until January 2020.

She has sent the following emails.

"I've just talked to my dealer and discovered that their understanding of the regulations affecting the reduction in the rebate for EVs is that a "locked down deal" means you must have a VIN attached to the deal. Obviously this is impossible in the situation that I face as the vehicle itself is on back order. There is no car yet available. Otherwise I would already have it.

I hope this isn't the case. In my view the fact that I have signed a deal and made a down payment must constitute a commitment to purchase and therefore qualify for the full rebate. The reduced rebate should only apply to new deals negotiated and agreed to after the end of June.

I hope theses the case as it only seems fair. I committed to purchase this EV and am arranging financing to cover the cost with the full rebate."

"I just spoke to the sales representative I'm dealing with at Port coquitlam Hyundai^{s.22} and he has been told that there is "fine Print" requiring delivery of the vehicle by September. I was told when I made my deposit that I would have to wait maybe into January. I have asked him to check his facts on his end. Are you aware of a delivery date caveat in the regulations?"

Do we have any additional information or someone that people in s.22 position can contact to work out whether or not they will receive the \$5000 or \$3000 rebate?

Thanks

Danika

BC Government Corporate Calendar

The Look Ahead is an edited product of the BC Government Corporate Calendar system and is published daily between 4:15 to 4:45pm whenever possible.

Executive Summary: What is the Corporate Calendar?

The Corporate Calendar provides a bird's eye-view of all communications activities across ministries and major agencies. The purpose is to:

- *Inform senior government officials of all government activities.*
 - *Prevent scheduling conflicts within government departments.*
 - *Improve efficiencies within the organization.*
 - *Streamline the business process of planning and executing government activities.*
-

Recently Published News Releases can be found here:

BCGov Newsroom: <https://news.gov.bc.ca>

News Archive: <https://archive.news.gov.bc.ca/>

CORPORATE CALENDAR LINK (RESTRICTED ACCESS):

s.15

MO & Comm Shops – Important Process

Reminders:

For a number of reasons, ALL events and releases are to be scheduled Corporately as far in advance as possible.

- Final news releases, statements and info bulletins etc. are to be sent for final processing **at least 24-48hrs ahead of publishing time (wherever possible)**, unless otherwise arranged. Please keep approvals moving and don't hold them up.
- Significantly **more lead time** is needed if **translation** is required, per recent emails from HQ Exec on this topic.
- Send all finals to the larger '**GCPE Editors'** list (NOT the Editorial Services list please). Include the approved publishing date, time and Corp Cal ID # in that email.

This email is intended solely for the person or entity to which it is addressed and may contain confidential and/or privileged information. Any review, dissemination, copying, printing or other use of this email by persons or entities other than the addressee is prohibited. If you have received this email in error, please contact the sender immediately and delete the material from any computer.

Subject: BULLETS: Fraser Nicola - Craigmont Mine site

Hi Danika. Please see the bullets below. Thank you.

Marlene Cochrane
Executive Coordinator | Deputy Minister's Office
Ministry of Energy, Mines and Petroleum Resources
Victoria | British Columbia
Phone (778) 698 7254

- **Background:** Craigmont Mine (*Mines Act* permit M-68) is a closed open pit copper mine near Merritt BC. The operating mine and mill facilities were closed in 1982. In 2013 Huldra Properties Inc. (Huldra) took over the site and established a custom mill to process ore from other Huldra-owned properties. No active mining activities are currently permitted at Craigmont Mine, though some exploration activities are currently approved at the waste dumps and near the historic open pit.
- There have been long term issues with dusting from the tailings facilities mine affecting communities south of the mine.
- The mine has proposed to import woody debris and fly ash material to mix with topsoil and try to make a stable cover for the tailings to mitigate dust issues. An application is currently under review by EMPR, ENV and First Nations. No permit has been issued allowing the mine to import material at this time.
- On June 3, 2019 following concerns raised by the public and the Thompson Nicola Regional district about the mine importing material to site, Lowell Constable, Senior Director of Technical Operations (EMPR) spoke with Huldra Warwick Bay and Warwick confirmed the mine was indeed importing material to site. Lowell sent an e-mail communication to Peter Espig and Ron Veinotte (Craigmont mine manager), and directed that all further importation of material must halt pending authorization by EMPR.
- On June 12, EMPR followed up by conducting a reclamation inspection of the site. No material was being hauled to site on the day of the inspection, however unauthorized stockpiles of woody debris were observed. EMPR issued orders to halt all further importation unless authorized by EMPR.
- If the proposed cover plan is not authorized, the mine will be obligated to remove all imported material from site.
- Review of the permit amendment application is ongoing.

Subject: Fraser Nicola - Craigmont Mine site

Hello Marlene

I have the following inquiry from MLA Tegart's office. They have a constituent with concerns about the truckloads of soil that are currently being hauled into the old Craigmont Mine site.

They are wondering if we can advise them of the status of the mine site, whether there are any permits for work there, as well as what is currently being hauled to the site.

Please see the letter from the constituent below.

For several months now we have noticed double dumps traveling to and from the old Craigmont mine site in Lower Nicola. We are long time residents there. We contacted the TNRD about them as local talk is they contain and are dumping contaminated soil at the mine. The TNRD informed us that it was not their jurisdiction and asked we contact the ministry or mines, which we have and no reply or response has been given. TNRD did inform us that there are no permits granted for dumping at the mine site. None of the trucks have any company names or identifiers on them. I have contacted the current CEO of Nicola Minign Inc, listed as current owner on the net, no reply from him either. (Peter Espig 778-385-1213)

Our concern is that our community water system is already contaminated with fine black particles from the mine.(If lines are cut and emptied for renewal, a inky black tar like goop comes out of them.) If there is indeed contaminated soils being dumped at the mine them our water source is in peril.

Can you look into this and unlike the others take some action?

Thanks

Danika

Subject: Notes, facebook live progress
Attachments: image1.jpeg; image2.jpeg

Notes:

I have the eNewsletter all ready to send but I can't get the formatting for the pictures done right- I sent you another email with the approved draft. Please do your best to fix the formatting and send it out.

Creston Facebook Live event:

- Brian Lawrence is confirmed. I have told him tentative time for the 18th, but not yet confirmed it with him
- Museum: They are keen to have us come film from there. They emailed some pictures of the spaces that have a good wifi connection. I have said I would get back to them on which space we will use but haven't yet- I'm leaning towards the WW2 exhibit as it is out of the way and has good visuals still. I attached a picture of that room to this email for your reference.
- **MM wants to do radio ads and PSAs as well as facebook ads and possibly a press release. I haven't gotten to anything except I did set up a facebook event. We need to get on asking people to submit their questions ASAP. There is a section in the eNewsletter encouraging people to participate that MM has edited and approved already. She wants to make sure we highlight that it's on the anniversary of 2 years in government.**

Colleen Driscoll and group advocating for satellite renal unit in Nelson. There are now 6 people that need to travel to Trail for dialysis, some are coming from Kaslo and North Kootenay Lake area- need to travel more than an hour to get there. They have requested a meeting with the MLA. I asked her to email more information about the number of people affected as well as the members of the group who would like to meet.

I have contacted OUTspoken- creston's LGBTQ+ advocacy group. Their response is in the inbox. Maybe put it on a staff meeting to discuss with MLA – she had said she would love to fund them in some way that is meaningful like paying for their travel to Kootenay Pride. From what they've sent I don't think that they would consider that a priority- but would like assistance with some of the projects / events they are organizing.

I have not yet replied to the request from the Premiers office asking about what we did in response to Madelyn McKay's meeting request as well as Canada day at the Moyie. I couldn't remember off the top of my head, maybe you can respond next week.

Also I forgot to call^{s.22} this week- Cyra forwarded her issues as she went to Kat's office in error. If you don't get to it next week I can call her the week after- it might be nice to get going on it sooner. Cyra thought we should refer her to the advocacy center. The email is in the inbox.

Ainsworth: MM wants to have breakfast with Minister Behr and staff and Chief and Council while they are there on Saturday morning. I have not yet done anything to organize this. She specifically said she wanted to invite Diana Ducs as well.

Subject: RE: Question about Plug In BC

Hello Krystine

Sorry for the delay but we have some potentially good news.

If the applicant is able to provide documentation indicating that a deposit was paid from the applicant to MasonLift for the two units prior to September 21, 2018, the Ministry would be happy to review the application in order to determine eligibility for the SUVI program incentive. If documentation regarding deposit payment is available, please send via email to: Nick Clark, Senior Economist, Clean Vehicles - Nick.Clark@gov.bc.ca

Was a deposit made when the Purchase Order was signed?

Kind regards,

Danika

Sent: Wednesday, May 8, 2019 10:46 AM
To: Hammond, Danika S EMPR:EX
Subject: RE: Question about Plug In BC

Hi Danika,

Just a question about what you were able to find out, specifically about:

“Applicants that had placed deposits on vehicles that were removed from the eligibility list prior to September 21, 2018 had their applications honoured and received the incentive. Applicants who did not place deposits or complete a vehicle sale prior to September 21, 2018 are not eligible to receive the SUVI program incentive.

The applicant was denied the SUVI incentive in this case as the invoice was dated January 18, 2019 which is beyond the September 21, 2018 requirement”

On June 1, Mason Lift wrote up the terms and conditions of the order, also stating that the balance would be due on delivery of the vehicle. Papasan signed this form on July 19, 2018 and created a Purchase Order (PO) on July 26, 2018. It stated on the terms and conditions that delivery would be between 21-23 weeks; however, it was delivered at 31 weeks and Papasan were officially invoiced at 33 weeks – January 18, 2019.

It stated on the terms and conditions proposal that signing it constitutes as an order. I am just curious if this signed proposal would constitute as confirmation of an order, even though mason lift did not officially invoice them until after the vehicles were delivered?

Please let me know if you need any more information! Thanks 😊

Sent: Wednesday, May 1, 2019 5:09 PM
To: Iley, Krystine <Krystine.Iley@leg.bc.ca>
Subject: RE: Question about Plug In BC

Hello Krystine

This is what we were able to find out on our end.

In September 2018, the Ministry reviewed the Specialty-Use Vehicle Incentive (SUVI) Program vehicle eligibility list as the intent of the program is to support the adoption of hydrogen fuel cell and plug-in electric vehicles in sectors that have not fully shifted to electrification. As a result of this review, the forklift category of the program was adjusted on September 21, 2018 to only include vehicles that are four-wheel sit-down counterbalance forklifts or three wheel sit down counterbalance forklifts. This resulted in several models being removed from the program. This program change was communicated to vehicle dealers and manufacturers, so they could inform their customers regarding orders that were no longer eligible.

Applicants that had placed deposits on vehicles that were removed from the eligibility list prior to September 21, 2018 had their applications honoured and received the incentive. Applicants who did not place deposits or complete a vehicle sale prior to September 21, 2018 are not eligible to receive the SUVI program incentive.

The applicant was denied the SUVI incentive in this case as the invoice was dated January 18, 2019 which is beyond the September 21, 2018 requirement.

I hope this helps. If you have any other questions please don't hesitate to ask.

Kind regards,

Danika

Subject: RE: Question about Plug In BC

Hi Danika,

Apologies for not getting back to you sooner –

Papason Trucking purchased two units from Masonlift Ltd. to build for them. The two units at the time were listed as an eligible vehicle under the SUVI program (Toyota 8HBW23). They received approval and Plug in BC emailed them requiring that they would just need the VIN and proof of payment. When Papason did submit the required information

after the two machines were built, there application was denied and they were told that the vehicle was no longer eligible for the SUV program.

Please let me know if you would like me to attach the approval or denial letters – or if this is enough information to determine if it would be a concern of the Fraser Basin Council.

Thank you!

Hi Danika,

I just finished speaking with the constituent further and it sounds like his concern involves the Specialty-Use Vehicle Incentive Program through Plug-In BC. It looks like they were initially approved to receive the rebate then the application was denied as the model was no longer shown under the eligible vehicles. Would this be something that would go through the Ministry? If so, I will send in all the information regarding the constituent and consent.

Let me know ☺ I can provide more information if needed.

Subject: RE: Question about Plug In BC

Hello again Krystine

Can you tell me what the constituent's concern is with the Plug In BC program?

That may help us in determining if we can answer any questions or if they should just go to the Fraser Basin Council.

Thanks

Danika

Good morning Krystine

My apologies for the delay, it's been a busy break week.

I am working I am working on obtaining the information to answer your constituent's question about the Plug In BC program.

I'll get back to you hopefully early next week.

Kind regards,

Danika

Danika Hammond

Subject: Question about Plug In BC

Good afternoon Danika,

I have a constituent who has called saying he has a concern with Plug In BC. I looked at the Plug In BC (pluginbc.ca) website but it doesn't show that the Ministry manages it – only says that, "Plug In BC is a program of the Fraser Basin Council and works in collaboration with **government**, industry, academic institutions, EV owners, NGOs and utilities. The program lays the groundwork for plug-in electric vehicles and related charging infrastructure in British Columbia." Sounds like he should be directed towards the Fraser Basin Council for assistance but just wanted to confirm with you first if that would be the proper route.

Please let me know – give me a call if you have any questions about my request!

Thank you,

Krystine Iley

Subject: s.22 - EV rebate

Hello Glenn

Your email regarding s.22 Hyundai Kona EV that she has on order was forwarded to me.

From my understanding she paid a \$500 deposit and signed an agreement on June 4th and now wants to ensure she will receive the \$5000 rebate.

Here is some information for you on why the incentive was changed and what requirements need to be fulfilled to ensure customers can receive the \$5000.

- B.C. has the highest uptake of new electric vehicles in Canada and our recent incentive program has seen huge success – more than we anticipated.
- The revised structure will ensure that more British Columbians can take advantage of both the federal and provincial incentives and get as much as \$8,000 off the purchase of an affordable zero-emission vehicle.
- At this stage, adjusting the eligibility threshold to make only the lower cost ZEVs eligible for the incentive, and moderate demand on the vehicle incentive program, is a measure to extend the funds to more potential buyers.
- With the new incentive structure, we expect approximately 3,800 additional vehicles will be able to access an incentive.
- The majority of incentives have been allocated to individuals, not fleets. We are seeing unprecedented demand in the incentive program due to a combination of factors: success of our CEV Program investments in incentives, infrastructure and public awareness; the introduction this year of the federal incentive on eligible vehicles; the introduction of our ZEV Act; and automakers making more numbers and models of ZEVs, with longer ranges, available in B.C. at more affordable prices.
- Buyers who have purchased (a sale is deemed completed and consummated when the purchaser of the vehicle has paid the purchase price, or, in lieu thereof, has signed a purchase contract or security agreement and taken physical possession or delivery of the vehicle) before June 22, 2019 will be covered by the former incentives and rules.
- **Buyers who reserved their vehicles before June 22, 2019 (evidenced by either their dealers submitting an OEM Order application to the CEVforBC Program to reserve their incentive prior to June 22, 2019, or by a vehicle order with deposit made before June 22, 2019) will be covered by the former incentives and rules, including the 90-day limit for reservations (supporting documents including proof of deposit, vehicle tracking number and purchase order are required).**

From this last bullet it sounds like s.22 would qualify as she has a vehicle order and made a deposit (as long as she has the supporting documents).

If she has any trouble at the dealership can you contact me again?

Many thanks,

Danika

Subject: RE: Hi

Hello^{s.22}

That's a good question. At this time, Zero-emission vehicles only account for approximately 1% of vehicles on B.C. roads. The Province has not yet determined how plug-in electric vehicle use will be taxed to support the transportation system overall. As the uptake of plug-in electric vehicles increases, the Province will explore options for ensuring transportation services such as transit and roadways continue to be supported.

Cheers,

Danika

Subject: Hi

Hi Danika,

I attended the Electric Vehicle Car Show event in Kamloops today, and a person asked the question, "...if everyone transitions to full electric vehicles, and they aren't buying gas, diesel, oil, then there won't be all of the tax revenue from that source anymore, which probably all or part of it goes into building and maintaining our roads and highways in BC and Canada, and the related infrastructure, so he is wondering how that will be covered in the future or where the money comes from for roads etc currently.

Thanks for any info 🌞⚡CA👍😊CA⚡🌞 !!!...

Sincerely,

s.22

Subject: Messaging Request: Charging ZEVs

Hi Danika,

I had a constituent come in with a suggestion about charging ZEVs. They stated that we should make it such that charging electric cars at home is always done at the step 1 hydro rate of \$.0945 per kWh, instead step two (\$.1417 per kWh) as an incentive for more people to be able to charge their electric cars at home for cheaper.

I was wondering if you have any messaging on this matter.

Thanks,
