

CLAIMS IN THE NORTHEAST

CONFIDENTIAL

MINISTRY OF ENERGY, MINES AND PETROLEUM RESOURCES

NOVEMBER 2018

1.0 - Introduction

s.13

This document is in support of mining analysis regarding the Intergovernmental Partnership Agreement on the Conservation of the Central Group of Southern Mountain Caribou (Partnership Agreement). Within the Partnership Agreement there are two zones specifically identified contemplating differing levels of deferrals and protections. This document summarizes the level of currently contemplated action for each zone under the Partnership Agreement as well as underlying mineral and coal interests. Additionally, it provides an overview of tenures in the northeast region (map provided in Appendix A) and their respective status with regards to the level of efforts expended in exploring and developing the resource. For the purpose of this document, activity constitutes physical work being carried out within the tenure boundaries. Within each zone, there is a summary of mineral claims, labelled as titles either 'Good Standing Titles with Recent Activity' and 'Titles without Activity'. For the purpose of this document, activity constitutes physical work being carried out within the tenure boundaries.

Good Standing Titles with Recent Activity

The following information includes the list of tenures in the northeast region where physical work has been carried out within the past two years. Collectively, the two tenures cover approximately 175.00 hectares.

Commented [JAA4]: Update this section as per above

s.13; s.17

Titles without Activity

The 47 tenures listed below have not had physical work applied to them within the last two years and are being kept in good standing via other means (technical works, cash in lieu, etc.). The tenures cover approximately 26,502.35 hectares.

***Limitations of this Document**

This document is confidential and intended only for internal Government of BC employees and officials. This document provides rough estimates based on data provided by analysts within FLNRORD, EMPR, RSTBC, and MTAC. Data came from a variety of sources, including BC Government data and industrial proponents from forestry and mining. BC did not reach out to proponents and individuals involved in Oil & Gas, Alternate Energy, Commercial Recreation or Public Recreation (snowmobiling); therefore this information is based on best estimates from B.C. Government staff with expertise in these areas. Appendix V provides a summary of the information received and methods utilized to develop this report.

MINISTRY OF ENERGY, MINES AND PETROLEUM RESOURCES
BRIEFING NOTE FOR INFORMATION

- I PREPARED FOR:** Dave Nikolejsin, Deputy Minister, Ministry of Energy, Mines and Petroleum Resources
- II ISSUE:** Summary of Key Aspects of the Intergovernmental Partnership Agreement for the Conservation of the Central Group of Southern Mountain Caribou

III BACKGROUND:

The Province has been negotiating on caribou recovery efforts in Central Group of Southern Mountain Caribou with the federal Ministry of Environment and Climate Change Canada (ECCC) and two of the Treaty 8 First Nations, Saluteau First Nations (SFN) and West Moberly First Nations (WMFN), since receiving an updated Cabinet mandate in August 2018. The current draft of the Intergovernmental Partnership Agreement for the Conservation of the Central Group of Southern Mountain Caribou (Agreement) sets out the strategy for caribou recovery efforts within specific herd areas across northeastern BC.

The Central Group contains three Local Population Units (LPU): Pine, Quintette and Narraway. The Central Group has seen significant population declines in the past 20 years and currently sits at approximately 228 animals remaining. In May 2018, the federal minister of ECCC determined that ten herds in BC were deemed as being at imminent threat, two of those herds are found in the Central Group; the Quintette and Narraway herds.

The Agreement is structured to address caribou recovery within the Central Group and enhance the role of WMFN and SFN over the 30 years of the Agreement. The Agreement sets out specific objectives, protections and recovery areas across the Pine, Quintette and Narraway LPU areas. The areas addressed in the Agreement extend from the southern border of the Williston reservoir to South of Tumbler Ridge into the Narraway River area (Appendix 1).

Within this area, there are two broad categories of zones that have been negotiated: those that offer protection and conservation of habitat, and those that focus on sustainable resource development. A tripartite Caribou Recovery Committee will be established to review proposals for development within the sustainable resource development zone and must provide consensus recommendations to the statutory decision maker. Both this committee and the Agreement itself will be subject to specific dispute resolution processes involving mediation and recommendations from external parties.

Additional conservation measures within the Agreement area include habitat restoration, the establishment of Caribou Recovery Objectives, and updated forestry operating practices.

The Province has committed to enacting various regulatory measures to support the objectives of the Agreement and has carved out the opportunity to review the above-described protection and conservation measures on a bi-annual basis.

IV DISCUSSION:

Key components of the Agreement local governments are likely to raise include:

- Balancing Social and Economic Factors with the Recovery of Caribou:

The Agreement aims to balance the need for ongoing development to support local economies and communities with the required conservation and protection efforts necessary to support recovery of caribou populations. The Agreement carves out mining interests in the short-term and allows previously approved mines and existing operations to continue alongside key areas for continued exploration and development. Similarly existing petroleum and natural gas infrastructure and previously approved developments would be carved out of the Agreement.

Much of the Agreement's focus is on enhancing protections in the Pine LPU which has limited mining, petroleum and natural gas potential and activity. Petroleum and natural gas activity is generally focused on pipeline development, and mining is limited to small bundles of mineral claims.

The enhanced protections in the Pine LPU include the expansion of the existing Klinse-za (Twin Sisters) Park by approximately 200,000 hectares, as well as the establishment of areas totalling approximately 200,000 hectares for additional conservation measures and actions. This will build upon the existing Ungulate Winter Range and Wildlife Habitat Areas, of approximately 80,000 hectares that already exist in the Pine LPU.

Across the Quintette and Narraway LPUs measures include protection of approximately 552,489 hectares of high elevation habitat deemed critical to the ongoing recovery and survival of the caribou herds. Approximately 464,000 hectares of high elevation habitat had prior protections in place from coal mining activities through coal land reserves, however, the new areas within the Quintette and Narraway LPUs were the subject of repeated engagement with industry to identify properties that could be deferred without impacting sites critical to ongoing mine supply or future operations.

- Complexity of Decision Making in Sustainable Resource Areas:

Areas of sustainable resource development activity will be subject to an enhanced decision making process that will entail review of proposed developments by the tripartite Caribou Recovery Committee, who in turn must provide consensus recommendations to the statutory decision maker. Both the mining and petroleum and natural gas industries have raised concerns with the process for adjudicating applications in the sustainable resource development areas as it is likely to be

extremely complex and not increase certainty in permitting processes. Applications will be required to do more than current policy including restoration and habitat offsets, financial offsets and demonstrating projects are leading to net neutral or net benefit for caribou.

Pipelines intersect with the Pine LPU and proposed zones for conservation and protection, however, the pipelines are considered as existing developments. Any ancillary activities that require authorizations will require consensus recommendations from the Caribou Recovery Committee. While the Parties are committed to being reasonable and efficient, enhanced decision making may add some complexity.

- Public Engagement to Date:

Engagement efforts by the Ministry of Energy, Mines and Petroleum Resources have been focused on industry through 2018 to ensure that any actions or measures contemplated by the Agreement would limit impacts to existing and reasonably foreseeable future operations.

Broader provincial engagement efforts with a consortium of stakeholders have been led by Forests, Lands and Natural Resource Operations and Rural Development and the Ministry of Environment and Climate Change.

Now that the Agreement is positioned as a more complete draft, the Province has developed a process and nine month timeline from signing of the Agreement to allow appropriate community, First Nations, industry and stakeholder engagement to inform the specific areas where the various levels of protection will be established.

V KEY MESSAGES:

- The Agreement has been structured to allow existing oil and gas activities as well as mining interests to continue, while being subject to a tripartite review process seeking consensus recommendations that demonstrate a proposed activity is in support of caribou recovery objectives.
- The various areas of differing conservation and protection activities under the Agreement will be engaged upon over the course of nine months prior to finalization of the Agreement.
- Balancing social and economic drivers with the protection and recovery of caribou within northeastern BC remains a key focus of the Province.

**MINISTRY OF ENERGY, MINES AND PETROLEUM RESOURCES
BRIEFING NOTE FOR INFORMATION**

- I PREPARED FOR:** Michelle Mungall, Minister of Energy, Mines
and Petroleum Resources
- II ISSUE:** Intergovernmental Partnership Agreement for the
Conservation of the Central Group of Southern Mountain Caribou

III BACKGROUND:

The Province has initialled the Intergovernmental Partnership Agreement for the Conservation of the Central Group of Southern Mountain Caribou (Partnership Agreement) with the federal Ministry of Environment and Climate Change Canada (ECCC) and two of the Treaty 8 First Nations, Saulteau First Nations (SFN) and West Moberly First Nations (WMFN). The initialling of the Partnership Agreement initiates engagement with industry, local communities and the public.

Engagement sessions will be undertaken in a two-phased approach. Initial pre-engagement will be targeted to the Partnership Agreement area with local governments, industry and industry organizations and internal government staff; currently these sessions are slated to occur over the week of March 18- 22, 2019. The second phase of engagement will involve broader public forums, and Indigenous nations regarding not only the Partnership Agreement but also the draft Section 11 bi-lateral agreement between ECCC and the Province. These sessions are slated to occur within the week of March 25 and carry through until the end of April 2019.

The Partnership Agreement has been negotiated over the last two years and is focused on the Province's Central Group of caribou located in the Northeast (see attached map). Within the Partnership Agreement area, there are two broad categories of zones that have been negotiated:

- Protection and conservation of habitat zones: Enhanced protections in the Pine Local Population Unit (LPU) include the expansion of the existing Klinse-za (Twin Sisters) Park as well as the establishment of areas totalling approximately 400,000 hectares for additional conservation measures and actions which build on existing Ungulate Winter Range and Wildlife Habitat Areas (approximately 80,000 hectares).

Across the Quintette and Narraway LPUs protection measures include approximately 550,000 hectares of high elevation habitat deemed critical to the ongoing recovery and survival of the caribou herds. Approximately 460,000 hectares of high elevation habitat had prior protections in place from coal mining activities through coal land reserves, however, the new areas within the Quintette and Narraway LPUs were the subject of repeated engagement with industry to identify properties that could be deferred without

impacting sites critical to ongoing mine supply or future operations.

- Sustainable economic development zones: These zones allow for previously approved mines and existing operations to continue alongside key areas for ongoing exploration and development to enable long term development of coal resources.

The Province has committed to enacting various regulatory measures to support the objectives of the Partnership Agreement and has carved out the opportunity to review the above-described protection and conservation measures on a regular basis as set by Cabinet.

IV DISCUSSION:

- Protection and conservation of habitat zones and mining interests: The Partnership Agreement has three zones that contemplate varying levels of protection and interim moratoriums on activities and tenures. There are 22 different mineral and coal tenure holders that overlap the zones identified for immediate conservation and protection. These tenure holders will be receiving letters detailing the tenures that are overlapped by these protection zones along with a map when the Partnership Agreement is announced.
s.16; s.17
s.16; s.17
EMPR has ensured that any actions or measures contemplated by the Partnership Agreement would not apply to existing pipeline applications or projects having received all material approvals. EMPR engagement and negotiation efforts have been focused on limiting any impacts to operations in the interim protected zone where the majority of major coal operations exist. The long-term plan for the interim protected area across high elevation is the subject of ongoing engagement efforts.
s.16; s.17
s.16; s.17
- Sustainable economic development zones and mining interests: A tripartite Caribou Recovery Committee will be established to review proposals for development and will strive to provide consensus recommendations to statutory decision makers. Both the mining and petroleum and natural gas industries have raised concerns with the process for adjudicating applications in the sustainable resource development areas as it is likely to be extremely complex and not increase certainty. Applications will be required to do more than current policy including restoration and habitat offsets, financial offsets and demonstrating projects are leading to net neutral or net benefit for caribou. While the Parties are committed to being reasonable and efficient, enhanced decision making will likely add complexity to permitting processes.
- Additional conservation measures: Includes habitat restoration, the establishment of Caribou Recovery Objectives, and updated forestry operating practices.

Broader provincial engagement efforts will be led by the Ministries of Forests, Lands and Natural Resource Operations and Rural Development and will be launched on March 25, 2019. Engagement efforts by EMPR has been focused on both the oil and gas and mining industries through 2018/19 to ensure that any actions or measures contemplated by the

Partnership Agreement would limit impacts to existing and reasonably foreseeable future operations. Key considerations for mining include:

s.13; s.16; s.17

~~Impacts of these properties~~
s.13; s.14; s.16; s.17

s.13

V CONCLUSIONS:

- The Partnership Agreement has been structured to allow existing and potentially new oil and gas activities as well as mining interests to continue, new activities will be subject to a tripartite review process seeking consensus recommendations that demonstrate a proposed activity is in support of caribou recovery objectives.
- The various areas of differing conservation and protection activities under the Partnership Agreement will be the subject of engagement between March and the end of May 2019, prior to finalization of the Partnership Agreement.
- Balancing social and economic drivers with the protection and recovery of caribou within northeastern BC remains a key focus of the Province.

MINISTRY OF ENERGY, MINES AND PETROLEUM RESOURCES
BRIEFING NOTE FOR DECISION

Date: September 6, 2019
CLIFF: 107294

PREPARED FOR: Dave Nikolejsin, Deputy Minister, Ministry of Energy, Mines and Petroleum Resources

ISSUE: s.13; s.17

BACKGROUND:

On June 20, 2019, a temporary Order (**Appendix I**) under section 7 of the *Environment and Land Use Act* was approved by the Lieutenant Governor in Council, to prohibit new resource authorizations. The Order is a temporary 24-month measure preventing decisions on resource applications in the interim moratorium area (**Appendix II**) to support s.13; s.17
s.13; s.17 The 24-month period will provide additional time to protect jobs and support workers as the Province engages with affected communities and industries on long-term caribou protection strategies.

The establishment of the interim moratorium has increased the amount of area protected to 97 percent of the 673,483 hectares of high elevation habitat. s.13; s.17
s.13; s.17

DISCUSSION:

Throughout engagement on the Partnership Agreement negotiations. s.13; s.17

MINISTRY OF ENERGY, MINES AND PETROLEUM RESOURCES

BRIEFING NOTE FOR INFORMATION

PREPARED FOR: Dave Nikolejsin, Deputy Minister, Ministry of Energy, Mines and Petroleum Resources

ISSUE: Mining, Oil and Gas Considerations for the Intergovernment Partnership Agreement for the Conservation of the Central Group of Southern Mountain Caribou

BACKGROUND:

In March 2019, the Province initialled the Intergovernmental Partnership Agreement for the Conservation of the Central Group of Southern Mountain Caribou (Partnership Agreement), with the federal Ministry of Environment and Climate Change Canada and two of the Treaty 8 First Nations: Saluteau First Nations and West Moberly First Nations. The initialling of the Partnership Agreement initiated engagement with industry, local communities and the public.

The engagement period for the Partnership Agreement was initiated in March 2019 and concluded in May 2019, which resulted in significant concerns raised by local governments and communities, including industry. In response to these concerns and a subsequent report by Blair Lekstrom, a two-year interim moratorium area (see **attachment 1**) was established through a s.7 *Environment and Land Use Act* Order (the Order)^{s.13}

s.13

s.13 The interim moratorium temporarily protects identified high and low elevation habitat of the central group by preventing any new activities from occurring.

Ongoing engagement on the Partnership Agreement is occurring through the Leaders' Table, which includes representatives from the provincial government, local government, Indigenous Nations and industry. The Leaders' Table is charged with collating and exchanging perspectives on the Partnership Agreement and providing input into how best to complete and implement the Partnership Agreement in a manner consistent with the goals of caribou recovery and economic wellbeing.

DISCUSSION:

s.13

Under the interim moratorium, the Oil and Gas Commission is prohibited from issuing permits under s.25 of the *Oil and Gas Activities Act* (OGAA) and as is the Ministry of Energy, Mines and Petroleum Resources (EMPR) under s.10 of the *Mines Act*. s.13; s.17
s.13; s.17

SUMMARY:

The work of the Leaders' Table will take place in Winter 2020-21, so that key stakeholder engagement and input is in place, leading then to the signing of the Partnership Agreement. It is anticipated that there may be a continuing role for leaders in providing support and strategic input on the implementation of the recovery of the agreement for the Central Group of Southern Mountain Caribou.

Subject: RE: 20190321 Correspondence, Intergovernmental Partnership Agreement for the Recovery of the Central Group of Southern Mountain Caribou

Mr. Chris Trumpy,
Executive Director
Mines Competitiveness and Authorizations Division
Ministry of Energy, Mines and Petroleum Resources

RE: 20190321 Correspondence, Intergovernmental Partnership Agreement for the Recovery of the Central Group of Southern Mountain Caribou

Mr. Trumpy,
We received correspondence dated March 21, 2019, pertaining to the Draft Intergovernmental Partnership Agreement for the Recovery of the Central Group of Southern Mountain Caribou (Partnership Agreement) as it relates to Ethos Gold Corporation's mineral tenure and within it were instructions to direct questions or specific concerns to you.

We appreciate the recognition by your offices that the measures proposed within the draft Partnership Agreement, if and when implemented, will potentially impact our interests. Through our engagement activities in the subject area we were aware of the progress of the draft Partnership Agreement development and we reviewed the document as soon as it was made publicly available. As I am certain you are aware of the formal processes within the Parks Act (11 (2)(c)) and Mineral Tenure Act (17.1) that are triggered in the event that the final expansion area of the Klin-se-za Class-A

Provincial Park overlaps our tenure, I am left slightly confused as to the intended purpose of the letter and both the implied uncertainty and weighting of the measures proposed to accommodate our interests.

We would greatly appreciate the opportunity to speak with you and are hoping you can provide much needed clarity related to the next steps and process timing to so that we are making business decisions with the best available information. The Ethos Gold team would be pleased to meet in person at your Victoria office or alternately via teleconference. Our ideal timing for a discussion is within the first two weeks of April.

As we are held to very specific and stringent disclosure regulations pertaining to material risks, a press release relating to the information within the March 21st letter from your offices was issued. It is attached for your interest.

Sincerely,
Michelle Tanguay

Pine Pass Vanadium Project Encounters Regulatory Concerns

Vancouver, BC – March 29, 2019, Ethos Gold Corp. (“Ethos” or the “Company”) (TSXV:ECC) announces that it has received notice from the Province of British Columbia that the mineral tenures making up its Pine Pass vanadium project, located on the John Hart Highway between Mackenzie and Chetwynd, B.C., are included in an area under consideration for an immediate moratorium on development proposals and possible inclusion in an expanded environmental protected area. This notice was issued to Ethos in the context of negotiations between the B.C. Provincial Government, the Canadian Federal Government, Saúlteau First Nations and West Moberly First Nations, that have resulted in a draft Intergovernmental Partnership Agreement relating to conservation and recovery efforts for the Central Group of Southern Mountain Caribou.(the “Partnership Agreement”).

The Province has advised the Company that, “The draft Partnership Agreement proposes immediate interim habitat protection measures for critical areas, an expansion of the Twin Sisters (Klinse-za) Protected Area, additional habitat protection in core areas, and operational recovery and restoration measures.” Furthermore, the Province has cautioned the Company that, if the Partnership Agreement comes into force, then the Company’s mineral tenure, “... may be impacted by the new land protection and regulatory measures that are under consideration”. Additional details on the Partnership Agreement including on the related consultation process are available online at the Provincial Caribou Recovery Engagement Portal:

<https://engage.gov.bc.ca/caribou/section11agreement/>

The Company is preparing a submission to respond to the draft Partnership Agreement, conveying its significant concerns about the proposed measures and to recommend amendments to mitigate the impact on its Pine Pass vanadium project. Submissions are due by April 26, 2019.

The Company’s Mines Act Permit application for its planned 2019 Pine Pass exploration program was submitted to provincial regulators on February 4th, 2019, and presently is pending. Based on recent discussions between the Company and its regulatory contacts, the Company understands that, for the time being, exploration permit applications are being processed in the ordinary course. Until the Company has more certainty about the impacts of the Partnership Agreement on its Pine Pass and Ursula vanadium projects, it will continue to maintain its

projects in good standing. However, given the risk that the proposed Partnership Agreement, if instituted, will result in new land protection and regulatory measures that could prevent or materially impair those projects, the Company will curtail making any new material expenditures.

Commented Craig Roberts, P.Eng., President and CEO of Ethos: "Certainly, we are concerned about the proposed imposition of restrictions on our vanadium projects, and we intend to make a robust submission to the Province to defend the interests of Ethos and its shareholders. At the same time, until the uncertainty over these proposals is cleared up, we will be measured appropriately in our activities and expenditures on our Pine Pass and Ursula vanadium projects."

About Ethos Gold

Ethos Gold is exploring the La Purisima gold project in northwest Chihuahua State, Mexico, as well as the Pine Pass and Ursula vanadium projects located on Highway 97 in northern, British Columbia. La Purisima is a near surface, bulk tonnage oxide gold target. The Company is nearing completion of its trenching program at La Purisima, and a maiden drill program is planned to begin by shortly after the trench assay results are received.

The Company is well funded with a current net cash balance of approximately \$7.0 million. Ethos is actively evaluating additional precious metals opportunities.

For additional information please contact Craig Roberts at 604-682-4750 or view the Company's website, www.ethosgold.com

Ethos Gold Corp.

Craig Roberts P.Eng., President & CEO

Forward-Looking Statement Cautions:

This press release contains certain "forward-looking statements" within the meaning of Canadian securities legislation, including: statements regarding the possible negative impacts of proposed land protection and regulatory measures on the Company's Pine Pass and Ursula vanadium projects in northeast B.C.; the Company's need to carefully manage expenditures on its vanadium projects in the context of new regulator concerns; a proposed Company submission to the B.C. government to address its concerns over the proposed land protection and regulatory measures; the expectations concerning the Company's application for a permit for 2019 an exploration program at Pine Pass; and the project timing for the signing of a Caribou Protection Plan that covers the Company's Pine Pass project area. Although the Company believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct. Forward-looking statements are statements that are not historical facts; they are generally, but not always, identified by the words "expects," "plans," "anticipates," "believes," "intends," "estimates," "projects," "aims," "potential," "goal," "objective," "prospective," and similar expressions, or that events or conditions "will," "would," "may," "can," "could" or "should" occur, or are those statements, which, by their nature, refer to future events. The Company cautions that Forward-

looking statements are based on the beliefs, estimates and opinions of the Company's management on the date the statements are made and they involve a number of risks and uncertainties. Consequently, there can be no assurances that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Except to the extent required by applicable securities laws and the policies of the TSX Venture Exchange, the Company undertakes no obligation to update these forward-looking statements if management's beliefs, estimates or opinions, or other factors, should change. Factors that could cause future results to differ materially from those anticipated in these forward-looking statements include the risk of accidents and other risks associated with mineral exploration operations, the risk that the Company will encounter unanticipated geological factors, or the possibility that the Company may not be able to secure permitting and other governmental clearances, necessary to carry out the Company's exploration plans, and the risk of political uncertainties and regulatory or legal changes in the jurisdictions where the Company carries on its business that might interfere with the Company's business and prospects. The reader is urged to refer to the Company's reports, publicly available through the Canadian Securities Administrators' System for Electronic Document Analysis and Retrieval (SEDAR) at www.sedar.com for a more complete discussion of such risk factors and their potential effects

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.

Hi David,

Sorry for the delay on this one. We will get some draft wording asap. Legal should also review it. Do you have a draft agreement you can send our way or more details behind the agreement. There is a mechanism called a section 25 that often works for multi year agreements but we need more information before we suggest the wording.

Thank you

Adam

Hi David,

I will take this away from a financial perspective. Have we had legal input into this?

Also, will you please call me to provide a bit more context?

Thank you
