Importance: High

Okay to respond as below? Reporter sent additional Qs this afternoon.

Reporter / Outlet / Contact: Mike Hagar, Globe & Mail, 604-631-6631

Deadline: ASAP

Request: Variety of questions on real estate.

Recommendation / Response:

- 1. Why not get data on income instead of just citizenship?
 - By definition, if an individual is not a Canadian citizen nor a permanent resident, they would not be filing a
 Canadian income tax return.
- 2. What about taxing foreign wealth?
 - There are constitutional limits to what the Province is able to tax.
- 3. Next steps for government
 - The data released July 7 provides a 19-day snapshot into the extent of foreign ownership and foreign investment in B.C. real estate. It is too soon to draw any conclusions about the effect foreign buyers have on the market. The Province will be watching this data closely over the coming weeks and months, to see if the trends that presented themselves in this initial data set continue. The Province is also working on a number of other fronts to help address housing affordability including increasing housing supply, smart transit expansion and supporting first-time buyers.
- 4. Is the ministry able to break out the same data for Canadian citizens vs. permanent residents vs. foreigners?
 - No. The property transfer tax return form asks transferees whether they are Canadian citizens or permanent residents, and if not, they are asked to provide their country of citizenship. Canadian citizens and permanent residents are counted in one category. The Province began collecting this information to answer questions about the extent of foreign ownership and investment in B.C. real estate. To answer this question, we do not need to single out permanent residents.

- 5. Also, how many corporations involved foreign directors during this time period?
 - There were a small number of transactions involving corporations during this period, and their directors were counted in the numbers provided. We don't have that data split out at this time.
- 6. Also, the minister has said the data set didn't include the 30th because it had to be manually compiled and he had "undertaken to release the data on Thursday." Why did he not wait until the 30th could be counted? Why did he have to release the data on Thursday? s.13
- 7. Critics say breaking out foreign investment in terms of citizenship is unnecessarily divisive. Why did the government choose to track this and not where income of all homeowners comes from?"
 - The public expressed an interest in understanding the extent of foreign ownership and investment in B.C. real estate. Estimates of the impact of foreign investment and the use of bare trusts in B.C.'s housing market have been just that estimates. We are now in a position to monitor the magnitude of foreign ownership and investment in B.C.'s real estate sector.

Weekly Economic Summary

June 13 – June 17, 2016 NOT FOR FURTHER DISTRIBUTION

BC & Canada

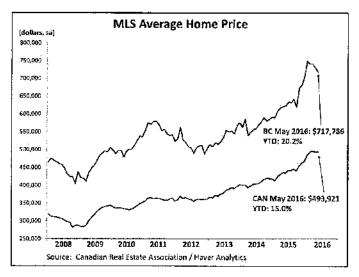

MLS Housing Activity (May)

BC home sales decreased 4.9 per cent (m/m) in May and the average BC home price decreased 1.5 per cent (m/m) to \$717,786.

- On a year-to-date basis, BC home sales rose 34.5 per cent. Meanwhile, the average home price increased 20.2 per cent compared to the first five months of 2015, as demand continued to push home prices higher in many BC regions.
- Looking ahead, the BC Real Estate Association noted that increased construction in the Metro Vancouver area may ease some of the upward pressure on home prices.

Canadian home sales declined 2.8 per cent (m/m) in May, while the average Canadian home price rose 0.1 per cent (m/m) to \$493,921.

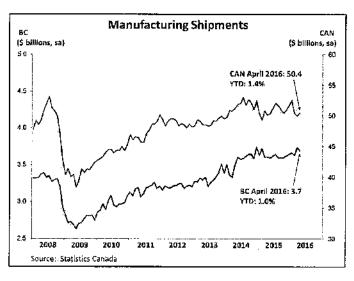

- Year-to-date to May, Canadian home sales rose
 10.4 per cent, while national home prices increased
 15.0 per cent compared to the same period of 2015.
- Analysts noted that while tight housing supply is fuelling sellers' market conditions in BC and Ontario, sales activity and price trends in most other regions are relatively stable.
- According to Scotiabank analysts, overall sales are likely to remain elevated in the near term, supported in part by low borrowing costs, and employment and population growth.

Manufacturing Shipments (April)

BC manufacturing shipments fell 1.3 per cent (m/m) in April, following a 3.0 per cent (m/m) gain in March.

- Year-to-date to April, BC manufacturing shipments increased 1.0 per cent compared to the first four months of 2015.
 - Over this period, gains were led by notable increases in shipments of primary metals (+20.7 per cent) and wood products (+5.6 per cent).

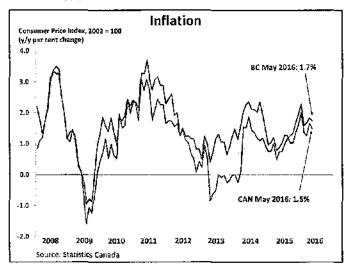

Canadian manufacturing shipments increased 1.0 per cent (m/m) in April, following two months of declines.

- On a year-to-date basis, Canadian manufacturing shipments increased 1.4 per cent compared to the first four months of 2015.
- Analysts expect that disruptions resulting from the recent Alberta wildfires will likely weigh on petroleum and coal product manufacturing in the coming months.

Consumer Price Index (May)

BC's inflation rate was 1.7 per cent (y/y) in May, down slightly from 1.8 per cent (y/y) in April.

- Year-to-date to May, BC's consumer prices rose 1.8 per cent compared to the first five months of 2015.
- Notable year-to-date increases have occurred in prices for various food items as well as household appliances, partially offsetting year-to-date declines in energy prices.

Canadian consumer prices increased 1.5 per cent (y/y) in May, easing from April's pace of 1.7 per cent (y/y).

- Year-to-date to May, Canadian consumer prices are up 1.6 per cent compared to the same period of 2015.
- The Bank of Canada's core consumer price index rose
 2.1 per cent (y/y) in May, after rising 2.2 per cent (y/y) in the previous month.
- TD analysts noted that a weaker Canadian economy has put downward pressure on inflation.

United States

Retail Sales (May)

US retail sales rose 0.5 per cent (m/m) in May, following an increase of 1.3 per cent (m/m) in April.

- Year-to-date to May, US retail sales rose 2.7 per cent compared to the first five months of 2015.
- Year-to-date gains were led by non-store retailers (+9.8 per cent) and food service and drinking places (+6.4 per cent), while a decline in sales at gasoline stations (-10.8 per cent) subtracted from overall growth.
- Analysts at Moody's noted that core sales continue to be limited by a lack of pricing power and negative wealth effects from past stock market declines.

Federal Reserve Monetary Policy (June)

The Federal Open Market Committee (FOMC) maintained the federal funds target range of 0.25 to 0.50 per cent.

- The FOMC noted that labour market gains have slowed and business fixed investment remains soft.
- Inflation continued to run below the FOMC's 2.0 per cent longer-run objective, due in part to previous declines in energy prices and non-energy import prices.
- The Fed lowered its real GDP forecast to 2.0 per cent for both 2016 and 2017, down from 2.2 per cent and 2.1 per cent, respectively.
- Some private sector analysts anticipate that the Fed will take a 'lower for longer' approach to key interest rates, given the downward revisions to the economic outlook.

Housing Starts & Building Permits (May)

There were 1,164,000 (annualized) US housing starts in May, down 0.3 per cent (m/m) from April.

- Year-to-date, US housing starts rose 11.0 per cent compared to the first five months of 2015.
- Meanwhile, US building permits fell 10.1 per cent (y/γ) compared to May 2015.
- Analysts for Moody's Analytics note that the pace of construction has been running ahead of permits, which may result in a weakening trend in homebuilding activity over the next few months (particularly for single-family housing starts).

Asia

Japan's Monetary Policy (June)

As anticipated by analysts, the Bank of Japan (BoJ) held rates steady and maintained its existing monetary policy.

- The BoJ will continue to purchase assets at an annual pace of about 80 trillion yen, while keeping a negative benchmark interest rate of -0.1 per cent.
- According to the BoJ, Japan's economy has continued its moderate recovery trend. However, the BoJ anticipates that exports and production will remain sluggish for some time.
- Private sector analysts noted that further monetary stimulus may be required given the re-emergence of deflationary pressures and weak economic momentum.

World

Consensus Economics Forecast (June)

In June, the Consensus lowered their 2016 real GDP forecast for Canada by 0.3 percentage points compared to last month's survey. For 2017, the Consensus raised their outlook for Japan's economic growth by 0.4 percentage points.

June 2016 Consensus Forecasts for Real GDP, % change

Canada	the first of the condition of the man	2017 2,2 (n.c.)
US	1.9 (+0.1)	2.3 (n.c)
Euro Zone	1.6 (n.c.)	1.6 (n.c.)
China	6.6 (+0.1)	6.3 (n.c.)
Japan	0,5 (п.с.)	0.9 (+0,4)

Brackets indicate change from previous forecast in percentage points; n.c. = no change

Source: Consensus Economics (June 2016 Survey)

- The Consensus remains cautious regarding the Canadian economic outlook, citing continued weakness in capital spending and industrial production.
- The upgrade to Japan's 2017 real GDP forecast reflects Prime Minister Shinzo Abe's recent announcement to postpone the proposed tax hike from April 2017 to October 2019.

Subject: CKNW - Interview with McComb

Hi Jamie,

I understand the housing data is to released tomorrow, so I was hoping we could organise a follow-up interview as promised to us by the minister.

We are happy to do it on Friday or Monday morning at the same time of 7:35am... whichever works better for the minister.

Looking forward to hearing from you.

Kind regards, John

More than 14,000 families have saved money on their new homes this year

- Between Feb. 17 and June 29, because of the newly built home exemption:
 - 3,603 families have saved an average of \$7,060 on their newly built homes.
 - Total savings to families: \$25,436,366
 - 189 per week on average (19 weeks)
 - 27 per day on average.

 The existing First Time Buyers Program has helped more than 10,470 families buy their first home this year.

Total estimated future supply: 108,000 homes in six communities

	Concept planning or policy stage	Zoning, re-zoning and development applications	Building permits/Pending construction start	Total estimated future supply
City of Richmond (consulted and pending confirmation)	1,000	15,500	Data not publicly available	16,500
City of Surrey (consulted and pending confirmation)	4,500		Data not publicly available	20,000
City of Burnaby (confirmation requested and unconfirmed)	4,000	21,500	4,500	30,000
City of Coquitlam (consulted and confirmed)	2,000	2,000	1,500	5,500
City of New Westminster (consulted and confirmed)	4,500	4,000	2,000	10,500
City of Vancouver (consulted and pending confirmation)	14,500	11,000	Data not publicly available	25,500
Six Total Municipalities	30,500	69,500	8,000	108,000

^{*} All figures based on publically available data, with the assistance of the BC Government efforts have been made to confirm inventory with the surveyed municipalities

^{**} The City of Surrey advised of a further 50,000 units of potential future supply within approved area community plans currently not reflected within this review

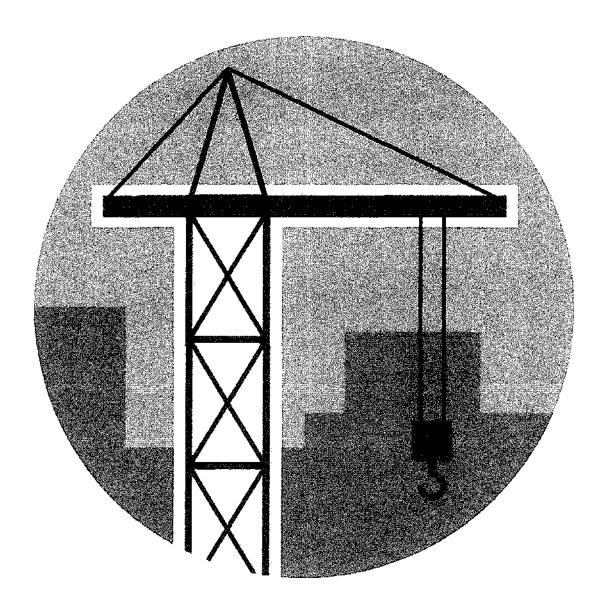

Notes on Housing supply inventory

Assumptions and restrictions

It is important to note that this data and its analysis must be considered within the context of some assumptions and restrictions:

- 1. The accuracy of the applications as stated by the various municipalities was deemed to be correct, no additional review to confirm unit counts, address, and application status was conducted.
- Information related to application inventory was sourced from municipal reporting available online and as necessary additional information was gathered from specific planning applications. Information was gathered in June of 2016. Sources are provided below:
 - City of Vancouver: http://development.yancouver.ca/
 - City of Richmond: http://www.richmond.ca/plandev/devzoning/currentdevapps.htm
 - City of Surrey: http://www.surrey.ca/city-services/1414.aspx
 - City of Burnaby: https://www.burnaby.ca/Assets/city+services/policies+projects+and+initiatives/community+development/Major+Development nt+Projects/01+-+May+2016.pdf
 - City of Coguitlam: http://www.coguitlam.ca/planning-and-development/resources/current-applications.aspx
 - City of New Westminster: http://www.newwestcity.ca/business/planning-development/projects-on-the-go.php
- 3. The Province of British Columbia requested each municipality surveyed to confirm the information. At the time of printing, some municipalities were still in the process of confirming the information. We anticipate ongoing consultations and as information from the individual municipalities is confirmed the total housing supply information may evolve.
- 4. Due to differences in reporting and application status descriptions between the various municipalities' unit counts have been sorted into three key stages in an effort to align findings across all six markets.
 - Concept planning or policy stage
 - Rezoning, development or combined applications
 - Building permits/pending construction start

Deloitte

Development Application Review

Summary of Findings

City of Richmond City of Surrey City of Burnaby City of Coquitlam City of New Westminster City of Vancouver

July 2016

Table of Contents

1.0 Methodology of Review	2
2.0 Approach for Review	2
3.0 Findings of Review	3
4.0 Caveats for Analysis and Findings	4

1.0 Methodology of Review

The focus of this review was within the six Lower Mainland municipalities: Richmond, Surrey, Burnaby, Coquitiam, New Westminster, and Vancouver. The process for identifying, consolidating, and analyzing information from these municipalities is provided below:

- 1. Data on applications was sourced directly from each municipality, depending on the municipality, reporting was available either as a consolidated list of all applications or through multiple lists based upon application stage.
- Information on projects in Pre-Planning and Concept Plan stages (rezoning policy, concept etc.) were identified through alternative property reporting. Efforts to determine the contemplated housing units included a review of multiple sources from available pre-application submissions, municipal reporting and/or through verification with applicant.
- 3. All findings were consolidated by municipality in order to review and identify (as possible) duplications in property entries caused by multiple status entries in some municipalities.
- 4. Application status was consolidated to Rezoning/Development Applications and where possible Building Permit Application classifications.
- 5. Additional consideration was given to information available within the Major Projects Inventory (MPI) Database and as possible additional projects not contained within the municipal reporting were identified.

2.0 Approach for Review

The application review identified three key components for estimating future supply, based on publically available information across the municipalities. These three components are based off of the application and development process for new properties, with the calculation for estimating future supply provided below:

Concept Planning + Rezoning, Development or or Policy Stage + Combined Applications + Building Permits/ Pending = Total Estimated Construction Start

3.0 Findings of Review

An initial review of current applications in Richmond, Surrey, Burnaby, Coquitiam, New Westminster and Vancouver would indicate approximately 108,000 housing units are in various stages of planning and contemplation, as seen in the chart below:

	Concept Planning or Policy Stage	Rezoning, Development, or Combined Applications	Building Permits/Pending Construction Start	Total Estimated Future Supply
City of Richmond (consulted and pending confirmation).	1,000	15,500	Data not publically available	16,500
City of Surrey (consulted and pending confirmation)	4,500	15,500	Data not publically available	20,000
City of Burnaby (confirmation requested and unconfirmed)	4,000	21,500	4,500	30,000
City of Coquitlam (consulted and confirmed)	2,000	2,000	1,500	5,500
City of New Westminster (consulted and confirmed)	4,500	4,000	2,000	10,500
City of Vancouver (consulted and pending confirmation)	14,500	11,000	Data not publically available	25,500
Six Total Municipalities	30,500	69,500	8,000	108,000

^{*} All figures based on publically available data, with the assistance of the BC Government efforts have been made to confirm inventory with the surveyed municipalities

^{**} The City of Surrey advised of a further 50,000 units of potential future supply within approved area community plans currently not reflected within this review

4.0 Caveats for Analysis and Findings

It is important to note that this data and its analysis must be considered within the context of some assumptions and restrictions:

- 1. The accuracy of the applications as stated by the various municipalities was deemed to be correct, no additional review to confirm unit counts, address, and application status was conducted.
- 2. Information related to application inventory was sourced from municipal reporting available online and as necessary additional information was gathered from specific planning applications. Information was gathered in June of 2016, Sources are provided below:

 - o Building permits/pending construction start

INFORMATION BULLETIN

For Immediate Release 2016FIN0028-001239 July 7, 2016

Ministry of Finance

Government releases real estate transaction data

VICTORIA — The Province released the first set of data today resulting from new measures to track the extent of foreign real estate transactions.

The data is drawn from the filings of Property Transfer Tax forms by purchasers of residential real estate in British Columbia between June 10 and June 29, 2016. The data represents a first, early look at the rate and value of purchases of residential property by foreign nationals—people who are neither Canadian citizens nor permanent residents.

Main findings include, between June 10 and June 29, 2016:

- 10,148 residential real estate transactions in B.C., totalling more than \$7.6 billion.
- 337 transactions (3.3%) involved foreign nationals, worth \$390 million (5.1%).
- In Metro Vancouver, there were 5,118 transactions worth nearly \$5.4 billion, of which 260 involved foreign nationals (5.1%), worth \$351 million (6.5%)
- In the City of Vancouver, there were 1,139 transactions, totalling more than \$1.6 billion.
 47 of these involved foreign nationals (4.1%), worth \$64 million (3.9%).

Government has released additional data on Richmond, Surrey, Burnaby and the Capital Regional District. Further updates will be available.

New data is also available online that shows the extent of re-sale activity in the province. An extensive data set dating back to 1976 shows paired sales, or how soon after being purchased a home is re-sold. The full data set has been made available online at: https://public.tableau.com/profile/bcpairedsalesdata#!/vizhome/BCPairedSalesAnalysis/PairedSalesSummaryTable

The Province has been working to identify the number of new housing units that are in development within six Metro Vancouver municipalities that include Burnaby, Coquitlam, New Westminster, Richmond, Surrey and Vancouver.

A survey of publicly available information shows that approximately 108,000 units are at one of three stages prior to completion:

- 30,500 homes are in the concept planning or policy stage.
- 69,500 homes are pending a zoning, re-zoning, development or combined application.
- 8,000 homes are pending construction start in New Westminster, Burnaby and Coquitlam. (Permit survey data for the City of Vancouver and others is not yet available.)

The existing process to take a development project from inception to completion can take up to 13 years, depending on the scope, scale, complexity and public position around each

project.

Quick Facts:

- Budget 2016 introduced the Newly Built Home Exemption, which can save purchasers up to \$13,000 in property transfer tax when purchasing a newly constructed or subdivided home worth up to \$750,000.
- Between Feb. 17 and June 29, 2016, because of the newly built home exemption:
 - 3,603 families have saved an average of \$7,060 on their newly built homes.
 - Total savings to families: \$25,436,366
 - 189 per week on average (19 weeks)
 - 27 per day on average.

The existing First Time Buyers Program has helped more than 10,470 families buy their first home this year.

A summary chart is attached and below Some Comments:

- With Deloitte we were able to gather and consolidate Burnaby, Coq, New West and Vancouver based on the
 development application and rezoning application summaries available on their websites, plus follow ups with
 other contacts and sources. A review was also made of available major project policy statements. Allocating
 amongst stages is difficult because not all cities categorize their planning stages the same
- The numbers may understate to some extent the units in planning stages in some municipalities, as the fixed housing allocation has not yet been confirmed through that process - but the data is illustrative of what's coming
- Coquitlam and New West appear to be making increased use of combined development/rezoning applications

 there were also a few instances in City of Vancouver. This has helped to simplify the process for simpler
 "vanilla" projects
- There is lack of consistent and reliable definitions and information that tells us the dates of application or process starts among the cities.
- There are various layers from when a project first starts through planning/policy review to final bylaw and permitting stages public consultation itself can be a lengthy process. At each phase, projects may be turned down or withdrawn and there isn't reliable information that tracks this outcome for all projects. For example, minutes of city council meetings generally only consider the successful or very high profile projects records/minutes of review sub-committees or staff engagements are generally not available or incomplete

Analysis does show that over 73,000 housing units contained in various projects are in the systems today within
4 of the cities, and in total the process can take up to 13 years (or longer), depending on the scope, scale,
complexity and public position around each project

Hope this is helpful.

Understanding the backlog

An initial review of current applications in Burnaby, Coquittam, New Westminster and Vancouver would indicate more than 73,000 housing units are in various stage of planning, contemplation/review and permitting processes

Key observations:

- Nearly 40% (27,000 units) of future inventory is within projects which are in planning & have not yet entered rezoning application – the 1st stage
- 22% (about 16,000 units are undertaking a <u>rezoning application</u> – the 2nd stage
- 33% (nearly 24,000 units) is under a development application or combined development/rezoning application 3rd stage and likely to enter the market over the coming 1-3 years)
- Less than 10% (about 6,000) of surveyed units are <u>pending construction</u> start – the 4th stage (and likely reflect presold inventory). Permit survey data for COV & New West not avail yet

Phase/Duration

- m Concept planning or policy stage
- Rezoning Applications
- MD evelopment or Combined Applications
- #Building Permits/Pending Construction Sta

Update on the housing data study:

- The previous estimate of 73,000 has been reduced to about 69,000. Through
 cross checking every number and reviewing files, it was noted that there were a
 number of duplicate records in Coq and New West in particular, as well as
 adjustments needed elsewhere. As well, Deloitte has decided to take the
 lowest of every estimate of units for properties undertaking policy statement
 work to avoid any further vagueness in upward potentials.
- On the way better news side, Deloitte expanded its work to include 2 additional cities for a total of 6 now. Before we had Vanc, Coq, Burn and New West. Now Deloitte has captured Richmond and Surrey.

- Pulling in the latest 2 shows a total validated (doubled checked) number of just over 112,000 units in various process stages of development, review and approval within 6 cities surveyed and researched.
- All municipalities have been gathered; however, only two of the six (as noted in the slide) have building permit statistics available for reporting. All the numbers included have been taken directly from reports issued from the municipalities and developers. The only additional research Deloitte conducted were on less than 10 proposed projects not yet through the policy review for Vancouver. In order to determine the inventory Deloitte contacted the developers directly and have recorded their responses within the numbers.
- Deloitte has based most of its work on publically available data produced by municipal reporting. For various reasons, Deloitte did not audit every set of council minutes, but has assumed that council minute decisions would be reflected in the updated data registries maintained by those cities:
- You'll also notice the proportions in each phase have shifted significantly. While
 the original 4 surveyed are about the same proportionately, the adding of the
 newest 2 (Richmond and Surrey) changed those proportions significantly. Note
 the earlier limitation on available building permit data. If you could include those
 pieces, the 112,000 would be even higher.
- Here are the details of the latest Deloitte work. They are continue to prepare
 detailed summaries by city, listing key assumptions and show cross links to city
 data and developers surveyed. These will come as soon as possible.

	Concept planning or policy stage	Rezoning Applications	Development or Combined Applications
City of Richmond	none found	8,787	
City of Surrey	none found	11719	
City of Burnaby	3824	2417	
City of Coquitlam	2500	1155	
City of New Westminster	3500	1747	
City of Vancouver	327	21341	
Six Total Municipalities	10,151	47,166	
	9%	42%	
Initial Four Municipalities			
Reviewed	10,151	26,660	
	15%	39%	

Hope this provides you with what you need. d.

Key messages - Draft

- The Province released the first set of data today resulting from new measures to track the extent of foreign real estate transactions.
- The data represents a first, early look at the rate and value of purchases of residential property by foreign nationals-people who are neither Canadian citizens nor permanent residents.
- In Budget 2016, we announced would re-start the collection of data on foreign purchasers a practice that was stopped in the 1990s. The information comes from purchasers, when their lawyer or notary submits the Property Transfer Tax filing to the Land Title Authority.

Main findings include, between June 10 and June 29, 2016:

- 10,148 residential real estate transactions in B.C., totalling more than \$7.6 billion.
- 337 transactions (3.3%) involved foreign nationals, worth \$390 million (5.1%).
- In Metro Vancouver, there were 5,118 transactions worth nearly \$5.4 billion, of which 260 involved foreign nationals (5.1%), worth \$351 million (6.5%)
- In the City of Vancouver, there were 1,139 transactions, totalling more than \$1.6 billion. 47 of these involved foreign nationals (4.1%), worth \$64 million (3.9%).

Government has released additional data on Richmond, Surrey, Burnaby and the Capital Regional District. Further updates will be available.

The Province has also been working to identify the number of new housing units that are in development within six Metro Vancouver municipalities that include Burnaby, Coquitlam, New Westminster, Richmond, Surrey and Vancouver.

A survey of publicly available information shows that approximately 108,000 homes are at various stages of approval and represent a significant source of supply in Metro Vancouver.

- 30,500 homes are in the concept planning or policy stage.
- 69,500 homes are pending a zoning, re-zoning, development or combined application.
- 8,000 homes are pending construction start in New Westminster, Burnaby and Coquitlam.
 (Permit survey data for the City of Vancouver and others is not yet available.)

The existing process to take a development project from inception to completion can take up to 13 years, depending on the scope, scale, complexity and public position around each project.

Quick Facts:

- Budget 2016 introduced the Newly Built Home Exemption, which can save purchasers up to \$13,000 in property transfer tax when purchasing a newly constructed or subdivided home worth up to \$750,000.
- Between Feb. 17 and June 29, 2016, because of the newly built home exemption:
 - 3,603 families have saved an average of \$7,060 on their newly built homes.
 - o Total savings to families: \$25,436,366

- o 189 per week on average (19 weeks)
- o 27 per day on average.
- The existing First Time Buyers Program has helped more than 10,470 families buy their first home this year.

Okay to respond as below?

Reporter / Outlet / Contact: Mike Hagar, Globe and Mail, MHager@globeandmail.com

Deadline: End of day

Request: Some questions about the real estate data released today.

Recommendation / Response: Sourcing response.

- 2) What about data on number of bare trusts that purchased homes during this 19-day period?
 - There were a small number of transactions involving bare trusts during this period, but none involving foreign nationals.
- 3) Also, how many 'corporation' or 'other' buyers were tracked buying during this same period?
 - There were a small number of transactions involving corporations during this period, and their directors were counted in the numbers provided. We don't have that data split out at this time.
- a. If they weren't tracked, why not?(N/A)

INFORMATION BULLETIN

[release number]
[Date]

Ministry of Finance

Government releases real estate transaction data DRAFT

VICTORIA – The Province released the first set of data today resulting from new measures to track the extent of foreign real estate transactions.

The data is drawn from the filings of Property Transfer Tax forms by purchasers of residential real estate in B.C. between June 10 and June 29. The data represents a first, early look at the rate and value of purchases of residential property by foreign nationals—people who are neither Canadian citizens nor permanent residents.

Main findings include, between June 10 and June 29:

- 10,148 residential real estate transactions in B.C., totalling more than \$7.6 billion.
- 337 transactions (3.3%) involved foreign nationals, worth \$390 million (5.1%).
- In Metro Vancouver there were 5,118 transactions worth nearly \$5.4 billion, of which 260 involved foreign nationals (5.1%), worth \$351 million (6.5%)6
- In the city of Vancouver, there were 1,139 transactions, totalling more than \$1.6 billion.
 47 of these involved foreign nationals (4.1%), worth \$64 million (3.9%).

Government has released additional data on Richmond, Surrey, Burnaby, and the Capital Regional District. Further updates will be available.

New data is also available online that shows the extent of re-sale activity in the province. An extensive data set dating back to 1976 shows paired-sales, or how soon after being purchased a home is re-sold. The full data set has been made available online at: https://public.tableau.com/profile/bcpairedsalesdata#!/vizhome/BCPairedSalesAnalysis/PairedSalesSummaryTable

The Province has also been working to identify the number of new housing units that are in development within six Metro Vancouver municipalities that include Burnaby, Coquitlam, New Westminster, Richmond, Surrey and Vancouver.

A survey of publicly available information shows that approximately 108,000 units are at one of four stages prior to completion:

- 30,500 homes are in the concept planning or policy stage
- 69,500 homes are pending a zoning, re-zoning, development or combined application
- 8,000 homes are pending construction start in New Westminster, Burnaby and Coquitlam. (Permit survey data for the City of Vancouver and others is not yet available.)

The existing process to take a development project from inception to completion can take up to 13 years, depending on the scope, scale, complexity and public position around each project.

Quick Facts:

- Budget 2016 introduced the Newly Built Home Exemption, which can save purchasers up to \$13,000 in property transfer tax when purchasing a newly constructed or subdivided home worth up to \$750,000.
- Between Feb. 17 and June 1, because of the newly built home exemption:
 - 3,603 families have saved an average of \$7,060 on their newly built homes.
 - Total savings to families: \$25,436,366
 - 189 per week on average (19 weeks)
 - 27 per day on average.
- The existing First Time Buyers Program has helped more than 10,470 families buy their first home this year.
