## ADVICE TO MINISTER

### 10. What is the government's position with respect to the use of fracking in natural gas extraction?

- Natural gas and petroleum activities in B.C. are subject to some of the world's most stringent environmental standards and procedures.
- Fracking is a technological practice that is used safely in British Columbia.
- Water use for shale gas development is tightly monitored, with strict provisions for containment.
- Provincial regulations ensure that potable groundwater is protected by using drilling practices that encase fracking fluid inside the well bore when being used, so it cannot enter potable water aquifers.
- Water in B.C., including water used for shale gas development, is protected through legislation – the Water Act, the Groundwater Protection Act and the Drilling and Production Regulation.
- Regulations under the Oil and Gas Activities Act, brought in last year, strengthen the regulatory powers and requirements around fracking and water use.

Hello,

Attached is a BN provided by Treaty 8 for our Minister's to Chiefs' meeting tomorrow afternoon.

Outlined in their BN are issues that they would like to raise with each of your Minister's. You may want to send over to your DMOs as well.

**Sent:** Tuesday, July 31, 2012 9:12 AM  
**To:** 'Lana.Lowe@fnnation.ca'  
**Subject:** Invitation: Keepers of the Water VI

Thank you for your email sent on July 12<sup>th</sup>. Unfortunately Minister Thomson will be unable to attend as we have meetings booked that week as the Union of BC Municipalities will be holding their annual convention here in Victoria. Please accept Minister Thomson's best wishes for a well attended and informative event.

**Subject:** Invitation: Keepers of the Water VI

Dear Minister Thompson,

On behalf of the FNNF, I'd like to invite you to attend the Keepers of the Water VI conference, to be hosted by FNNF from September 26-29th at the Fort Nelson Rec Centre!

We are finalizing the agenda right now, but I can tell you that the theme of the conference is collaborative approaches to watershed management. As you can imagine, the Liard and Horn River Basins and fracking are topics of discussion and concern. Our hope is that we can start working toward some solutions that will allow government, industry, and local communities to better manage water use in the Fort Nelson-Liard River watersheds.

The conference will be facilitated by David Marshall (Fraser Basin Council) with keynote presentations from: Wade Davis (National Geographic), Jon Waterhouse (Yukon River Inter-tribal Watershed Council) and Maude Barlow (Council of Canadians). We will also have a series of panel discussions and workshops on shale gas, collaborative watershed management, and Keepers of the Water initiatives.

I have attached an invitation from Chief Dickie, along with registration and accommodation information. A hard copy invitation will follow in the mail.

We hope to see you there!

Thank You! Mussi Cho!

Dear Minister Thomson:

**Invitation to March 8<sup>th</sup> meeting of Partnership Committee on Agriculture and the Environment**

The Partnership Committee on Agriculture and the Environment was established as a key channel for government and industry to discuss environmental issues affecting B.C. farmers and ranchers. It has proven to be an effective way for all participants to collaborate on difficult issues.

The committee meets annually in Victoria and the respective Ministers are invited to participate. The Committee would like to invite you to the March 8<sup>th</sup>, 2012, meeting at the Harbour Towers & Suites at 12:15pm. As per the draft agenda (copy attached), there is time for a short address from each Minister.

Please confirm your availability to Reg Ens, Executive Director of BCAC ([reg@bcac.bc.ca](mailto:reg@bcac.bc.ca)). Thank you for your ongoing support of the agriculture and agrifood sector.

Yours truly,

Per: 

Allen James  
Co-Chair  
Partnership Committee on Agriculture and the Environment

- c. Honourable Don McRae, Minister of Agriculture  
Honourable Terry Lake, Minister of Environment  
Wes Shoemaker, Deputy Minister, B.C. Ministry of Agriculture  
Cairine MacDonald, Deputy Minister, B.C. Ministry of Environment  
Doug Konkin, Deputy Minister, B.C. Ministry of Forests, Lands and Natural Resource Operations

## ForestEthics

35 of 48

8 June 2012

Dear Honourable Steve Thomson,

**RE: Coalbed methane in Sacred Headwaters/Klappan**

On December 5, 2008, Minister Neufeld signed Order in Council no. 890, imposing a temporary moratorium on Shell's coalbed methane-related activities in the Klappan. In six months time, this coming December, the period of inactivity expires. Based on a statement made by Minister Coleman in the Legislature earlier this week, we understand that Ministry of Aboriginal Relations and Reconciliation has a mandate to have discussions with Shell and the Tahltan First Nation. We feel that Forest, Lands, and Natural Resource Operations may have an important role in resolving the uncertainty in the Sacred Headwaters and achieving a solution in the region, and we are writing to request a meeting with you to discuss this.

Since Shell was granted the rights to develop coalbed methane in the Klappan-Groundhog tenure area in 2004, the project has generated much attention and controversy in B.C.:

- In 2006, additional drilling permits were approved on the assumption that no salmon were present within the tenure area, but in 2007, spawning salmon were documented near the approved drill sites.
- In 2008, the Skeena Independent Science Review Panel cites Shell's project as a major threat to wild salmon habitat in the Skeena.
- A poll conducted in 2008 finds that seven out of ten B.C. residents oppose the development of coalbed methane in salmon watersheds.
- Eight First Nations band councils, five municipal governments, and two regional governments - representing all levels of government in the region- signed resolutions opposing the project.
- The Union of BC Municipalities passed a resolution in 2008 opposing coalbed methane development in the Sacred Headwaters.
- NDP captured remaining two Liberal ridings in northwest B.C. during last provincial election; Sacred Headwaters conflict cited as the defining issue.
- National and international media generated due to blockades and international protests.
- The headwaters of the Skeena, Nass, and Stikine topped BC's Most Endangered Rivers List in 2010, 2011, and 2012.
- During the last municipal elections, 100% of candidates polled across six communities and two regional districts in the recent municipal election support protection of the Sacred Headwaters.

The Tahltan First Nation, on whose territory Shell's tenure lies, have taken several steps to demonstrate their position to protect the Klappan:

- In 2005, Tahltan Elders Statement was created (*Dena nenn Sogga neh'ine*), declaring a moratorium on resource development in the territory.
- The Klappan Declaration (*Tl'abne 'ani Dahth'ke noh'dih*) is born out of the 2005 blockade of Shell, declaring the Sacred Headwaters be held in Sacred Trust for all time and endorsed by 8 neighbouring First Nations
- The Tahltan blockaded Shell's road access during the field seasons from 2005 through 2007, resulting in several arrests

- The Tahltan successfully litigated against Shell as a result of misleading information given to public about the CBM project in 2008
- First Nations and communities do not want to put the salmon ecosystems at risk by exposing the headwaters of the Skeena, Nass, and Stikine to coalbed methane development, which has never before been done in salmon ecosystems. The Klappan is culturally significant, as it is the source of creation stories for several First Nations in the northwest. Skeena wild salmon contribute \$110 million annually to the local economy, and guide-outfitting contributes \$28 million.

As Shell moves forward with plans to develop liquefied natural gas operations in the northwest, Shell's reputation in the region precedes them. It is premature for your B.C. government and Shell to pursue another development while the Sacred Headwaters issue remains unresolved.

We commend the government's decision to put a moratorium in place in 2008, in order to create the time and space to work on a permanent solution to the conflict in the Sacred Headwaters. As such, our organizations have suspended much of our public campaign during this time.

Opposition to coalbed methane development in the Sacred Headwaters remains strong, and it is timely to create a solution for this issue. Certainty for communities and for Shell moving forward is much needed.

We realize that crafting the terms of a resolution amenable to all parties will take time. With only months remaining in the moratorium and an upcoming election, we would like to meet with you at your earliest convenience to discuss the future of the Sacred Headwaters, and to ensure a solid plan is in place to safeguard this area that has global significance.

Please contact Karen Tam Wu at 778.846.5647 or karen@forestethics.org to arrange a meeting. We look forward to hearing from you.

## **A RESOLUTION CONCERNING COALBED METHANE DEVELOPMENT IN BRITISH COLUMBIA'S SACRED HEADWATERS**

May 2008

**WHEREAS** To date there has been no commercial extraction of coalbed methane gas in British Columbia.

**AND WHEREAS** Coalbed methane extraction in other North American jurisdictions has caused significant harm to water, wildlife and rural economies.

**AND WHEREAS** Coalbed methane has never been commercially extracted in a wild-salmon-bearing watershed.

**AND WHEREAS** The Skeena, Nass and Stikine Rivers support three of North America's richest wild salmon fisheries, which in turn contribute to Northwest British Columbia's vibrant cultures and economy.

**AND WHEREAS** The headwaters of the Skeena, Nass and Stikine Rivers is home to robust populations of large mammals including stone sheep, grizzly bears, and Osborne caribou, which have been shown to be sensitive to landscape fragmentation caused by linear developments such as roads and pipelines.

**AND WHEREAS** Shell Canada Energy, a wholly owned subsidiary of Royal Dutch Shell, is planning to drill exploratory coalbed methane wells at the headwaters of the Skeena and Stikine Rivers, for the purpose of determining the extent and feasibility of the resource.

**BE IT RESOLVED THAT** We the undersigned respectfully request that the British Columbia government

- (1) Immediately suspend coalbed methane exploration in the Klappan-Groundhog tenure area;
- (2) Engage in comprehensive consultations with all residents of the Skeena, Nass and Stikine watersheds and estuaries;
- (3) Not proceed with coalbed methane development in the Klappan-Groundhog area until there is compelling evidence of environmental safety, and residents of the region are satisfied such development does not jeopardize their values and existing economic activities.
