Subject: RE: Kitimat Refinery

Good Afternoon Mr. Black,

As promised, please find EAO's comments on the Kitimat Refinery Project Description, submitted by Kitimat Clean Ltd (September 14, 2012). We have made our comments in 'track changes' for ease of use. Please let us know if you have any questions regarding our comments.

We would also like to inform you of a change in the EAO project team who will be working on the environmental assessment for this proposed Project. Starting next week, Alanya and I will not longer be involved in this proposed Project. Scott Bailey (cced), Executive Project Director, will be taking the lead with a new team (to be determined). We will be providing Scott and the new team with all the relevant information to bring them up to speed as quickly as possible.

As you are likely aware, an environmental assessment is an iterative process and EAO will work with proponents to ensure that documents meet the needs of government. I encourage you to discuss the EA process with Scott and his team to clarify expectations and next steps for this proposed Project.

Finally, as promised, EAO has met with permitting agencies regarding the permitting requirements for this proposed Project. Sean Darling (cced), Executive Project Director at the Ministry of Jobs, Tourism and Skills Training will be taking the lead in determining the permits needed for the proposed Project.

Many thanks and have a great weekend,
Rachel

Kitimat Clean and the Proposed Refinery

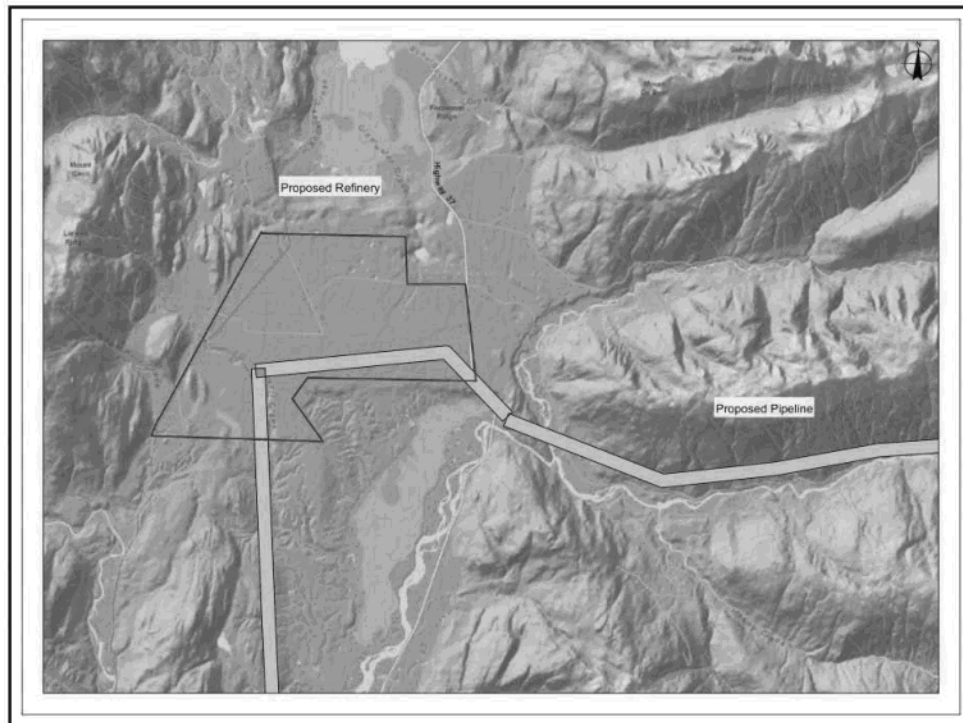

On Aug. 17, 2012, Mr. Black announced he is putting forth a proposal to build a \$13.2 billion oil refinery in Kitimat, B.C. with his company, Kitimat Clean Ltd. The refinery would serve the Northern Gateway pipeline, proposed by Enbridge. The diluent will be extracted at the refinery and returned to Alberta. The bitumen will be processed into fuel products (gasoline, jet fuel and diesel fuel) primarily for export to Asian markets. The facility will have a capacity to process 550,000 barrels per day (87,445 cubic meters per day) of diluted bitumen. David Black committed to invest his own money (between \$2 million and \$3 million) for the environmental assessment. On September 14th Kitimat Clean Ltd. submitted a draft project description to the Environmental Assessment Office (EAO).

Kitimat Clean Ltd. is a privately held British Columbia company set up to plan, construct and operate an oil refinery on a 3,000 hectare site in the Kitimat-Stikine Regional District known as the Dubose site. The site is situated 25 km North of Kitimat and 25 km South of Terrace, and has available power and access to CN rail. The proposed Enbridge pipeline is planned to run through the Dubose site. Water licenses will be applied for along the Kitimat River to supply the refinery.

Map 1: North West Coast of BC Proposed Refinery Location

Map 2: Dubose site between Kitimat and Terrace, B.C.

The key environmental benefit for the refinery hinges on the significantly lower environmental impact of any potential spill of clean products versus bitumen. The major concern with the Northern Gateway Pipeline project is a potential spill of bitumen on the west coast. Crude oil, especially heavy oil and bitumen, have been shown to be difficult to recover and clean up from water and shorelines. In contrast, the effects of a spill of clean products such as gasoline, jet fuel and diesel fuel are much shorter-lived and reduced.

Investment

Not Responsive

Mr. Black's proposal met with interest, however it is clear that more work remains to make the project a reality, including--but not limited to--assessing and securing a market with an off-take agreement and solidifying significant investment. Mr. Black has indicated that he would like to meet with senior level officials from Sinopec and Petro China.

Subject: hard copy of maps please

Hi Ron,

Would it be possible to have a copy of the maps walked over here to the DM's office on Monday morning?

Thanks,
Sveah

All,

To follow-up, I have now confirmed with Ed Osterwald that he is available tomorrow morning at 9 AM PST (5 PM London) for a conference call to discuss the refinery matter. I will be sending out a separate conference call invitation soon with dial-in details for the call tomorrow.

I am attaching a copy of Ed's CV for information prior to the call. Ed will be able to provide more 'color' on this and other matters tomorrow.

Thanks again for reaching out to us.

Subject: Expert Opinion/Report - Refinery Concept

Dave:

For information ...

The MIO can engage Navigant Consulting to conduct a review and evaluation of the Kitimat Clean refinery proposal. This review will evaluate the project from a technical and market perspective. The expert will prepare a draft report by February 25th with summary findings and a final report by March 1st. The expert will also be asked to present his findings via teleconference and to answer questions.

The MIO will also ask Navigant to conduct an overview of Asian (China, Japan, Korea and India) refinery market supply and demand. Given very tight timelines and budget constraints, this will be a high level analysis.

Expected value of the contract: approximately \$25,000 or less. The work will be added to an existing contract the MIO has with Navigant currently underway through government's standard competitive procurement process.

Linda Beltrano at MEMNG participated with me in engaging with the expert (resume attached). He is located in London, UK and has extensive global experience. The firm has worked with MEMNG before, and they are quite knowledgeable about Western Canada.

Please contact me if you have any questions.

Hi Eamon,

Please let me know if you or your staff would appreciate a quick update on the Kitimat Clean / Dubose Site.

There's quite a bit of interest in the site at present, discussions are focusing on:

Hi Ron,

This is very helpful.

I think a quick conference call tomorrow would be useful. I want to make sure we are all on the same page before getting back to Dan.

Cheers,

Dave

Lindsey-please coordinate, invite me, doug, tim, ron, Duncan. thx
