Table 552-0006 Canadian business counts, location counts with employees, by employment size and North American Industry Classification System (NAICS), Canada and provinces, June 2017, semi-annual (number)(1,2,3,4)

Survey or program details:

Business Register - 1105

Geography	Employment size (5)	North American Industry Classification System (NAICS) (6)	1 2017
British Columbia [59]	1 to 4 employees	Total, all industries [1]	110561
British Columbia [59]	5 to 9 employees	Total, all industries [1]	38126
British Columbia [59]	10 to 19 employees	Total, all industries [1]	24384
British Columbia [59]	20 to 49 employees	Total, all industries [1]	14796
British Columbia [59]	50 to 99 employees	Total, all industries [1]	4859
British Columbia [59]	100 to 199 employees	Total, all industries [1]	1938
British Columbia [59]	200 to 499 employees	Total, all industries [1]	876
British Columbia [59]	500 plus employees	Total, all industries [1]	347

Footnotes:

- 1 Businesses are counted according to the number of 'statistical locations' they have. For example, a retail business with 10 stores and a head office is counted 11 times in the Canadian business counts. Please consult our [guide](http://www23.statcan.gc.ca/imdb-bmdi/document/1105_D16_T9_V1-eng.htm) for more information.
- 2 This CANSIM table is no longer being updated. For the December 2016 reference period, please refer to CANSIM table 552-0005. CANSIM table 552-0006 contains data for the June 2017 reference period only.
- 3 The data includes all active Canadian locations with employees.
- 4 Fluctuations in these figures from one reference period to another can come from methodological changes (for example, changes to the method for identifying inactive units or in business industrial classification strategies). As a result, these data do not only represent changes in the business population over time. Statistics Canada advises users not to use these data as a time series.
- 5 The employment size ranges provided should not be used to calculate total number of employees.
- 6 The 2012 version of the [North American Industry Classification System \(NAICS\)](http://www.statcan.gc.ca/eng/subjects/standard/naics/2012/index) is used for this table.

Footnotes:

- 1 Employment data are not in full-time equivalents and do not distinguish between full-time and part-time employees.
- 2 Federal general government data includes reservists and full-time military personnel.
- 3 Data may not add to the total due to rounding.
- 4 Each year in May, minor revisions are applied to various data series based on more current information, to improve overall data quality.
- 5 Effective May 29, 2009 revisions were made to 2005 to 2008 federal, provincial and territorial employment and wages and salaries data. An adjustment to the provincial and territorial general government data for 2001 to 2008 was made to exclude struck-off employees and employees on unpaid leave to better conform to the Public Sector Employment Survey's definition of employment. Also, provincial government business enterprise data in Manitoba, Saskatchewan and Alberta from 1999 to 2008 have been revised.
- 7 Effective May 29, 2009, 2001 to 2008 data on education, health and social service institutions and local general government from the Survey of Employment Payroll and Hours (SEPH) were revised.
- 8 Colleges, vocational and trade institutions and local school boards are embedded in provincial and territorial general government in New Brunswick, Yukon, Northwest Territories (partially for local school boards) and Nunavut.
- 9 Starting in 2005, health and social services institutions are embedded in provincial general government in Prince Edward Island.
- 10 The monthly seasonally adjusted series on public sector employment is available from reference period January 2001. Wage and salaries data are not seasonally adjusted.

Legend:

x Suppressed to meet the confidentiality requirements of the Statistics Act

Footnotes:

2 Number of persons who, during the reference week, worked for pay or profit, or performed unpaid family work or had a job but were not at work due to own illness or disability, personal or family responsibilities, labour dispute, vacation, or other reason. Those persons on layoff and persons without work but who had a job to start at a definite date in the future are not considered employed. Estimates in thousands, rounded to the nearest hundred.

7 Industry refers to the general nature of the business carried out by the employer for whom the respondent works (main job only). If the individual did not have a job during the reference week, the data relate to the previous job, if that job was held in the past year. Those unemployed persons who have never worked before and those persons who last worked more than 1 year ago make up the "unclassified" category in this table. In January 1999, the industry classification switched from Standard Industrial Classification (SIC 1980) to North American Industry Classification System (NAICS), which was quite different. For this reason, detailed historical data based on NAICS is provided going back to January 1987. In addition, data from 1976 to 1986 is provided at a less detailed level than the more recent data. Historical data have been created by imputation. From 1976 to 1986, estimates are based on 2002 NAICS. From 1987 onwards, industry estimates are based on the 2012 North American Industry Classification System.

11 The labour force survey collection of tables, starting with number 282-, is large with many possible cross-tabulations for the 10 provinces and other geographic regions. To ensure respondent's confidentiality, detailed data are suppressed. Data for Canada, Quebec, Ontario, Alberta and British Columbia are suppressed if the estimate is below 1,500, for Newfoundland and Labrador, Nova Scotia, New Brunswick, Manitoba and Saskatchewan, if the estimate is below 500, and for Prince Edward Island, under 200. For suppression levels within census metropolitan areas (CMAs) and economic regions (ERs), use the respective provincial suppression levels above. While suppressing to protect respondent confidentiality has the added effect of blocking out the lowest-quality LFS data, some remaining non-suppressed data in these very large LFS CANSIM tables may be of insufficient quality to allow for accurate interpretation. Please be warned that the more detailed your LFS CANSIM download, the smaller the sample size up on which y

12 Formerly "Management of companies and administrative and other support services".

14 This combines the North American Industry Classification System (NAICS) codes 11 to 91.

15 This combines the North American Industry Classification System (NAICS) codes 11 to 33.

16 This combines the North American Industry Classification System (NAICS) codes 41 to 91.

17 Labour Force Survey (LFS) North American Industry Classification System (NAICS) code exception: add group 1100 - Farming - not elsewhere classified (nec). When the type of farm activity cannot be distinguished between crop and livestock, (example: mixed farming).

18 Labour Force Survey (LFS) North American Industry Classification System (NAICS) code exception: add group 2100 - Mining - not elsewhere classified (nec). Whenever the type of mining activity cannot be distinguished.

19 Also referred to as Natural resources.

Table 281-0042 Survey of Employment, Payrolls and Hours (SEPH), employment for all employees, by enterprise size and North American Industry Classification System (NAICS), annual (persons)(2,7,9)

Footnotes:

1. Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations. The seasonal adjustment program is a complicated computer program which differentiates between these seasonal, cyclical and irregular movements in a series over a number of years and, on the basis of past movements, estimates appropriate seasonal factors for current data. On an annual basis, the historic series of seasonally adjusted data are revised in light of the most recent information on changes in seasonality.
2. Those who work for a local, provincial or federal government, for a government service or agency, a crown corporation, or a government funded establishment such as a school (including universities) or hospital.
3. Those who work as employees of a private firm or business.
4. Includes both incorporated and unincorporated working owners, self-employed persons who do not have a business and persons working in a family business without pay.
5. The Labour force survey collection of tables, starting with number 282-, is large with many possible cross-tabulations for the 10 provinces and other geographic regions. To ensure respondent's confidentiality, detailed data are suppressed. Data for Canada, Quebec, Ontario, Alberta and British Columbia are suppressed if the estimate is below 1,500, for Newfoundland and Labrador, Nova Scotia, New Brunswick, Manitoba and Saskatchewan, if the estimate is below 500, and for Prince Edward Island, under 200. For suppression levels within census metropolitan areas (CMAs) and economic regions (ERs), use the respective provincial suppression levels above. While suppressing to protect respondent confidentiality has the added effect of blocking-out the lowest-quality LFS data, some remaining non-suppressed data in these very large LFS CANSIM tables may be of insufficient quality to allow for accurate interpretation. Please be warned that the more detailed your LFS CANSIM download, the smaller the sample size upon which y
7. For more information on seasonal adjustment see Seasonally adjusted data - Frequently asked questions.

Insurance

The following charts illustrate the size of the industry, and any changes over the most recent five to six-year period. Industry size has been represented in a number of ways, including the number of registered employers, the amount of payroll that the employers represent, or the financial size of the assessments collected. Industries may expand or contract with economic or business cycles. There is no target or goal related to these measures.

Measure	2011	2012	2013	2014	2015	2016 *
# Employers	203,607	207,144	209,105	211,133	214,917	
Assessable Payroll	\$75,655,591,948	\$78,718,540,674	\$81,720,549,981	\$84,989,720,387	\$88,696,644,121	\$94,605,402,766
Assessment Amount	\$1,142,463,888	\$1,171,701,763	\$1,265,781,967	\$1,389,419,906	\$1,439,704,065	\$1,544,658,314

NOTES

*If presented above, the current year is an estimate.

i) More than 97% of registered employers are active in only one Classification Unit.

The data displayed is as of July 31, 2016.

DEFINITIONS

Employers

The number of employers registered in the given industry. Employers registered in more than one Classification Unit (CU) will be counted multiple times.

Assessable Payroll (\$)

The gross earnings of all full-time and part-time workers, casual workers, labour contractors who don't have an account with WorkSafeBC, and shareholders in the firm.

Assessment Amount (\$)

The total premium a firm pays for workers' compensation insurance. The premium is calculated based on the firm's base rate, assessable payroll, and experience rating discount or surcharge.
