Coastal Fire Centre

July 4, 2015 Section Meeting

Safety:

Tim: support to the field. IMT JS is SO. This may make **s.22** available. No injury reports today. Will communicate generic safety inbox to the team.

Chris – be proactive and get messages out. Safety packages are done and can be sent out. Includes all safety documentation that may be required if an incident occurs. Will get them out to the zones.

Plans:

GIS support now at the centre. Todd Davis. PWCC requested prsr report for today. Almost caught up on resources. Trying to confirm in centre moves. Beth to keep resources and demob. Kathy to take Sit Unit. T cards system in place for tomorrow. Support to the zones via iap, org, mapping, documentation. Issue: need info coming in from the zones in order to better support them. Need orgs for Sechelt and NI.

Logs:

Started one page summary of all standing offers. Will be published as it changes. Capacity of fire crews 2 5pack osprey in whistler, 2 5 pack lilloet in Pemberton with possibility of a third. Used 6 SNRC hope to have another available late today and another tomorrow. That exhausts our SO crew resources. Blue Thunder has 16 engaged in the centre. 5 FA units on fires and 1 on SB.

Two equipment people enroute to Sechelt. **s.22** and Darrren Rowsell. Lonny Turnbull on his way to the complex.

Hard to contact non dirt ministry liaisons after hours. HQ had 14 no's for TEAMS yesterday.

Trailer in on Monday. Next trailer is in the works.

Trying to get more centre logs help.

Ops:

Nigel – Fraser – 247 fire pushed back on itself. Yesterday's run burnt hot and clean and looks quiet. Hope ground crews will action tomor.

Coq – release ia tomorrow afternoon, frasers back to their crew and handover to contractors.

241 out into the main valley, ATR became low priority. Trying to put in lines to aid in burning. lpp looks like it is good candidate for SPU

160 challenged with AC needs. Will need to reassess requirements based on resource needs and values at risk.

256 – burnt into area last night that isn't good for crew. Looking at equipment lines to burn from if resources available. Fire is at the control line on the west flank. Another contingency guard available. East flank good progress. John Forrest now in the zone as ZWCO. Looking for guidance on developing a game plan using IGN Spec. Excavator broke and could be in the fire path. Advised to let company know asap.

270 crane has been effective. Holding well. FD is working near the homes and water plant.

Bayliss grass fire almost wrapped up. FD jurisdiction.

Nanaimo cedar finishing mob up with 5 pack Iverson. Back out tomorrow

Sproat lake peninsula: RCMP are evacuating boat access on the lake. 2 int and a 500, 2 ia, 2 UC members, 10 pack contract on the way. We have one tanker with a 1 hour turn around.

9 other ATR besides our 2 in the province.

South Island is quiet.

247 aggressive behaviour, rank 4/5 info from Richard Heard

Gene: got a UC Burnslake enroute to Sechelt.

Make sure zones are keeping up with documentation.

Feedback from PWCC re TEAMS. A protocol is in place and we need to follow it. sounds like there are teams people who are able to play and haven't been contacted.

Message to keep ordering critical resources whether they are available or not.

Dispatch:

Busy. A lot of unnecessary calls for other sections. Don't call dispatch unless you want dispatch. Email if possible rather than calling. Fire wardens are all checking in at the same time and check points are not being used. Would like this implemented again to lessen traffic.

Finance:

Expanded ops project number 71W16VA for the centre starting today. IMT is 71W16VB. Process for hiring stats is in place for the IMT. Org chart is updated. Focus today and tomorrow is procurement. Support IMT complex and the zones.

Info:

90 interviews since Thursday with Media. Ellie and Paula in today. Melissa taking info for the complex fires. PH and Sechelt FON and 160 and 241 by Melissa. Issue is poor intel from incidents. Hoping IAP will help. Monday will have 4 in the section. Need a different space.

Ken:

Look at longer term strategies and use of space.

Gene: we are tapped and holding our own. Critical time and we will see how it plays out. Weekday and weekend days are no different at this point. 0800 – 2000 and advise a need outside of that.

Fatigue trackers: need review to ensure there is a stagger of resources.
