Did a quick access query in Resources.

Not sure if these are too far back, but I found two BCTS Babine (SBFEP) blocks that were treated (heli) in 1995 – both in the Lakes.

A31763-1 (Aug 25, 1995) 3.0 ha of glyphosate treatment at a rate of 1.068 kg/ha = 3.204kg

A31679-1 (Aug 24, 1995) 11.0 ha of glyphosate treatment at a rate of 1.424 kg/ha = 15.664kg

The only other chemical treatments I could find in the silvi records was for fertilization – Gro-Max Bags (20 blocks, one in 1994, one in 1996, one in 1999 and the rest in 1998)

So sending to Management to get your take on this.... I don't remember or don't know... have we used Glyphosate in our Business area in the past and do we have any documentation on what/how much and where it was used?

- Report all non-Excluded class pesticides used over the last calendar year (January 1 – December 31).
- Complete this record accurately. The most common mistake in completing these records is writing down the wrong P.C.P. Act Registration Number.
- The only acceptable units for reporting quantities used are kilograms of product (not “jugs”, “cases”, “L”, “mL” etc.). Record the amount used from the product container before mixing. Do not report diluted quantities. Do not report the quantity of active ingredient. For this report you may consider 1 L of product to weigh 1 kg.
- Record each separate product on a separate line.
- Submit this summary to the Administrator, *Integrated Pest Management Act* before January 31.

Description of the treatment location (also enclose a map): 1: Cutblocks in the Headwaters Forest District and Kamloops Forest District

- Report all non-Excluded class pesticides used over the last calendar year (January 1 – December 31).
- Complete this record accurately. The most common mistake in completing these records is writing down the wrong *P.C.P. Act* Registration Number.
- The only acceptable units for reporting quantities used are kilograms of product (not “jugs”, “cases”, “L”, “mL” etc.). Record the amount used from the product container before mixing. Do not report diluted quantities. Do not report the quantity of active ingredient. For this report you may consider 1 L of product to weigh 1 kg.
- Record each separate product on a separate line.
- Report the size of the areas in hectares.
- If pesticide was applied as a service for the Confirmation holder, please give the names of the service companies.

Name Of The Service Company That Provides The Service	Licence Number
