**Subject:** Grizzly put-down

Hi Pat and Garth.

Invermere COS destroyed an ancient adult male Griz yesterday that was captured in a Culvert Trap at the Windermere Valley Golf Course. This bear had a seasonal pattern of coming down into the valley late summer/early fall for garbage. It would tip over the large metal dumpsters and bend the lid open to access the garbage.

The decision was made to put it down as I could see it was in poor health. It had worn teeth with decay, poor hide condition, and had broken off most of its claw tips by racking the trap wire screen. Compulsory Inspection # is: 104835, which will be mailed to Cranbrook.

Regards,

**Greg Kruger**

The bear was hit by a car on the Kimberly side of the bridge over the St. Mary's River and had to be put down. I'll check with Garth. Thanks for the suggestions.

## GENERAL ORDERS PART II ORDER #21-2012

<b>Issue Date:</b> April 13, 2012	<b>Effective Date:</b> April 13, 2012	<b>Review Date:</b> N/A
--------------------------------------	--	----------------------------

**Subject: Unlawful Killing of Grizzly Bears**

### Summary

In the past two years a number of grizzly bear have been killed by members of the public ostensibly for the protection of life or property<sup>1</sup>. Some of these incidents received considerable media attention, resulting in questions and criticism about the legality of the killings and the subsequent COS response.

The *Wildlife Act* provides for the lawful killing of grizzly bears **in only these situations:**

- An officer under the *Wildlife Act* may kill a grizzly in the course of performing duties under the Act.
- A person may kill a grizzly:
  - during the open season with the required licences and LEH authorization
  - if exercising a recognized aboriginal right to do so
  - with a permit to do so, under the conditions described in the permit (i.e. the grizzly is dangerous to public safety)
- A person to whom *Wildlife Act* section 26(2) applies may kill a grizzly. The applicable prohibitions against killing do not apply to “a person who hunts or traps wildlife that is on the person’s property and is a menace to a domestic (defined term, but fairly broad) animal or bird”. The killing must occur on the person’s property and only the property owner may do the killing. Legal Counsel advises that property includes owned and leased land, but not land used under licence or permit (e.g. a holder of a grazing licence is not excused).
- Any person may kill a grizzly that is an **immediate threat to that person’s life**, relying on the common law excuse of necessity. The authority in this situation only applies if there are **no alternatives** to the killing (i.e. killing the bear is the only way to avoid serious injury or death to a human).

<sup>1</sup> Click [here](#) for provincial bear stats, including the number of grizzly bears killed by the COS and “other”, which includes either a member of the RCMP or a member of the public.

Examples of situations where the killing of a grizzly bear is not permitted:

- Except as excused by section 26(2), as noted above, it is **not lawful** to kill a grizzly that is merely destroying personal property. For example, a grizzly that is:
  - claiming harvested game
  - eating fish left on a porch
  - eating a steer on Crown land subject to a grazing licence
  - trying to get into a refrigerator on a sundeck
- It is **not lawful** to kill a grizzly that is not an immediate threat to life. More specifically, an immediate threat to life is not automatically presented by a grizzly that is:
  - repeatedly walking through a back yard while people are in their house
  - frightening someone while they are in their truck
  - hanging around a hunting camp

### **Actions Required**

It is essential that all staff understand the distinction between the lawful and unlawful killing of a grizzly bear, as outlined above, and are capable of articulating same to the public. Furthermore, it is expected that conservation officers, in exercising their discretion, will ensure that an appropriate and consistent enforcement response is taken for any unlawful killing. This includes conducting a thorough investigation to ensure an individual's actions were permitted under the *Wildlife Act*.

### **Questions**

Questions or concerns about the foregoing should be directed through your supervisor to Inspector Wayne Zimmerman, Support Services.

**Approval:** Gord Hitchcock, A/Chief Superintendent  
Program Governance

**Date:** April 13, 2012

## EXPORT OF GAME FROM BRITISH COLUMBIA, CANADA

The bearer of this Compulsory Inspection data sheet is, for the purposes of the Wildlife Act (BC) and the Wild Animal and Plant Protection and Regulation of International and Interprovincial Trade Act (Canada), hereby authorized to export the game described in this data sheet from British Columbia. Valid as an export permit only for 30 days from the date of issuance. (C.I.T.E.S. permit may also be required if wildlife is exported from Canada).

I certify the information provided by me is true and accurate to the best of my knowledge.
