Hello Stephen,

As discussed, Minister Donaldson will phone you between 12 noon and 12:05 today on your cell - s.22

Thank you,
Tristan

Good morning Tristan, I left you a voicemail as well, but wanted to follow up with an email.
I am hoping that Minister Donaldson can call me regarding some temporary production curtailments that we will be announcing today, and I wanted to provide the Minister with confidential advance notice before issuing a press release at 2:00pm this afternoon.

If you could have him call me, or contact me yourself, that would be appreciated.

Regards,

Stephen Mackie

Date: Thursday, November 1, 2018 11:17:19 AM

Hello Stephen,

As mentioned in our phone call this morning, we have set aside a 1/2 day, January 22, 2019 for the Minister to participate in a tour of Canfor facilities based on your recommendations.

Based on daylight at that time of year, we propose that the tour start at 9 a.m. and end approximately 1 pm.

Will this work for you?

Thank you for your assistance with this.

Tristan

Hi Michelle

I am hoping you can help me out? If you read the emails below you will see that I purchased on line on the ministry website, September 11th 2018 both a hunting licence and a white tail deer tag. The hunting licence I can only assume I received as it is a virtual licence and no paper copy exists, but the deer tag should have been mailed out to me as I must be in possession of it to hunt deer. As of today I have not received it. On October 9th 2018 I attended the Nelson office of front counter BC and requested a refund as I no longer had time to hunt. On October 30th I received the reply below denying my request.

Obviously the government has put in place a system that does not work and has denied me the opportunity to hunt deer this year as I had planned, and they take no responsibility for their poor performance.

Please have them refund the $25 dollars they billed my credit card for my nonexistent deer tag.

CC: Caesar, Sharon FLNR:EX <Sharon.Caesar@gov.bc.ca>

Good afternoon,

I am in receipt of the email below dated October 9, 2018 requesting you be issued a refund for your White-tailed Deer species licence which was purchased online on September 11, 2018. It's my understanding that the licence you purchased was not received in the mail, and that you declined a free replacement species licence "due to season being almost over".

While open-season dates vary across the province, there are many general open-season hunting opportunities for White-Tailed Deer, some as late as December 20, 2018. A refund will not be issued for the licence you purchased on September 11.

Please also be advised that, should you wish to hunt for the remainder of the licence year, regardless of the species, you must carry all of your species licences (cancelled and un-cancelled) at all times. If you wish to hunt for the remainder of the licence year, you will need to obtain a replacement species licence, please attend any FrontCounter BC or Service BC location to do so.

Thank you,

Sandra Marshall | Licence Action Officer | Wildlife and Habitat Branch | Ph: 778-698-9236| Sandra.Marshall@gov.bc.ca

Subject: RE: Grand Forks Accommodatiion

Hi Tristan,

Thanks for this. I met directly with the City and Regional District on Tuesday when they were in town and had the opportunity to discuss Broadacres. They were very familiar with the property. In fact, Mayor-Elect Brian Taylor ran the facility for eight years before it was bought out be someone else

and then subsequently shut down. Here is what I have been able to find out about the property.

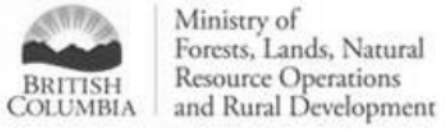

- The GF Recovery Team (City and Regional District) is well aware of the property and considered it alongside all other housing options
- Broadacres is not currently a serviceable building having been closed for some time and not properly winterized. Significant investment would be required to bring the building up to a habitable standard.
- The current state of the building along with its design does not meet the community's immediate housing needs
- Going forward, the Recovery Team will continue to look at all available housing options, including Broadacres, to meet the needs of the community.

While I am sure that BC Housing is well aware of the property, I will advise them through my regular Grand Forks project team meeting which is this afternoon.

Please let me know if there is anything more specific the Minister would like to know.

Sent: Thursday, November 1, 2018 12:54 PM
To: Minister, FLNR FLNR:EX
Cc: Renneberg, Tim FLNR:EX
Subject: Thank You

Minister,

It was a pleasure to meet you and Tim Renneberg on October 17th. We respect the constraints on your schedule and appreciate the time you spent with us.

As we discussed Western is committed to coastal forestry and we believe your government's interests and Western's interests are very much aligned. Our vision of creating the premier global supplier of speciality softwood lumber products for customers around the world will support jobs in the coastal communities in which we operate and create opportunity for others to use the infrastructure we draw to the region such as shipping and broad support industries.

It was helpful to learn more about government's directions and your approach. I appreciate that you are looking to gather a range of perspectives as you make decisions. As the largest employer within the coastal forestry industry, and the business that drives the infrastructure necessary for others to be successful, I am thankful for the opportunity to directly share our perspectives with you.

As we discussed we are concerned about the potential for unintended consequences with some of the policy proposals that have been presented as part of the coastal forestry revitalization process. Specifically, we are concerned about four key areas, the taking of AAC, waste bench marks and penalties in fibre recovery zones, amendments to the manufactured lumber regulation and the variable fee-in-lieu. The policy proposals as outlined create greater risk to domestic manufacturers and are more likely to deliver increased log exports, lower volumes of pulp logs and increased sawmill curtailments on the Coast.

Since our meeting, the WFP team has met with officials from your ministry to provide them with details on our concerns and you can expect to see our written submission shortly. We have requested the economic modelling or analysis from the ministry that support and demonstrate how the proposals will meet the stated objectives. Without greater clarity from government, there are significant risks for unintended consequences. As this process moves forward, I hope that we can continue to have dialogue as the proposals evolve.

I understand your desire to be kept informed of decisions in a timely way. I can commit that WFP will provide you with as much notice as possible on operational changes within the constraints we are under as a publicly traded company.

Thank you for your time. I look forward to our next discussion. I will make myself available to you as needed, please do not hesitate to contact me, or our team, if you have questions.

Kind regards,
Don

Subject: Re: Meeting Minister Donaldson

Hi Tristan,

Our preference would be to meet earlier than January 23, 2019. We have requested a meeting for some time now, but also understood the significant precedence of the wildfires over our last meeting.

We would be able to travel to meet Minister Donaldson and surely take any opportunity to meet in the in the near future.

Respectfully,

Derek

Hello Derek,

Thank you for letting me know that Bill Kordyban is available Friday the 17th.

I have booked him in for a meeting with the Minister: 1:30 – 2:00 p.m. at our Smithers office – 1175

Main Street.

Can you please provide me with his cell # so that I can contact him directly in case the Minister is called away for an emergency?

Thank you,
Tristan Jones

Good morning Tristan:

Thank you for email notification, I tried to contact constituent this morning with no avail. I had spoken briefly with s.22 with reference to your email request for additional information regarding her concerns and contacts made in the past to enable Ministry follow up. I did email follow-up giving details of our conversation and Ministry contact in writing to s.22 s.22 . I have not heard back from s.22 or acknowledgement of my email sent on Oct. 29th, 2018 transmission. I have now cc: copy of emails to her for her response. Sorry for any inconvenience, trust meets with your approval and s.22 will be contacting you in the near future with information requested.

Thanks,
Judy Button, CA

To: Minister, FLNR FLNR:EX
Cc: Lee-Ann Unger; Jens Wieting; Torrance Coste; TJ Watt
Subject: ENGO participation in old-growth strategy, Coast Forest Revitalization Plan, & other relevant processes

Dear Tim and Kenn,

Thank you, Tim, for taking the time to meet with our groups last month and to Kenn for helping to arrange the meeting.

As discussed, we are interested in the options currently being researched by the ministry for a provincial old-growth strategy and are keen to learn about those options in early November. We are concerned, however, that our organizations were not contacted to provide input or participate in discussions on these options.

Minister Donaldson has stated the ministry's Coast Forest Revitalization Plan is currently being developed with input from different sectors including industry, First Nations, forestry unions, and communities. It is, however, missing input from environmental groups, which we see as a significant oversight. Our organizations request that we be included in the Coast Forest Revitalization Plan process.

We would like to reiterate and emphasize that all four of our organizations are committed to these issues and request that we be included and invited to meaningfully participate in these processes, as well as all additional processes relating to old-growth forests, including, but not limited to: modernizing BC land use plans, marbled murrelet and northern goshawk habitat protections, protection of old-growth in BC's species at risk legislation, Clayoquot Sound, and the Big Tree Protection Order, upon completion of the ministry's pilot project.

We ask that you please discuss our requests with Minister Donaldson and relevant staff. We look forward to more frequent discussions with yourselves and other FLNRO representatives on these issues.

In closing, our two requests as stated above are:

1. That our organizations be actively included in the Coast Forest Revitalization Plan process immediately.
2. That you commit to a meeting date and time with our organizations for the first two weeks of November to share with us the options developed for an Old-Growth Strategy based on the research being conducted by your ministry.

We look forward to a timely response to our requests.

Thank you for your time. We look forward to hearing from you soon.

Sincerely,

Andrea Inness, Forest Campaigner, Ancient Forest Alliance
Lee-Ann Unger, Corporate Campaigner, Canopy
Jens Wieting, Senior Forest and Climate Campaigner, Sierra Club BC

Hi Reamick and Tristan,
Hope you both are well and that the sun is shining in Victoria.
Please see the below concern. This appears to be a cross ministry complaint, so I would very much like both of you to take a look at it. s.22 came into our office recently and I asked him to email his concerns and provide some background and photographs.
Hoping that something can be done because s.22 seems to be getting away with doing some serious environmental damage in the area.
Looking forward to hearing back from you.
Thanks!

Cc: s.22
Subject: Dumping of demolition waste - s.22

Dear Linda and Colleen,
Firstly thank you Colleen for your time a few weeks ago when I dropped in to the Constituency office to discuss this issue.

I write to ask whether your office is able to assist with controlling the damage being done in

the s.22 area at the above address.
The new owner, s.22 took possession of the property in the Fall of 2017.
s.22

I have approached s.22 to discuss the issues that have arisen on his property but it has been a difficult interaction.
I have approached the BC Conservation Officer Service on a number of occasions through the RAPP line and provided photos of the dumping activities.
I have also discussed this with the RDOS who have redirected me back to the RAPP line.
Despite many calls and discussions with the RDOS and the Conservation officers by a number of people in the area, s.22 has continued to truck in large quantities of demolition waste material as per the attached photos. There have been up to 3 truckloads per day on occasions.
The waste material is being dumped and buried in multiple areas where fill is clearly not required and construction is highly unlikely to occur subsequently. The waste has included non-inert materials such as painted wood, Gyproc, sawdust and grape pressings.
The majority of the concrete and steel waste has been dumped into a gully which is a waterway in the spring for about 4 to 5 months each year. Further down the waterway in an area where there are wetlands he has now excavated 2 large ponds (as per the attached photos). I was informed by one of the visiting conservation officers that he required permission to do this and that it had not been obtained.
s.22 also raised the earth wall of a small illegal dam on the property and due to concerns that this would potentially breach and add to the flooding in Sportsman's Bowl he was ordered by Mr. Mike Noseworthy to place pipes in the wall and lower the level of the water. I understand that s.22 is expected to have the Dam compliant by the end of this year.

I am aware that s.22 may import inert material to use as fill. However the multiple dumps on the property and their locations make it clear that he is simply using the property to dump significant volumes of waste that should otherwise have been taken to a designated dumping area.
As all of the interventions to date do not seem to have stopped s.22 dumping I would appreciate the assistance of your office in trying to achieve a reasonable outcome in this case.
Thank you,
s.22

The attachments are as follows:
1. Wetlands before excavation (Wetlands 2016)
2. Wetlands after excavation of 2 ponds (Excavation in Wetlands)
3. Dumping in the gully/waterway (Dumping 17 Sept 2018)
4. Concrete along the gully prior to being pushed into the waterway (Dumping 17 Sept)
5. Painted and burnt wood waste (Burnt wood waste)
6. Wood and steel waste (Mixed Dump pile 1)
7. Concrete waste (Dumping 17 Sept2)
8. Covered pit containing 5, 6 & 7 above (Covered buried waste Oct 2018)
9. Dumped sawdust and grape pressings (Dumped sawdust 1)

Hi Tristan

You may recall this discussion about wanting to get info on the Manalta project application in the 90s from the government and Doug offering to assist if there were problems in getting the material. Jay highlights the problems he has had. Do you think you could follow up on that?

Thanks.

Pat

Subject: Fwd: Telkwa Coal

Hi Doug:

When we met with you in April about the Telkwa Coal proposal, one of the things we discussed was obtaining access to the information that the government currently has in its files connected to prior similar proposals.

As you probably know, Telkwa Coal has now filed a preliminary application with the Environmental Assessment office and the company states that it plans to file a full application by January.

We understand that a prior application filed in the 1990's by Manalta Coal to establish a similar mine at this site went through an extensive review by the Province before it was withdrawn by the proponent. In preparation for assisting the community in a review of this project, we submitted the below information request to the local office of the MoE where we understand that the Manalta era documents are now being maintained.

We have not received a reply from Ms. Fallows and we are wondering if you could assist us in obtaining a prompt response. These documents should shed a great deal of light on the environmental and other concerns connected to this proposal.

Dear Ms. Fallows:

My name is Jay Gilden and I am working with a community group in the Bulkley Valley known as What Matters in Our Valley. We are currently involved in trying to make sure that the public is fully informed about the risks associated with the Telkwa Coal mine project. We understand that the company is planning on filing an EA application for approval of this mine in January 2019.

It is also our understanding that a similar project was proposed in the early 1990's by a mining firm by the name of Manalta. This proposal was reviewed by your office and this resulted in a substantial amount of work being done investigating the potential environmental impacts.

In preparation for the work we expect to do to inform the public about this proposal, we would like to have a chance to review documents that were prepared by your office in the 1990's in connection with the Manalta proposal.

In particular, we are requesting the following documents, including drafts:

Application Comments
Comments from Technical Reviewers
Preliminary Conclusions and Reports
Environmental Assessment Reports

Please let me know when and under what circumstances these documents will be made available.

Jay Gilden

Subject: RE: Dumping of demolition waste - s.22

Hi Tristan –

I've checked in with the team and our read is the main issue is " the multiple dumps on the property and their locations make it clear that he is simply using the property to dump significant volumes of waste that should otherwise have been taken to a designated dumping area."

This activity is regulated under Part 2 of the Environmental Management Act (EMA), therefore ENV.

There may be potential violations of the Water Sustainability Act, in that some materials are getting dumped in waterways, gullies and wetland. NRO are the lead agency on WSA. Regardless, though the main issue here are under the EMA.

Let me know if you need more.

D.

Subject: Dumping of demolition waste - 2591 Willowbrook Road

Dear Linda and Colleen,
Firstly thank you Colleen for your time a few weeks ago when I dropped in to the Constituency office to discuss this issue.

I write to ask whether your office is able to assist with controlling the damage being done in the Willowbrook area at the above address.
The new owner, s.22 took possession of the property in the Fall of 2017.
s.22

I have approached s.22 to discuss the issues that have arisen on his property but it has been a difficult interaction.
I have approached the BC Conservation Officer Service on a number of occasions through the RAPP line and provided photos of the dumping activities.
I have also discussed this with the RDOS who have redirected me back to the RAPP line.
Despite many calls and discussions with the RDOS and the Conservation officers by a number of people in the area, s.22 has continued to truck in large quantities of demolition waste

material as per the attached photos. There have been up to 3 truckloads per day on occasions. The waste material is being dumped and buried in multiple areas where fill is clearly not required and construction is highly unlikely to occur subsequently. The waste has included non-inert materials such as painted wood, Gyproc, sawdust and grape pressings.
The majority of the concrete and steel waste has been dumped into a gully which is a waterway in the spring for about 4 to 5 months each year. Further down the waterway in an area where there are wetlands he has now excavated 2 large ponds (as per the attached photos). I was informed by one of the visiting conservation officers that he required permission to do this and that it had not been obtained.
s.22 also raised the earth wall of a small illegal dam on the property and due to concerns that this would potentially breach and add to the flooding in Sportsman's Bowl he was ordered by Mr. Mike Noseworthy to place pipes in the wall and lower the level of the water. I understand that s.22 is expected to have the Dam compliant by the end of this year.

I am aware that s.22 may import inert material to use as fill. However the multiple dumps on the property and their locations make it clear that he is simply using the property to dump significant volumes of waste that should otherwise have been taken to a designated dumping area.
As all of the interventions to date do not seem to have stopped s.22 dumping I would appreciate the assistance of your office in trying to achieve a reasonable outcome in this case.
Thank you,
s.22

The attachments are as follows:
1. Wetlands before excavation (Wetlands 2016)
2. Wetlands after excavation of 2 ponds (Excavation in Wetlands)
3. Dumping in the gully/waterway (Dumping 17 Sept 2018)
4. Concrete along the gully prior to being pushed into the waterway (Dumping 17 Sept)
5. Painted and burnt wood waste (Burnt wood waste)
6. Wood and steel waste (Mixed Dump pile 1)
7. Concrete waste (Dumping 17 Sept2)
8. Covered pit containing 5, 6 & 7 above (Covered buried waste Oct 2018)
9. Dumped sawdust and grape pressings (Dumped sawdust 1)

Hello My name is Subrina Monteith and I believe we met in Kaleden on Canada Day l. I recently was elected to RDOS Area I which is the split Kaleden Area from Tom Siddon's ridding of Area D.

I mentioned to you then that I would be in touch to peruse an award to acknowledge Tom Siddon's service to BC and our local region. I'm looking for support in which award we should apply for and when a letter of support for the application. I've enjoyed learning from Tom Siddon prior to election and believe he deserves to be acknowledged for his service.
If you could provide guidance, it would be appreciated. Also we are trying to be sneaky and work without Tom being aware. Perhaps you would know of who else would be willing to write a letter of support for an award.
Sincerely
Subrina Monteith

Subject: Re: Keeping in touch

s.22 good to hear from you. I spoke last week with one of my contacts at the MFLNRORD Forest For Tomorrow program about our industry's use of plastics. He had called after the BC Cattlemen's Association had raised concerns about calves eating flagging and the sometimes lethal consequences. I told him the WFCA was in touch with your citizens group based in our minister of forests riding, that we had established a WFCA contractor working group and that we would be proposing strategies and alternatives to using plastic fabrics at our 2019 conference. In that process the earliest we could see significant reduction or possible elimination of plastics used for forestry and seedling packaging would be 2020. I told him the WFCA was in principle behind reducing the use of plastics and was looking at alternatives and the costs associated with switching to bio-degradable fabrics.

It seems that between the cattlemen, wildlife biologists, and citizens along with the WFCA's collaboration there is momentum to at least reduce the amount of plastic reforestation crews leave on blocks. We may still need durable plastics for some activities like surveying for roads and cut boundaries where something more permanent tied to trees and stakes is required. At this point contractors are bidding on next year's work and will likely not be considering changing their use of plastics and the additional costs. Even with that I think we can get the word out and encourage planters to not overuse flagging. We could see some reduction in the level of litter this spring.

Right now my plastic reduction working group members are out in the field viewing planting projects for next year across the province. That will begin to calm down in the next few weeks. At that point when people have time we will convene and begin our research (thanks for your work on this) on alternatives in time to raise it at our conference in Victoria next January. I think that with groups like yours and the Cattlemen's Association raising the matter our government will be behind our efforts.

s.22

I am pretty sure the plastic deer browsing cones will be picked up and reused on another plantation.

Subject: FW: Water License s.22

Hi Tristan,

Apologies for the lengthy email thread, but I wasn't sure how much info you needed for this.

This is a complaint from one of our constituents which he has asked me to escalate to the Minister's office. s.22 has been waiting a year for the apportionment of a water license. He is completely fed up with the long wait and wants to make sure that Minister is aware of how unacceptably long the wait time is for the office in Cranbrook to get this kind of task done.

You and I last spoke about this in August, when he first came to our office with this issue. Nothing has progressed since then, and he is really losing patience with it.

Is there anything that can be done to finally have his issue dealt with?
Can your office provide a response addressing the lengthy wait time?

I will be away from the office all next week in Victoria at the CA conference, so I was hoping you could get the ball rolling on this in my absence. I'll follow up with you during the week of Nov. 13th when I return, but feel free to have staff respond to him directly in the mean if that is appropriate.

Kind regards,
Angelika Brunner, Constituency Assistant

Subject: RE: Water License s.22

Hi Angelika

I am again doing a follow-up on our initial request for the water license apportionment to be registered as per Water Allocation Technician Mr. Sturdy's letter of November 6, 1995. (attached) This should have been done in 1995 as indicated in Mr. Sturdy's letter of commitment.

We discovered in December of 2017 that the apportionment was not done.
On December 8, 2017 we contacted the Water Stewardship Branch in Cranbrook requesting that the apportionment be completed and registered as per Mr. Sturdy's letter.

The response we received from the Section Head of the Water Stewardship Branch was that it will be addressed when resources allow.

It has been 23 years since the initial commitment was made to apportion the water license and almost 1 year since the request to complete the apportionment.

This type of oversight and response to correct the oversight should be and is unacceptable in level of Government including the current Provincial Government.

Therefore I am again requesting our MLA's involvement to have this apportionment completed and registered as per Mr. Sturdy's letter.

Thank you for your attention to this matter.

Subject: RE: Water License s.22

Thanks for your help Angelika.

Obviously I am not too happy about the length of time it is taking them to finalize the water license, (8 months and still not done) so if they are that short staffed is there something I can do as Local government to bring the lack of adequate staffing levels in the Water Stewardship Division at the Cranbrook Office. It would appear to me that I am not the only one that is subjected to long wait times therefore the Minister should be made aware that there is a problem with staffing levels in the Canbrook office and hopefully he can resolve the problem, maybe Katrine can bring it to his attention.

Thanks

Subject: RE: Water License s.22

Hi s.22

I received an update from the Ministry today. They have explored the reasons for the delay and it is truly a case of available resources. The team in Cranbrook that you have been dealing with has limited resources and have had to prioritize a lot of urgent issues that involve public safety, and therefore unfortunately have not been able to address your concerns in a timely manner.

I have checked that they have all the information on their files that they need, and indeed they do. They ask for your continued patience as they work on their backlog. They will be contacting you as soon as they are able to. They have not been able to give us an estimated timeline.

It looks like there is nothing we can do to speed this up for you. I would suggest sending them some regular reminders so that they know to keep you as far up the priority list as possible.

Kind regards,
Angelika Brunner, Constituency Assistant

Subject: Water License s.22

Hello Tracy

This is a follow-up on my phone message of Dec 8, 2017. In our process of Estate Planning we have noticed that the water license for s.22 was not apportioned to s.22 s.22

I am attaching a scanned copy of the November 6, 1995 letter from Robin Sturdy Water Allocation Technician indicating how he was going to proceed and apportion the water license, apparently this was not done.

Would appreciate if this can be corrected and done as per Mr. Sturdy's letter of November 6, 1995.

My spouse s.22 is 1/3 owner of s.22 and would like to ensure that the property has the appropriate water rights to s.22 as apportioned by Mr. Sturdy.

I am attaching a scanned copy of the 2017 Property Tax Notice with her current address so once the adjustment is made to the water license she would then be able to receive the billing notice for the water license, which I understand will be due in early 2018.

We can be reached at s.22 for any additional information.

Thank you for your attention to this matter.

Subject: Recreational Use Cabin

Good afternoon - It has come to my attention that a cabin that was built on Timberwest land and in an area where an agreement is in place between the Mid Island Snow Blazers and Timberwest for use of the land has been scheduled for removal this weekend. In addition, I understand that another cabin that I'm told had been there for over 10 years, has already been partially removed. Both cabins are near but not in Strathcona Park, however, we have been told by Park Ranger James Godfrey that it is the Parks departement that are taking the cabins down.

I am writing you today to ask that you please intervene in order to delay the removal long enough that we can get stakeholders together to discuss the issue. Cabins in these areas are crucial to the safety and survival of people that use and love our BC backcountry; in fact there was a story on the news just yesterday that mentioned a worker from Mt. Washington getting lost. That same news story mentioned that there was a total of 8 people who were lost in the park recently. These cabins are not in the park, but they are near. They are well kept and could save someone's life one day.

I appreciate your attention to this matter.

Cheers and thanks again,

Subject: Logging the Skagit

Mr Kahlon,

You are my MLA.

I was shocked yesterday to learn that BC Timber Sales has granted rights to log part of the Skagit River Watershed. This watershed was formally protected in 1984 and its stewardship given to the Skagit Environmental Endowment Commission. This cooperation between BC and Seattle was established to forever protect the pristine watershed of the Skagit River which originates in Manning Park. To allow logging in this watershed destroys this trust and, if allowed to proceed, will degrade the Skagit Valley and its river. It cannot be allowed to proceed!

If you have not already done so, please review the following article in the Vancouver Sun

https://vancouversun.com/opinion/op-ed/ken-farquharson-and-tom-perry-horgan-should-cancel-logging-plans-for-skagit-valley

I consider this to be very urgent.

Can you help?

Subject: FW: Recreational Use Cabin

Hi Reamick,

I think Fred may be sending this to you as well. I don't think this has anything to do with FLNRORD because it is an agreement between parties on private land. The Park Ranger involvement is why I am sending this along to you.

Tristan

To: Trevena.MLA, Claire <Claire.Trevena.MLA@leg.bc.ca>
Subject: Recreational Use Cabin

Good afternoon - It has come to my attention that a cabin that was built on Timberwest land and in an area where an agreement is in place between the Mid Island Snow Blazers and Timberwest for use of the land has been scheduled for removal this weekend. In addition, I understand that another cabin that I'm told had been there for over 10 years, has already been partially removed. Both cabins are near but not in Strathcona Park, however, we have been told by Park Ranger James Godfrey that it is the Parks departement that are taking the cabins down.

I am writing you today to ask that you please intervene in order to delay the removal long enough that we can get stakeholders together to discuss the issue. Cabins in these areas are crucial to the safety and survival of people that use and love our BC backcountry; in fact there was a story on the news just yesterday that mentioned a worker from Mt. Washington getting lost. That same news story mentioned that there was a total of 8 people who were lost in the park recently. These cabins are not in the park, but they are near. They are well kept and could save someone's life one day.

I appreciate your attention to this matter.

Cheers and thanks again,

Dear sir,

I just received my notice of legal requirement for a ground water licence. I own a small farm s.22
s.22
Now, apparently, for no good reason that I can see, I will have to ask your government's permission, and apparently, pay rent to use water from a well that was drilled with private capital 60 years ago and has served three families with no problems for that time. This would apply to every small struggling farm in your constituency (and there are many) and add one more financial burden on an already struggling community. While I see advantages in regulating water flow for large industrial users such as mines and pulp mills it is nothing more than an added tax burden on the small commercial business owner.

I would like to see you stand up for the small farmer and business owner.

Subject: RE: Hunting Regulations Question
Date: Thursday, November 8, 2018 3:20:27 PM
Attachments: image001.png
image003.png

Hi Kirsty,

I hope you well as we descend into the short winter days!

Here is more information regarding the imposition of the ATV ban.

The hunting area that your constituent references was impacted heavily by the 2017 Elephant Hill fire. With moose populations already declining in this management zone, steps need to be taken immediately to protect wildlife and ensure healthy moose populations in the future

In the long-term wildlife benefit from wildfire; however, in the short-term there can be negative impacts. For example, wildfires in the Thompson and Cariboo regions have enabled motor vehicle access by hunters to remote moose and mule deer habitats that were previously only accessible by foot. In addition, loss of vegetation from fires has significantly increased lines of sight for hunters.

To address the increased vulnerability of wildlife to hunters, two motor vehicle restrictions are being implemented under the Wildlife Act:

- ATV for Hunting Restrictions in M.U. 3-28, 3-29 and 3-30 and that portion of M.U. 3 -17 North of Highway 99. Click here to see Map
- Motor Vehicle Hunting Restrictions, except designated roads, within portions of M.U. 5-4, 5-13 and 5-14. Click here to see Map

The restrictions are expected to be in place until access and visibility conditions return to a state where wildlife is less vulnerable. These new restrictions do not apply to First Nations exercising aboriginal rights to hunt.

The restrictions are immediate and government will monitor their effectiveness. Dependent on the review, further hunting restrictions may be implemented.

I hope this information helps.

All the best,

Tristan

Subject: Hunting Regulations Question

Hi Tristan

I hope you are well?

I have received an enquiry from a constituent – but not sure whether this is FLNRO or MoE??

Received a call from a constituent in s.22 who is extremely unhappy that Areas, 3-28, 3-29 & 3-30 are being closed for ATV access for hunting in the new regulations. The constituent states that the 3 areas covers almost 7000 Sq km of land - he says it is impossible for someone like himself (s.22 s.22) to go and hunt on foot in those areas, and then carry a deer/moose out without an ATV – highlighted section from the new hunting regs – pg43 – show the details:

ATV for Hunting Closed Areas: The operation of all ATVs to hunt wildlife, transport wildlife, transport equipment and supplies which are intended for or in support of hunting, or transport hunters to and from the location of wildlife is prohibited in that portion of MU 3-17 north of Hwy 99 and MUs 3-28, 3-29 and 3-30 from September 1 to December 10.

The constituent is hoping to find out what has prompted these closures?

Thanks

Kirsty

Date:	Thursday, November 8, 2018 4:37:06 PM

Hello s.22

I wanted to let you know that I have sent your suggestion on to the Fish and Aquatic Habitat Branch. Although this is more of a DFO issue, I know they work closely with their provincial counterparts because of their overlapping jurisdictions. I will ensure that Doug is also aware of your advocacy regarding Pound nets as a selective fishing alternative.

For your information, The BC Wildlife Federation is also interested in reviving traditional selective First Nations fishing methods such as Pound nets. They are hosting a forum in the lower mainland in Feb/March with regards to fishing practices in the Lower Fraser specifically. However, I thought you might want to reach out to them with regards to your thoughts about the Skeena and how best to partner and advocate for different selective fishing methods.

Please let me know if I can assist in any way.

All the best,

Tristan Jones

Dear Doug.
s.22 here.
I want to urge you to look into and to move towards bringing the commercial fishing technique known as Pound traps to the attention of those fisheries managers, both provincial and federal, that can take steps to look into and implement this kind of selective fishing technology into the Fraser, Skeena and other British Columbia mixed stock fisheries.
It is essential that we find a new tool, besides indiscriminate 18th century technology gill nets, to harvest our salmon stocks in a selective manner. Every one will benefit then right? More fish for the commercial sector and more fish for the sports sector, and more fish for ecology of our wild salmon watersheds; something that is essential to the well being our our wild salmon river systems.
You know well, being a resident of the Skeena watershed, just how pressing this issue is here

and on the Fraser river as well.
Please help our salmon stocks in this regard.
Thank you.

Date: Friday, November 9, 2018 10:24:53 AM
Importance: High

Hi Danika,

An update from staff:

Some info on the BC Hydro hookup at Telegraph Creek. Dease Lake Emergency Operation Centre has a call with BC Hydro at 1pm today (Nov. 9) about hooking up the modulars, 2 homes without power, and other items. I've asked staff to provide an update following that call.

Issue of hydro hook up at Telegraph Creek is one of capacity and priorities for BC Hydro crews. Delays in authorizations and the physical work may be causing the concern from residents, since the modular homes are now in place. Inspection and approval is needed for hydro to hook up to the 8 modular homes. Hydro also has a project to provide hook up to the temporary camp to house the 100 + cleaners that are washing and painting the existing homes. This involved the potential installation of 15 hydro poles.

I'll get back to you with update as soon as possible.

Tristan

Hi Tristan –

Some info on the BC Hydro hookup at Telegraph Creek. Dease Lake Emergency Operation Centre has a call with BC Hydro at 1pm today (Nov. 9) about hooking up the modulars, 2 homes without power, and other items. I've asked staff to provide an update following that call.

Issue of hydro hook up at Telegraph Creek is one of capacity and priorities for BC Hydro crews. Delays in authorizations and the physical work may be causing the concern from residents, since the modular homes are now in place. Inspection and approval is needed for hydro to hook up to the 8 modular homes. Hydro also has a project to provide hook up to the temporary camp to house the 100 + cleaners that are washing and painting the existing homes. This involved the potential installation of 15 hydro poles.

The primary projects that support short-term housing needs and to replace destroyed and damaged infrastructure include:

- Remediation of the housing site - substantially completed
- Repairs and completion of construction on 3 homes at Telegraph Creek
- Placement of 8 modular homes in Telegraph Creek – well underway. First entry of residents back into Telegraph Creek is planned to start by November 15 with completion by December 16.
- Refurbishment of 17 homes held by the Stikine Housing Society in Dease Lake – nearly complete.
- 15 units of portable housing for individuals with lifestyle related challenges at People's Haven in Dease Lake
- Cleaning of smoke affected existing housing by the insurer, involving a team of 20 or more workers that are on site now.
- In the longer term, 27 additional permanent homes are to be constructed in 2019 – 20 to deal with losses due to wildfire and the waiting list for the reserve community.

Note: FLNR does not have a direct role in the funding or coordination of the housing projects for Telegraph Creek. Support for infrastructure projects primarily comes from the Tahltan's insurers or their own resources, EMBC and Indigenous Services Canada. We facilitate community recovery planning and work on providing general support and communications in insuring all aspects of

recovery are being addressed by relevant agencies.

Sent: Thursday, November 8, 2018 3:12 PM
To: Jones, Tristan FLNR:EX
Subject: Right to Roam bills

Hi Tristan,

MLA Weaver has introduced a Private Members' Bill on the right to roam twice. The first time was February 27, 2017, and the second was November 8, 2017.

From the Progress of Bills table for each session, it looks like both times the bill was introduced at First Reading and didn't progress beyond that point:

Progress of Bills – 40th Parliament, 6th Session (Spring 2017) – See Bill M 223

Progress of Bills – 41st Parliament, 2nd Session (Fall 2017) – See Bill M 209

Text of the bills themselves is available here:
Bill M 223
Bill M 209

And the text of the introductions in the House for both bills is also available online:
Hansard transcript – Bill M 223 (page 13833)
Hansard transcript – Bill M 209

Unfortunately beyond this information, there doesn't appear to be any public indication of whether or not the bill will be re-introduced, or whether it is being considered by the government. I've scanned the news and haven't found any mention of an upcoming bill by MLA Weaver regarding the right to roam.

I'm sorry I wasn't able to be of more help on this one, but if I can help with anything further, please let me know.

Best,
Andrea

Subject: FW: Placer miners
Date: Friday, November 9, 2018 12:36:51 PM

Julie,

See from staff below – what is the status of your correspondence with s.22

Hey Tristan –

You may have already received this via ENV MO, but I just received so sending along just in case... I think the crux of it is in the highlighted bullets, Atlin Placer Miners have the opportunity right now to have their concerns heard, and a decision will not be made until consultation is complete and full analysis is done. Give me a call if you have any updates for me on this.

Emily

- The Placer Mining Waste Control Regulation (PMWCR) under the Environmental Management Act (EMA) is under review; it has been 29 years since the regulation first came into effect in 1989
- The review is taking place in response to environmental impacts from this activity and the uneven playing field that is in place vis-a-vis other similar activities due to out-dated, geographically restricted, exemptions.
- EMPR is the lead on mining activities which require a permit under the Mines Act and has been the lead on all consultation activities related to proposed regulatory changes associated with the regulation.
- Consultation on the proposed changes took place as follows:
    - January 2018 Round Up
    - July 2018 Regulatory Proposal and request for info distributed
    - July 2018 stakeholder meeting
    - August 2018 stakeholder meeting
- Currently ENV is waiting for voluntary written responses back from individual industrial stakeholders who have mines permits in the Atlin area (timeline for responses has been extended to December 2018).
- In addition, government released a policy intentions paper related to the Water Sustainability Act which proposes to make permanent provisions for water use under regulation by mineral explorers and small scale placer miners.
- Specific consultation regarding the *Water Sustainability Act* outlined below:
    - The BC Association of Mineral Exploration and the Cariboo Mining Association (placer mining) were engaged in the development of the intentions paper.

- Public, First Nations and sector engagement on the draft intentions paper to be released October 9 – Nov 26, 2018.
- The policy intentions paper is in the process of being mailed to First Nations.

- Government will decide on the outcome of both of these initiatives once consultation is completed and a full analysis of results has been undertaken.

Re: Meeting Request – November 20th, 2018

Dear Minister Donaldson,

Mortgage Professionals Canada (MPC) is the national mortgage industry association representing 11,500 individuals and over 1,000 companies. MPC interacts with governments, regulators, media, and consumers across Canada on behalf of its members, which include mortgage brokerages, lenders, mortgage insurers, and industry service providers.

The mortgage broker channel we represent originates more than 35% of all mortgages in Canada and 55% of mortgages for first-time homebuyers. This represents approximately $80 billion dollars in annual economic activity. Together with our members, we are dedicated to maintaining a high standard of industry ethics, consumer

protection, and best practices. With our diverse and strong national membership, MPC is uniquely positioned to speak to issues impacting all aspects of the mortgage origination process.

Mortgage Professionals Canada will be in Victoria on November 20th and would like to schedule a meeting with you to discuss the housing and mortgage market both in your riding and across British Columbia.

The issues of housing affordability, availability, and accessibility remain of utmost importance to British Columbians, especially to first-time homebuyers. We welcome the opportunity to discuss how recent legislative changes are impacting homeownership in your riding.

Please contact Michael Hutchison at mortgageproscan@impactcanada.com <mailto:mortgageproscan@impactcanada.com> or 647-317-9057 at your earliest convenience to confirm your meeting.

Sincerely,

Paul Taylor
President and CEO
Mortgage Professionals Canada

Subject: Follow up on conservancy proposal for Mary Lake property

November 6, 2018

Honourable Doug Donaldson

Minister of Forests, Lands, Natural Resource

Operations and Rural Development

Parliament Buildings

Victoria, British Columbia V8V 1X4

Dear Minister, Donaldson

I am contacting you on the recommendation of Bruce Fogg, Executive Assistant (Constituency) for Premier John Horgan, as a follow up to the Greater Victoria Greenbelt Society's proposal for the conservancy of the Mary Lake Nature Sanctuary lands and waters in the Capital Regional District.

In our meeting Premier Horgan expressed interest in supporting the project and bringing it to your attention. We have been instructed to set up a meeting with you to discuss our proposal. (see attached)

We are looking forward to the opportunity to discuss with you the continued protection of these special riparian areas, red-listed species and watershed for future generations.

Sincerely,

Koi Neah - Vice Chair

Date: Friday, November 9, 2018 2:22:10 PM

Yes, they can be same cliff. You can close the log as I have spoken with C3 – Claire Perruse indicating MDD is not available to meet with Skeena resources until the new year – perhaps Resource Forum in PG or AME, however have not guaranteed anything. They will send new request closer to those events.

Tristan

Hi Tristan,
Further to the questions the organizing committee sent, here is information the Minister may be interested in regarding the two Business Areas. It is the 5th joint staff meeting between the Babine and Skeena Business Areas which includes BC Timber Sales staff from Terrace, Hazelton, Smithers, Houston, and Burns Lake.
We look forward to seeing the Minister next week.
Thanks.

Hello Tristan,

There is a group of residents in Genoa Bay who are concerned about the water quality and quantity provided to them by a private water service located near/on Mount Tzouhalem. I'm wondering if FLNRORD has any information about the water service provider, any permits they have been issued, and if there is anything the province can do to help this community get better access to water.

Thank you,

To: Jones, Tristan FLNR:EX
Subject: Placer miners

Hey Tristan –

You may have already received this via ENV MO, but I just received so sending along just in case... I think the crux of it is in the highlighted bullets, Atlin Placer Miners have the opportunity right now to have their concerns heard, and a decision will not be made until consultation is complete and full analysis is done. Give me a call if you have any updates for me on this.

Emily

- The Placer Mining Waste Control Regulation (PMWCR) under the Environmental Management Act (EMA) is under review; it has been 29 years since the regulation first came into effect in 1989
- The review is taking place in response to environmental impacts from this activity and the uneven playing field that is in place vis-a-vis other similar activities due to out-dated, geographically restricted, exemptions.
- EMPR is the lead on mining activities which require a permit under the Mines Act and has been the lead on all consultation activities related to proposed regulatory changes associated with the regulation.
- Consultation on the proposed changes took place as follows:
    - January 2018 Round Up
    - July 2018 Regulatory Proposal and request for info distributed
    - July 2018 stakeholder meeting
    - August 2018 stakeholder meeting
- Currently ENV is waiting for voluntary written responses back from individual industrial stakeholders who have mines permits in the Atlin area (timeline for responses has been extended to December 2018).
- In addition, government released a policy intentions paper related to the Water

Sustainability Act which proposes to make permanent provisions for water use under regulation by mineral explorers and small scale placer miners.

- Specific consultation regarding the *Water Sustainability Act* outlined below:
  - The BC Association of Mineral Exploration and the Cariboo Mining Association (placer mining) were engaged in the development of the intentions paper.
  - Public, First Nations and sector engagement on the draft intentions paper to be released October 9 – Nov 26, 2018.
  - The policy intentions paper is in the process of being mailed to First Nations.
- Government will decide on the outcome of both of these initiatives once consultation is completed and a full analysis of results has been undertaken.

Subject: FW: Shellfish Application - Texada Island

Hi Rob,

Here is some more information from staff. Looks like still some uncertainty around extended public consultation.

- All aquaculture applications are required to be advertised in local papers and are posted online on FLNRORD's Applications and Reasons for Decision web page. Comments are usually received for 30 days. [note: this process has recently changed]
- The posting in the local paper for this application occurred the week of August 8, 2018 and the public comment period for this application was open until September 6, 2018.
- The application was also sent to the qathet Regional District (in Powell River) for review and comments. They submitted comments on September 28 and recommended that the public consultation period be extended and that the applicant be required to host a public meeting on Texada.
- The operational policy for aquaculture provides for FLNRORD to require an open house; however, this is rarely required for shellfish applications and the determination has not yet been made for this application.

Tristan

Tristan,

Quick follow up question – will there be a public consultation re: this project or only with the folks affected?

Hi Rob,

Here is some info from staff.

Tristan

Some info from South Coast staff re: shellfish application on Texada Island.

- **Is there currently a proposal for a shellfish farm on the Northeast Bay of Texada Island in Powell River?**
  -Yes. An application for a new license of occupation for shellfish aquaculture at Northeast Bay, Texada Island is being reviewed under Crown land file 1414717

- **Is yes, what is the status of it and the granting of the tenures?**
  -The application has been accepted by FrontCounterBC and referrals have gone out to affected agencies and local government; as well, engagement letters have been sent to First Nations whose asserted territory the application site is located in. First Nation consultation is on-going, the application review is in the early, preliminary stages and formal recommendations have not yet been developed for consideration by the Decision Maker.

Hi,

A bit more info on this. It is an isolated small hamlet (approx. 30 houses) at the end of a point east of Duncan in the Cowichan Valley Regional District.

I think the only thing here we can help them with is the permit info as it is the CVRD that provides the other authorizations. Right?

If there is somewhere I can find permit info myself let me know. If not, can you assist?

Thanks,
Tristan

Subject: Genoa Water Supply

Hello Tristan,

There is a group of residents in Genoa Bay who are concerned about the water quality and quantity provided to them by a private water service located near/on Mount Tzouhalem. I'm wondering if FLNRORD has any information about the water service provider, any permits they have been issued, and if there is anything the province can do to help this community get better access to water.

Thank you,

Subject: The "Hardway" road de-activation

Hi Tristan,
We have been hearing about the de-activation of a frequently used road here south of Revelstoke, referred to as the "Hardway". Today, Doug's office has been cc'd on an email to Minister Donaldson from the local Rod and Gun club about this issue.
Can you provide some information about this situation?
-What is the classification of this road?
-Who has been maintaining this road?
-Is de-activation scheduled for this road? If so, when will that take place?
-If so, what has prompted the scheduled de-activation?
-Is there any opportunity for a private (commercial) or a volunteer entity to repair and maintain this road instead of it being de-activated?

We are hoping to educate ourselves with facts surrounding this situation. There has been a lot of hearsay but I would like to be able to provide the correct information when people ask.

Thanks in advance,

Subject: RE: Doug"s Visit
Date: Tuesday, November 13, 2018 1:52:17 PM
Attachments: image001.png

Hi Richard,

You can introduce him as the Honourable Doug Donaldson, Minister of Forests, Lands, Natural Resource Operations and Rural Development (honestly the name of the Ministry is the hardest to flow off the tongue – believe me!)

Here's his Bio if you want to use any of it.

Doug Donaldson was elected as MLA for Stikine in 2009 and re-elected in 2013 and 2017. Doug served as the Official Opposition spokesperson for Energy, Mines and Petroleum Resources and Children and Family Development.
He was sworn in as Minister of FLNRORD 10 days into the provincial state of emergency in the summer of 2017.
Prior to becoming an MLA, Doug worked for Storytellers' Foundation, a non-profit organization focusing on community economic development in the region including local food action initiatives. His previous work in Stikine included jobs in forestry, tourism, education, communications and journalism. He has worked as a biologist with a forestry consulting business, as a reporter and columnist with a weekly newspaper, communications director with the Gitxsan Treaty Office, coordinator of the cultural tourism program at Northwest Community College, and instructor with the Gitxsan Wet'suwet'en Education Society. He has also owned and operated businesses in the B.C. Rockies.
Doug's many years in the northwest included living in Smithers and Telkwa before settling in Two Mile where he was a four-term municipal councillor for Hazelton. He has travelled extensively throughout the Stikine constituency which overlays the traditional territories of seven First Nations.
Doug is married and has two adult sons, a daughter-in-law and 2 grand-daughters. He enjoys skiing, hiking, running and tending to his chickens, turkeys, sheep and llamas. His formal education includes an undergraduate degree in biology and a master's degree in journalism.

Hope this helps!
Tristan

Subject: FW: Information on Snowmobile Closure for Sproatt Mountain

Tim –

Information for you to respond to MLA Sturdy's Office with

Background

- RST has been working with the snowmobile organizations and other stakeholders for the past 7 years to manage use of the 21 Mile/Rainbow Lake watershed.
- The 21 Mile/Rainbow Lake water has been designated non-motorized. The designation is supported by the LRMP, Resort Municipality of Whistler, RMOW Watershed Protection Plan and the public health agency.
- The 21 Mile/Rainbow Lake area is also a valued non-motorized backcountry skiing area
- Despite numerous attempts and management actions intended to limit snowmobile incursions into the watershed from the adjacent snowmobiling area, non-compliance with the closure continues.

-

Subject: Information on Snowmobile Closure for Sproatt Mountain

Hello John

A constituent who operates a snowmobile and power sports retail store in Squamish is concerned about the closure of Sproatt Mountain in Whistler to snowmobiles.

Can you provide some background on the decision and any consultations that may have taken place.

Before I respond to the constituent I'd like to understand the decision made and the rationale and provide these to Jordan as well for his information.

Thank you in advance John, I realize that this enquiry is a small part of the bigger recreation capacity issue, non-motorized versus motorized uses, etc. and that your team is working to address concerns around this complex topic.

Regards
Nicola

Subject: abandonned horses on Holmes Road near Fort Steele

Hello Shawna Larade,

A couple of weeks ago I phoned you regarding 21 horses that were dumped at Lakit Lake and found their way onto s.22 and mentioned that gates were all open to the highway as cattle were gone as of Oct 15th.

The owner s.22) did phone me two weeks ago and said that he'd get them picked up

right away. Two days ago, they were once again in my yard eating my hay that I need for my animals. THIS IS BULLSHIT! Why does the government have no power / clout? Why does this go on? s.22 had one in her yard that looked emaciated. She called the SPCA & they called the brand inspector but she was told there is nothing they can do. s.22 s.22 that someone has been allowed to just dump 21 horses out because he is too cheap to feed them properly. If he can do that then maybe I should too. I have ten animals. It is a rag tag bunch of horses (and one mule) .... Two of mine are worth more than all of them put together! I do not want them coming nose to nose with my animals over the barbed wire fence because of potential for injury and potential for disease or parasite transmission. I doubt very much that those 21 horses are up to date with their inoculations. Some look in rough shape. It is stupid to assume that hunters are going to shut the gates after October 15th. No gates should be closed after Oct 15th. I like to drive my team and gates are a real nuisance. I will always leave them open after Oct 15th as it is risky to leave the team unattended while dealing with gates. As of today, all gates are all open and it is possible for the abandoned horses to get onto the highway should they be unlucky enough to do that ... not that s.22 isn't bad enough (speed limit 80 vs 100). No one wants to see a horse harmed but it seems like that is the only thing that might get the government's attention.

For us (and my neighbours it is a big irritation because we have to keep our private property gates shut all the time now in case they come back. Each time they were on my property they ate about $100 worth of hay. They are very hungry. There is hardly any grass left on Crown Land after the cows grazed it down. What little grass that is left should be for the elk and deer. Having a guide licence should not entitle someone to free grazing wherever they like.... espcially not for 21 horses! I believe the spirit of the grazing thing was to allow a guide to graze his animals near his high cabins, not where ever he feels like it and especially not down where people live. His "territory" stretches from s.22 Surely there is better grazing elsewhere. I hear that this is not the first year he has done this. In the past (hearsay) I was told that he received a $150 fine for the same thing done up the St Mary river area. He has saved approximately $300 per head by having them dumped out here for the last two months. The fine should be more than $6000 otherwise it is cheaper for him to pay the fine rather than pay for good feed.

As I write this, they are at my front gate again trying to get in. The government has to show some leadership here. This must not happen again next year or I will have to spend money on legal fees. There's no point in phoning the owner ... you cannot believe what he says. These horses should be rounded up, vet checked and either sold / adopted out to caring people or given back to the owner only after he pays the bill.

Please respond to let me know what you (ie the government) plan to do about this.

Hi all –

Would it be possible to have some details/dates of when this decision was communicated to s.22 s.22 , and follow up conversations with him?

Nothing too detailed is needed, just who called him and when. He is continuing to insist to his MLA's office that he has not heard back from staff about his file.

Thanks

Emily

Hi Tristan,

Here's a news snippet, "“We’ve initiated a two-year study to look at the impacts of herbicide spraying on feed and moose forage and nutritional quality of moose forage,” Donaldson said. “We anticipate the preliminary results will be available in 2019, and we look forward to implementing that research, based on scientific evidence.”

Are you able to refer me to details about the study?

Thanks very much!

Good morning Tristan.

Regarding the below email, I do believe that this area is private forested land, owned by TimberWest. As an aside, I have heard rumours that TimberWest has closed their logging roads to hunting, but as I said, they are rumours. I cannot confirm one way or the other.

The roads and areas this gentleman is speaking of are as follows:

He drove up Strathcona Parkway to Mount Washington (which is a public, paved road to the local ski hill). The roads he is specifically speaking of are Cougar Main Logging Road, and Duncan Bay Main Logging Road.

I'm hoping you can confirm that in fact these roads are in fact in PFL.

Thanks Tristan, and regards,

Leanne

Sent: Thursday, May 3, 2018 1:47 PM
To: Jones, Tristan FLNR:EX
Subject: Re: Contractor Sustainability Report

Tristan,

Thank you for the update, we will look for the press release since our level is probably not going to be included in the briefing. The timing of the release is after the ILA week-end which is interesting as this report is on the minds of many contractors in this province and would have been easily shared at this weekends convention.

If you have any future information on this issue, could you please update as as it would certainly be appreciated as this is our livelihood and a positive change for contractors is needed. Too many contractors are taking their equipment to auction and not enough people are attracted to working in this industry for the simple reason that the rates are not there.

Shari

Subject: Contractor Sustainability Report

Shari,

Thank you for taking the time to speak with me this morning.

Not every person who participated in the review process will be included in a briefing, however relevant forestry organizations and associations are scheduled to be briefed on the report and its recommendations next week. A press release will follow (probably mid to end of next week) outlining the recommendations and government's response and process for follow through.

I understand you will be away. But, if when you return, you have any questions. Please don't hesitate to contact me. I am based in Smithers.

All the best,

Tristan Jones
Executive Assistant to the
Honourable Doug Donaldson
Minister of Forests, Lands, Natural Resource Operations and Rural Development

Hi Tristan,

Yes if you could contact Bill directly as soon as the Minister/plane lands then they can head out. They will either fly out tonight or drive tomorrow but we are leaning towards flying. Thanks for your help with this.

HI Jennifer,

The Minister's plans have changed and he will hopefully fly in this evening. Weather looks pretty favourable so far, so hopefully his plane will land at approx. 7:30 pm.

Looks like we are expecting about 5cm of snow here tomorrow morning, so the roads could be a bit dicey as it's right around the freezing level.

I can call Mr. Kordyban tonight to let him know if the Minister has arrived. I have his cell #. Would this work?

Let me know.

Thank you,

Tristan Jones

Subject: Meeting with Minister Donaldson - November 15

Good morning Tristan,

I am writing to you on behalf of Bill Kordyban and his upcoming meeting tomorrow at 11:00 am with Minister Donaldson. Our pilot has raised some concerns about the flight to Smithers tomorrow as the weather is not looking great so Bill would like me to check with you on when the Minister would be arriving in Smithers. Will he be arriving on a commercial flight? You had mentioned on booking this meeting that this was weather permitting, would you know in advance if it would be cancelled? If you could let me know then Bill can plan to drive as opposed to flying.

Subject: FW: The "Hardway" road de-activation
Date: Wednesday, November 14, 2018 12:10:40 PM
Attachments: image001.png

Hi Stacey,

Here is some information from staff:

Some info on the Harding road deactivation south of Revelstoke.

- What is the classification of this road?
  This is a non-status road.
- Who has been maintaining this road?
  Due to the road classification - nobody is currently authorized to maintain. Government has not maintained ever.
- Is de-activation scheduled for this road? If so, when will that take place**?**
  It will likely be deactivated, pending funding. We are getting a geotech prescription. No timeframe has been established. We will be sending referrals to local landowners and clubs to further discuss potential use of the road for some limited activities.
- What has prompted the de-activation?
  Inspections have found that the road is unsafe as it is extremely steep, and there is no way to make it meet safe road specifications.
- Is there any opportunity for a private (commercial) or a volunteer entity to repair and maintain this road instead of it being de-activated?
  We do not believe the road can be made to meet safe engineering specifications. The volunteer group could engage a professional engineer to get recommendations on what could be done and how much it would cost. There is an alternate route that is maintained and safe, that is greater in distance but only slightly longer in travel time.

We encourage any of the local groups to contact the local Revelstoke district contact – Kurt Huettmeyer 250 827 7609 for further details.

Hope this helps,
Tristan

Subject: The "Hardway" road de-activation

Hi Tristan,
We have been hearing about the de-activation of a frequently used road here south of Revelstoke, referred to as the “Hardway”. Today, Doug’s office has been cc’d on an email to Minister Donaldson from the local Rod and Gun club about this issue.

Can you provide some information about this situation?
-What is the classification of this road?
-Who has been maintaining this road?
-Is de-activation scheduled for this road? If so, when will that take place?
-If so, what has prompted the scheduled de-activation?
-Is there any opportunity for a private (commercial) or a volunteer entity to repair and maintain this road instead of it being de-activated?

We are hoping to educate ourselves with facts surrounding this situation. There has been a lot of hearsay but I would like to be able to provide the correct information when people ask.

Thanks in advance,

Hello MLA Rice,

FLNRORD is bringing forward exemption extension orders to Cabinet and we're aiming for a December 5 Cabinet date. The OICs will impact your constituency. We require confirmation of your support by November 25th. I've highlighted some of the rationale below:

- This OIC was extended by six months in June of this year to allow time for government to consider and consult with affected First Nations on possible changes to export policy and the configuration, terms and conditions of existing exemptions.
- This extension is required to incorporate what was learned during consultations with First Nations and with ongoing industry discussions intended to revitalize coast timber supply and manufacture.

Subject: FW: Telegraph Creek home replacements
Importance: High

Hi Danika,

An update from staff:

Some info on the BC Hydro hookup at Telegraph Creek. Dease Lake Emergency Operation Centre has a call with BC Hydro at 1pm today (Nov. 9) about hooking up the modulars, 2 homes without power, and other items. I've asked staff to provide an update following that call.

Issue of hydro hook up at Telegraph Creek is one of capacity and priorities for BC Hydro crews. Delays in authorizations and the physical work may be causing the concern from residents, since the modular homes are now in place. Inspection and approval is needed for hydro to hook up to the 8 modular homes. Hydro also has a project to provide hook up to the temporary camp to house the 100 + cleaners that are washing and painting the existing homes. This involved the potential installation of 15 hydro poles.

I'll get back to you with update as soon as possible.

From: Jones, Tristan FLNR:EX
To: Maguire, Maeve LASS:EX
Subject: FW: Resource officers in Duncan
Date: Thursday, November 15, 2018 9:12:51 AM

Morning Maeve,

To clarify my email below. On Vancouver Island, this is how Field Units are distributed:

- Nanaimo has a Field Unit with 4 NROs and a supervisor
- Port Alberni has a Filed Unit with 5 NROs and a supervisor
- Port McNeil has as Field Unit with 2 NROs and a supervisor
- Campbell River has a Field unit with 3 NROs and a supervisor

Until this recent decision to transfer the Duncan officers to Nanaimo. This was the only Field Unit that had separate locations.

I hope this helps.

Tristan

From: Jones, Tristan FLNR:EX
Sent: Wednesday, November 14, 2018 4:37 PM
To: Maguire, Maeve LASS:EX
Subject: FW: Resource officers in Duncan

Hello Maeve,

Here is a some information from staff regarding the NRO's transfer to Nanaimo:

All other South Island District NRO staff are located in Nanaimo. Our priority is to ensure all NROs are aligned with the FLNRORD's various departments by co-locating with these staff to provide effective enforcement across all business areas. This collaborative approach is crucial for successful natural resource protection and proper enforcement.

The Cowichan Valley is one of many important areas on Vancouver Island where our officers conduct inspections, investigations and carry out enforcement actions. This work is not restricted to the two NROs in Duncan. There will be four officers in Nanaimo that will have a presence in the Cowichan Valley ensuring no loss of service to the area.

I hope this helps.

Tristan

To: Maguire, Maeve LASS:EX
Subject: RE: Resource officers in Duncan

Maeve,

No apparently there are not strictly defined jurisdictions. There is an Duncan Field Office and a Nanaimo Field Office so they would respond as indicated previously.

To: Jones, Tristan FLNR:EX
Subject: Re: Resource officers in Duncan

HI Tristan,

I appreciate the response but unfortunately I don't understand the answer nor does it answer my question.

Is there nothing that indicates the jurisdiction in which each NRO in BC works?

Thank you,

Maeve

From: "Jones, Tristan FLNR:EX" <Tristan.Jones@gov.bc.ca>

To: Maeve Maguire <Maeve.Maguire@leg.bc.ca>
Subject: FW: Resource officers in Duncan

Hi Maeve,

Officers are organized in "field units" all across the province.

NROs closest to the area would respond. For places further away from field unit offices, they normally do a "project" and batch them together, then a team goes out to address them all at once.

It's not necessarily a mapped/clearly defined area, so much as the nearest field unit that responds.

Hope this helps.

Sent: Wednesday, November 14, 2018 8:32 AM
To: Routley.MLA, Douglas <Douglas.Routley.MLA@leg.bc.ca>
Subject: Report: Economic Impact Analysis of Caribou Management Decisions on HeliCat Canada Members

Dear Mr. Routley,

The helicopter and snowcat skiing industry is a valuable part of the economic and social landscape across rural British Columbia with close to $200 million per year in sales revenue. Although the industry has been directly involved in caribou conservation for decades, recent pressure to protect mountain caribou habitat may threaten the viability of this industry unless solutions unique to the sector are implemented.

In an attempt to quantify the potential impact of recent discussions between the governments of British Columbia and Canada to develop a Section 11 Conservation Agreement and an impending Section 80 Emergency Order, both under the Species at Risk Act (SARA), as well as an upcoming provincial mountain caribou recovery strategy and the development of a provincial Species at Risk Act, HeliCat Canada has completed the attached economic impact analysis.

The analysis concludes:

- Defined by federal government habitat mapping, 19 of 41 helicat operators have a portion of their tenure that overlaps with caribou habitat. These 19 businesses represent 64.2% of the sector's skier days and 24.6% of the total industry tenure area.

- Six businesses estimate they would not be able to operate and lose 100% of their current skier days if they lost access to caribou habitat.

- Five more operators would see a reduction in skier days and revenue to the point where the businesses may not remain viable.

- These losses total the following and do not include millions of dollars in infrastructure investment that has been made in lodges, radio repeaters, fuel caches, marketing, IT and training:

    - $55.2 million in revenue

    - $13.0 million in goods and services produced

    - $71.1 million in output

    - $35.1 million in GDP

    - 466 full-time equivalent jobs

    - $20.3 million in household income

    - $6.7 million in federal, provincial and local tax revenues

- 2018 data shows the helicat industry is growing at an average of 3.5% per year.

- 20 of the 41 helicat businesses are located within Columbia Basin communities.

With so much at risk, the helicat industry is concerned about its very viability and expert, and science-based decision-making is crucial to the sustainability of this important world-class product.

To read the full economic impact report, please see the attachment to this email. If you have any comments, please contact me.

Sincerely,

Ross Cloutier

To: Maurmann, Katja LASS:EX
Subject: RE: License of Tenure
Date: Thursday, November 15, 2018 3:29:40 PM

Hello Katja,

Here is an update from staff regarding the license of tenure application for Royal Astronomical Society of Canada Kelowna chapter:

Staff are currently adjudicating this file, and actively working with Guy Mackie (the main contact for the RASC) to submit information supporting the application. The application was submitted a considerable time ago, but fell low in the work priority matrix. This, coupled with resourcing challenges over the last few years, resulted in a delay before the file was examined closely.

Ben Sampogna was assigned to the file a few months back, and at that time determined that the management plan was information deficient, specifically with regard to justifying a need for the application area. At that time (Oct 10/18), Ben initiated contact with Mr. Mackie and explained what was needed. Since then (Nov 4/18) Ben has received a supplemental information package from Mr. Mackie which has not been reviewed yet.

Hope this helps.

Subject: RE: Fwd: RE: Lost Species Tag, Please refund client
Date: Friday, November 16, 2018 11:25:20 AM
Attachments: image001.png

Hi Laurie,

Here's a response from staff.

When asked to look into the mailing, staff discovered that this had been held at the BC Mail Office (Director is looking into why) for 5 days. While this shouldn't have affected the constituent's ability to hunt during the season, staff understand that this 5 day delay should not have occurred. As a result, staff in the Branch have decided they will issue the refund.

As an aside, we still don't know why it didn't reach the constituent after being mailed out. If a hunter's address has an error and their licenses could not be delivered, it is returned to our office as a RTS (Return to sender). Records show we have not received an RTS.

Staff also note that they offered the constituent a replacement license when he came in to FCBC, and he declined.

All the best,

Tristan

I'm wondering if you might know if there is an appeal process for situations like the below, where there may be some evidence of error and the client has been denied a refund? Thank you for any information you can provide.

Hi Michelle

I am hoping you can help me out? If you read the emails below you will see that I purchased on line on the ministry website, September 11th 2018 both a hunting licence and a white tail deer tag. The hunting licence I can only assume I received as it is a virtual licence and no paper copy exists, but the deer tag should have been mailed out to me as I must be in possession of it to hunt deer. As of today I have not received it. On October 9th 2018 I attended the Nelson office of front counter BC and requested a refund as I no longer had time to hunt. On October 30th I received the reply below denying my request.

Obviously the government has put in place a system that does not work and has denied me the opportunity to hunt deer this year as I had planned, and they take no responsibility for their poor performance.

Please have them refund the $25 dollars they billed my credit card for my nonexistent deer tag.

Good afternoon,

I am in receipt of the email below dated October 9, 2018 requesting you be issued a refund for your White-tailed Deer species licence which was purchased online on September 11, 2018. It's my understanding that the licence you purchased was not received in the mail, and that you declined a free replacement species licence "due to season being almost over".

While open-season dates vary across the province, there are many general open-season hunting opportunities for White-Tailed Deer, some as late as December 20, 2018. A refund will not be issued for the licence you purchased on September 11.

Please also be advised that, should you wish to hunt for the remainder of the licence year, regardless of the species, you must carry all of your species licences (cancelled and un-cancelled) at all times. If you wish to hunt for the remainder of the licence year, you will need to obtain a replacement species licence, please attend any FrontCounter BC or Service BC location to do so.

Thank you,

Sandra Marshall | Licence Action Officer | Wildlife and Habitat Branch | Ph: 778-698-9236| Sandra.Marshall@gov.bc.ca

Subject: Keremeos Creek in Olalla

Good afternoon,

I need local staff to contact a constituent regarding the possibility of dredging of Keremeos Creek in Olalla. There is a Mobile Home Park, Northside MHP, located at 2637 1st Street in Olalla that is near Keremeos Creek. It has flooded the last two years and the residents, some of whom have applied for DFA, and the owner has asked what is going to be done about flood mitigation in her area.
Her name is s.22 :. Her phone number is s.22 and her Email: s.22
The Regional District has told her that they are not involved in flood mitigation.
I believe that the area in question is on a flood plain but I am sure that local staff out of Penticton will know this area well. Can you two help me with who will be dealing with this area and what, if any mitigation will be being done?
Thanks very much!

To: Jones, Tristan FLNR:EX
Subject: MLA Support for Export OICs

Hey Tristan,
We're bringing forward the exemption extension orders to Cabinet and we're aiming for a December 5 Cabinet date. The OICs will impact the constituencies of Parliamentary Secretary Rice and Minister Trevena. I've highlighted some of the rationale below:

- This OIC was extended by six months in June of this year to allow time for government to consider and consult with affected First Nations on possible changes to export policy and the configuration, terms and conditions of existing exemptions.
- This extension is required to incorporate what was learned during consultations with First Nations and with ongoing industry discussions intended to revitalize coast timber supply and manufacture.

Northwest Interior:
North Coast, MLA, Jennifer Rice

North Coast District:
North Coast, MLA, Jennifer Rice

Mid-Coast:
North Coast, MLA, Jennifer Rice
North Island, MLA, Honourable Claire Trevena

Haida Gwaii:
North Coast, MLA, Jennifer Rice
Would you please reach out to their constituencies and confirm their support by Wednesday, November 25?

Attached are draft copies of the cabinet summary documents relating to these orders. Please let me know if there is any additional information that I can provide. I'd also be happy to connect with GCPE or the DMO if you require additional background material for briefing the MLAs.
Thanks,

Ryan Munroe

Hi Emily,

I think this is Front Counter, but for some reason my computer won't open the Archaeological Permit site?

Apparently, when Tal issued the stop work order he was not very forthcoming regarding the permitting process and timelines.

The closest Front Counter is more than 2 hours away, so not easy for him to visit to get further information.

Can you assist with process as I can't get into the site (maybe that's his problem too!?)

Thanks,
Tristan

Subject: Jai Singh - Archaeology Data Request

Hello Tristan,

Jai Singh has reached out to MLA Tegart for assistance. Jai is the owner of the Esso in Lillooet and plans to build a fast food restaurant on the abutting vacant lot, that he also owns.

On June 4, 2018 Jai completed an archaeology data request, and received the confirmation below. He did not hear back regarding his request so two months later he proceeded with application for a building permit which was issued on August 15, 2018. He started earthworks shortly after. On October 4, 2018 Tal Fisher, from the Heritage Division of FLNRO did a site visit, and issued a Temporary Protection Order (stop work order).

Tal Fisher also advised that Jai needed to apply for a Site Alteration Permit prior to continuing work. Jai would like to make application for the Site Alteration Permit but is unable to get any information about the application process (how to apply, how long will it take, etc).

Could you please provide information on that Site Alteration Permit Application process as soon as possible. Jai has contractors waiting to go back to work. Thank you!

Subject: FW: COMPLAINT -s.22 He lives in MLA Sonia Furstenau's riding
Date: Monday, November 19, 2018 2:15:59 PM
Attachments: image001.png

Hi Emily,

Please see below.

Not sure if the area in question is private or crown land, but I assume private lands are under the same IPMA rules?

If so, and the constituent is concerned that these rules may not have been adhered to, how would they lodge an official complaint which would trigger and investigation/water test?

FYI below is the messaging I have regarding use of glyphosate. Anything else?

Thank you,
Tristan

- Chemical brushing is used to improve survival and growth of trees, and to help ensure planted trees meet growing standards required by the Forest and Range Practices Act (FRPA).
- If forestry companies choose to use chemical brushing, they must work under BC's Integrated Pest Management Act (IPMA), administered by the Ministry of Environment.
- Prior to obtaining an authorization under the Integrated Pest Management Regulation (IPMR) for large scale operations on public land, there must be consultation with the public and First Nations.
- Requirements must also be met under the IPMR to minimize the impacts to the environment and people, including setbacks from fish-bearing streams and lakes, no treatment zones surrounding drinking water wells and water intakes, and public notification.
- It's important to note that since 1990, there has been a decline in the amount of chemical brushing used in BC's forests.
- BC's reforestation practices are updated when new scientific research and information becomes available – recently, this saw the Ministry start to allow increased levels of aspen and broadleaves in managed stands throughout BC, which will cause a further decline in chemical brushing.
- Use of superior orchard seed, improved nursery techniques, fast-growing seedlings and well-timed planting is also reducing the amount of brushing

required.

- Ministry of Environment staff are not aware of negative environmental impacts from the use of glyphosate in forestry when applied according to the label.

- Additionally, before a pesticide is allowed to be sold or used in Canada, it must be evaluated and registered with Health Canada's Pest Management Regulatory Agency (PMRA). The PMRA will only approve a pesticide if satisfied its use will not result in unreasonable adverse impacts.

Subject: COMPLAINT - s.22 He lives in MLA Sonia Furstenau's riding

Good morning Tristin and Don,

Our constituency office received a phone call from s.22 He lives in MLA Sonia Furstenau's riding.

Ray's complaint is regarding a "glyphosate" spray that was done last week over the Honeymoon Bay Watershed. He identifies the spray either contained or was called Roundup. He is extremely concerned about the contamination.

He wants the Premier to immediately order that this practice of spraying stops. He is also demanding a water quality test be done at the watershed.

He is not sure which logging company is up there, he thought either Timber West or Hancock Timber.

Ray quoted that he saw/read an article from CBC, I have looked on line and cannot find the article for you to read.

Tristian, is this something you can respond to?

Don, FYI.

Thanks, Moe

Hi Maureen,

I am checking with staff on rules regarding glyphosate use on private vs. crown land and how the constituent could lodge an official complaint if he feels rules have not been adhered to.

Please see bullets below regarding current rules for glyphosate use in forestry practices.

As you may be aware, glyphosate is also a contentious issue regarding agricultural use as well.

I'll get back to you as soon as possible.

Tristan

Subject: COMPLAINT - s.22 He lives in MLA Sonia Furstenau's riding

Good morning Tristin and Don,

Our constituency office received a phone call from s.22 He lives in MLA Sonia Furstenau's riding.

s.22 complaint is regarding a "glyphosate" spray that was done last week over the Honeymoon Bay Watershed. He identifies the spray either contained or was called Roundup. He is extremely concerned about the contamination.

He wants the Premier to immediately order that this practice of spraying stops. He is also demanding a water quality test be done at the watershed.

He is not sure which logging company is up there, he thought either Timber West or Hancock Timber.

s.22 quoted that he saw/read an article from CBC, I have looked on line and cannot find the article for you to read.

Tristian, is this something you can respond to?

Don, FYI.

Thanks, Moe

Kenn,

I think we should ask staff to go ahead with Interim measure as described by David Borth; "The most useful interim action, however would be to agree with their request for a field visit from a senior official of BCWS and further assessment by a hydrologist – and to possibly consider other options to mitigate the impacts on their property."

He indicates a meeting with Minister could be helpful, but I think we should go with the field visit first.

Your thoughts?
Tristan

Hi Angela,

Kenn is going to call Ken F. to address this second incoming to clarify that the work is not "new" logging, it is related to cleaning up corners of cut block, yarding felled timber and shutting the operation down for the winter. No written response required.

Re: First incoming: I have attached Kenn's comments regarding the substance of the Oct 29th meeting. But basically he said their letter confirms the general tone and substance of the meeting. We cannot commit to a January meeting, but will commit to staff keeping them updated on the status of plans within the donut hole.

Please provide Kenn with a draft of the response.

Thank you,
Tristan

Hello MLA Rice,
FLNRORD is bringing forward exemption extension orders to Cabinet and we're aiming for a

December 5 Cabinet date. The OICs will impact your constituency. We require confirmation of your support by November 25th. I've highlighted some of the rationale below:

- This OIC was extended by six months in June of this year to allow time for government to consider and consult with affected First Nations on possible changes to export policy and the configuration, terms and conditions of existing exemptions.
- This extension is required to incorporate what was learned during consultations with First Nations and with ongoing industry discussions intended to revitalize coast timber supply and manufacture.

Northwest Interior:
North Coast, MLA, Jennifer Rice

North Coast District:
North Coast, MLA, Jennifer Rice

Mid-Coast:
North Coast, MLA, Jennifer Rice
North Island, MLA, Honourable Claire Trevena

Haida Gwaii:

Attachments:	GVGS Mary Lake Proposal for Conservancy Aquisition.pdf

Hello Eveline,

Please see points below from FLNRORD staff regarding the Mary lake proposal. It appears to be an ENV issue because the lands in question are private, not crown land.

We will defer this to you for follow-up.

Thank you,
Tristan

Background:

The Greater Victoria Greenbelt Society (GVGS) purchased the fee simple Mary Lake property on the Saanich Peninsula in 2016 from private owners. We are not clear on funding sources, but a private individual may have provided interim funding. GVGS have since transferred a portion of the land to the Capital Regional District for a trail system connecting other park lands (the sale price for the trail lands was $500,000). They are nominally partnered with Habitat Acquisition Trust, the Land Conservancy and the Tsartlip First Nation.

The GVGS approached the local MLA's office (Premier John Horgan) and it was suggested that the proposal for Crown acquisition go to both Minister Heyman and Minister Donaldson for consideration. Since there are no Crown lands involved in the transaction, FLNRORD need not be involved. The acquisition would add to Coastal Douglas-fir representation, but since that is not a primary purpose, there are no major considerations for FLNRORD.

Since the GVGS is proposing that the property be acquired and designated as a conservancy or other park classification under the *Park Act*, it is appropriate for Minister Heyman to represent the Crown. FLNRORD staff have spoken with BC Parks Regional Director, Don Cadden, about the course of action and he concurred.

The GVGS would be also seeking some form of Parks tenure to allow them to continue to operate the "Nature House" and meeting space for workshops, school field work and other events within the new Parks designation. They propose that any extra funds accruing from these activities be used to defray operating costs of the facility. Not sure what would happen in case of a deficit. This would also be a BC Parks issue.

Parliament Buildings

Victoria, British Columbia V8V 1X4

Dear Minister, Donaldson

I am contacting you on the recommendation of Bruce Fogg, Executive Assistant (Constituency) for Premier John Horgan, as a follow up to the Greater Victoria Greenbelt Society's proposal for the conservancy of the Mary Lake Nature Sanctuary lands and waters in the Capital Regional District.

In our meeting Premier Horgan expressed interest in supporting the project and bringing it to your attention. We have been instructed to set up a meeting with you to discuss our proposal. (see attached)

We are looking forward to the opportunity to discuss with you the continued protection of these special riparian areas, red-listed species and watershed for future generations.

Sincerely,

Koi Neah - Vice Chair

Subject: RE: Metis Forest Allocation

Hi Tristan,

It's with North Area, there was a bit of back and forth as I had originally sent to OCF and it's not actually theirs anymore (TSR/AAC is complete, now it's with the region/BCTS to work on allocation).

I followed up yesterday and North Area told me they are creating a BN.. I've asked them to never mind that and just provide the pertinent info re: s.13; s.16
s.13; s.16

I know it's cold comfort without the actual info to provide, but it is underway.

At this point, am I correct in thinking we'll just provide some bullets rather than an MRL?

Emily

From: s.22
Sent: November 21, 2018 11:08 AM
To: Oakes.MLA, Coralee; Donaldson.MLA, Doug
Subject: Update

Hello Coralee,

Just looking for an update as to whether the province is going to help with replacing structures lost in the 2017 fires. I would like to know for a fact if the province is helping to replace buildings at Telegraph Creek. I heard Doug Donaldson on CBC Radio this summer state that the BC Government would be there (Telegraph Creek) to help rebuild. I would like the same treatment.

By the Government's own stats there were 300 + structures lost in the 2017 Fires in all BC. We lost 11 structures on our place alone, which is 3.5% of all structures lost that year in the whole province and it was only due to the fact that BC Wildfire Service: 1) didn't fight the fires when they had resources and opportunity and "monitored" the fires only, and 2) they did NOT run the sprinkler system at our place after we were forced to evacuate and REMOVED the water pump without letting us know.

This is old news now and I know that really nobody cares but we live everyday in a burned out hell hole. The s.22 is ruined and needs repair after the BC Wildfire Service tore it up trying to build a fire guard. This was really a logging operation in the midst of the fire as the fire guard was left strewn with flammable debris. (Please see other email to Jim Glassford CRD re road repair update). I'm pretty feed up with government staff...you can't call them government workers as that would be an oxymoron.

I need the s.22 repaired and my buildings replaced!!!! I'm tired of inaction, sympathy and buck passing. Anywhere else in the province, if some utility dug up your street, you would

reasonably expect that they would at least return it to its previous state. Not so with BC Wildfire Service. What is BC Wildfire Recovery all about?..apparently a 'make payroll project' as evidently, displayed here, they don't do any WORK.

As you may pick up from the tone of this email I'm pretty 'ticked' with BC Government agencies. Let me be clear this is not directed at you or your office staff who have tried to be helpful. s.22 and I will not be able to live in our house this winter as the road is too dangerous for me to keep the road cleared. This is the NEW fallout from the fire which you are likely unaware of as I have not let you or your office know. I have spent hours through the spring and summer trying to get the road repair but BC Wildfire say it's not their job (originally they were too busy) Forestry says It's not their job and C&C Wood Products is responsible as they hold the licence. (Forestry told me they'd take legal action against me if I 'Tamper" with the road) C&C says there's no wood (no kidding) so they won't fix the road and that BC Wildfire should repair it. Around and round.

Please advise me how to withhold my taxes to BC Government until I'm satisfied with repair on my property and access to it. I can guarantee that the Solicitor General will take **immediate and definitive action** in a case like this. We have been waiting for a response from Doug Donaldson's office for a year and a half. He has not responded to emails or letters!!

Angrily,

s.22

From: Jones, Tristan FLNR:EX
To: Vasilev, Susan LASS:EX
Subject: RE: herbicide glyphosate
Date: Wednesday, November 21, 2018 3:00:05 PM

Hi Susan,

Is this helpful?

•Chemical brushing is used to improve survival and growth of trees, and to help ensure planted trees meet growing standards required by the Forest and Range Practices Act (FRPA).
•If forestry companies choose to use chemical brushing, they must work under BC's Integrated Pest Management Act (IPMA), administered by the Ministry of Environment.
•Prior to obtaining an authorization under the Integrated Pest Management Regulation (IPMR) for large scale operations on public land, there must be consultation with the public and First Nations.
•Requirements must also be met under the IPMR to minimize the impacts to the environment and people, including setbacks from fish-bearing streams and lakes, no treatment zones surrounding drinking water wells and water intakes, and public notification.
•It's important to note that since 1990, there has been a decline in the amount of chemical brushing used in BC's forests.
•BC's reforestation practices are updated when new scientific research and information becomes available – recently, this saw the Ministry start to allow increased levels of aspen and broadleaves in managed stands throughout BC, which will cause a further decline in chemical brushing.
•Use of superior orchard seed, improved nursery techniques, fast-growing seedlings and well-timed planting is also reducing the amount of brushing required.
•Ministry of Environment staff are not aware of negative environmental impacts from the use of glyphosate in forestry when applied according to the label.

•Additionally, before a pesticide is allowed to be sold or used in Canada, it must be evaluated and registered with Health Canada's Pest Management Regulatory Agency (PMRA). The PMRA will only approve a pesticide if satisfied its use will not result in unreasonable adverse impacts.

BC Timber Sales and forest licensees, particularly in the north, use glyphosate, in select areas only. Overall the use of the herbicide is decreasing.

However, the use of glyphosate in forests is a small fraction compared to what is used in agriculture.

Let me know if you need anything else.

Thanks,
Tristan

Subject: RE: herbicide glyphosate

Susan,
The only aspect that falls under ENV is the permit for the use of glyphosate (the federal government determines that glyphosate is OK to use generally, then we ensure it is used as directed on the label, as needed).

The news report a lot of people are referencing was more focussed on the fact that the Province removes (or allows for the removal of) aspen trees using glyphosate, leaving only coniferous trees, which apparently increases wildfire risk significantly, as the aspens act as a fire break so it's a FLNRO issue.

Warmly,

Reamick Lo

Subject: CBC News : 'It blows my mind': How B.C. destroys a key natural wildfire defence every year

Dear Minister,

The practice outlined in the CBC news report below also “blows my mind”. Not only can these types of trees better resist fire, their shedding of leaves each year helps provide nutrients that build soil for future generations of trees. As a constituent, please let me know what you and our current government will do to end this senseless practice.

Sincerely,

s.22

Subject: Funds for flood work

Hello Reamick,

Do you know of any funding for Regional Districts/Municipalities, or even private citizens to assistance in work done on river banks to avoid flooding? We have a group of residents in Salmo who live near a river whose banks eroded last spring during extreme high water such that has changed the flow map of the river. They would like to have work done to avoid potential flooding in subsequent springs. The Regional District has told them that if the residents agreed to be taxed for it, the RD would set up a service to do the work, but otherwise there is no money for it. I'm just wanting to do my due diligence that there isn't anything I'm missing from the province that might help them. Thanks for any advice you may have.

Sincerely,

Subject: FW: Hydro gate on East Main - Public Access to Public Land

Good day Kenn and Danika. Hope your week is going well.
The below and attached pertain to gating and locking of Forestry and other roads across the Province and specifically in Premier's constituency.
I am aware that this is a multi-facetted, multi-stakeholder issue that government, industry, recreation users have been struggling with for years.
Please provide MLA Horgan with an update on status of the work going into resolving this issue Province wide and specifically with the Hydro and licensee work to come to some sort of resolution with BC Wildlife Federation and Mr Martin as pertaining to "East Main" in the Juan de Fuca area of the constituency of Langford-Juan de Fuca.
Thanks and best.

Premier John Horgan, MLA
Langford-Juan de Fuca

Dear Sir:

Further to our meeting March 8, 2018, my email of October 15, 2018, and as requested in our telephone conversation October 23, here is a recap of our request for assistance in communicating with FLNRO and BC Hydro:

Provincial policy around access to Crown land in this area is as set out in the attached document "All Licensee Letter Gate." BC Hydro has apparently installed a gate on East Main without the requisite FLNRO approvals.

We have had concerns about illegal and irresponsible firearm misuse and other undesirable activity on East Main for some time, and would like to engage BC Hydro and FLNRO to test an industrial gate access control solution on the gate as an alternative to having it left open. Our primary concern is that as a result of open road policy the road will continue to such a problem that it is permanently closed. The rationale for our position is as set out in the attached article (OpenRoadsBCWF) published in the BCWF space of May/June 2018 Outdoor Magazine.

While East Main is a case in point, it is not a unique circumstance in the province, and I would like to have our industrial road access control solution given consideration as a potential solution at the Ministry level. It has been proven out on a haul main Timberwest gate since March 2017, and represents a marquis example of innovation in forestry practice bringing together resource sector industry, recreation sector non-profits, small business, and youth centered outdoor education initiative through our Caveman Engineers program of which it is work product.

For continuity I have attached an email from 2015 directed to BC Hydro that establishes the original contact. In addition to David Bruce (BC Hydro Reservoir Rights) from that email I have been in touch with:

Date: Wednesday, November 21, 2018 4:11:23 PM
Attachments: MDD Roundup schedule Nov 21 tent.xlsx

Hi Doug,

See schedule at a glance and attachment with info on Ministers and the events they have been invited to or are attending/speaking.

Morning Flight: Monday, January 28th out of Smithers at 10:20 arrive 12:05, so you won't be in time for the lunch.

Government/industry forum panel discussions all booked up for speaking. (1-4 Monday)

Edie said the reconciliation breakfast (Tuesday a.m.) is well attended, so I have put a hold in your calendar – not speaking.

What about Tuesday 10:00 a.m. Gathering Place opening ceremonies – would you want to speak there?

Let me know your thoughts.

Subject: Glyphosate
Date: Thursday, November 22, 2018 8:16:32 AM

Hi Susan,

Here are a few more bullets that you can add to the information I sent you yesterday.

- Mature aspen and birch in retention zones are not sprayed.
- Aspen and deciduous will not disappear from our regeneration forests.
- The provincial timber goals and objectives accomplishment report indicates that, especially in the North, the amount of broadleaf species is higher in reforested areas than in the pre-harvested condition, even with the selective herbicide use that is occurring.

Hope this helps,
Tristan

Subject: Update

Hello Coralee,

Just looking for an update as to whether the province is going to help with replacing structures lost in the 2017 fires. I would like to know for a fact if the province is helping to replace

buildings at Telegraph Creek. I heard Doug Donaldson on CBC Radio this summer state that the BC Government would be there (Telegraph Creek) to help rebuild. I would like the same treatment.

By the Government's own stats there were 300 + structures lost in the 2017 Fires in all BC. We lost 11 structures on our place alone, which is 3.5% of all structures lost that year in the whole province and it was only due to the fact that BC Wildfire Service: 1) didn't fight the fires when they had resources and opportunity and "monitored" the fires only, and 2) they did NOT run the sprinkler system at our place after we were forced to evacuate and REMOVED the water pump without letting us know.

This is old news now and I know that really nobody cares but we live everyday in a burned out hell hole. The s.22 is ruined and needs repair after the BC Wildfire Service tore it up trying to build a fire guard. This was really a logging operation in the midst of the fire as the fire guard was left strewn with flammable debris. (Please see other email to Jim Glassford CRD re road repair update). I'm pretty feed up with government staff...you can't call them government workers as that would be an oxymoron.

I need the s.22 repaired and my buildings replaced!!!! I'm tired of inaction, sympathy and buck passing. Anywhere else in the province, if some utility dug up your street, you would reasonably expect that they would at least return it to its previous state. Not so with BC Wildfire Service. What is BC Wildfire Recovery all about?..apparently a 'make payroll project' as evidently, displayed here, they don't do any WORK.

As you may pick up from the tone of this email I'm pretty 'ticked' with BC Government agencies. Let me be clear this is not directed at you or your office staff who have tried to be helpful. s.22 and I will not be able to live in our house this winter as the road is too dangerous for me to keep the road cleared. This is the NEW fallout from the fire which you are likely unaware of as I have not let you or your office know. I have spent hours through the spring and summer trying to get the road repair but BC Wildfire say it's not their job (originally they were too busy) Forestry says It's not their job and C&C Wood Products is responsible as they hold the licence. (Forestry told me they'd take legal action against me if I 'Tamper" with the road) C&C says there's no wood (no kidding) so they won't fix the road and that BC Wildfire should repair it. Around and round.

Please advise me how to withhold my taxes to BC Government until I'm satisfied with repair on my property and access to it. I can guarantee that the Solicitor General will take **immediate and definitive action** in a case like this. We have been waiting for a response from Doug Donaldson's office for a year and a half. He has not responded to emails or letters!!

Angrily,

Hi Angelika,

A short update:

This file has been pulled from 'pending' and has been assigned to a water officer.
The officer will ensure that the 1995 decision is consistent with the WSA (Water Sustainability Act) and whether any adjustments need to be made.

I have been told they will update me on a timeline regarding review completion.

I'll let you know when I have any further info.

All the best,
Tristan

Subject: FW: Water License s.22

Hi Tristan,

Apologies for the lengthy email thread, but I wasn't sure how much info you needed for this.

This is a complaint from one of our constituents which he has asked me to escalate to the Minister's office. s.22 has been waiting a year for the apportionment of a water license. He is completely fed up with the long wait and wants to make sure that Minister is aware of how unacceptably long the wait time is for the office in Cranbrook to get this kind of task done.

You and I last spoke about this in August, when he first came to our office with this issue. Nothing has progressed since then, and he is really losing patience with it.

Is there anything that can be done to finally have his issue dealt with?
Can your office provide a response addressing the lengthy wait time?

I will be away from the office all next week in Victoria at the CA conference, so I was hoping you could get the ball rolling on this in my absence. I'll follow up with you during the week of Nov. 13th

when I return, but feel free to have staff respond to him directly in the mean if that is appropriate.

Kind regards,
Angelika Brunner, Constituency Assistant

Subject: RE: Water License s.22

Hi Angelika

I am again doing a follow-up on our initial request for the water license apportionment to be registered as per Water Allocation Technician Mr. Sturdy's letter of November 6, 1995. (attached) This should have been done in 1995 as indicated in Mr. Sturdy's letter of commitment.

We discovered in December of 2017 that the apportionment was not done.
On December 8, 2017 we contacted the Water Stewardship Branch in Cranbrook requesting that the apportionment be completed and registered as per Mr. Sturdy's letter.

The response we received from the Section Head of the Water Stewardship Branch was that it will be addressed when resources allow.

It has been 23 years since the initial commitment was made to apportion the water license and almost 1 year since the request to complete the apportionment.

This type of oversight and response to correct the oversight should be and is unacceptable in level of Government including the current Provincial Government.

Therefore I am again requesting our MLA's involvement to have this apportionment completed and registered as per Mr. Sturdy's letter.

Thank you for your attention to this matter.

Subject: RE: Water License s.22

Thanks for your help Angelika.

Obviously I am not too happy about the length of time it is taking them to finalize the water license, (8 months and still not done) so if they are that short staffed is there something I can do as Local government to bring the lack of adequate staffing levels in the Water Stewardship Division at the Cranbrook Office. It would appear to me that I am not the only one that is subjected to long wait times therefore the Minister should be made aware that there is a problem with staffing levels in the Canbrook office and hopefully he can resolve the problem, maybe Katrine can bring it to his attention.

Thanks

Subject: RE: Water License s.22

Hi s.22

I received an update from the Ministry today. They have explored the reasons for the delay and it is truly a case of available resources. The team in Cranbrook that you have been dealing with has limited resources and have had to prioritize a lot of urgent issues that involve public safety, and therefore unfortunately have not been able to address your concerns in a timely manner.

I have checked that they have all the information on their files that they need, and indeed they do.

They ask for your continued patience as they work on their backlog. They will be contacting you as soon as they are able to. They have not been able to give us an estimated timeline.

It looks like there is nothing we can do to speed this up for you. I would suggest sending them some regular reminders so that they know to keep you as far up the priority list as possible.

Kind regards,
Angelika Brunner, Constituency Assistant

Subject: Water License s.22

Hello Tracy

This is a follow-up on my phone message of Dec 8, 2017. In our process of Estate Planning we have noticed that the water license for s.22 was not apportioned to s.22
s.22

I am attaching a scanned copy of the November 6, 1995 letter from Robin Sturdy Water Allocation Technician indicating how he was going to proceed and apportion the water license, apparently this was not done.

Would appreciate if this can be corrected and done as per Mr. Sturdy's letter of November 6, 1995.

My spouse s.22 is 1/3 owner of s.22 and would like to ensure that the property has the appropriate water rights to s.22 as apportioned by Mr. Sturdy.

I am attaching a scanned copy of the 2017 Property Tax Notice with her current address so once the adjustment is made to the water license she would then be able to receive the billing notice for the water license, which I understand will be due in early 2018.

We can be reached at s.22 for any additional information.

Thank you for your attention to this matter.

Hi Lynne,

Here is a response from staff regarding assistance in interpreting the geo-tech report.

Regarding the request for assistance to interpret the geotechnical report from BGC Consulting:

- BGC Consulting are the experts on their report - we encourage the Village to reach out to them for questions related to the report.
- Matthias Jakob, principle geoscientist with BGC is best positioned to assist the Village in understanding the geotechnical report and what it means for individual properties.
- If the Village would like support from FLNRORD to facilitate a meeting with BGC, Tom Millard will be available to help.
- It is up to the Village to determine the next steps for the evacuation order based on the risks identified in the report. FLNRORD technical staff will not be making recommendations to the Village.

Regarding the request that FLNRO explore alternate mitigation measures for the Village.

- EMBC will be the contact for the Village in coordinating future mitigation. We encourage them to work though the contacts at Emergency Management BC (David Timaz and John Forrest).
- EMBC could help the Village identify potential funding avenues to contract the appropriate expertise to identify mitigation options for the Village to consider.
- FLNRORD will not be carrying out additional studies for mitigation measures.

I'll give you a call on this shortly.

Tristan

Hi Laurie,

Some info from staff.

Local Governments can get funding from:

- The CEPF (Community Emergency Preparedness Fund) is a suite of funding programs intended to enhance the resiliency of local governments and their residents in responding to emergencies and is administered through UBCM. Please visit the CEPF website (www.ubcm.ca/EN/main/funding/lgps/community-emergency-preparedness-fund.html) for more information on future funding intakes.
- The Federal DMAF (Disaster Mitigation and Adaptation Fund) – a 10-year, $2 billion national program designed to help communities better withstand current and future risks of natural hazards. DMAF will support large-scale infrastructure projects with a minimum cost of $20 million. For more information, please visit: https://www.infrastructure.gc.ca/dmaf-faac/index-eng.html
- The Rural and Northern Communities (RNC) Program is a component of the wider Investing in Canada Infrastructure Program (ICIP), which supports infrastructure projects in communities across the province that have populations 25,000 or less. For more information, please visit the RNC website (www2.gov.bc.ca/assets/gov/driving-and-transportation/funding-engagement-permits/grants-funding/investing-in-canada/rnc-program-guide.pdf).
- The First Nations Adapt Program provides funding to First Nation communities located below the 60th parallel to assess and respond to climate change impacts on community infrastructure and emergency management. For more information, please visit https://www.aadnc-aandc.gc.ca/eng/1481305681144/1481305709311

Private individuals have no such access to funding; however, staff have heard of Fisheries and Oceans Canada (DFO) funding some flood protection works for ranchers and homeowners if the works can also double as salmon habitat. This isn't a regular program, more of a one-off administered by a local Kamloops DFO restoration team. Similarly, some individuals have received funding from neighbouring First Nations and from NPOs such as the Salmon Society.

Hope this helps.

Subject: Funds for flood work

Hello Reamick,

Do you know of any funding for Regional Districts/Municipalities, or even private citizens to assistance in work done on river banks to avoid flooding? We have a group of residents in Salmo who live near a river whose banks eroded last spring during extreme high water such that has changed the flow map of the river. They would like to have work done to avoid potential flooding in subsequent springs. The Regional District has told them that if the residents agreed to be taxed for it, the RD would set up a service to do the work, but otherwise there is no money for it. I'm just wanting to do my due diligence that there isn't anything I'm missing from the province that might help them. Thanks for any advice you may have.

Sincerely,

Laurie Langille
Constituency Assistant to the
Hon. Michelle Mungall
MLA Nelson-Creston

Subject: FW: Water License s.22
Hi Tristan,
Apologies for the lengthy email thread, but I wasn't sure how much info you needed for this.
This is a complaint from one of our constituents which he has asked me to escalate to the Minister's office. s.22 has been waiting a year for the apportionment of a water license. He is completely fed up with the long wait and wants to make sure that Minister is aware of how

unacceptably long the wait time is for the office in Cranbrook to get this kind of task done.
You and I last spoke about this in August, when he first came to our office with this issue. Nothing has progressed since then, and he is really losing patience with it.
Is there anything that can be done to finally have his issue dealt with?
Can your office provide a response addressing the lengthy wait time?
I will be away from the office all next week in Victoria at the CA conference, so I was hoping you could get the ball rolling on this in my absence. I'll follow up with you during the week of Nov. 13th when I return, but feel free to have staff respond to him directly in the mean if that is appropriate.
Kind regards,
Angelika Brunner, Constituency Assistant

Subject: RE: Water License s.22
Hi Angelika
I am again doing a follow-up on our initial request for the water license apportionment to be registered as per Water Allocation Technician Mr. Sturdy's letter of November 6, 1995. (attached)
This should have been done in 1995 as indicated in Mr. Sturdy's letter of commitment.
We discovered in December of 2017 that the apportionment was not done.
On December 8, 2017 we contacted the Water Stewardship Branch in Cranbrook requesting that the apportionment be completed and registered as per Mr. Sturdy's letter.
The response we received from the Section Head of the Water Stewardship Branch was that it will be addressed when resources allow.
It has been 23 years since the initial commitment was made to apportion the water license and almost 1 year since the request to complete the apportionment.
This type of oversight and response to correct the oversight should be and is unacceptable in level of Government including the current Provincial Government.
Therefore I am again requesting our MLA's involvement to have this apportionment completed and registered as per Mr. Sturdy's letter.
Thank you for your attention to this matter.

Thanks for your help Angelika.
Obviously I am not too happy about the length of time it is taking them to finalize the water license, (8 months and still not done) so if they are that short staffed is there something I can do as Local government to bring the lack of adequate staffing levels in the Water Stewardship Division at the Cranbrook Office. It would appear to me that I am not the only one that is subjected to long wait times therefore the Minister should be made aware that there is a problem with staffing levels in the Canbrook office and hopefully he can resolve the problem, maybe Katrine can bring it to his attention.
Thanks

Subject: RE: Water License s.22
Hi Walter,
I received an update from the Ministry today. They have explored the reasons for the delay and it is truly a case of available resources. The team in Cranbrook that you have been dealing with has limited resources and have had to prioritize a lot of urgent issues that involve public safety, and therefore unfortunately have not been able to address your concerns in a timely manner.
I have checked that they have all the information on their files that they need, and indeed they do. They ask for your continued patience as they work on their backlog. They will be contacting you as soon as they are able to. They have not been able to give us an estimated timeline.
It looks like there is nothing we can do to speed this up for you. I would suggest sending them some regular reminders so that they know to keep you as far up the priority list as possible.
Kind regards,
Angelika Brunner, Constituency Assistant

Subject: Water License s.22

Hello Tracy
This is a follow-up on my phone message of Dec 8, 2017. In our process of Estate Planning we have noticed that the water license fors.22 was not apportioned tos.22
s.22
I am attaching a scanned copy of the November 6, 1995 letter from Robin Sturdy Water Allocation Technician indicating how he was going to proceed and apportion the water license, apparently this was not done.
Would appreciate if this can be corrected and done as per Mr. Sturdy's letter of November 6, 1995.

My spouse s.22 is 1/3 owner of s.22 and would like to ensure that the property has the appropriate water rights to s.22 as apportioned by Mr. Sturdy.

I am attaching a scanned copy of the 2017 Property Tax Notice with her current address so once the adjustment is made to the water license she would then be able to receive the billing notice for the water license, which I understand will be due in early 2018.

We can be reached at s.22 for any additional information.

Thank you for your attention to this matter.

Subject: RE: south coast commercial salmon fishery
Date: Thursday, November 22, 2018 12:38:51 PM

Hi Josh,

Yes, this is mostly a DFO decision. However, there is some provincial overlap.

While salmon harvesting decisions are federal, the Province has delegated authority under the Federal *Fisheries Act* for sea-run steelhead and management of salmon habitat and hydrology and ecosystem conditions.

Kenn McLaren is working on setting up a last minute meeting with the Minister and this group for next Monday. He will ensure that Jennifer is invited to the meeting as well.

Please don't respond to him directly just yet, as the meeting planning is still in the works.

Thanks,

Tristan

Hi Jenn
This is Guy Johnston from the Union. I have meet you a few times. A group with representatives from all the south coast fishing groups would like to meet with you and Doug Donaldson and lana Popham. To discuss the emergency listing of Thompson and Chilcot steelhead. While we are all wanting to do what we can to help the steel head, shutting down the only remaining commercial fishery in the south coast will not achieve this aim. I have talked with Ken Mclaren and Jessica Smith and so far no luck to meet them prior to Dec 2 cut off date for input. If there is anything you can do to help achieve a meeting with the Province that would be most appreciated .
Thanks Guy

Subject: RE: Water License s.22
Hi Angelika
I am again doing a follow-up on our initial request for the water license apportionment to be registered as per Water Allocation Technician Mr. Sturdy's letter of November 6, 1995. (attached)
This should have been done in 1995 as indicated in Mr. Sturdy's letter of commitment.
We discovered in December of 2017 that the apportionment was not done.
On December 8, 2017 we contacted the Water Stewardship Branch in Cranbrook requesting that the apportionment be completed and registered as per Mr. Sturdy's letter.
The response we received from the Section Head of the Water Stewardship Branch was that it will be addressed when resources allow.
It has been 23 years since the initial commitment was made to apportion the water license and almost 1 year since the request to complete the apportionment.
This type of oversight and response to correct the oversight should be and is unacceptable in level of Government including the current Provincial Government.
Therefore I am again requesting our MLA's involvement to have this apportionment completed and registered as per Mr. Sturdy's letter.
Thank you for your attention to this matter.

Subject: RE: Water License s.22

Thanks for your help Angelika.
Obviously I am not too happy about the length of time it is taking them to finalize the water license, (8 months and still not done) so if they are that short staffed is there something I can do as Local government to bring the lack of adequate staffing levels in the Water Stewardship Division at the Cranbrook Office. It would appear to me that I am not the only one that is subjected to long wait times therefore the Minister should be made aware that there is a problem with staffing levels in the Canbrook office and hopefully he can resolve the problem, maybe Katrine can bring it to his attention.
Thanks

Subject: RE: Water License s.22

Hi s.22
I received an update from the Ministry today. They have explored the reasons for the delay and it is truly a case of available resources. The team in Cranbrook that you have been dealing with has limited resources and have had to prioritize a lot of urgent issues that involve public safety, and therefore unfortunately have not been able to address your concerns in a timely manner.
I have checked that they have all the information on their files that they need, and indeed they do. They ask for your continued patience as they work on their backlog. They will be contacting you as soon as they are able to. They have not been able to give us an estimated timeline.
It looks like there is nothing we can do to speed this up for you. I would suggest sending them some regular reminders so that they know to keep you as far up the priority list as possible.
Kind regards,
Angelika Brunner, Constituency Assistant

Hi Angelika
As mentioned during our conversation the other day regarding having the water license

apportionment registered.
I am attaching a letter from my wife authorizing me to act on her behalf.
I have attached all the information and everything I have done to date with no results from the water rights branch or even indication when they are going to process the registration.
The initial request was back in December of 2017.
Would appreciate your assistance and if you have any questions please call me.
Please note this is not RDCK issue but an issue that I am following up my wife's behalf and using my personal e mail address.
Thanks

Subject: Water License s.22

Hello Tracy
This is a follow-up on my phone message of Dec 8, 2017. In our process of Estate Planning we have noticed that the water license for s.22 was not apportioned to s.22
s.22
I am attaching a scanned copy of the November 6, 1995 letter from Robin Sturdy Water Allocation Technician indicating how he was going to proceed and apportion the water license, apparently this

was not done.
Would appreciate if this can be corrected and done as per Mr. Sturdy's letter of November 6, 1995.
My spouse s.22 is 1/3 owner of s.22 and would like to ensure that the property has the appropriate water rights to s.22 as apportioned by Mr. Sturdy.
I am attaching a scanned copy of the 2017 Property Tax Notice with her current address so once the adjustment is made to the water license she would then be able to receive the billing notice for the water license, which I understand will be due in early 2018.
We can be reached at s.22 for any additional information.
Thank you for your attention to this matter.

Date: Thursday, November 22, 2018 4:26:06 PM

Hi Dean,

Thanks very much for being flexible and accommodating the Minister's time constraints.

Please accept this email as confirmation that the Minister will attend from 8-9 a.m. Thursday, February 7.

I am assuming the First Nation and Mayor's welcome will be at approximately 7:45 a.m.?

Thank you for the invitation to breakfast. I'm not sure at this point whether he will attend the breakfast, but we'll make sure he is there for the welcoming remarks.

Thank you,

Tristan Jones
Executive Assistant to the
Honourable Doug Donaldson
Minister of Forests, Lands, Natural Resource Operations and Rural Development

Hello Tristan.

I just left you a voice message.

We've been able to shift another speaker so we can now accommodate Minister Donaldson on Thursday February 7 at our conference in Kamloops at the Coast Kamloops Hotel and Conference Centre.

Minister Donaldson would be speaking from 8 am to 9 am. Ideally about 20 minute of remarks and the remainder of time to take any questions.

The Thursday schedule begins at 7 am with buffet breakfast then greetings from a Kamloops-area Frist Nation and the Mayor of Kamloops.

The Minister is welcome to join us for breakfast.

Please confirm that this time slot fits with the Minister's schedule.

ABCFP forestry conference
Thursday, February 7
8 am – 9am
Ballroom A/B/C
Coast Kamloops Hotel and Conference Centre
1250 Rogers Way, Kamloops, BC

I look forward to your response and we are grateful the Minister can join us in Kamloops.

Regards.

Subject: FW: Funds for flood work
Date: Friday, November 23, 2018 7:52:03 AM
Attachments: image001.png

Hi Laurie,

Some info from staff.

Local Governments can get funding from:

- The CEPF (Community Emergency Preparedness Fund) is a suite of funding programs intended to enhance the resiliency of local governments and their residents in responding to emergencies and is administered through UBCM. Please visit the CEPF website (www.ubcm.ca/EN/main/funding/lgps/community-emergency-preparedness-fund.html) for more information on future funding intakes.
- The Federal DMAF (Disaster Mitigation and Adaptation Fund) – a 10-year, $2 billion national program designed to help communities better withstand current and future risks of natural hazards. DMAF will support large-scale infrastructure projects with a minimum cost of $20 million. For more information, please visit: https://www.infrastructure.gc.ca/dmaf-faac/index-eng.html
- The Rural and Northern Communities (RNC) Program is a component of the wider Investing in Canada Infrastructure Program (ICIP), which supports infrastructure projects in communities across the province that have populations 25,000 or less. For more information, please visit the RNC website (www2.gov.bc.ca/assets/gov/driving-and-transportation/funding-engagement-permits/grants-funding/investing-in-canada/rnc-program-guide.pdf).
- The First Nations Adapt Program provides funding to First Nation communities located below the 60th parallel to assess and respond to climate change impacts on community infrastructure and emergency management. For more information, please visit https://www.aadnc-aandc.gc.ca/eng/1481305681144/1481305709311

Private individuals have no such access to funding; however, staff have heard of Fisheries and Oceans Canada (DFO) funding some flood protection works for ranchers and homeowners if the works can also double as salmon habitat. This isn't a regular program, more of a one-off administered by a local Kamloops DFO restoration team. Similarly, some individuals have received funding from neighbouring First Nations and from NPOs such as the Salmon Society.

Hope this helps.

Tristan

Subject: Funds for flood work

Hello Reamick,

Do you know of any funding for Regional Districts/Municipalities, or even private citizens to assistance in work done on river banks to avoid flooding? We have a group of residents in Salmo who live near a river whose banks eroded last spring during extreme high water such that has changed the flow map of the river. They would like to have work done to avoid potential flooding in subsequent springs. The Regional District has told them that if the residents agreed to be taxed for it, the RD would set up a service to do the work, but otherwise there is no money for it. I'm just wanting to do my due diligence that there isn't anything I'm missing from the province that might help them. Thanks for any advice you may have.

Sincerely,

Tristan,

Please see below.

Nic has agreed to meet with this group Dec 4th or 5th. He is hoping to get some notes on the below issue. I believe this is a FLNRO issue.

He is looking to see where the ministry is at and what their perspective is on it.

These are a few of the main points:

- the mandated grey water treatment requirement placed upon us -the restrictions placed upon our tenures without consultation and prior to our current agreement expiring and / or negotiations starting on our next agreements -the relationship between compliance and enforcement and our membership
- upland tenure usage

Subject: Powell River Regional Cabin Owners

Hello Mr. Simmons.
I'm writing to you on behalf of the Powell River Regional Cabin Owners Association. The directors and myself would like to discuss some issues our membership are currently experiencing regarding the tenure agreements we have with the province. We are hoping to have a meeting with you as a group of directors , to discuss our issues , and potential solutions you may be able to help facilitate for the membership.
Our membership consists of 229 tenure holders , many of which are local residents. Our board of directors are made up entirely of local residents.
The issues we have are numerous, so without getting into too much detail I will give you a bit of a list so you will have an idea of the kind of issues we desire your help with.

- the mandated grey water treatment requirement placed upon us -the restrictions placed upon our tenures without consultation and prior to our current agreement expiring and / or negotiations starting on our next agreements -the relationship between compliance and enforcement and our membership
- upland tenure usage

Please keep in mind these are just a few of the concerns we wish to discuss with you if possible.
We have a dozen directors on our board . As we are varied group of individuals ,who by and large work during the weekdays , an evening meeting would be most desirable. As well , Tuesday or Thursday evenings seem to work best for most of our directors.
We look forward to hearing from you regarding these matters ,and it is with great optimism we look forward to working on some these issues with you.

Regards
Elliot Mostat

Attachments:	MDD Roundup schedule Nov 21 tent.xlsx

Lisa and Vivian,

MDD has confirmed he will attend AME – Monday afternoon and Tuesday morning (Jan 28,29)

Monday afternoon is open for him to be on the tradeshow floor or available for some meetings, although he does not want this time to be completely jammed with meetings. He may want to pop in on the panel discussions?

I have spoken with Edie and confirmed that on Tuesday MDD will attend the Reconciliation Breakfast and will provide opening remarks at the Gathering Place opening ceremonies at 10 a.m.

Edie will send a confirmation email and code for registration shortly.

Hi Doug,

See schedule at a glance and attachment with info on Ministers and the events they have been invited to or are attending/speaking.

Morning Flight: Monday, January 28th out of Smithers at 10:20 arrive 12:05, so you won't be in time for the lunch.

Government/industry forum panel discussions all booked up for speaking. (1-4 Monday)

Edie said the reconciliation breakfast (Tuesday a.m.) is well attended, so I have put a hold in your calendar – not speaking.

What about Tuesday 10:00 a.m. Gathering Place opening ceremonies – would you want to speak there?

Let me know your thoughts.

Subject: ENGO Input for Consideration re: Old-Growth Forests Strategy & Coast Forest Revitalization Plan

To the Honourable Doug Donaldson and Deputy Minister John Allan
Ministry of Forests, Land, Natural Resource Operations and Rural Development

November 21, 2018

Dear Minister Donaldson and Deputy Minister Allan,

Please find attached two key documents for your consideration: 1) *Current Opportunities for Old-growth Forest Protection* and 2) *Coast Forest Revitalization Plan Feedback Submission.*

We request that the recommendations outlined in these documents be incorporated into the development of the ministry's old-growth forests strategy and the Coast Forest Revitalization Plan in order to ensure a robust, science-based approach to conservation and management of old-growth forests while facilitating an accelerated transition to a sustainable, value-added, second-growth forest industry that respects First Nations rights and aspirations, as well as ecological and cultural values.

It's important to note that our groups are advocating for a timely transition, not an immediate end to all old-growth logging everywhere. Our proposal calls for moratoria in key old-growth forest areas while science-based timelines are identified to quickly phase-out logging of endangered old-growth ecosystems, giving the industry time to retool for second-growth stands with accompanying government incentives and regulations to stimulate this transition.

There is an ecological and social imperative calling for action to protect BC's ancient forests and to help industry manage this necessary transition before the last old-growth tree is cut. The latest data show the biggest and best high-productivity forest stands are now extremely scarce and remaining intact tracts are being increasingly fragmented. Time is quickly running out to protect BC's richest and most intact ancient forest stands on Vancouver Island, BC's southern coast, and in the BC Interior.

We have been disappointed by the BC's government's lack of action on protecting old-growth forests since taking office. The May 24, 2018, response letter from Minister Donaldson to our organizations didn't offer any hope that the NDP government was willing to take timely action with regards to any of our 10 recommendations shared 10 months earlier, in July 2017.

We expect the NDP government to take our joint 10 point policy recommendations seriously and work cooperatively and proactively with our organizations to achieve science-based solutions for endangered forests while taking advantage of the opportunity to promote a sustainable, second-growth forest economy.

We look forward to a meeting with Minister Donaldson and ministry staff at the minister's earliest convenience to discuss the contents of these documents, the old-growth options currently being prepared for the minister, and opportunities for our organizations to support the ministry in meeting its 2017 election platform commitments regarding sustainable, science-based old-growth forest management.

Sincerely,

Andrea Inness, Forest Campaigner, Ancient Forest Alliance
Jens Wieting, Senior Forest and Climate Campaigner, Sierra Club BC
Torrance Coste, Vancouver Island Campaigner, Wilderness Committee

Dear Sirs (Andrew, Doug, Tom),

I am addressing this to all of you since I hope that despite your political differences you are people of good character who recognize something wrong when they see it. This is not a partisan issue, it is a question of right and wrong and the wise stewardship of our province's natural resources. I have witnessed a troubling increase in the use of wireless game cameras and bait stations which are negatively influencing hunting and wildlife in this province. I have attached a letter detailing the problem and hope that you will act accordingly.

Sincerely,

s.22

HI Tristan,

Thank you for the opportunity to discuss this matter.

The BC permit / application number is WSA Application# 6001822, and I believe the title is “Trapper Lake / Kowatua Creek Salmon Passage”. As I mentioned in our conversation, DFO has secured funding for this project through the Northern Fund with the expectation that it was to happen in 2017. There is real concern that they won't be able to hold this money if it is not completed this year.

Thank you,

s.22

Tristan,

Please see below.

Nic has agreed to meet with this group Dec 4th or 5th. He is hoping to get some notes on the below issue. I believe this is a FLNRO issue.

He is looking to see where the ministry is at and what their perspective is on it.

These are a few of the main points:

- the mandated grey water treatment requirement placed upon us -the restrictions placed upon our tenures without consultation and prior to our current agreement expiring and / or negotiations starting on our next agreements -the relationship between compliance and enforcement and our membership
- upland tenure usage

Subject: Powell River Regional Cabin Owners

Hello Mr. Simmons.
I'm writing to you on behalf of the Powell River Regional Cabin Owners Association. The directors and myself would like to discuss some issues our membership are currently experiencing regarding the tenure agreements we have with the province. We are hoping to have a meeting with you as a group of directors , to discuss our issues , and potential solutions you may be able to help facilitate for the membership.
Our membership consists of 229 tenure holders , many of which are local residents. Our board of directors are made up entirely of local residents.
The issues we have are numerous, so without getting into too much detail I will give you a bit of a list so you will have an idea of the kind of issues we desire your help with.

- the mandated grey water treatment requirement placed upon us -the restrictions placed upon our tenures without consultation and prior to our current agreement expiring and / or negotiations starting on our next agreements -the relationship between compliance and enforcement and our membership
- upland tenure usage

Please keep in mind these are just a few of the concerns we wish to discuss with you if possible.
We have a dozen directors on our board . As we are varied group of individuals ,who by and large work during the weekdays , an evening meeting would be most desirable. As well , Tuesday or Thursday evenings seem to work best for most of our directors.
We look forward to hearing from you regarding these matters ,and it is with great optimism we look forward to working on some these issues with you.

Regards
Elliot Mostat
President , Powell River
Regional Cabin Owners
Association

Subject: Urgent: Need Notes for MLA SIMONS FW: FW: Powell River Regional Cabin Owners

Tristan,

Please see below.

Nic has agreed to meet with this group Dec 4th or 5th. He is hoping to get some notes on the below issue. I believe this is a FLNRO issue.

He is looking to see where the ministry is at and what their perspective is on it.

These are a few of the main points:

- the mandated grey water treatment requirement placed upon us -the restrictions placed upon our tenures without consultation and prior to our current agreement expiring and / or negotiations starting on our next agreements -the relationship between compliance and enforcement and our membership
- upland tenure usage

Hi Edena,

Sorry for the rush on this. Apparently Cabinet Operations has recently changed their policies and requires MLA support on *every* OIC in a government constituency. In the past we were just getting MLA approval for more controversial ones prior to them going to Cabinet for discussion. It seems like they are scrambling a bit, as I have received a few of these today.

I am checking regarding MMM's riding, but they are usually pretty good about confirming which constituencies are impacted. It could just be a little sliver that carries over, that's all it takes to trigger approval.

Thanks for your help on this.

Subject: FW: Hydro gate on East Main - Public Access to Public Land

Good day Kenn and Danika. Hope your week is going well.
The below and attached pertain to gating and locking of Forestry and other roads across the Province and specifically in Premier's constituency.
I am aware that this is a multi-facetted, multi-stakeholder issue that government, industry, recreation users have been struggling with for years.
Please provide MLA Horgan with an update on status of the work going into resolving this issue Province wide and specifically with the Hydro and licensee work to come to some sort of resolution with BC Wildlife Federation and Mr Martin as pertaining to "East Main" in the Juan de Fuca area of the constituency of Langford-Juan de Fuca.
Thanks and best.

Premier John Horgan, MLA
Langford-Juan de Fuca

Dear Sir:

Further to our meeting March 8, 2018, my email of October 15, 2018, and as requested in our telephone conversation October 23, here is a recap of our request for assistance in communicating with FLNRO and BC Hydro:

Provincial policy around access to Crown land in this area is as set out in the attached document "All Licensee Letter Gate." BC Hydro has apparently installed a gate on East Main without the requisite FLNRO approvals.

We have had concerns about illegal and irresponsible firearm misuse and other undesirable activity on East Main for some time, and would like to engage BC Hydro and FLNRO to test an industrial gate access control solution on the gate as an alternative to having it left open. Our primary concern is that as a result of open road policy the road will continue to such a problem that it is permanently closed. The rationale for our position is as set out in the attached article (OpenRoadsBCWF) published in the BCWF space of May/June 2018 Outdoor Magazine.

While East Main is a case in point, it is not a unique circumstance in the province, and I would like to have our industrial road access control solution given consideration as a potential solution at the Ministry level. It has been proven out on a haul main Timberwest gate since March 2017, and represents a marquis example of innovation in forestry practice bringing together resource sector industry, recreation sector non-profits, small business, and youth centered outdoor education initiative through our Caveman Engineers program of which it is work product.

For continuity I have attached an email from 2015 directed to BC Hydro that establishes the original contact. In addition to David Bruce (BC Hydro Reservoir Rights) from that email I have been in touch with:

Hello Tristan,

s.22 has contacted MLA Tegart's office for assistance regarding the planned removal of emergency works abutting his property which is located on s.22 The area has flooded in both 2017 and 2018. The TNRD, with EMBC funding, installed emergency works (rock berm) to protect his property in both 2017 and 2018.

s.22 recently received an email from Michael Owen, P. Eng with Associated Engineering, representing TNRD/EMBC, that advised that a portion of the works protecting his property would be removed pursuant to EMBC regulations.

s.22 has respectfully request that no part of the rock berm be removed and he has indicated that he would be willing to sign a disclaimer relieving EMBC/TNRD/FLNRO of any liability for leaving the rock berm in place. He has also engaged his own engineer and plans to have the existing berm 'engineered in place' to the extent possible.

Could you please confirm whether EMBC will entertain s.22 request. A consent form is attached.

Regards,
Lori

Hi Danika and Edena,

The map attached shows the s.12; s.13 , and it indeed overlaps into MMM's constituency

I've attached a screenshot (red font/lines is electoral districts and yellow font/lines are TSAs).

Hope this helps, and that you can find time in your Minister's schedule to approve this prior to the deadline.

Thanks,
Tristan

Hi Tristan,

Thanks for the email however Fort St. John not in our area. ☺

s.12; s.13 is in Kootenay West for MKC…not sure but I do not think it is in Nelson-Creston for Minister Mungall. Can you check on that for us?

This is a very short turn around as well… Will try and get this to MKC but it is going to be tough.

Thanks,
Edena

Hello Edena and Danika,

Hi, we require MLAs whose constituencies are impacted to sign off on OICs. Please see below and attached for details.
Please let me know if you need more info.

A simple email stating approval is sufficient.

Thanks,
Tristan

Subject: Online petition to the BC Government is active

Protect BC groundwater from bottling and commercial sale

Hi everyone. We finally have the BC petition online. If you have already signed the paper version you don't need to sign again.

Please consider sharing the link to the petition with friends and family so we can raise awareness and spread our support province-wide.

Water is a necessity of life. The job of the provincial government is to enact laws and govern the province for the good of all its people and not just for the financial gain of a select few individuals or corporations. The government of British Columbia needs to protect and conserve our groundwater aquifers for the benefit of all the people of British Columbia. The government must stop approving groundwater licences for bottling and commercial sale that benefit only a few individuals and corporations, while putting the water security of thousands of other British Columbians at risk. British Columbia just experienced widespread level 4 drought this past summer, impacting residents and farmers who rely on our aquifers, and impacting rivers, streams and fish habitat. In the face of this climate change, and in the face of population growth our groundwater aquifer resources are under increasing pressure and people who rely on those aquifers for their only source of water are concerned about their wells running dry. The government must take firm measures to protect and conserve our groundwater aquifers for the people of British Columbia who they serve now, and for our children and grandchildren in the future. The people of British Columbia must demand that the provincial government of British Columbia take immediate action to stop approving groundwater aquifer licences for bottling and commercial sale and bulk export to ensure all the people of British Columbia have access to good, clean water for our personal needs, to grow our backyard gardens

and to supply the farms that grow our food. Water is a precious community owned resource and must be protected for the future. Water is Life.

https://you.leadnow.ca/petitions/protect-bc-groundwater-from-bottling-and-commercial-sale

Real change happens when everyday people like you and I come together and stand up for what we believe in. Together we can reach thousands of people and help create change around this important issue.

After you've signed the petition please also take a moment to share it with others. It's super easy – all you need to do is forward this email.

Thank you!

Hello MLA Rice,

FLNRORD is bringing forward exemption extension orders to Cabinet and we're aiming for a December 5 Cabinet date. The OICs will impact your constituency. We require confirmation of your support by November 25th. I've highlighted some of the rationale below:

- This OIC was extended by six months in June of this year to allow time for government to consider and consult with affected First Nations on possible changes to export policy and the configuration, terms and conditions of existing exemptions.
- This extension is required to incorporate what was learned during consultations with First Nations and with ongoing industry discussions intended to revitalize coast timber supply and manufacture.

Northwest Interior:
North Coast, MLA, Jennifer Rice

North Coast District:
North Coast, MLA, Jennifer Rice

Mid-Coast:
North Coast, MLA, Jennifer Rice
North Island, MLA, Honourable Claire Trevena

Haida Gwaii:
North Coast, MLA, Jennifer Rice
Attached are draft copies of the cabinet summary documents relating to these orders. Please let me know if there is any additional information that I can provide.
Thank you,

Tristan Jones
Executive Assistant to the
Honourable Doug Donaldson
Minister of Forests, Lands, Natural Resource Operations and Rural Development

Hi Kirsten,

Per our phonecall this afternoon Norm would like to request a meeting with a member of staff from the Ministry of Environment and Climate Change. Matter details are below.
Thank you for your help!

Please ask Min of Env if I can meet with someone there today on this urgent matter.

From: Executive s.22
Sent: Monday, November 26, 2018 2:30 PM
To: Letnick.MLA, Norm <Norm.Letnick.MLA@leg.bc.ca>
Cc: s.22
Subject: Water Issues: Middle Vernon Creek, Duck Lake and Holiday Park.

Honorable Norm Letnick

The water level in Duck Lake today is at a level much higher than would be normal for this time of year and continues to rise. The Duck Lake level today is near the maximum level experienced at the height of a normal spring runoff. This is maintaining excessive and unseasonal ground water saturation causing problems for Holiday Park and its septic sewer system.

This problem is being caused by the Middle Vernon Creek and its accumulation of debris, silt, gravel logs, etc. from the exceptional spring runoff of 2017. Not only does this prevent water from exiting freely from Duck Lake through its natural route of Middle Vernon Creek, but it disrupts and has destroyed the fish habitat and migration. There is also concern for the neighboring lands along Middle Vernon Creek, north of Holiday Park.

Because of this, the residents of Holiday Park are becoming increasingly concerned about the inactivity in correcting the blockages causing the water flow problems in Middle Vernon Creek and its inevitable, future consequences to the residents and properties in Holiday Park.

The issues we are experiencing today are a result of the excessive spring runoff of 2017 when water management was apparently planned for one set of circumstances, i.e. anticipated drought conditions, which did not happen. The rapid and intense runoff that did occur destroyed the cement waterway on Upper Vernon Creek causing excessive ground water and overland flooding damage in Holiday Park along with an excessive accumulation of debris in Middle Vernon Creek. The water overflowed onto and destroyed the Holiday Park Golf Course along with flooding the condos and private sites in the vicinity of Middle Vernon Creek and Duck Lake. This required the evacuation of residents from some condos and sites as well as the disconnection of services to many. The Vehicle Storage Facility was closed and unusable for over 5 months because of the onsite high-water level. The septic sewer system became overloaded due to the oversaturation of the ground from Middle Vernon Creek water seepage resulting in the need for 24-hour sewage disposal via truck to maintain the proper functioning of the sewer plant.

The repairs to the Upper Vernon Creek, completed in the fall of 2017, resulted in a vigorous, free-flowing spring runoff in 2018. With the inability of water to flow freely out of Duck Lake via Middle Vernon Creek, some areas of Holiday Park experienced flooding once again and extensive sandbagging was required. Without a free-flowing exit of spring runoff from Duck Lake via Middle Vernon Creek, we will experience water problems and flooding disruptions again for Holiday Park and its residents in the spring of 2019.

It should be noted that the residents and management of Holiday Park are willing to be part of the solution and are willing to assist as needed. **This is a very serious situation**.

Thank you for your attention to this issue on behalf of the 450+ residents of Holiday Park who look forward to having a solution in place before May of 2019.

Subject: RE: Environment Constit question from Norm Letnick

Thanks Norm for the follow up. You have been the only one to respond to both of my emails. Not one other person. Unbelievable.

I am not sure where we are at as I still do not know if anyone is going to do anything or if they will let me do something?

The Leaseholders at Holiday Park Resort are getting very concerned, and so as I am. We are actually having high ground water issues currently. Sewer plant system is being infiltrated, as stated before, we are pumping water out of 4 well sites so that our condos do not get damaged and whenever it rains the water isn't going away as the ground is super saturated.

Attached is a graph of Nov 2018 ground water reading from a nearby well site. Not a lot of movement, but it does show that the ground water is HIGHER than it was at the start on Nov 2018. That is not good.

We really need to get some immediate focus on this, as it will probably take a fair bit of time to coordinate a plan of action.

Anymore Ideas of what to do and or who to talk to?

Thanks again for your help and response.

Resortfully yours,

s.22

From: Russell, Shannon CITZ:EX
Sent: Monday, November 26, 2018 6:38 PM
To: Jones, Tristan FLNR:EX
Subject: Foreshore Lease Request
Importance: High

Hi Tristan,

As per our discussion, I spoke to s.22 with reference to their question about getting a foreshore sub-lease. Here are the details:

Company Name: Garmar Holdings Ltd
Crown Lands File #: 0313943

Issue:

- They have easement access to Lower Fraser
- Land was recently sold but previous owner kept water lease, which expires in 2022
- Garmar Holdings is driving 10+ trucks to the foreshore and back to pick up the logs
- They would like to build a barge landing at the foreshore - Crown Land Use Operational Policy: Log Handling states land can be sub leased
- They approached current lease holder to sub lease but the conversation stalled when the prices rose too high
- Attended FLNRO office (Surrey?) and spoke to Ellen Law who advised them she is a Natural Resource Specialist and they need to speak to a Portfolio Manager, but did not provide name or contact info

As I noted, s.22 have both been trying to get connected with a Portfolio Manager to find out their rights when it comes to sub leasing lands. Due to the many members he has spoken to try to get some movement on this contact, can we please get a Portfolio Manager to call s.22 on a RUSH basis?

Thanks Tristan.

Hello MLA Rice,
FLNRORD is bringing forward exemption extension orders to Cabinet and we're aiming for a December 5 Cabinet date. The OICs will impact your constituency. We require confirmation of your support by November 25th. I've highlighted some of the rationale below:

- This OIC was extended by six months in June of this year to allow time for government to consider and consult with affected First Nations on possible changes to export policy and the configuration, terms and conditions of existing exemptions.
- This extension is required to incorporate what was learned during consultations with First Nations and with ongoing industry discussions intended to revitalize coast timber supply and manufacture.

Hi Raj,

Minister Donaldson is giving a "forestry 101" briefing to caucus on Monday morning. This may assist MLA Rice with her decision.

How about we stand-by until after the caucus briefing? If MLA Rice would still like a further briefing regarding the OICs at that time, we will get it organized for her.

Does this work for you?

Thanks,
Tristan

Yes, we're willing to meet.
The question will be when they get the response to their "requests" whether they will want to meet.

See attached FMI.
Thanks Iris,

Gerry

For deeper dive:

- November 13, 2018 Ashcroft awarded **$464,948** for Campground and concession from Special Circumstance fund of BC Rural Dividend

- s.16

s.16

- March 12, 2018 Ashcroft awarded **$490,000** consisting of $390,070 for pivot and $100,000 healing center (logs from Bonaparte) from Special Circumstance fund of BC Rural Dividend. It was made clear to Ascroft that regional operations would persevere in getting this funding to Ashcroft as well as expediting a water licence, as there is no additional timber available to offer them out of any TSA at this time.

Hi Arianna,
Although my last email indicated that the meeting could wait until next week, Norm Letnick has sent an email request today to see if someone from FLNRORD can speak with him today?
Please see below.

Subject: RE: Environment Constit question from Norm Letnick

Thanks Norm for the follow up. You have been the only one to respond to both of my emails. Not one other person. Unbelievable.

I am not sure where we are at as I still do not know if anyone is going to do anything or if they will let me do something?

The Leaseholders at Holiday Park Resort are getting very concerned, and so as I am. We are actually having high ground water issues currently. Sewer plant system is being infiltrated, as stated before, we are pumping water out of 4 well sites so that our condos do not get damaged and whenever it rains the water isn't going away as the ground is super saturated.

Attached is a graph of Nov 2018 ground water reading from a nearby well site. Not a lot of movement, but it does show that the ground water is HIGHER than it was at the start on Nov 2018. That is not good.

We really need to get some immediate focus on this, as it will probably take a fair bit of time to coordinate a plan of action.

Anymore Ideas of what to do and or who to talk to?

Thanks again for your help and response.

Resortfully yours,

s.22

s.22

s.22 and friends,

Thank you for your email. I'm also really disappointed with our government's inaction on this and other matters relating to Holiday Park.

I've asked for an urgent meeting with someone from the ministry of environment to discuss solutions. Fingers crossed as we only have two more days in Victoria before the session ends.

Have you received any guidance or advice from any qualified individual on what

we should be asking government to do?

Norm

Cc: s.22
Subject: Water Issues: Middle Vernon Creek, Duck Lake and Holiday Park.

Honorable Norm Letnick

The water level in Duck Lake today is at a level much higher than would be normal for this time of year and continues to rise. The Duck Lake level today is near the maximum level experienced at the height of a normal spring runoff. This is maintaining excessive and unseasonal ground water saturation causing problems for Holiday Park and its septic sewer system.

This problem is being caused by the Middle Vernon Creek and its accumulation of debris, silt, gravel logs, etc. from the exceptional spring runoff of 2017. Not only does this prevent water from exiting freely from Duck Lake through its natural route of Middle Vernon Creek, but it disrupts and has destroyed the fish habitat and migration. There is also concern for the neighboring lands along Middle Vernon Creek, north of Holiday Park.

Because of this, the residents of Holiday Park are becoming increasingly concerned about the inactivity in correcting the blockages causing the water flow problems in Middle Vernon Creek and its inevitable, future consequences to the residents and properties in Holiday Park.

The issues we are experiencing today are a result of the excessive spring runoff of 2017 when water management was apparently planned for one set of circumstances, i.e. anticipated drought conditions, which did not happen. The rapid and intense runoff that did occur destroyed the cement waterway on Upper Vernon Creek causing excessive ground water and overland flooding damage in Holiday Park along with an excessive accumulation of debris in Middle Vernon Creek. The water overflowed onto and destroyed the Holiday Park Golf Course along with flooding the condos and private sites in the vicinity of Middle Vernon Creek and Duck Lake. This required the evacuation of residents from some condos and sites as well as the disconnection of services to many. The Vehicle Storage Facility was closed and unusable for over 5 months because of the onsite high-water level. The septic sewer system became overloaded due to the oversaturation of the ground from Middle Vernon Creek water seepage resulting in the need for 24-hour sewage disposal via truck to maintain the proper functioning of the sewer plant.

The repairs to the Upper Vernon Creek, completed in the fall of 2017, resulted in a vigorous, free-flowing spring runoff in 2018. With the inability of water to flow freely out of Duck Lake via Middle Vernon Creek, some areas of Holiday Park experienced flooding once again and extensive sandbagging was required.

Without a free-flowing exit of spring runoff from Duck Lake via Middle Vernon Creek, we will experience water problems and flooding disruptions again for Holiday Park and its residents in the spring of 2019.

It should be noted that the residents and management of Holiday Park are willing to be part of the solution and are willing to assist as needed. This is a very serious situation.

Thank you for your attention to this issue on behalf of the 450+ residents of Holiday Park who look forward to having a solution in place before May of 2019.

Hi Hayley,

If this is an issue of concern over a potential blockage, ultimately the Ministry of Environment is responsible for permitting any work conducted by the local RD or

municipality to remove a blockage.

I spoke briefly to a District of Lake Country official in very broad terms about jurisdictional questions concerning creek blockages, and she confirmed to me that Lake Country has been in touch with MOE about some recent concerns about beavers on Middle Vernon Creek.

Subject: RE: Middle Vernon Creek

Here is an update as we did get some time to do a quick survey of the water level along the creek from Commonwealth rd to Beaver lake road.

Taken on Oct 10th, 2018 and it shows that there is about a 4 1/2 metre difference between the Creek Run development and Beaver Lake Rd. that I believe is way

too much of a change and further proves that there is a major blockage occurring.

Because of this the Duck lk water level is being kept artificially high, which impacts the ground water levels and will potentially create a higher risk of spring flooding if this level doesn't go down by the 2019 freshet.

The high ground water table may not appear to be an issue to anyone, however Holiday Park Resort is still being impacted by it on a daily basis. We currently seem to be getting about 20,000 gal per day more waste water going through our system then past years, and we feel that is directly related to the high ground water table throughout the resort.

Is there anyone that can take action and improve the flow of Middle Vernon Creek? This is not just for HPR's benefit as it will be beneficial for the other residences and property owners all along the creek, as well it will improve and assist the fish habitat and spawning opportunities for the Kokanee.

Maybe there is a plan in place already? If so please let me know.

I have many owners here at Holiday Park Resort that are very concerned about their homes and investment here. They are asking me what is being done and when will someone fix the problem. I do not know what to say?

We are more than willing to be part of the solution, and like I said before I don't expect something for nothing, but I do hope we can establish a plan, some funding and some actual clearing and repair work over the next 6 to 8 months at the latest.

Thanks

Resortfully yours,

s.22

On Oct 11, 2018, at 9:37 AM, s.22 wrote:

To All, who should be concerned.

I am very concerned about the apparent inactivity/action towards the opening up, dredging and clearing of Middle Vernon Creek between Duck lake and Beaver lake road.

The water level is 2 to 3 feet higher than it normally is at this time of year,(

meaning the last 35 years except for 2017). What this high water does is reduce the ability for the ground water to lower down, it disrupt the fish habitat, and potentially cause high water problems for Holiday Park Resort and neighbouring lands to the North of us during the spring run-off.

It is my understanding that there is a fair bit of dredging work being done on a number of creeks throughout the city to help minimize any future flooding and property damage.

Unfortunately, to date there has only been discussions about the need to open up and dredge the creek better than it currently is, however there has been NOTHING done so far. As a result of this inaction, Holiday Park Resort is being exposed to the potential damages that can result from this lack of action.

As a result of last year's flooding and ground water problems we have just seen a 11% increase in our insurance premiums with a deductible increasing from $100,000 to $250,000. We are currently having to pay over $90,000 annually, and have been told we are very lucky to even get flood insurance this year. We cannot afford to have any more flooding on our property.

We are having trouble trying to protect ourselves from the lack of priority, money and jurisdictional bureaucracy that exists along this area of the creek.

Please know that we are more than willing to be part of the solution, and assist in any way we can. We are not expecting something for nothing, we just want this fixed for the betterment of the FISH and ALL the land owners along the creek.

PLEASE understand the seriousness of this issue, and lets get something done before we are faced with the flooding problems that WILL OCURR in the spring of 2019.

Thank you for your attention to this.

Tim,

What's the plan on this?

I am working on the two other OICs, but FYI if we don't have approval from Clare and Jenn today, the OICs will be pulled from Dec 5th Cabinet calendar.

As per below Ryan is prepared to ask staff to expedite a briefing.

FYI it is new cabinet ops policy that all OICs that impact government ridings need to have approval by relevant MLAs.

To: Munroe, Ryan FLNR:EX
Subject: FLNR items - Dec 5th

Hi Ryan,

Hope you had a good weekend.

I wanted to touch base on the items we still need for the FLNR items currently on the Dec 5th agenda:

- s.12; s.13; s.16 pulled off the Nov 28th agenda – we are

awaiting MLA approval for New Westminster (Minister Darcy)

- Five timber export OICs (2821, 2838, 2841, 2843, 2844) – we are still awaiting finals, as well as MLA support from Minister Donaldson, MLA Rice and Minister Trevena – I recall you mentioned a meeting was happening today to square this away?
- s.12; – this was the one missing the log number at the bottom. Did you get a new copy from Leg Co?
- s.12; – I know you were hoping to not have to receive MLA support for these, but I'm afraid I have not heard an answer back to your query and I'm worried we're running out of time to get MLA support if it's required (which I suspect it is).

If you can give me an update when you can on the above (preferably in the next hour or two), I'd appreciate it.

Best,

Executive Assistant (Constituency)
Premier John Horgan, MLA
Langford-Juan de Fuca

Dear Sir:
Further to our meeting March 8, 2018, my email of October 15, 2018, and as requested in our telephone conversation October 23, here is a recap of our request for assistance in communicating with FLNRO and BC Hydro:
Provincial policy around access to Crown land in this area is as set out in the attached document "All Licensee Letter Gate." BC Hydro has apparently installed a gate on East Main without the requisite FLNRO approvals.
We have had concerns about illegal and irresponsible firearm misuse and other undesirable activity on East Main for some time, and would like to engage BC Hydro and FLNRO to test an industrial gate access control solution on the gate as an alternative to having it left open. Our primary concern is that as a result of open road policy the road will continue to such a problem that it is permanently closed. The rationale for our position is as set out in the attached article (OpenRoadsBCWF) published in the BCWF space of May/June 2018 Outdoor Magazine.
While East Main is a case in point, it is not a unique circumstance in the province, and I would like to have our industrial road access control solution given consideration as a potential solution at the Ministry level. It has been proven out on a haul main Timberwest gate since March 2017, and represents a marquis example of innovation in forestry practice bringing together resource sector industry, recreation sector non-profits, small business, and youth centered outdoor education

initiative through our Caveman Engineers program of which it is work product.
For continuity I have attached an email from 2015 directed to BC Hydro that establishes the original contact. In addition to David Bruce (BC Hydro Reservoir Rights) from that email I have been in touch with:

From: Russell, Shannon CITZ:EX
Sent: Monday, November 26, 2018 6:38 PM
To: Jones, Tristan FLNR:EX
Subject: Foreshore Lease Request
Importance: High

Hi Tristan,

As per our discussion, I spoke to s.22 , with reference to their question about getting a foreshore sub-lease. Here are the details:

Company Name: Garmar Holdings Ltd
Crown Lands File #: 0313943

Issue:

- They have easement access to Lower Fraser
- Land was recently sold but previous owner kept water lease, which expires in 2022
- Garmar Holdings is driving 10+ trucks to the foreshore and back to pick up the logs
- They would like to build a barge landing at the foreshore - Crown Land Use Operational Policy: Log Handling states land can be sub leased
- They approached current lease holder to sub lease but the conversation stalled when the prices rose too high
- Attended FLNRO office (Surrey?) and spoke to Ellen Law who advised them she is a Natural Resource Specialist and they need to speak to a Portfolio Manager, but did not provide name or contact info

As I noted, s.22 have both been trying to get connected with a Portfolio Manager to find out their rights when it comes to sub leasing lands. Due to the many members he has spoken to try to get some movement on this contact, can we please get a Portfolio Manager to call s.22 on a RUSH basis?

Thanks Tristan.

Hello MLA Rice,
FLNRORD is bringing forward exemption extension orders to Cabinet and we're aiming for a December 5 Cabinet date. The OICs will impact your constituency. We require confirmation of your support by November 25th. I've highlighted some of the rationale below:

- This OIC was extended by six months in June of this year to allow time for

government to consider and consult with affected First Nations on possible changes to export policy and the configuration, terms and conditions of existing exemptions.

- This extension is required to incorporate what was learned during consultations with First Nations and with ongoing industry discussions intended to revitalize coast timber supply and manufacture.

Northwest Interior:
North Coast, MLA, Jennifer Rice

North Coast District:
North Coast, MLA, Jennifer Rice

Mid-Coast:
North Coast, MLA, Jennifer Rice
North Island, MLA, Honourable Claire Trevena

Haida Gwaii:
North Coast, MLA, Jennifer Rice

Attached are draft copies of the cabinet summary documents relating to these orders. Please let me know if there is any additional information that I can provide.

Thank you,

Tristan Jones
Executive Assistant to the
Honourable Doug Donaldson
Minister of Forests, Lands, Natural Resource Operations and Rural Development

Importance: High

Hello MLA Rice,
FLNRORD is bringing forward exemption extension orders to Cabinet and we're aiming for a December 5 Cabinet date. The OICs will impact your constituency. We require confirmation of your support by November 25th. I've highlighted some of the rationale below:

- This OIC was extended by six months in June of this year to allow time for government to consider and consult with affected First Nations on possible changes to export policy and the configuration, terms and conditions of existing exemptions.
- This extension is required to incorporate what was learned during consultations with First Nations and with ongoing industry discussions intended to revitalize coast timber supply and manufacture.

Northwest Interior:
North Coast, MLA, Jennifer Rice

North Coast District:
North Coast, MLA, Jennifer Rice

Mid-Coast:
North Coast, MLA, Jennifer Rice
North Island, MLA, Honourable Claire Trevena

Haida Gwaii:
North Coast, MLA, Jennifer Rice
Attached are draft copies of the cabinet summary documents relating to these orders. Please let me know if there is any additional information that I can provide.
Thank you,

Tristan Jones
Executive Assistant to the
Honourable Doug Donaldson

Minister of Forests, Lands, Natural Resource Operations and Rural Development
t 778.584.4285 f 250.387.1040

Hi Scott,

Here's a screen shot that show the overlap of the s.12; s.13 between MKCs riding to MMMs riding. The s.12; s.13 is in the southwest portion of Nelson Creston.

Red lines are riding boundaries - yellow lines are Timber Supply Area.

Hope this helps.

Tristan

Hi Tristan,

Do you have a map that shows which areas on Minister Mungall's riding is affected?

Thanks

Scott

Hi Jennifer,
I know there's been a lot of back and forth with the Export OIC. I got in touch with Raj at MLA Rice's office. Rice has some time to speak to staff to clarify anything that's holding up her support. Ryan suggested you were the best person to speak to this. Would you be available to speak to MLA Rice about the OIC either between **11am-11:30am** or between **3pm-4:30pm**? Times were provided from Raj. If so, please get in touch with either Ryan or Raj as they are working to coordinate.

Hi Raj,

Minister Donaldson is giving a "forestry 101" briefing to caucus on Monday morning. This may assist MLA Rice with her decision.

How about we stand-by until after the caucus briefing? If MLA Rice would still like a further briefing regarding the OICs at that time, we will get it organized for her.

Does this work for you?

Thanks,
Tristan

Hi Jennifer,

I know there's been a lot of back and forth with the Export OIC. I got in touch with Raj at MLA Rice's office. Rice has some time to speak to staff to clarify anything that's holding up her support. Ryan suggested you were the best person to speak to this. Would you be available to speak to MLA Rice about the OIC either between **11am-11:30am** or between **3pm-4:30pm**? Times were provided from Raj. If so, please get in touch with either Ryan or Raj as they are working to coordinate.

Best,

Hi Raj,
Minister Donaldson is giving a "forestry 101" briefing to caucus on Monday morning. This may assist MLA Rice with her decision.
How about we stand-by until after the caucus briefing? If MLA Rice would still like a further briefing regarding the OICs at that time, we will get it organized for her.
Does this work for you?
Thanks,
Tristan

Hello MLA Rice,

FLNRORD is bringing forward exemption extension orders to Cabinet and we're aiming for a December 5 Cabinet date. The OICs will impact your constituency. We require confirmation of your support by November 25th. I've highlighted some of the rationale below:

- This OIC was extended by six months in June of this year to allow time for government to consider and consult with affected First Nations on possible changes to export policy and the configuration, terms and conditions of existing exemptions.
- This extension is required to incorporate what was learned during consultations with First Nations and with ongoing industry discussions intended to revitalize coast timber supply and manufacture.

Northwest Interior:

North Coast, MLA, Jennifer Rice

North Coast District:

North Coast, MLA, Jennifer Rice

Mid-Coast:

North Coast, MLA, Jennifer Rice

North Island, MLA, Honourable Claire Trevena

Haida Gwaii:

North Coast, MLA, Jennifer Rice

Attached are draft copies of the cabinet summary documents relating to these orders. Please let me know if there is any additional information that I can provide.

Thank you,

Tristan Jones
Executive Assistant to the
Honourable Doug Donaldson
Minister of Forests, Lands, Natural Resource Operations and Rural Development

Hi Rob,

Here are some notes form staff for the meeting next week.

Hope these are helpful to MLA Simons.

Below are some bullets regarding the Powell River Regional Cabin Owners:

- Ministry of Forests, Lands, Natural Resource Operations and Rural development staff from South Coast Region Authorizations and Compliance and Enforcement has been working with the Powell River Regional Cabin Owners Association and Vancouver Coastal Health to ensure the floating cabin tenure holders are meeting all requirements of their tenure agreements.
- In 2016, when several floating cabins in s.22 were inspected, it came to light that some of the floating cabin owners were disposing of their blackwater and greywater by methods that are not in compliance with current regulations and that many floating cabin owners were using the upland property to store materials although they didn't have tenure to do so.
- In 2017 a survey was sent out to all floating cabin tenure holders on Powell Lake requesting information about what blackwater and graywater sewage disposal method was being used. Over 70% of tenure holders completed the survey.
- There has been a slow, measured approach taken to get floating cabin tenure holders into compliance. In 2018, a request was sent to each cabin owner asking them to declare that they have a Sewerage System Regulation compliant blackwater disposal system, they have removed any unauthorized improvements on the upland and all improvements are in a safe, clean and sanitary condition.
- To date, out of 228 floating cabin tenures contacted, 77 have signed declarations and 122 have asked for extension requests. All extension requests have been granted.
- South Coast Region Authorization staff are working closely with floating cabin tenure holders to assist them with becoming compliant with their existing tenure requirements. Staff have completed mailouts and attended multiple meetings to ensure that all tenure holders would have all the information required in order to become compliant.
- This work has been conducted to ensure floating cabin tenure holders are meeting the current terms of their tenure agreements and so that potential non-compliances are addressed prior to tenure expiry and replacement.

Tristan,

Please see below.

Nic has agreed to meet with this group Dec 4th or 5th. He is hoping to get some notes on the below issue. I believe this is a FLNRO issue.

He is looking to see where the ministry is at and what their perspective is on it.

These are a few of the main points:

- the mandated grey water treatment requirement placed upon us -the restrictions placed upon our tenures without consultation and prior to our current agreement expiring and / or negotiations starting on our next agreements -the relationship between compliance and enforcement and our membership
- upland tenure usage

Subject: Powell River Regional Cabin Owners

Hello Mr. Simmons.
I'm writing to you on behalf of the Powell River Regional Cabin Owners Association. The directors and myself would like to discuss some issues our membership are currently experiencing regarding the tenure agreements we have with the province. We are hoping to have a meeting with you as a group of directors , to discuss our issues , and potential solutions you may be able to help facilitate for the membership.
Our membership consists of 229 tenure holders , many of which are local residents. Our board of directors are made up entirely of local residents.
The issues we have are numerous, so without getting into too much detail I will give you a bit of a list so you will have an idea of the kind of issues we desire your help with.

- the mandated grey water treatment requirement placed upon us -the restrictions placed upon our tenures without consultation and prior to our current agreement expiring and / or negotiations starting on our next agreements -the relationship between compliance and enforcement and our membership
- upland tenure usage

Please keep in mind these are just a few of the concerns we wish to discuss with you if possible.
We have a dozen directors on our board . As we are varied group of individuals ,who by and large work during the weekdays , an evening meeting would be most desirable. As well , Tuesday or Thursday evenings seem to work best for most of our directors.
We look forward to hearing from you regarding these matters ,and it is with great optimism we look forward to working on some these issues with you.

Regards
Elliot Mostat

Subject: More Creek Hydro

Minister Donaldson.
I am the president of a company trying to develop a hydroelectric project on More Creek in northwest B C. The project is in the EAO process and is at the point of having a draft Sec 11 Order.
We have been stalled from going forward on the EAO process for two reasons We are a small company but have had the benefit of moving this project through a prefeasibility study, filing land and water applications and receiving an Investigative Use permit for the project. These applications have been subjected to intense scrutiny and come a significant cost in time and money. We have got this far on a shoestring and we are now faced with a payment of $75,000 to get the Sec 11 Order. I don't know whether the government needs the money to cover costs or it is meant to dissuade applications. (I note in Bill 51 that there will be even more costs put on proponents.) With all the risk and costs incurred to date I can assure you that that this is a serious effort and is not done to get a SEC 11 Order. We would like to use our limited resources to move the project forward and would like to see this fee abolished.
The government clearly wants to advance low cost clean energy and this fee makes our project more expensive and becomes an unnecessary obstruction.
Second we have been attempting to get the Government to enter into a Aboriginal Consultation Plan for over a year. We have drafted and redrafted this agreement many times and each and every time the agreement is sent to the First Nations for comment. Each and every time we have tried to meet the request of the First Nations but our changes are never enough.
Most recently they asked how we were going to incorporate UNDRIP into the ACP and how we were going to address reconciliation Both reconciliation and UNDRIP is a government responsibility and not that of a proponent (Bill 61 wants to shift this onto the proponent. _ Nevertheless we have never found the government willing to draw the line onany request from the First Nations demands.
We have also tried for over a year to engage with the First Nations and initiate consultation. They repeatedly refuse to respond to emails, telephone calls and letters. This behaviour is totally unacceptable and the government should not tolerate the refusal to engage in discussions with the proponent.
Since we cannot engage our Environmental Applications dealing with such things as valued components goes no where.
I hope that in your efforts to encourage investment in BC and especially to encourage investment in clean energy you will look at ways to enhance and support investment rather than find ways to frustrate it with legislation and regulation

Subject: Upper Nass Watershed Chiefs

Dear Doug
The Upper Nass Chiefs who are, Ted Mowatt-Djogaslee, Earl Muldon-Delgamuukw, Bill Blackwater-

Niist, John Olson-Xhliiyemlaxha, Larry Skulsh-Wii Minosik, Roy Wilson-Luus and George Muldoe-Neekt would like to meet with you in the next two weeks.

The Chiefs are respectively prepared to "Tet's" you as Ax Jubit from the House of Dawamuuxw, but we appreciate and acknowledge your busy schedule and request a specific date that you can meet with the table within the next two weeks. The watershed table would like to discuss having a Gitxsan Land Use Plan done to ensure our resources and territories are protected. Our concern is that the slow process within government to come up with a new direction for strategic land use planning in B.C. will result in more years of the territories being pillaged and water diminished to the detriment of the Gitxsan people and our wildlife, air, etc. A strategic land use plan was developed 12 years ago and since then there is no new plan with changes based on relations and reconciliation and if it takes another 12 years, what will be left of on the territories.

The chiefs say that the Environmental Strategic Initiative ESI should go hand in hand and that government should contract ESI to do the land use work for the Gitxsan as there are no resources available from MIRR, BCTS or MOTI and the MIRR representatives and BCTS representatives that come to the table do not have the power to change legislation they are guided by. BCTS sells blocks at no cost to them and these funds do not go back into forestry but into an administrative fund and MOTI has not come to the table to be a part of this process and in good faith should.

While FLNRO views the Upper Nass land use development pressure as "relatively low", we strongly disagree and do not agree to being compared to areas such as Golden Triangle (mining) and central interior (forestry). The Chiefs' territories are our Hani Tokxw, it is our livelihood, our table.

In closing, ESI and Watershed should go hand in hand and government should contract ESI, who have received 30 million dollars in block funding as opposed to fiscal as Gitxsan are subjected to, Gitxsan should be treated the same.

We look forward to hearing from you and getting together in the next two weeks and look forward to finding a solution and access to resources for a Gitxsan Land Use Plan, 33,000 sq. km. (as suggested by a colleague Kevin Stevens) and work to start in 2019.

Hi Wendy!

Please see below. MO is looking to provide s.22 _ with the name and contact info of a portfolio manager he could speak to regarding his Crown Lands file.

Arianna, once this info comes back could you send it to Tristan?

Thanks!
Emily

To: Jones, Tristan FLNR:EX
Subject: Foreshore Lease Request
Importance: High

Hi Tristan,

As per our discussion, I spoke to s.22 with reference to their question about getting a foreshore sub-lease. Here are the details:

Company Name: Garmar Holdings Ltd
Crown Lands File #: 0313943

Issue:

- They have easement access to Lower Fraser
- Land was recently sold but previous owner kept water lease, which expires in 2022
- Garmar Holdings is driving 10+ trucks to the foreshore and back to pick up the logs
- They would like to build a barge landing at the foreshore - Crown Land Use Operational Policy: Log Handling states land can be sub leased
- They approached current lease holder to sub lease but the conversation stalled when the prices rose too high

- Attended FLNRO office (Surrey?) and spoke to Ellen Law who advised them she is a Natural Resource Specialist and they need to speak to a Portfolio Manager, but did not provide name or contact info

Hi Scott,

Danika asked me to contact you directly regarding this OIC approval:

Please see attached for specifics and below for some more clarification that MKC had asked for regarding the same OIC.

If MMM is unavailable to provide approval, Cab Ops has indicated an MA approval would work.

Cabinet ops has indicated that if we do not have approval by 10:00 a.m. tomorrow it will be pulled from the calendar and s.12; s.13

s.12; s.13 Sorry for the push on this, it is based on the NEW cab ops policy that all government ridings that are impacted require an approval from the MLA. This OIC fell in between implementation of the new policy and the old.

Further clarification:

s.12; s.13

This is FYI for you, I suggest you allow for Garth Wiggill to reach out to s.22 directly with this information.
Tristan
Estimated completion date is end of February:

- There are several properties involved and 7 people who will need to agree on the apportionment decision as described in the 1995 letter.
- We are aware of several concerns raised by the land owners in the past therefore the projected date will need to be extended if the land owners disagree on the apportionment in its current form and would likely appeal the decision.
- Water staff are initiating communications with the land owners and will need to explain that we are following the WSA in its current form and not the Water Act which was in place in 1995
- Regional Executive Director Garth Wiggle will be reaching out directly to the client s.22 s.22 with an update

That's great, thank you Tristan.
Would you kindly pass on to the water officer, that an important point to consider is that the ministry all but finalized this in 1995 when the officer Robin Sturdy apportioned the license but did not complete the final paperwork.
Consequently, Mr. Popoff believes the ministry should go with the apportionment as proposed in 1995. He is hoping the work can merely be completed where it was left in 1995, and not begun from scratch again, as it would be an unnecessarily lengthy process.
Kind regards,
Angelika Brunner, Constituency Assistant

Hi Angelika,
A short update:
This file has been pulled from 'pending' and has been assigned to a water officer.
The officer will ensure that the 1995 decision is consistent with the WSA (Water Sustainability Act) and whether any adjustments need to be made.
I have been told they will update me on a timeline regarding review completion.

I'll let you know when I have any further info.
All the best,
Tristan

Hi Tristan,
Apologies for the lengthy email thread, but I wasn't sure how much info you needed for this.
This is a complaint from one of our constituents which he has asked me to escalate to the Minister's office. s.22 has been waiting a year for the apportionment of a water license. He is completely fed up with the long wait and wants to make sure that Minister is aware of how unacceptably long the wait time is for the office in Cranbrook to get this kind of task done.
You and I last spoke about this in August, when he first came to our office with this issue. Nothing has progressed since then, and he is really losing patience with it.
Is there anything that can be done to finally have his issue dealt with?
Can your office provide a response addressing the lengthy wait time?
I will be away from the office all next week in Victoria at the CA conference, so I was hoping you could get the ball rolling on this in my absence. I'll follow up with you during the week of Nov. 13th when I return, but feel free to have staff respond to him directly in the mean if that is appropriate.
Kind regards,
Angelika Brunner, Constituency Assistant

Subject: RE: Water License CL35633

Hi Angelika
I am again doing a follow-up on our initial request for the water license apportionment to be registered as per Water Allocation Technician Mr. Sturdy's letter of November 6, 1995. (attached)
This should have been done in 1995 as indicated in Mr. Sturdy's letter of commitment.
We discovered in December of 2017 that the apportionment was not done.
On December 8, 2017 we contacted the Water Stewardship Branch in Cranbrook requesting that the apportionment be completed and registered as per Mr. Sturdy's letter.
The response we received from the Section Head of the Water Stewardship Branch was that it will be addressed when resources allow.
It has been 23 years since the initial commitment was made to apportion the water license and almost 1 year since the request to complete the apportionment.
This type of oversight and response to correct the oversight should be and is unacceptable in level of Government including the current Provincial Government.
Therefore I am again requesting our MLA's involvement to have this apportionment completed and registered as per Mr. Sturdy's letter.
Thank you for your attention to this matter.

Thanks for your help Angelika.

Obviously I am not too happy about the length of time it is taking them to finalize the water license, (8 months and still not done) so if they are that short staffed is there something I can do as Local government to bring the lack of adequate staffing levels in the Water Stewardship Division at the Cranbrook Office. It would appear to me that I am not the only one that is subjected to long wait times therefore the Minister should be made aware that there is a problem with staffing levels in the Canbrook office and hopefully he can resolve the problem, maybe Katrine can bring it to his attention.

Thanks

Hi s.22

I received an update from the Ministry today. They have explored the reasons for the delay and it is truly a case of available resources. The team in Cranbrook that you have been dealing with has limited resources and have had to prioritize a lot of urgent issues that involve public safety, and therefore unfortunately have not been able to address your concerns in a timely manner.

I have checked that they have all the information on their files that they need, and indeed they do. They ask for your continued patience as they work on their backlog. They will be contacting you as soon as they are able to. They have not been able to give us an estimated timeline.

It looks like there is nothing we can do to speed this up for you. I would suggest sending them some regular reminders so that they know to keep you as far up the priority list as possible.

Kind regards,

Angelika Brunner, Constituency Assistant

Hi Angelika
As mentioned during our conversation the other day regarding having the water license apportionment registered.
I am attaching a letter from my wife authorizing me to act on her behalf.
I have attached all the information and everything I have done to date with no results from the water rights branch or even indication when they are going to process the registration.
The initial request was back in December of 2017.
Would appreciate your assistance and if you have any questions please call me.
Please note this is not RDCK issue but an issue that I am following up my wife's behalf and using my personal e mail address.
Thanks

Hello Tracy

This is a follow-up on my phone message of Dec 8, 2017. In our process of Estate Planning we have noticed that the water license for s.22 was not apportioned to s.22 s.22

I am attaching a scanned copy of the November 6, 1995 letter from Robin Sturdy Water Allocation Technician indicating how he was going to proceed and apportion the water license, apparently this was not done.

Would appreciate if this can be corrected and done as per Mr. Sturdy's letter of November 6, 1995. My spouse s.22 is 1/3 owner of s.22 and would like to ensure that the property has the appropriate water rights to s.22 as apportioned by Mr. Sturdy.

I am attaching a scanned copy of the 2017 Property Tax Notice with her current address so once the adjustment is made to the water license she would then be able to receive the billing notice for the water license, which I understand will be due in early 2018.

We can be reached at s.22 for any additional information.

Thank you for your attention to this matter.

Bruce Fogg
Executive Assistant (Constituency)
Premier John Horgan, MLA
Langford-Juan de Fuca

Dear Sir:

Further to our meeting March 8, 2018, my email of October 15, 2018, and as requested in our telephone conversation October 23, here is a recap of our request for assistance in communicating with FLNRO and BC Hydro:

Provincial policy around access to Crown land in this area is as set out in the attached document "All Licensee Letter Gate." BC Hydro has apparently installed a gate on East Main without the requisite FLNRO approvals.

We have had concerns about illegal and irresponsible firearm misuse and other undesirable activity on East Main for some time, and would like to engage BC Hydro and FLNRO to test an industrial gate access control solution on the gate as an alternative to having it left open. Our primary concern is that as a result of open road policy the road will continue to such a problem that it is permanently closed. The rationale for our position is as set out in the attached article (OpenRoadsBCWF) published in the BCWF space of May/June 2018 Outdoor Magazine.

While East Main is a case in point, it is not a unique circumstance in the province, and I would like to have our industrial road access control solution given consideration as a potential solution at the Ministry level. It has been proven out on a haul main Timberwest gate since March 2017, and represents a marquis example of innovation in forestry practice bringing together resource sector industry, recreation sector non-profits, small business, and youth centered outdoor education initiative through our Caveman Engineers program of which it is work product.

For continuity I have attached an email from 2015 directed to BC Hydro that establishes the original contact. In addition to David Bruce (BC Hydro Reservoir Rights) from that email I have been in touch with:

Subject: FW: Cache Creek Diversion to Dairy Lake

Hi Lori,

Here are the responses to your questions regarding Cache Creek.

Hope this helps.

All the best,
Tristan

When was the diversion to Dairy Lake decommissioned and under what circumstances (i.e. nature)?

- This diversion (point of diversion 45884) has had years of repeated spring freshet complications. CN Railway is the holder of both licenses (C106482 and C129600) on this diversion.
- Staff believe that in 2012 the diversion structure was destroyed during a high water event.
- CN rebuilt the structure, which was then completely destroyed again during freshet in 2017.
- To add complications, the creek channel moved during 2017 freshet, and then the diversion ditch that is used to carry water from the diversion to the lake was damaged during fire guard installation during the Ashcroft fire in the summer of 2017.

Will the diversion be reinstated, and if so when?

- Yes the diversion will be reinstated as it is part of the condition of the water licence.
- CN Railway and the rancher that leases the appurtenant land to the water licence (lease holder) are aware of the issues, and will be coming up with a plan.
- FLNRORD hasn't had an update on progress from the license holder since last fall.

Who manages the weir on Dairy Lake, and what criteria is used for managing the flows out of the lake?

- The lease holder manages the dam on Dairy Lake on behalf of CN.
- The release is based on schedules set out in the water licences and needs for irrigation.
- The diversion of water to storage in Dairy Lake is licenced from November 1st to June 15th each year.
- Irrigation season is from April 1st to September 30th each year.
- Water can be released for irrigation as needed during the irrigation season.

Regarding the diversion referred to that is closer to Hwy 1 for irrigation purposes:

- There are three diversions lower on Cache Creek which have numerous licences on them. Attached is a spreadsheet that lists the volumes and timing windows for release.
- Staff note that all of these diversions have suffered the same fate as the Dairy Lake diversion. The licence holders have consistently been trying to fix the diversions since 2012 but every spring for the last two years they have been severely damaged. FLNRORD staff have been in contact with all of the licensees repeatedly for the last 3 years.

Also, please note that for future, the public can query water licenses and related information at any time using the Water Licenses Search Tool:
https://j200.gov.bc.ca/pub/ams/Default.aspx?

PossePresentation=AMSPublic&PosseObjectDef=o_ATIS_DocumentSearch&PosseMenuName=WS_Main

Subject: Cache Creek Diversion to Dairy Lake

Hello Tristan,

The Cache Creek that runs through the Village of Cache Creek has flooded in 2017 and 2018. Historically the creek has been diverted in two locations:

-one higher up where Cache Creek is diverted to Dairy Lake (also known as Tsotin Lake), and
-one closer to Hwy 1 where Cache Creek is diverted for irrigation purposes.

Could you please advise:

Diversion to Dairy Lake

-

1. When the diversion to Dairy Lake was decommissioned and under what circumstances (i.e. nature)?
2. Will the diversion be reinstated, and if so when?
3. Who manages the weir on Dairy Lake, and what criteria is used for managing the flows out of the lake?

Diversion for Irrigation

-

1. Who manages the diversion for irrigation purposes?
2. Are there limitations on how much water can be diverted?

Thank you so much Tristan!

Regards,
Lori

- Yes the diversion will be reinstated as it is part of the condition of the water licence.
- CN Railway and the rancher that leases the appurtenant land to the water licence (lease holder) are aware of the issues, and will be coming up with a plan.
- FLNRORD hasn't had an update on progress from the license holder since last fall.

Who manages the weir on Dairy Lake, and what criteria is used for managing the flows out of the lake?

- The lease holder manages the dam on Dairy Lake on behalf of CN.
- The release is based on schedules set out in the water licences and needs for irrigation.
- The diversion of water to storage in Dairy Lake is licenced from November 1st to June 15th each year.
- Irrigation season is from April 1st to September 30th each year.
- Water can be released for irrigation as needed during the irrigation season.

Regarding the diversion referred to that is closer to Hwy 1 for irrigation purposes:

- There are three diversions lower on Cache Creek which have numerous licences on them. Attached is a spreadsheet that lists the volumes and timing windows for release.
- Staff note that all of these diversions have suffered the same fate as the Dairy Lake diversion. The licence holders have consistently been trying to fix the diversions since 2012 but every spring for the last two years they have been severely damaged. FLNRORD staff have been in contact with all of the licensees repeatedly for the last 3 years.

Also, please note that for future, the public can query water licenses and related information at any time using the Water Licenses Search Tool:
https://j200.gov.bc.ca/pub/ams/Default.aspx?

Subject: Cache Creek Diversion to Dairy Lake

Hello Tristan,

The Cache Creek that runs through the Village of Cache Creek has flooded in 2017 and 2018. Historically the creek has been diverted in two locations:

-one higher up where Cache Creek is diverted to Dairy Lake (also known as Tsotin Lake), and
-one closer to Hwy 1 where Cache Creek is diverted for irrigation purposes.

Could you please advise:

Diversion to Dairy Lake

-

1. When the diversion to Dairy Lake was decommissioned and under what circumstances (i.e. nature)?
2. Will the diversion be reinstated, and if so when?
3. Who manages the weir on Dairy Lake, and what criteria is used for managing the flows out of the lake?

Diversion for Irrigation

-

1. Who manages the diversion for irrigation purposes?
2. Are there limitations on how much water can be diverted?

Thank you so much Tristan!

Regards,
Lori

Subject: FW: Metis Forest Allocation
Date: Thursday, November 29, 2018 8:26:24 AM

Hello MLA Davies,

I'm sorry for the delay in response to your enquiry. I'm not sure whether Minister Donaldson had the time to speak to you directly about the Metis Forest Allocation before the house rose.

Staff have been in contact with the Fort St. John Metis Society and have provided these notes on progress.

From Staff:

- The apportionment process is underway and will not conclude until likely 2019
- Caribou management strategies may significantly impact volumes that can be made available and there is also strong demand for volume from existing mills
- Discussions have occurred with both the Kelly Lake and Fort St. John Metis Societies
    - Both have expressed interest in forest tenure, although it appears there may be little experience or capacity in those groups to take on a major tenure.
    - The *Forest Act* does not provide for direct award of tenure to non-First Nation groups, so the Metis would not be specifically referenced in the apportionment.
    - **However, subject to available volume, there may be interest in providing a small competitive non-replaceable licence opportunity which these parties could bid on.**

Please let me know if I can be of any further assistance.

Thank you,

Tristan Jones

Hi,

I have spoken with Arianna.

She is going to confirm that Rick M has either dealt with this or delegated to staff.

Staff will prepare an IN for MO.

She will continue to cc us on the progress but we do not need to deal with anything more at this point. If anything, I will deal with it.

We are going to use this as a case study on how we can improve. I will contact DMO on this matter.

Subject: Keremeos Grift Mill Provincial Historic site
Date: Thursday, November 29, 2018 11:44:11 AM

Hi Emily,

MLA Larson is requesting a copy of the lease/terms of agreement regarding provincial funding for this site.

There has been some press and the Mayor has weighed in regarding "loss of funding". However, to MLA Larson's recollection the terms stipulated that provincial funding would decrease over time with an expectation that the site would become self-funding.

If this is the case, she wants to correct any misinformation regarding this issue with constituents.

Is it possible to provide her with a copy of the agreement or at least stipulate as to the terms regarding provincial funding. Or any other bullets that could be useful.

Thanks,
Tristan

Please note: This email message, including attachments, is intended for the addressee(s) only and may contain legally privileged information. Any unauthorized use, distribution, disclosure or reproduction is strictly prohibited. If you have received this email in error, please notify sender by return email and delete all copies.

Thanks for the response Christy. There is nothing really to report to RAPP or the CO service since technically the practice I'm describing is not illegal. It is a case in which our laws have not evolved as fast as technology and it appears that many hunters do not have a well developed sense of ethics. Perhaps the correct course of action is to define what acceptable methods of hunting are and then periodically update the definition rather than always playing catch up writing legislation to control new technologies. New technologies are appearing rapidly and our game managers do not have the time or resources to stay on top of them. Most people wouldn't even imagine the new tech being marketed to hunters. Search "smart rifle" or "forward looking infrared system" (FLIR) and you'll see what I mean.

To: Jones, Tristan FLNR:EX
Subject: silt from slide near Passmore

Hi Tristan,

A constituent has come in with concerns about excessive silt coming downriver from a landslide that occurred in the Spring of this this year near Passmore in the Slocan Valley. The slide went into the Little Slocan River somewhere in the area marked in the yellow circled area below (not sure the exact location). Since then, the river has been dragging a lot of silt into the Little Slocan River and the main Slocan River.

The constituent is concerned about the silt threatening the many years of efforts to preserve and restore fish in those rivers. The constituent reports that the water quality from the point downriver of the slide has been consistently poor all year, especially after rain (even just light rain), and that the silt is likely going to negatively affect fish habitat.

Is there anything you can tell me about whether the ministry has any concerns about or plans for this slide?
Are there any plans to mitigate the effects of the silt on the river and its fish?

Thanks for any information you can share.

Subject: Question from MLA Popham's Office

Hi Tristan,

I hope all is well with you! Have a constituent question I'm hoping you can help with – our CAs are off today they asked me to follow up and see if I can get the ball rolling on this.

The constituent has come up with a proposal where military helicopters are used to fight forest fires – his idea being that since they can apparently "re-fuel" with water more quickly and are more mobile they can stop small fires before they break out into larger fires (I've attached the letter he left after meeting with our CA). I assume there's probably a bunch of reasons why this isn't currently the case (including that we don't have jurisdiction over the military…) but could we try and get a response to him about his proposal? We're happy with bullets on our end that we can turn into a letter back to him, or if you're able to get a direct response to his letter that would also be excellent.

The constituent also referenced the four AirTractor amphibious airtankers referred to on this website, and would like to know if the Province leases these or owns them outright if you're able to confirm this? https://www2.gov.bc.ca/gov/content/safety/wildfire-status/about-bcws/wildfire-response/response/aviation

Sorry about this one – let me know if there's anything I can do on my end to assist

Subject: Question from MLA Popham's Office

Hi Tristan,

I hope all is well with you! Have a constituent question I'm hoping you can help with – our CAs are off today they asked me to follow up and see if I can get the ball rolling on this.

The constituent has come up with a proposal where military helicopters are used to fight forest fires – his idea being that since they can apparently "re-fuel" with water more quickly and are more mobile they can stop small fires before they break out into larger fires (I've attached the letter he left after meeting with our CA). I assume there's probably a bunch of reasons why this isn't currently the case (including that we don't have jurisdiction over the military…) but could we try and get a response to him about his proposal? We're happy with bullets on our end that we can turn into a letter back to him, or if you're able to get a direct response to his letter that would also be excellent.

The constituent also referenced the four AirTractor amphibious airtankers referred to on this website, and would like to know if the Province leases these or owns them outright if you're able to confirm this? https://www2.gov.bc.ca/gov/content/safety/wildfire-status/about-bcws/wildfire-response/response/aviation

Sorry about this one – let me know if there's anything I can do on my end to assist

Chris

s.22 ,

Yes, the Ministry is working to address these issues within a comprehensive review of, and revitalization of the forest sector. As with other technologies that are impacting other sectors, industry can outpace our ability to adapt with regulations and other controls. However, the impact Is real and government is working towards solutions.

For example things are moving quickly in the research field and government staff are working closely with organizations within BC like FP Innovations https://fpinnovations.ca/Pages/index.aspx , UBC and UNBC.

Thank you for checking in.

All the best,

Subject: Non-timber forest resources

Hello Tristan,

Thank you for the meeting on October 10th. I must say, though, that I left there feeling that I did not effectively communicate our opportunities with ntf resources. Once again may I refer you to this paper in the following link. It is now aged but is a strong indicator:

https://www.for.gov.bc.ca/ftp/Het/external/!publish/web/non_timber_forest_products/qcismf~1.pdf

It is of note that the above does not mention essential oils nor biochemicals, common also with all feasibility studies of our tree oils. In 2001, an RPF and I calculated the value of oils in the branches of a cedar tree to equal the values

of the wood. In 2013, I met with UBC Professor Emeritus (Chemistry) James Kutney and it was affirming to hear him rant about the forest industry only using fifty percent of the value of every tree they harvest! He has done $Ms research on tree essential oil biochemicals.

Subject: Stoney Creek Streamkeepers

Hello,

Our office has had an inquiry from one of our constituents, s.22 , from the Stoney Creek Streamkeepers. Do you have any information we can share with this group?

Q1: s.22 mentioned that when he tried to contact the Ministry to report this spill incident in Burnaby (https://www.burnabynow.com/news/toxic-runoff-from-murder-victim-s-torched-jeep-killed-dozens-of-young-fish-1.23408133), he learned that there's only two staff available at the emergency centre he called to report spills - and the person he talked to was based in Kamloops. He'd like to obtain more information on how the Ministry works to deal with emergency situations like this.

Q2: s.22 also states that, when there's work needed to be done for waterways, the local city normally needs to apply for permit approval from the Ministry, but the time and process can take months. It sometimes results in significant delays which may affect the fish habitat in more urgent situations. He provided an example: in February 2018, City of Burnaby applied for a permit from the Ministry to get a waterway redone for the salmon stream to go through in Ash Grove (Forest Grove) area, but it took months for the process and it was already too late for this year's salmon stream by the time the City got the permit.

Thanks in advance. I look forward to hearing from you.

Subject: Round up use in British Columbia's forests

Dear Hon. Doug Donaldson:

I am forwarding to you the letter below, written on your behalf regarding the use of Round up in British Columbia by Lorne Bedford, Manager, FLNR in Prince George. It was written Nov 19 and addressed to s.22 who posted it on Facebook and gave me permission to use it. I therefore copy this message to her with my comments.

As somebody who has been involved the last 20 yrs with the very serious issues associated with the use of Round up, I cannot help being profoundly shocked by the lack of knowledge shown in the letter. To tell us that because it is approved by Health Canada, it is safe to use is a great leap of faith. So was MSMA. a pesticide with arsenic supposed to fend off the beetle infestation in BC. It was de-registered after fierce claims of its safety against the new scientific evidence I had presented but could no longer be denied. This fiasco has left us with the legacy of 1/2 million dead trees full of arsenic contaminating the environment all the way into the smoke of forest fires. In 2011, I succeeded in forcing Health Canada to look at the toxicity of Round up (a mix of glyphosate and POEA which has its own toxicity) to Amphibians through a court case for which the agency had threatened to have me pay for the costs if I would lose. I won and Health Canada had to pay $12,000 for the expenses incurred. In reality, the agency made us all pay for their mistakes.

If one adds the way Health Canada has handled the tobacco issues, the asbestos issues, claiming safety of those products until they absolutely have to surrender to the evidence, and after inflicting undue hardships and even deaths to Canadians, one has to be very naive to believe in Health Canada's claim that Round up is safe if applied according to the label, -- something NOBODY monitors in BC--. I remember telling you of my experience in Smithers with my neighbour, a farmer using Round up on GMO canola, in documented windy conditions contrary to the label, and the impossibility of having a Health Canada inspector

come to look at his practices. As you may recall, I had explained to you that BC Environment does not monitor the application of pesticides, except for roadways and buffer zones for waterways.

Moreover, the BC Ministry of Environment is hardly present when it comes to pesticides; there is only one pesticide officer out of Prince George, who is unable to do his job for obvious reasons.

So the reality of the Big Wild West for pesticides in forestry (and agriculture) seems to escape your manager. The expression "Integrated Pest Management" is utterly devoid of meaning. BC Environment has not only completely gutted the number of its pesticide officers, it is using the controversial Professional Reliance model with PMPs (Pest Management Plans) which are handed to to the logging companies on a silver platter every 5 yrs. The so called public consultation does not allow the public to oppose the use of pesticides, or simply know where the pesticides will be applied, how much and when. Neither is there an account of how much and what has been applied over the years, and there is total ignorance of other pesticide usages for cumulative effects. Those PMPs are registered and are not appealable. It is simply defrauding the public of our voices in regard to the management of our Crown Lands.

Worse, the professionals supposedly consulting with the owning public have no interest in new scientific findings like Suzanne Simard's research on the interconnectivity of all forest flora. I presented the article to the Canfor silviculturist, arguing that calling aspens, willows, shrubs "weeds" was a misnomer for those important species for the regeneration of the forest but it fell on deaf ears. He preferred to retreat behind the approval of Health Canada. He also refused to provide me with data showing the efficacy of "chemical brushing".

The Prince George manager is also poorly informed on the damages from aerial spraying. Aerial spraying has been shown repeatedly to drift outside the intended sprayed areas, hence, relying on buffer zones for protection of waterways is rather problematic to say the least. It is even more problematic for those who live nearby, even kilometres away.

I strongly recommend that your staff familiarizes itself with the Monsanto Papers easily accessible on internet. The historic ruling in San Francisco of August 2018, exposed troubling evidence of manipulations of data by Monsanto to prove the "safety" of Round up, as well as the corruption of some high level bureaucrats of the US-EPA. The plaintiff, who had contacted Non Hodgkin disease from spraying glyphosate for 20 yrs on school grounds, was awarded $289 million recently revised to $78 million. The verdict is being appealed to day but the evidence is indisputable.

The last issue ignored by the manager is the relationship of the forest management aiming at destroying leaf species like aspens and cottonwoods and the forest fires we have been

witnessing recently. I would like to know if your Ministry has researched this area actively and come to some conclusions about it.

Further, I request that your Ministry produce a map of all glyphosate sprayed areas for the last 20 yrs in BC, with the amount used and methods of applications.
I also would like to be shown what is gained, if at all, by chemical brushing compared to no brushing and mechanical brushing.
I would like to see the results of inspected sprayed areas by your Ministry and/or BC Environment for the last 20 yrs
I would like to know how Amphibians are protected with aerial spraying.

As always, I look forward to your reply.

s.22

Dear s.22

Thank you for your email of November 7, 2018, regarding the use of herbicides in British Columbia's forests. Your email was referred to me and I am happy to respond on behalf of Minister Donaldson.

Chemical brushing treatments are used to improve survival and growth of trees, and to help ensure planted trees meet free growing standards required by the *Forest and Range Practices Act* (FRPA). If forestry companies choose to use chemical brushing, they must work under BC's *Integrated Pest Management Act* (IPMA), administered by the Ministry of Environment. Prior to obtaining an authorization under the Integrated Pest Management Regulation (IPMR) for large scale operations on public land, there must be consultation with the public and First Nations. It's important to note that since 1990, herbicide use has declined by 50 percent in British Columbia.

British Columbia's reforestation practices are updated when new scientific research and information becomes available. Recently, this saw the Ministry start to allow increased levels of aspen and broadleaves in managed stands throughout British Columbia, which will cause a further decline in chemical brushing. Use of superior orchard seed, improved nursery techniques and well-timed planting is also reducing the amount of brushing required. Seedlings are now quite often able to out-grow competing brush species on certain sites. These fast growing seedlings will reduce the number of brushing treatments. Authorization holders are required to meet the environmental protection standards listed in the IPMR such as setbacks from streams and lakes, no treatment zones surrounding water, and public notification (posting of signs). When aspen or other deciduous species are not the preferred species for reforestation, some areas within harvested openings are brushed manually with brush saws, or with herbicides. However, areas adjacent to creeks, streams and wetlands, do not get sprayed. These non-treatment zones, and unharvested wildlife tree retention areas within cutover areas, ensure biodiversity in our forests is maintained. Ministry of Environment staff is not aware of negative environmental impacts from the use of glyphosate in forestry when applied according to the label. Additionally, before a herbicide is allowed to be sold or used in Canada, it must be evaluated and registered with Health Canada's Pest Management Regulatory Agency (PMRA). The PMRA will only approve a pesticide if satisfied its use will not result in unreasonable adverse impacts.

Again, thank you for taking the time to express your views.

Sincerely,

Lorne Bedford, Manager

Chemical brushing treatments are used to improve survival and growth of trees, and to help ensure planted trees meet free growing standards required by the *Forest and Range Practices Act* (FRPA). If forestry companies choose to use chemical brushing, they must work under BC's *Integrated Pest Management Act* (IPMA), administered by the Ministry of Environment. Prior to obtaining an authorization under the Integrated Pest Management Regulation (IPMR) for large scale operations on public land, there must be consultation with the public and First Nations. It's important to note that since 1990, herbicide use has declined by 50 percent in British Columbia.

British Columbia's reforestation practices are updated when new scientific research and information becomes available. Recently, this saw the Ministry start to allow increased levels of aspen and broadleaves in managed stands throughout British Columbia, which will cause a further decline in chemical brushing. Use of superior orchard seed, improved nursery techniques and well-timed planting is also reducing the amount of brushing required. Seedlings are now quite often able to out-grow competing brush species on certain sites. These fast growing seedlings will reduce the number of brushing treatments. Authorization holders are required to meet the environmental protection standards listed in the IPMR such as setbacks from streams and lakes, no treatment zones surrounding water, and public notification (posting of signs). When aspen or other deciduous species are not the preferred species for reforestation, some areas within harvested openings are brushed manually with brush saws, or with herbicides. However, areas adjacent to creeks, streams and wetlands, do not get sprayed. These non-treatment zones, and unharvested wildlife tree retention areas within cutover areas, ensure biodiversity in our forests is maintained. Ministry of Environment staff is not aware of negative environmental impacts from the use of glyphosate in forestry when applied according to the label. Additionally, before a herbicide is allowed to be sold or used in Canada, it must be evaluated and registered with Health Canada's Pest Management Regulatory Agency (PMRA). The PMRA will only approve a pesticide if satisfied its use will not result in unreasonable adverse impacts.

Again, thank you for taking the time to express your views.

Sincerely,

Lorne Bedford, Manager

Resource Practices Branch
Ministry of Forest, Lands, Natural Resource Operations and Rural Development

Subject: RE: Contractor Sustainability Report
Date: Thursday, November 29, 2018 4:33:47 PM

Hi s.22

Sorry for the delay in responding.

Over the summer a facilitator worked with parties to identify where there is consensus on the 13 recommendations in the report that came out in May, looking at recommendations that should be acted on, and also assessing the costs and benefits of adopting recommendations on which there may be differing opinions.

Since then, staff have been working on policy option to present to the Minister later this month (this has been done within the larger forest industry context and with a coordinated approach taking into account other initiatives i.e Coast Revitalization, Pulp and Paper Coalition meeting, potential changes to FRPA, wildfire impacts etc.).

This is not a report that is sitting on a table collecting dust!

I realize that the status quo continues to be a heavy burden upon your family's business and I'm sorry I don't have anything more concrete for you right now. But, I wanted you to know that there is a lot of work going into this at many levels.

Tristan

To: Jones, Tristan FLNR:EX
Subject: Re: Contractor Sustainability Report

Tristan,

Thank you for the update, we will look for the press release since our level is probably not going to be included in the briefing. The timing of the release is after the ILA week-end which is interesting as this report is on the minds of many contractors in this province and would have been easily shared at this weekends convention.

If you have any future information on this issue, could you please update as as it would certainly be appreciated as this is our livelihood and a positive change for contractors is needed. Too many contractors are taking their equipment to auction and not enough people are attracted to working in this industry for the simple reason that the rates are not there.

s.22

To: s.22
Subject: Contractor Sustainability Report

s.22 ,

Thank you for taking the time to speak with me this morning.

Not every person who participated in the review process will be included in a briefing, however relevant forestry organizations and associations are scheduled to be briefed on the report and its recommendations next week. A press release will follow (probably mid to end of next week) outlining the recommendations and government's response and process for follow through.

I understand you will be away. But, if when you return, you have any questions. Please don't

hesitate to contact me. I am based in Smithers.

All the best,

Tristan Jones
Executive Assistant to the
Honourable Doug Donaldson
Minister of Forests, Lands, Natural Resource Operations and Rural Development

Dear sir,

I just received my notice of legal requirement for a ground water licence. I own a small farm s.22
s.22
Now, apparently, for no good reason that I can see, I will have to ask your government's permission, and apparently, pay rent to use water from a well that was drilled with private capital 60 years ago and has served three families with no problems for that time. This would apply to every small struggling farm in your constituency (and there are many) and add one more financial burden on an already struggling community. While I see advantages in regulating

water flow for large industrial users such as mines and pulp mills it is nothing more than an added tax burden on the small commercial business owner.

I would like to see you stand up for the small farmer and business owner.

Thank you so much for this Tristan. Further to our conversation yesterday, we have encouraged Mr. Singh to contact the Archeology Branch directly, however this additional response enables us to provide him with more information regarding the process, including the requirement to retain a professional archeologist.

Also, further to our telephone conversation yesterday, could you provide a description of the process for the Archeology Branch's investigation, and how long it might take.

Thank you!

Subject: RE: Permit inquiry

Hello Lynne,

As discussed yesterday, Mr. Singh has been advised of the process below by both the Archaeological Branch and a Compliance and Enforcement(C&E) officer. The C&E investigation is ongoing, however

Mr. Singh can pursue the Alteration Permit while the investigation continues.

The process to obtain a HCA Section 12 Alteration Permit is as follows:

1. Engage a professional archaeologist to review the situation and determine whether a given development will disturb an archaeological site;
2. If development will impact the site, and an HCA Section 12 Alteration Permit is required, the professional archaeologist will draft the permit application on behalf of the developer and submit the application to the Archaeology Branch;
3. The permit application is reviewed by the Archaeology Branch (revisions may be requested);
4. Once accepted, the permit application is referred to affected First Nations;
5. Considering First Nations comments on the permit application, the Archaeology Branch will either issue or reject the alteration permit.

The average time for the permit issuance process is 8-10 weeks.

I will keep you updated with any further information I receive regarding this issue.

Thank you,
Tristan

Subject: Jai Singh - Archaeology Data Request

Hello Tristan,

Jai Singh has reached out to MLA Tegart for assistance. Jai is the owner of the Esso in Lillooet and plans to build a fast food restaurant on the abutting vacant lot, that he also owns.

On June 4, 2018 Jai completed an archaeology data request, and received the confirmation below. He did not hear back regarding his request so two months later he proceeded with application for a building permit which was issued on August 15, 2018. He started earthworks shortly after. On October 4, 2018 Tal Fisher, from the Heritage Division of FLNRO did a site visit, and issued a Temporary Protection Order (stop work order).

Tal Fisher also advised that Jai needed to apply for a Site Alteration Permit prior to continuing work. Jai would like to make application for the Site Alteration Permit but is unable to get any information about the application process (how to apply, how long will it take, etc).

Could you please provide information on that Site Alteration Permit Application process as soon as possible. Jai has contractors waiting to go back to work. Thank you!

Regards,
Lori

Subject: Old Grist Mill
Date: Friday, November 30, 2018 8:41:26 AM

Hi Colleen,
I haven't heard from staff regarding the lease. However, here ae some bullets than have been provided to local media.
Hope this helps for now.

- The province is not cancelling funding to the Grist Mill and Gardens. Under a five-year funding agreement made with the current site manager, the Province has provided funding to offset operating costs; this is the final year of that assistance.

  • Under the terms of a lease to 2027, the Province grants the property to the current manager for one dollar. In return, the manager has the use of the publicly owned asset for his heritage agri-tourism non-profit venture. This provides the public with access to the significant heritage structures while allowing the site manager to realise his plan to connect visitors with the region's unique agriculture.

  • The province remains responsible for major repairs and has just contracted with structural engineers and the site manager to design and build two new vehicle bridges on the property and to inspect and specify repairs to the historic mill building.

All the best,
Tristan

Subject: Upper Nass Watershed Chiefs

Dear Doug
The Upper Nass Chiefs who are, Ted Mowatt-Djogaslee, Earl Muldon-Delgamuukw, Bill Blackwater-Niist, John Olson-Xhliiyemlaxha, Larry Skulsh-Wii Minosik, Roy Wilson-Luus and George Muldoe-Neekt would like to meet with you in the next two weeks.

The Chiefs are respectively prepared to "Tet's" you as Ax Jubit from the House of Dawamuuxw, but we appreciate and acknowledge your busy schedule and request a specific date that you can meet with the table within the next two weeks. The watershed table would like to discuss having a Gitxsan Land Use Plan done to ensure our resources and territories are protected. Our concern is that the slow process within government to come up with a new direction for strategic land use planning in B.C. will result in more years of the territories being pillaged and water diminished to the detriment of the Gitxsan people and our wildlife, air, etc. A strategic land use plan was developed 12 years ago and since then there is no new plan with changes based on relations and reconciliation and if it takes another 12 years, what will be left of on the territories.

The chiefs say that the Environmental Strategic Initiative ESI should go hand in hand and that government should contract ESI to do the land use work for the Gitxsan as there are no resources available from MIRR, BCTS or MOTI and the MIRR representatives and BCTS representatives that

come to the table do not have the power to change legislation they are guided by. BCTS sells blocks at no cost to them and these funds do not go back into forestry but into an administrative fund and MOTI has not come to the table to be a part of this process and in good faith should.

While FLNRO views the Upper Nass land use development pressure as "relatively low", we strongly disagree and do not agree to being compared to areas such as Golden Triangle (mining) and central interior (forestry). The Chiefs' territories are our Hani Tokxw, it is our livelihood, our table.

In closing, ESI and Watershed should go hand in hand and government should contract ESI, who have received 30 million dollars in block funding as opposed to fiscal as Gitxsan are subjected to, Gitxsan should be treated the same.

We look forward to hearing from you and getting together in the next two weeks and look forward to finding a solution and access to resources for a Gitxsan Land Use Plan, 33,000 sq. km. (as suggested by a colleague Kevin Stevens) and work to start in 2019.

Hi Tristan,

Does this sound ok? I am assuming they will going to the Revelstoke Caribou Maternal Penning Project?

Hi s.22

Our liaison at the Ministry of Forests, Lands, Natural Resource Operations and Rural Development (FLNRORD) has been able to give us an update on the status of the 3 remaining Selkirk caribou.

I have been informed that the Selkirk caribou have been matched with a small herd in another part of the Kootenay region/cross border. The Selkirk does and the other Caribou will be combined. These 6 Caribou will be relocated to the Revelstoke area where they will be acclimatized to the slightly different environment and to socialize before being released, in the hope that they will mate and be protected in an effort to increase the herd's numbers.

I hope that is the information you're looking for.

Kind regards,

Angelika Brunner, Constituency Assistant

> I'm requesting a meeting on behalf of the Canadian Men's Health Foundation: Wayne Hartrick (CEO) will be in Victoria on **Wednesday, December 5th and is hoping to meet with a political staff person in your office.**
>
> CMHF is running programming specifically geared to men in rural areas – and so far their pilot programs have been quite successful.
>
> Thank-you for your time,
>
> Eden Toth
