Figure 1. The effect of the concentration of the solution on the rate of the reaction. The reaction was carried out at 25°C in a 0.1 M NaOH solution. The concentration of the solution was varied from 0.01 to 0.1 M. The rate of the reaction was measured by the change in the absorbance of the solution at 410 nm. The data were fitted with a linear regression line. The slope of the line was 0.012 min⁻¹ M⁻¹. The rate of the reaction was 0.0012 min⁻¹ at 0.1 M.

 Golden Management Unit

Dear Mr. & Mr. Batten:

Reference is made to your operations in the above mentioned Management Unit.

The period January 1, 1993, to December 31, 1997, has been designated as your five year cut control period.

Your harvest in any one year of your cut control period need not be within fifty (50%) percent of your allowable annual cut, but your harvest in the five year cut control period must be within ten (10%) percent of your total allowable cut for that period. Notwithstanding the foregoing, contractual provisions under previous agreements shall be honoured. Any overcut carried into this cut control period from a previous one will be considered as a harvest in this period, and your aggregate cut position must be within ten (10%) percent of your total allowable cut for this cut control period.

Our records indicate that your allowable annual cut and production record since the start of the above-mentioned cut control period are as follows:

		Volumes in Cubic Metres					
		1993	1994	1995	1996	1997	Total
Allowable annual cut at Dec. 31	Crown	434	434	434	434	434	2,170
	Private	50	50	50	50	50	250
	Total	484	484	484	484	484	2,420
Adjustment:							
a) Overcut	Undercut	0	0	0	0	0	0
b) Other							
Allowable annual rate of cut		484	484	484	484	484	2420
TOTAL CUT	Crown	1,728					
	Private	0					
	Total	1,728	(173)	(173)	(173)	(173)	(2,420)

Please note the actual volume cut and billed between January 1 and December 31 of 1993 was 1,826.0 cubic metres for the Crown portion. If your records do not agree with this volume, please advise.

This letter constitutes a statement for the purposes of the cut control provisions of this licence.
 See page 2 for additional conditions.

1. The total volume billed in 1993 was 1,826.0 cubic metres for the Crown portion of Woodlot Licence W0456. However, with the utilization policy introduced May 1, 1990, grade 5 and grade 6 volumes are deducted, as well as two (2%) percent to recognize the endemic portion of grade 3.
2. You should plan your operations to approximate the figures indicated in brackets to bring your cut into balance with your allowable annual cut.
3. There are 692 cubic metres remaining to be harvested during the remaining four (4) years of your current five year cut control period.

SUBJECT: WL 456
Bob,

I discussed your problem with Bob Harding. He agrees with the approach that we discussed.

s.22

You should place one legal notice in the local paper stating that a revision has been made to the woodlot licence, the nature of the revision, and a time period for the revision to be available for viewing by interested parties. You may also want to publish a cancellation notice for WL 457 at the same time (for PR).

I'm still working on the land ownership issue.

Thanks for keeping things so interesting.

SUBJECT

Woodlot Allotment

ATTENTION

Les J.
Larry P. V.
Bob.

Agree with
start proposed
action. We
should proceed
asap with
clearance.

Les

After reviewing the photos and maps of the
LaFontaine area and Mt 7 it would appear that
we could fit in two woodlots. Area at LaFontaine
is about 480 ha. Area @ Mt 7 is about 246 ha.
A clearance would sort it out exactly.

See attached maps/photos.

Considering the amount of deciduous - Es & Rock in the
two areas I'd think we'd be within our ~1700 m²
woodlot short fall of 6500 m³.

Once the T. Sale of Mercer's has expired - we
can look at deleting all the T. Sales we've established
in favour of a Woodlot. We - F.S. will still have
some obligations on Herchel's T. Sale ^{reforestation} and likely Mercer's ^{landscaping}.

With the new SB/ST foresters coming on and the
SBEP stretch for the summer/fall - I'd recommend we wait
until winter prior to advertising them so it's not taking
up a lot of time. All the sales here will be out of SBEP stretch plans.

Should have an updated forest cover map in order
to calculate an accurate AAC.
