Hi Steve,

Yeah, at this point there is 0% chance of a Sept 5th start date for s.22 I am working hard toward a Sept. 11 start date if that works? I realize this might complicate things on your end – thanks for bearing with the contract process.

At this point it's between me, Chapter 6 of our acquisition process and the finance department. I'll keep you up to date.

Cheers,
Craig

Hi Craig, just checking in, to see how things are going.

Two questions:

(1) Do you have any further clarity around start date for s.22 given the details you'd shared on the phone the other day, regarding the length of time to get paperwork done at your end?

(2) Do you need anything from me, at this time, to help you out?

Thanks,
Steve.

Hi Steve,

Sounds great to me. I'm glad^{s.22} is on deck.

Let me know what time works for you next week and I'm there. My schedule is free with the exception of Monday morning, so send me an invite for a time/place that's good for you and I'm there.

Cheers,
Craig

Alright!

Steve,^{s.22}
s.22

I ****believe****^{s.22} can start Sep 5th. I will confirm with him and get back to you once I've heard back.
s.22 so I cannot promise exactly when I will be getting back to you, only that I will be doing so.

On the^{s.22} engagement, please let me know the desired duration of this?

Craig, lets you and I get together super-briefly next week for a coffee to make sure I understand the full requirements (time-line, duration, technical stack, etc, etc) and then I can propose some solutions.

Thanks,
Steve.

Excellent!

And I now have permission to contract 3-4 resources between now and March 31. Same requirements as we've had before (like ^{s.22} ability to work on-site, sr. .Net Developer, etc.).

We would like to have ^{s.22} join us for a September 5th start. Is that possible? If so, I'll figure out how we can procure through Flextrack (haven't done that before) and set that up.

And, do you have anyone else who might fit our requirement? If so, let Craig know (cc'd here) and you and he can chat. ^{s.22}, but will be monitoring email and phone calls.

Steve

Hi Steve, We now have Flextrack access, I've logged into the system and am familiarizing myself with it.

The 7-10 days email that I got yesterday must have been some automated thing.

Either that or ^{s.22} the Flextrack administrator has managed to achieve time-travel. :)

So, we're now on the system. Let me know what you need to see from your end, in order for me to best help you out.

Steve.

Thanks Steve, even nebulous continuation of the conversation is appreciated!

We have registered with Flextrack, and I have executed the MSA. I was told yesterday that we will have our login to Flextrack within 7-10 days.

Thanks,

Steve.

Hi Steve,

I hate to keep giving you these nebulous answers, but such is my life at the moment. I am meeting with Exec today to get decisions so should know more then. But I am very confident that we will be approved. I will get back to you ASAP and let you know where we land.

Did you have success with getting Semaphore on our procurement lists?

Steve

Hi Steve, just checking in to see if there is more certainty around your sw team needs. IN particular it would be great to know if there is a start date and desired duration for a ^{s.22} engagement.
