Thanks Susannah, it would be great if you could share that with him. I'll see him in the meantime.

Hi Geoff – the reference to a two-phased approach is laid out in all of our public materials including the CEAA/EAO Environmental Assessment report. I may see Evan on Wednesday when I am in Victoria and could speak to him directly if helpful. Page 19 of our EAC pasted below.

“The main processing or production units of an LNG facility, where natural gas is converted to liquid, are referred to as “trains”. The Proponent anticipates that the proposed Project would be constructed in phases, with the first phase consisting of two trains and a further two trains to be added in subsequent phase(s). If an EAC is issued, and other regulatory approvals are received, construction of the proposed Project would start in 2015. Construction of the first phase would be completed in approximately four to five years following issuance of permits, with the subsequent phase(s) being developed as required by market demand.”

Susannah, thanks for your note to Dave Nikolejsin regarding LNG Canada's intention to do a second FID before moving two Phase 2 of your project. Is there a public location where that information can be viewed? If not, may I share your e-mail with the Green Party Caucus?

Geoff
