

Dataset	
Dataset Description: This dataset was created using the submitted date (date the application was submitted to the RTB and paid). The date ranges for the timeline of orders of possession in cases where the parties reach a settlement or if an order for landlord's use is issued can vary on a case-by-case basis. Unfortunately, the RTB's dispute management system does not track this data.	
Orders of Possession	
Decision Date	The date the decision was made for the application
Request_ID	The identifier of the dispute
Applicant	The dispute either is Landlord or Tenant application
Dispute_Codes	The internal code of the dispute
File Title	The internal name of the order of possession

Issue Outcome	
The new system introduced in February 2020 tracks the outcome of arbitrator's decisions at the individual dispute code/claim level. Because of this, the timeline of an order of possession is recorded at the dispute code/issue level (see "Issue Outcome" sheet). The Request_ID column in "Orders of Possession" and "Issue Outcome" will allow you to link the outcomes of individual dispute codes to the dispute file. For applications with more than one dispute code in "Main Dataset," there will be entries in "Issue Result" for each dispute code.	
Request_ID	The identifier of the dispute
Decision Date	The date the decision was made for the application
Dispute_Codes	The internal code of the dispute
Outcome	The outcome of each dispute code following an arbitrator's decision, including the timeline for the order of possession if applicable.
