

Asthma, Prevalence Measure

Age 5 to 54

Fiscal Year	Region	Health Region	Population	Gender	Count	Rate	Lower CI	Upper CI
2013	BC	BC	3,068,890	T	329,127	10.72	10.69	10.75
2013	HA	01 Interior	441,468	T	49,559	11.23	11.13	11.33
2013	HA	02 Fraser	1,129,033	T	129,351	11.46	11.39	11.53
2013	HA	03 Vancouver Coastal	794,805	T	71,503	9	8.93	9.07
2013	HA	04 Vancouver Island	444,662	T	53,523	12.04	11.94	12.14
2013	HA	05 Northern	203,173	T	22,235	10.94	10.8	11.08

1. Beginning in 2001/02, diagnostic coding of hospitalization data changed from ICD-9 to ICD-10.
2. Complete capture of drug utilization data began April 1, 1996, with the implementation of Pharmanet. From 1992/93 to 1995/96, data were collected through the Prescription Drug Information System (PDIS).
3. Variability of counts due to small numbers in individual age/sex cells, or in totals, for either numerator or denominator. The following designations are used to identify the degree to which variability may affect single year measures and trend analysis:
- A - Low variability (co-efficient of variation (CV) in range $0.0 \leq CV \leq 16.5$). Year to year variation should be limited. Single year measures are reliable.
 - B - Moderate variability (co-efficient of variation (CV) in range $16.6 \leq CV \leq 33.3$). Year to year variation may be moderate.
 - C - Extreme variability (co-efficient of variation (CV) $CV > 33.3$). Year to year variation may be extreme. Single year measures are unreliable.
 - U - Co-efficient of variation is not available.

es, 2013 to 2013

de Rate per 100				Age Standardized Rate per 100				
Upper CI	CV	Variability	Rate	Lower CI	Upper CI	CV	Variability	
10.76	0.17	A	10.72	10.69	10.76	0.18	A	
11.33	0.45	A	11.28	11.18	11.38	0.46	A	
11.52	0.28	A	11.47	11.4	11.53	0.28	A	
9.06	0.37	A	8.98	8.91	9.05	0.39	A	
12.14	0.43	A	12.13	12.02	12.23	0.45	A	
11.09	0.67	A	10.98	10.83	11.13	0.69	A	

1995/96, drug utilization data is primarily for age group 65+.

may cause year to year volatility in rates and make trends difficult to interpret or identify.

ls.

le year measures and trends should be reliable.

o. Single year measures and trends should be interpreted with caution.

res and trends will be unreliable.

Variable Name: LOPG050

Concept: Chronic condition - (G)

Universe: 15 < DHH_AGE < 75 and GR_N01A = 2 and LOPG020 = 1 or LOP_030 =

Note: Based on LOP_050. See documentation on derived variables.
