## 1.0 Project Purpose

The purpose is to improve both the access to, and quality of, Medical Imaging (MI) services in British Columbia.

### 1.1 Strategic Alignment

- The Minister of Health has identified wait list reduction as a Ministry priority.
- The Ministry has approved the fulfillment of the 18 recommendations produced by the Advanced Imaging Strategy Project (Phase I).

## 2.0 Background

The Advanced Imaging Strategy Project, Phase I, was initiated in January 2016 to (i) address wait time and access issues for magnetic resonance imaging (MRI) and (ii) to undertake policy reviews and provide recommendations to support accessible, timely and high quality advanced imaging services. The in-scope imaging services included MRI, computed tomography (CT) and positron emission tomography (PET). The project had two key objectives:

- Realize an increase and sustainment of MRI volumes between fiscals 15/16 and 18/19, and
- Provide recommendations to support accessible, timely and high quality advanced imaging services into the future. The recommendations addressed (i) governance, funding, and service models, (ii) ways to improve quality and appropriateness, and (iii) the IM/IT supports required to help enable service delivery.

An increase in MRI volumes was realized during the project and continues to improve. A series of 18 high-level recommendations were generated relating to access, quality, standardization and long-term sustainability. While the original focus was on advanced imaging, most recommendations pertained to medical imaging in general. These recommendations have received both Ministry and Health Authority (HA) Executive support. Phase II of this work, called the Medical Imaging Access and Quality Improvement (MI-AQI) project, will operationalize these recommendations within the context of four streams of work with a broadened scope which includes all medical imaging. The mapping of Phase II work streams to Phase I recommendations is listed in Appendix A.

### 3.0 MI-AQI Objectives By Phase

The objectives of the Medical Imaging Access and Quality Improvement (MI-AQI) project are:

- Reduce the wait times and improve geographic access to medical imaging services (all modalities)
- Improve quality and appropriateness of medical imaging services
- Improve business processes for medical imaging services
- Implement a framework for the governance, funding and service delivery models which promotes long-term sustainability

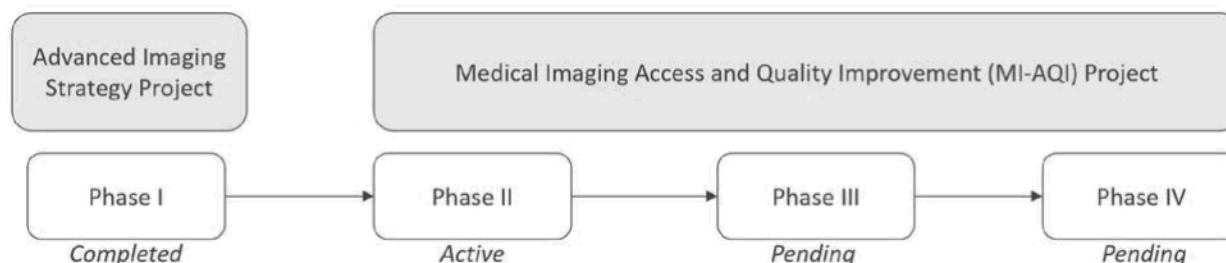

Image 1. Projects and phases

The table below provides a summary of the MI-AQI project phase objectives.

MI-AQI Project Phase	Phase Objectives
<b>Phase II</b> (Sept '17 to Mar '19)	<ul style="list-style-type: none"> <li>• Realize short-term access improvement</li> <li>• Begin monitoring quality of care and performance</li> <li>• Establish wait-time benchmarks and tracking capabilities</li> <li>• Implement quality and appropriateness interventions</li> <li>• Recommend models (governance, funding and service delivery)</li> </ul>
<b>Phase III</b> (Apr '19 - Mar '20)	<ul style="list-style-type: none"> <li>• Realize long-term access improvement (service volumes and location)</li> <li>• Improve the patient experience</li> <li>• Wait list management (including the completion of the KPI implementation)</li> <li>• Define a plan to realize models (governance, funding and service delivery)</li> </ul>
<b>Phase IV</b> (Apr '20 - Mar '21)	<ul style="list-style-type: none"> <li>• Execute the plan to realize models (governance, funding and service delivery)</li> <li>• Promote continuous improvement and sustainment activities for access and quality improvement</li> </ul>

Table 1. Phase objectives

An overview of the outcomes for each phase of the MI-AQI project are listed in Appendix B.

The delivery details for Phase II are listed in section 5.

### 4.0 MI-AQI Critical Success Factors

The success of the MI-AQI project is dependent upon the following items being in place:

- Executive support from both the Ministry and HAs for the project and what it aims to deliver
- Support, participation and partnership with HAs, practitioners and other key stakeholders
- Availability of key project resources (business leadership, SMEs, PM, HA & working group members)
- Health system resources (people and funding) required to implement the initiatives

For each phase, the project will be successfully completed when the phase objectives are achieved.

## 5.0 Phase II Scope

### 5.1 In Scope

The following tables depict the deliverables, artefacts and outcomes for Phase II.

#### 5.1.1 Workstream Delivery Summary

#	Workstream	Delivery Summary
1	Medical Imaging Access and Service Distribution	<ul style="list-style-type: none"> <li>Policy definition and implementation (short term access improvement, rapid access to imaging (CT, ultrasound), pooled referrals/first available slot scheduling)</li> <li>Service configuration framework and roadmap</li> <li>Pediatric access strategy</li> <li>Wait time management framework</li> <li>Prospective reporting implementation (CT, MRI)</li> <li>Retrospective reporting implementation (all others)</li> </ul>
2	Governance, Funding and Service Model	<ul style="list-style-type: none"> <li>Development and approval of proposed models</li> </ul>
3	Medical Imaging Business Processes	<ul style="list-style-type: none"> <li>Study on expanding image exchange (DI-R)</li> <li>HA commitment for ordering, booking and access results</li> </ul>
4	Quality of Care and Performance Monitoring	<ul style="list-style-type: none"> <li>Policy definition and implementation (medium stop requisition review process implementation, choosing wisely implementation, key performance indicators, radiology consult service)</li> <li>Utilization management function implementation</li> </ul>

Table 2. Workstream summary

#### 5.1.2 Workstream Delivery Details

Work Stream #1. Medical Imaging Access and Service Distribution

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion
<b>Short Term Access Improvements</b> (a) Set expectations for short term access improvement (b) Define linkages of medical imaging to primary care networks and specialized services (c) Monitor HAs as they continue to increase MRI service volumes as per Phase I	Policy component written and issued	Nov '17	Mar '18
	Policy component implemented	Apr '18	Mar '19
<b>Long Term Access Improvements</b> (d) Develop evidence-based service configuration framework and roadmap (e) Develop a strategy for pediatric access to medical imaging	Service configuration framework Service configuration roadmap	Jun '17	Mar '19
	Pediatric access strategy	Jan '19	Mar '19
<b>Enhance Wait Time Tracking</b> (e) Develop and implement enhanced wait time measurement framework	Wait time measurement framework	Nov '17	Mar '18
	Prospective reporting for CT and MRI implemented	Nov '17	June '18
	Retrospective reporting for all other modalities implemented	Nov '17	Mar '19
<b>Rapid Access to Imaging (CT and ultrasound)</b> (f) Establish rapid access services - access for CT and ultrasound for urgent care patients (to avoid outpatient ED)	Policy component written and issued	Nov '17	Mar '18
	Policy component implemented	Apr '18	Mar '19
<b>Pooled Referrals/First Available Slot Scheduling</b> (g) Establish and implement referrals/scheduling approach (where feasible)	Policy component written and issued	Nov '17	Mar '18
	Policy component implemented	Apr '18	Mar '19

Table 3. Work stream #1.

## Work Stream #2. Governance, Funding and Service Model

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion
<b>Governance Model</b> (h) Undertake analytics and policy development to produce the proposed governance model (i) Acquire decision/direction for the proposed governance model	Proposed governance model Approval for governance model	Apr '18	Mar '19
<b>Funding model</b> (j) Define a value-based funding model	Value-based funding model	Apr '18	Mar '19
<b>Capital Acquisition</b> (k) Define a capital planning/funding model for strategic medical imaging equipment purchases	Capital planning funding model	Apr '18	Mar '19

Table 4. Work stream #2.

## Work Stream #3. Medical Imaging Business Processes

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion
<b>Expand Image Exchange (DI-R)</b> (l) Acquire funding and complete a feasibility study regarding medical imaging expansion to community imaging providers	Funding received for feasibility study Feasibility study results	Sept '18	Dec '18
<b>Supports for ordering, booking and accessing results</b> (m) Seek HA commitment for business process improvement (through IMITSC)	HA commitment (through IMITSC)	June '18	June '18

Table 5. Work stream #3.

## Work Stream #4. Quality of Care and Performance Monitoring

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion
<b>Medium Stop Requisition Review Process Implementation</b> (n) Develop MRI/CT medium-stop approach and scope for implementation	Policy component written and issued	Nov '17	Mar '18
	Policy component implemented	Apr '18	Mar '19
<b>Choosing Wisely Implementation</b> (o) Develop & implement choosing wisely in community-based care (p) Develop & implement choosing wisely in HA facilities	Policy component written and issued	Nov '17	Mar '18
	Policy component implemented	Apr '18	Mar '19
<b>Key Performance Indicators</b> (q) Report and monitor KPIs	Policy component written and issued	Nov '17	Mar '18
	Policy component implemented	Apr '18	Mar '19
<b>Radiology Consult Service</b> (r) Establish Radiology Consult Service to provide input on ordering best first test	Policy component written and issued	Nov '17	Mar '18
	Policy component implemented	Apr '18	Mar '19
<b>Utilization Management Function</b> (s) Define and implement utilization management function	Utilization mgmt function implemented	Apr '18	Mar '19

Table 6. Work stream #4.

## 5.2 Out of Scope

- Interventional radiology services
- Physician compensation within current funding model (e.g. fee item amounts)
- The management and delivery of MI services

## 6.0 Phase II Project Timeline

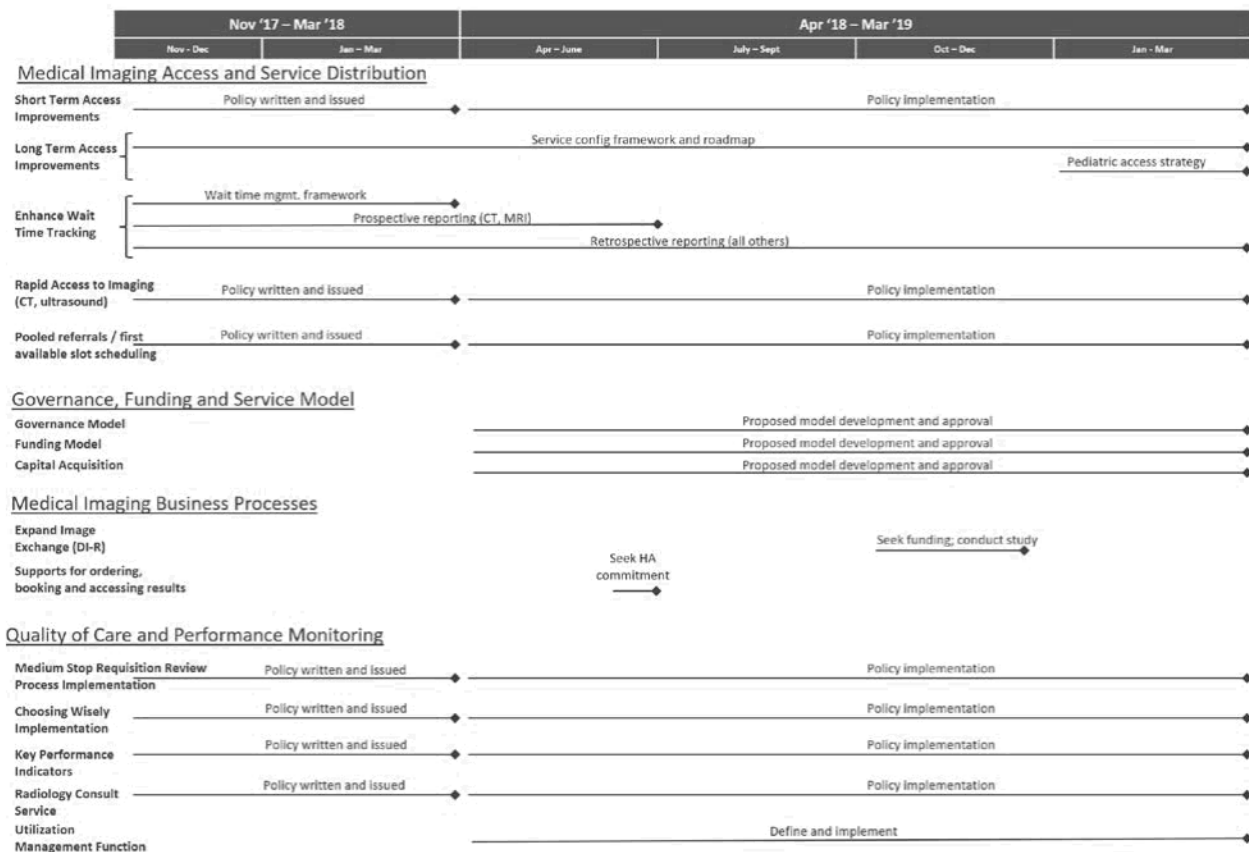

Image 2. Timeline

## 7.0 Phase II Stakeholders

Interests, Expectations, Concerns	Stakeholder(s)
<ul style="list-style-type: none"> <li>Interested in an accessible and effective medical imaging service for referring practitioners and patients</li> </ul>	<ul style="list-style-type: none"> <li>Patients</li> <li>Radiologists</li> <li>Referring practitioners</li> </ul>
<ul style="list-style-type: none"> <li>Impact of proposed changes to health service delivery system within the current model</li> </ul>	<ul style="list-style-type: none"> <li>HAs</li> <li>Radiologists and referring practitioners</li> </ul>
<ul style="list-style-type: none"> <li>Change to the models for governance, funding and service</li> </ul>	<ul style="list-style-type: none"> <li>CPSBC (DAP)</li> <li>DOBC</li> <li>HAs</li> <li>MSC</li> <li>Private clinics</li> <li>Other colleges</li> <li>Radiologists and other practitioners that perform MI</li> <li>Unions</li> </ul>
<ul style="list-style-type: none"> <li>Impact to medical imaging purchasing and deployment decisions</li> </ul>	<ul style="list-style-type: none"> <li>Equipment vendors</li> <li>HAs</li> <li>HSSBC</li> <li>Ministry Capital Services</li> </ul>
<ul style="list-style-type: none"> <li>Impact of implementing new IM/IT tools and processes</li> </ul>	<ul style="list-style-type: none"> <li>DOBC – technology office</li> <li>IMITSC</li> <li>Referring practitioners</li> <li>Radiology service providers</li> </ul>
<ul style="list-style-type: none"> <li>Regular information on project status</li> <li>Project fulfills medical imaging vision</li> <li>Project delivery on-time and on-budget</li> </ul>	<ul style="list-style-type: none"> <li>Assistant Deputy Minister</li> <li>Associate Deputy Minister</li> <li>Deputy Minister</li> </ul>

Table 7. Stakeholders

## 8.0 Phase II Approach

The MI-AQI project is the next step after the Advanced Imaging Strategy Project which achieved its intended outcomes on time and on budget. A similar approach for staffing will be used in which the project is governed by Ministry executive and staffed with both Ministry FTEs and consultants (for project management and subject matter expertise).

Reporting will be comprised of monthly project status reports to the Project Sponsors and Project Director and reporting to the steering committees and boards as required.

At the conclusion of Phase II, the Project Director will seek approval to perform the detailed planning for Phase III, followed by approval and execution activities. This cycle will then be repeated for Phase IV.

## 9.0 Phase II Budget

The Phase II budget includes:

- Funding for staff and consulting labour from existing, funded positions from within the Ministry

The Phase II budget does not include:

- Funding for any tools, equipment or people required for the HAs to meet their commitments. Where applicable, FCS is anticipated to provide this funding to the HAs

The budget will be managed by the Project Sponsor, Tricia Braidwood-Looney.

## 10.0 Phase II Project Resources, Governance

The following diagram depicts the proposed project resource structure.

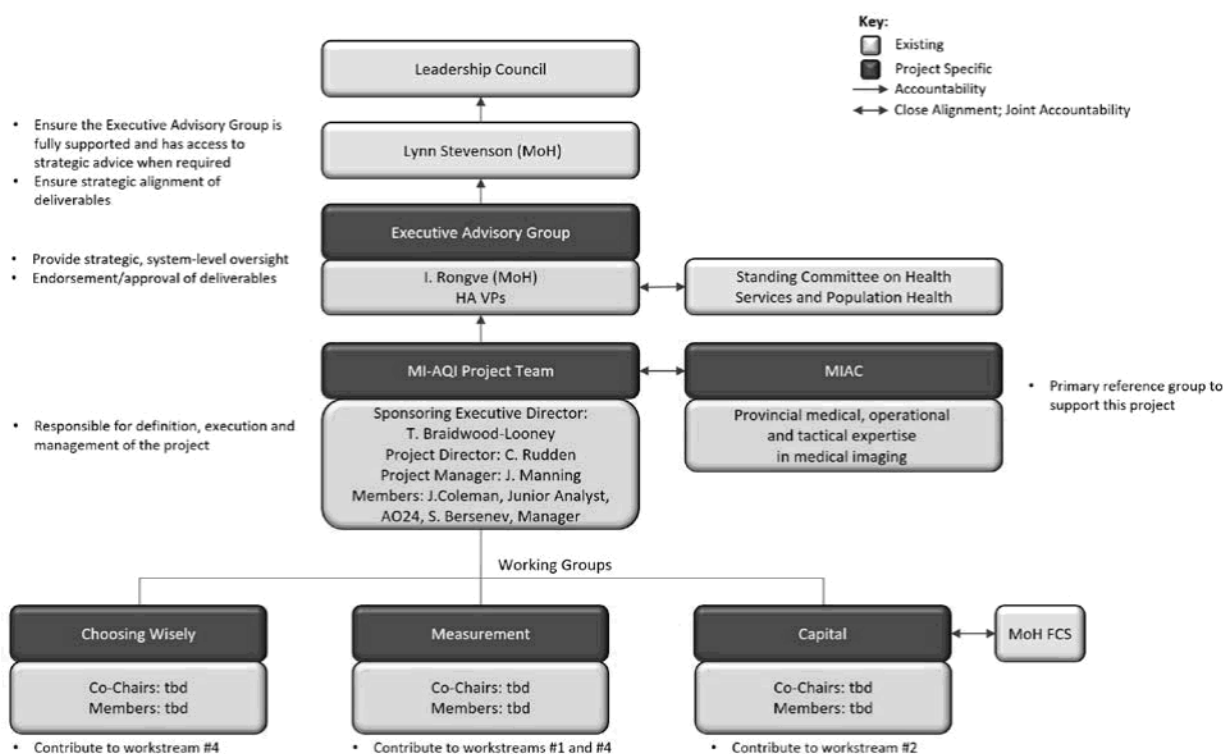

Image 3. Resources

### 10.1 Role of Governance, Executive and Working Groups

#### Lynn Stevenson

- Ensure strategic alignment of deliverables
- Endorsement/approval of recommendations

#### Standing Committee on Health Services and Population Health

- Advise on strategic alignment of deliverables
- Advise on operational feasibility/impact of recommendations

#### Executive Advisory Group

- Provide strategic, system-level review of products prior to standing committee submission
- Ensure that the project team and working groups are fully supported and have access to strategic advice when required
- Endorsement/approval of recommendations
- Advise on the need for working groups and their membership

#### MIAC

- Key reference group to support this project
- Nominate working group members
- Lead or participate in quality improvement activities

## Working Groups

- Together with the project team, produce artefacts and deliverables

## 11.0 Phase II Assumptions and Constraints

### 11.1 Assumptions

- Each HA, stakeholder and the Ministry will be able to contribute representatives to the steering and working committees
- Resources to support the project secretariat function will be available and in place
- Project governance bodies will provide timely decisions to advance the project according to timelines

### 11.2 Constraints

- Availability of sufficient funding to enable the delivery of the increase in service volumes
- Availability of people and resources in the HAs and Ministry to undertake quality improvement work to implement Choosing Wisely

## 12.0 Phase II Risks

Project Risks		
#	Description	Impact
1	Timely decision making and approval	The deliverables not be realized in the current project timeframes.
2	Insufficient Ministry and stakeholder commitment of funds and people	Work on many key deliverables cannot proceed.
3	Stakeholders do not accept nor commit to changes	Project goals will not be realized.

Table 8. Risks

### 13.0 Appendix A. Phase II Work Streams; Phase I Recommendations

The following table maps the workstreams of Phase II of the Medical Imaging Access and Quality Improvement project to the recommendations produced by the Advanced Imaging Strategy Project (Phase I).

Phase II Work Stream	Phase I Recommendations
Medical Imaging Access and Service Distribution	<ol style="list-style-type: none"> <li>1. Continue to improve MRI access to meet the needs of the population.</li> <li>2. Continue to improve geographic access to MRI services.</li> <li>3. Replace existing MRI machines in a timely manner to ensure equipment remains safe, reliable and technologically current</li> </ol>
Governance, Funding and Service Model	<ol style="list-style-type: none"> <li>4. Develop options for a governance model.</li> <li>5. Develop options to establish provincial oversight for advanced imaging.</li> <li>6. Develop an operational funding model for advanced imaging using a value-based funding approach.</li> <li>7. Use a new provincial oversight body to develop a new approach to support effective provincial service planning and prioritization of advanced imaging equipment needs.</li> <li>8. Determine changes required to the medical imaging service model to support primary / community care and perioperative care.</li> </ol>
Medical Imaging Business Processes	<ol style="list-style-type: none"> <li>9. Improve supports for ordering clinicians to order the most appropriate test.</li> <li>10. Implement improved patient-centric appointment scheduling and communications.</li> <li>11. Improve efficiency of ordering with standardized requisition forms and electronic processes</li> <li>12. Implement standardized electronic care-giver order entry province-wide, with embedded decision support for advanced imaging, using a phased approach.</li> </ol>
Quality of Care and Performance Monitoring	<ol style="list-style-type: none"> <li>13. Develop a comprehensive provincial Quality Framework for medical imaging in B.C.</li> <li>14. Implement Choosing Wisely for medical imaging in B.C.</li> <li>15. Implement standard Key Performance Indicators.</li> <li>16. Adopt the Provincial Service Configuration Guideline for B.C.</li> <li>17. Provide ongoing support for Medical Quality Initiatives.</li> <li>18. Develop a communications plan for appropriateness in medical imaging.</li> </ol>

Table 9. Mapping

## 14.0 Appendix B. Overview of Phase II – IV Key Deliverables and Artefacts

### Work Stream #1. Medical Imaging Access and Service Distribution

Initiative	Phase in which key deliverables, artefacts or outcomes will be realized		
	Phase II (to Mar '19)	Phase III (Apr '19 - Mar '20)	Phase IV (Apr '20 - Mar '21)
<b>Short Term Access Improvements</b> <ul style="list-style-type: none"> <li>Determine service delivery benchmarks to meet population needs by HA to 2020/21</li> <li>Modalities of MRI and CT</li> </ul>	(a) Set expectations for short term access improvement (b) Define linkages of medical imaging to primary care networks and specialized services (c) Monitor HAs as they continue to increase MRI service volumes as per Phase I	(t) HAs continue to increase MRI service volumes as per Phase I	
<b>Long Term Access Improvements</b> <ul style="list-style-type: none"> <li>Model to forecast service volumes to 2030</li> <li>Determine service delivery benchmarks to meet population needs to 2030</li> <li>Analytics to predict where new machine are needed</li> <li>Modalities of MRI, CT and PET</li> </ul>	(d) Develop evidence-based service configuration framework and roadmap (e) Develop a strategy for pediatric access to medical imaging	(u) HAs develop plans to meet longer-term volume targets	(kk) HAs include future needs into planning (volumes @ location)
<b>Enhance Wait Time Tracking</b> <ul style="list-style-type: none"> <li>Establish retrospective wait time tracking for all MI modalities</li> <li>Establish prospective wait time reporting for MRI and CT</li> <li>Promulgate policies on waitlist management expectations</li> </ul>	(e) Develop and implement enhanced wait time measurement framework	(v) Develop and promulgate policies on waitlist management & patient communication	
<b>Rapid Access to Imaging (CT and ultrasound)</b> <ul style="list-style-type: none"> <li>Define and implement a rapid access model to support primary and community care strategy to avoid Emergency Department (based on urgency criteria)</li> </ul>	(f) Establish rapid access services - access for CT and ultrasound for urgent care patients (to avoid outpatient ED)	(w) HAs implement rapid access for all medical imaging modalities for urgent care patients via out-patient to avoid ED	
<b>Pooled Referrals/First Available Slot Scheduling</b> <ul style="list-style-type: none"> <li>Mandate and implement where feasible</li> <li>All modalities</li> </ul>	(g) Establish and implement referrals/scheduling approach (where feasible)		

Table 10. Work stream #1.

## Work Stream #2. Governance, Funding and Service Model

Initiative	Phase in which key deliverables, artefacts or outcomes will be realized		
	Phase II (to Mar '19)	Phase III (Apr '19 - Mar '20)	Phase IV (Apr '20 - Mar '21)
<b>Governance model</b> <ul style="list-style-type: none"> <li>Establish new governance model for medical imaging</li> </ul>	(h) Undertake analytics and policy development to produce the proposed governance model (i) Acquire decision/direction for the proposed governance model	(x) Initiate the plan on how to realize (e.g. new legislation)	(ll) Execute the plan to realize
<b>Funding model</b> <ul style="list-style-type: none"> <li>Establish alternate funding models for medical imaging</li> </ul>	(j) Define a value-based funding model	(y) Acquire decision on model (z) Initiate the plan on how to realize (e.g. new legislation)	(mm) Execute the plan to realize
<b>Capital Acquisition</b> <ul style="list-style-type: none"> <li>Develop alternate approach for capital acquisition and provincial prioritization process</li> </ul>	(k) Define a capital planning/funding model for strategic medical imaging equipment purchases	(aa) Acquire decision on model (bb) Initiate the plan on how to realize (e.g. new legislation)	(nn) Execute the plan to realize

Table 11. Work stream #2.

## Work Stream #3. Medical Imaging Business Processes

Initiative	Phase in which key deliverables, artefacts or outcomes will be realized		
	Phase II (to Mar '19)	Phase III (Apr '19 - Mar '20)	Phase IV (Apr '20 - Mar '21)
<b>Expand Image Exchange</b> <ul style="list-style-type: none"> <li>Include all medical images from community-providers</li> </ul>	(l) Acquire funding and complete a feasibility study regarding medical imaging expansion to community imaging providers	(cc) PHSA expansion of image exchange	
<b>Supports for ordering, booking and accessing results</b> Work with IMITSC to advance business process enhancements including: <ul style="list-style-type: none"> <li>Electronic order entry with decision support</li> <li>Develop tools to support pooled referrals and increased patient choice</li> <li>Develop tools to support patient communication and patient scheduling</li> <li>Improved physician and patient access to test results</li> <li>Implement decision support program</li> </ul>	(m) Seek HA commitment for business process improvement (through IMITSC)	(dd) HAS initiate implementation of the policy on ordering /booking/accessing of results (ee) Acquire IMITSC support for the expansion of the decision support pilot	(oo) HAS complete implementation of the policy (pp) Expand decision support program to other HAs (further expansion of pilot) (qq) HAS implement policy on waitlist management and patient communications

Table 12. Work stream #3.

#### Work Stream #4. Quality of Care and Performance Monitoring

Initiative	Phase in which key deliverables, artefacts or outcomes will be realized		
	Phase II (to Mar '19)	Phase III (Apr '19 - Mar '20)	Phase IV (Apr '20 - Mar '21)
<b>Medium Stop Requisition Review Process Implementation</b> <ul style="list-style-type: none"> <li>Active review of MRI / CT requisitions to ensure appropriate utilization, using "medium stop" approach (allow off-guideline tests only after discussion with referring practitioner)</li> </ul>	(n) Develop MRI/CT medium-stop approach and scope for implementation		
<b>Choosing Wisely Implementation</b> <ul style="list-style-type: none"> <li>HA integration into practice and change management</li> <li>Develop and socialize BC Guidelines to support Choosing Wisely medical imaging decision rules</li> <li>Build Choosing Wisely into "Pathways" to be used as a decision support tool</li> <li>Develop indicators to monitor physician ordering profiles</li> <li>Public education on appropriate utilization (Patient guides)</li> </ul>	(o) Develop & implement choosing wisely in community-based care (p) Develop & implement choosing wisely in HA facilities	(ff) Begin tracking of ordering patterns and utilization with POP committee (gg) Provide feedback to ordering practitioners	(rr) Monitor implementations
<b>Key Performance Indicators</b> <ul style="list-style-type: none"> <li>Implement recommended provincial Key Performance Indicators for medical imaging</li> </ul>	(q) Report and monitor KPIs	(hh) Monitor and report KPIs	
<b>Radiology Consult Service</b> <ul style="list-style-type: none"> <li>Provide HA-level or local phone consultation on ordering best test first (e.g. RACE model)</li> <li>Provide feedback to ordering practitioners on ordering appropriateness</li> </ul>	(r) Establish Radiology Consult Service to provide input on ordering best first test		
<b>Utilization Management Function</b> <ul style="list-style-type: none"> <li>Develop a utilization management function that takes into consideration the medical imaging volumes and</li> </ul>	(s) Define and implement utilization management function	(ii) Determine utilization patterns, identifying areas of improvement or issues (jj) Develop approach for utilization management	(ss) Implement

<div>expenditure for cost effectiveness and patient quality.</div> <div><ul style="list-style-type: none"><li>Review physicians' ordering patterns for medical imaging, with the intent of reducing variability in ordering practices and reducing low-value services.</li></ul></div>

## MI-AQI. Phase 2 Timeline

## MRI Volumes and Wait Times – Tracking

Both the volumes and wait times tables below have been updated for the period.

### MRI Volumes

Location	Current Period			Year To Date			Comments
	Target Volume	Actual Volume	Variance	YTD Target Volume	YTD Actual Volume	YTD Variance	
	HA Projected Volume F2017/18 Period 13	HAMIS Actual Volume F2017/18 Period 13	HA Projected Volume vs HAMIS Actual Volume F2017/18 Period 13	HA Projected Volume F2017/18 YTD Period 13	HAMIS Actual Volume F2017/18 YTD Period 13	HA Projected Volume vs HAMIS Actual Volume F2017/18 YTD Period 13	
IHA	2,211	2,262	51	22,329	20,726	-1,603	Staffing issues at one site (departures and mat leaves) and problems
FHA	6,711	6,316	-395	58,330	55,723	-2,607	Unexpected down time of 10 yr old scanner Abbotsford Regional
VCHA	7,183	6,613	-570	55,977	57,142	1,165	
VIHA	4,706	4,419	-287	41,731	38,496	-3,235	Staffing shortages result in lower volumes
NHA	725	1,069	344	7,573	7,536	-37	
PHSA	690	1,100	410	8,974	9,753	779	
<b>BC Total</b>	<b>22,226</b>	<b>21,779</b>	<b>-447</b>	<b>194,914</b>	<b>189,376</b>	<b>-5,538</b>	

	Target Volume	Actual Volume	Variance
<b>BC Total Previous Period (Period 12)</b>	<b>17,181</b>	<b>16,111</b>	<b>-1,070</b>

### Wait Times

Location	Previous Wait Time	Previous Wait Time	Current Wait Time	Total YTD	Comments
	90th Percentile Wait Times (in Days) Quarter 1 F2017/18 (All Priorities)	90th Percentile Wait Times (in Days) Quarter 2 F2017/18 (All Priorities)	90th Percentile Wait Times (in Days) Quarter 3 F2017/18 (All Priorities)	90th Percentile YTD F2017/18 (All Priorities)	
IHA	235	240	248	239	Wait times in NHA continue to increase (by 32 days) in Q3, even though the 2 net new MRI units are now operational. Noted delays for the MRI unit in Prince George was reported in Q2, having a negative impact on wait times for NHA. With new Q3 data, the overall YTD went down from 200 to 197 because wait times in Q3 had reduced.
FHA	301	304	268	294	
VCHA	117	103	99	106	
VIHA	153	165	163	160	
NHA	194	318	350	322	
PHSA	n.a.	n.a.	n.a.	n.a.	
<b>BC</b>	<b>204</b>	<b>196</b>	<b>190</b>	<b>197</b>	

Wait times are for completed out-patient cases.

### Budget and Projections

The Phase 2 budget includes:

- Funding for staff and consulting labour from existing, funded positions from within the Ministry

The Phase 2 budget does not include:

- Funding for any tools, equipment or people required for the HAs to meet their commitments. Where applicable, FCS is anticipated to provide this funding to the HAs

The budget will be managed by the Project Director and Project Sponsor.

## Indicators and Legend

Dashboard Legend	
Number Indicators	# The numbers indicated next to the arrows indicates the number of periods that the status has been at the reported level (colour).
Arrow Indicators	<div>→</div> No change in status from previous period.
	<div>↑</div> Increase in status level from previous period (e.g. green to yellow);
	<div>↓</div> Decrease in status level from previous period (e.g. red to yellow)
	<div>☑</div> Decision required; Risk exists.
	<div>☒</div> No decision required; No risk exists

Deliverables Legend	
Approach for Deliverable % Complete	10% - Work is started, initial thinking (initiation) 25% - Work is defined, elements in place (initiation, planning) 50% - Perform the work (execution, monitor & control) 75% - Deliver material for internal review, amend cycle (execution, monitor & control) 90% - Deliver material for external review to executive / steering (execution, monitor & control) 100% - Deliver final version of material, complete (close)

# Project Status Report

Overall Status: On Track

## Medical Imaging Access and Quality (MI-AQI)

January

10, 2018

<b>Project Purpose</b>	Improve both the access to, and quality of, Medical Imaging (MI) services in British Columbia.
<b>Project Phase</b>	Phase II, Sept '17 – Mar '19
<b>Phase II Objectives</b>	<ul style="list-style-type: none"> <li>Realize short-term access improvement</li> <li>Begin monitoring quality of care and performance</li> <li>Establish wait-time benchmarks and tracking capabilities</li> <li>Implement quality and appropriateness interventions</li> <li>Recommend models (governance, funding and service delivery)</li> </ul>

Project Code	Phase II Project Stage	Reporting Period	Project Sponsors	Project Director	Project Manager
2017-NN	Initiation / Execution	12/1/2017 - 12/31/2017	Ian Rongve, Lynn Stevenson, Tricia Braidwood-Looney	Carolyn Rudden	Jim Manning

## Project Dashboard

Attribute	Status			
<b>Schedule</b>		1		Schedule refinement now complete.
<b>Scope/Objectives</b>		1		No changes to scope/objectives.
<b>Budget</b>		3		No additional resource costs. Funding for staff and consulting labour sourced from existing, funded positions from within the Ministry
<b>People</b>		3		The need for additional project team resources identified; Hiring process underway.
<b>Issue / Response</b>	<input checked="" type="checkbox"/>	3		All aspects of the project requiring data collection and analysis (I) Outstanding requests (requests submitted to HSIAR in summer '17). (R) Raised to Ian; Project team to meet with HSIAR to review prioritize list of outstanding requests and scope of work.
<b>Risk / Mitigation</b>	<input checked="" type="checkbox"/>	1		Short Term Access Improvements (R) Any announcements impacting MRI service delivery. (M) Accept (R) Funding request in response to volume increase mandate. (M) Accept.
<b>Decision(s) Required</b>	<input checked="" type="checkbox"/>	3		Revised project charter awaiting sponsor approval.

See Appendix A for the status key legend

## Project Deliverables and Key Milestones

### Workstream #1. Medical Imaging Access and Service Distribution

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion	% Complete	Comments
<b>Short Term Access Improvements</b> (a) Set expectations for short term access improvement (b) Define linkages of medical imaging to primary care networks and specialized services (c) Monitor HAs as they continue to increase MRI service volumes as per Phase I	Policy component written and issued	Nov '17	Mar '18	50%	Component of common policy paper.
	Policy component implemented	Apr '18	Mar '19	0%	
<b>Long Term Access Improvements</b> (d) Develop evidence-based service configuration framework and roadmap (e) Develop a strategy for pediatric access to medical imaging	Service configuration framework Service configuration roadmap	Jun '17	Mar '19	10%	
	Pediatric access strategy	Jan '19	Mar '19	10%	
<b>Enhance Wait Time Tracking</b> (e) Develop and implement enhanced wait time measurement framework	Wait time measurement framework	Nov '17	Mar '18	25%	
	Prospective reporting for CT and MRI implemented	Nov '17	June '18	25%	
	Retrospective reporting for all other modalities implemented	Nov '17	Mar '19	10%	
<b>Rapid Access to Imaging (CT and ultrasound)</b> (f) Establish rapid access services - access for CT and ultrasound for urgent care patients (to avoid outpatient ED)	Policy component written and issued	Nov '17	Mar '18	50%	Component of common policy paper
	Policy component implemented	Apr '18	Mar '19	0%	
<b>Pooled Referrals/First Available Slot Scheduling</b> (g) Establish and implement referrals/scheduling approach (where feasible)	Policy component written and issued	Nov '17	Mar '18	25%	Component of common policy paper
	Policy component implemented	Apr '18	Mar '19	0%	

### Workstream #2. Governance, Funding and Service Model

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion	% Complete	Comments
<b>Governance Model</b> (h) Undertake analytics and policy development to produce the proposed governance model (i) Acquire decision/direction for the proposed governance model	Proposed governance model Approval for governance model	Apr '18	Mar '19	10%	
<b>Funding model</b> (j) Define a value-based funding model	Value-based funding model	Apr '18	Mar '19	10%	
<b>Capital Acquisition</b> (k) Define a capital planning/funding model for strategic medical imaging equipment purchases	Capital planning funding model	Apr '18	Mar '19	25%	

### Workstream #3. Medical Imaging Business Processes

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion	% Complete	Comments
<b>Expand Image Exchange (DI-R)</b> (l) Acquire funding and complete a feasibility study regarding medical imaging expansion to community imaging providers	Funding received for feasibility study Feasibility study results	Sept '18	Dec '18	25%	
<b>Supports for ordering, booking and accessing results</b> (m) Seek HA commitment for business process improvement (through IMITSC)	HA commitment (through IMITSC)	June '18	June '18	50%	

## Workstream #4. Quality of Care and Performance Monitoring

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion	% Complete	Comments
<b>Medium Stop Requisition Review Process Implementation</b> (n) Develop MRI/CT medium-stop approach and scope for implementation	Policy component written and issued	Nov '17	Mar '18	50%	Component of common policy paper.
	Policy component implemented	Apr '18	Mar '19	0%	
<b>Choosing Wisely Implementation</b> (o) Develop & implement choosing wisely in community-based care (p) Develop & implement choosing wisely in HA facilities	Policy component written and issued	Nov '17	Mar '18	50%	Component of common policy paper.
	Policy component implemented	Apr '18	Mar '19	0%	
<b>Key Performance Indicators</b> (q) Report and monitor KPIs	Policy component written and issued	Nov '17	Mar '18	50%	Component of common policy paper.
	Policy component implemented	Apr '18	Mar '19	0%	
<b>Radiology Consult Service</b> (r) Establish Radiology Consult Service to provide input on ordering best first test	Policy component written and issued	Nov '17	Mar '18	50%	Component of common policy paper.
	Policy component implemented	Apr '18	Mar '19	0%	
<b>Utilization Management Function</b> (s) Define and implement utilization management function	Utilization mgmt function implemented	Apr '18	Mar '19	10%	

Deliverables Legend	
Approach for Deliverable % Complete	10% - Work is started, initial thinking (initiation) 25% - Work is defined, elements in place (initiation, planning) 50% - Perform the work (execution, monitor & control) 75% - Deliver material for internal review, amend cycle (execution, monitor & control) 90% - Deliver material for external review to executive / steering (execution, monitor & control) 100% - Deliver final version of material, complete (close)

# Workstream Activity Report

## Workstream #1. Medical Imaging Access and Service Distribution

Initiatives	Activities started, ongoing or completed this Reporting Period	Activities planned for the next Reporting Period
<b>Short Term Access Improvements</b> (a) Set expectations for short term access improvement (b) Define linkages of medical imaging to primary care networks and specialized services (c) Monitor HAs as they continue to increase MRI service volumes as per Phase I	<ul style="list-style-type: none"> <li>ID rates in other jurisdictions. Email other provinces, request per capita rate for MRI &amp; CT and service volumes (this year, and last two) &lt;Complete&gt;</li> <li>Investigate other sources of info e.g. CIHI &amp; OECD (Org for Economic Cooperation and Development) rates for MRI &amp; CT &lt;Complete&gt;</li> <li>Provide HA with status of MRI # and expectation for end of fiscal and if off track. If off track, their mitigation strategy. &lt;Ongoing&gt;</li> </ul>	Jan 1-15 <ul style="list-style-type: none"> <li>Develop options for short term targets for 19/20 (for input into consultation with PIC)</li> <li>Draft outline (of what is required in policy)</li> <li>Internal review of draft outline</li> <li>Provide HA with status of MRI # and expectation for end of fiscal and if off track. If off track, their mitigation strategy.</li> </ul> Jan 16 - 31 <ul style="list-style-type: none"> <li>Distribute as part of common package (Target Jan 16)</li> <li>Discuss at PIC (Jan 31)</li> </ul>
<b>Long Term Access Improvements</b> (d) Develop evidence-based service configuration framework and roadmap (e) Develop a strategy for pediatric access to medical imaging	<ul style="list-style-type: none"> <li>Discuss w/HSIAR ADM &lt;Complete&gt;</li> </ul>	<ul style="list-style-type: none"> <li>Conduct scoping discussion w/HSIAR</li> </ul>
<b>Enhance Wait Time Tracking</b> (e) Develop and implement enhanced wait time measurement framework	<ul style="list-style-type: none"> <li>Work to prepare for PIC mtg &lt;Active&gt;</li> </ul>	Jan 1 - 15 <ul style="list-style-type: none"> <li>HSIAR mtg to complete PIC package (included in common package)</li> </ul> Jan 16 - 31 <ul style="list-style-type: none"> <li>Consult HA &amp; PIC to address data quality issues related to prospective wait times</li> </ul>
<b>Rapid Access to Imaging (CT and ultrasound)</b> (f) Establish rapid access services - access for CT and ultrasound for urgent care patients (to avoid outpatient ED)	<ul style="list-style-type: none"> <li>Gather info on VIHA service model &lt;Active&gt;</li> </ul>	Jan 1 - 15 <ul style="list-style-type: none"> <li>Gather info on VIHA service model</li> <li>Develop strategy for how to apply the VIHA model (ID any issues) across all HAs. (2-page document). Present to MIAC on Feb 1.</li> </ul> Jan 16 - 31 <ul style="list-style-type: none"> <li>Initiate MI-AQI policy consult with HAs</li> </ul>
<b>Pooled Referrals/First Available Slot Scheduling</b> (g) Establish and implement referrals/scheduling approach (where feasible)	<ul style="list-style-type: none"> <li>Gather info on current state and the gaps identified in the Surgical Strategy &lt;active&gt;</li> <li>Perform MI-AQI policy consult with HAs &lt;Active&gt;</li> </ul>	Jan 1 - 15 <ul style="list-style-type: none"> <li>Gather info on current state and the gaps identified in the Surgical Strategy (apply surgical approach for imaging)</li> <li>Contact Scott McCarten and Sue Avery to retrieve information on Pooled Referrals.</li> <li>Meet with Luba and discuss retrieve possible methodology or expectations they have in surgical for pooled referrals.</li> </ul> Jan 16 - 31 <ul style="list-style-type: none"> <li>Initiate MI-AQI policy consult with HAs</li> </ul>

## Workstream #2. Governance, Funding and Service Model

Initiatives	Activities started, ongoing or completed this Reporting Period	Activities planned for the next Reporting Period
<b>Governance Model</b> (h) Undertake analytics and policy development to produce the proposed governance model (i) Acquire decision/direction for the proposed governance model	<ul style="list-style-type: none"> <li>Determine approach for analysis and options paper &lt;ongoing&gt;</li> </ul>	<ul style="list-style-type: none"> <li>Determine approach for analysis and options paper</li> </ul>
<b>Funding model</b> (j) Define a value-based funding model	<ul style="list-style-type: none"> <li>Wait for Ministry Project on value-based funding models to begin. &lt; ongoing&gt;</li> </ul>	<ul style="list-style-type: none"> <li>Wait for Ministry Project on value-based funding models to begin.</li> </ul>
<b>Capital Acquisition</b> (k) Define a capital planning/funding model for strategic medical imaging equipment purchases	<ul style="list-style-type: none"> <li>Finance and Corporate services representatives identified &lt;Complete&gt;</li> <li>Setup 1<sup>st</sup> meeting of the working group services representatives identified &lt;Complete&gt;</li> </ul>	<ul style="list-style-type: none"> <li>Distribute material (backgrounder) on problems for meeting in Feb.</li> </ul>

## Workstream #3. Medical Imaging Business Processes

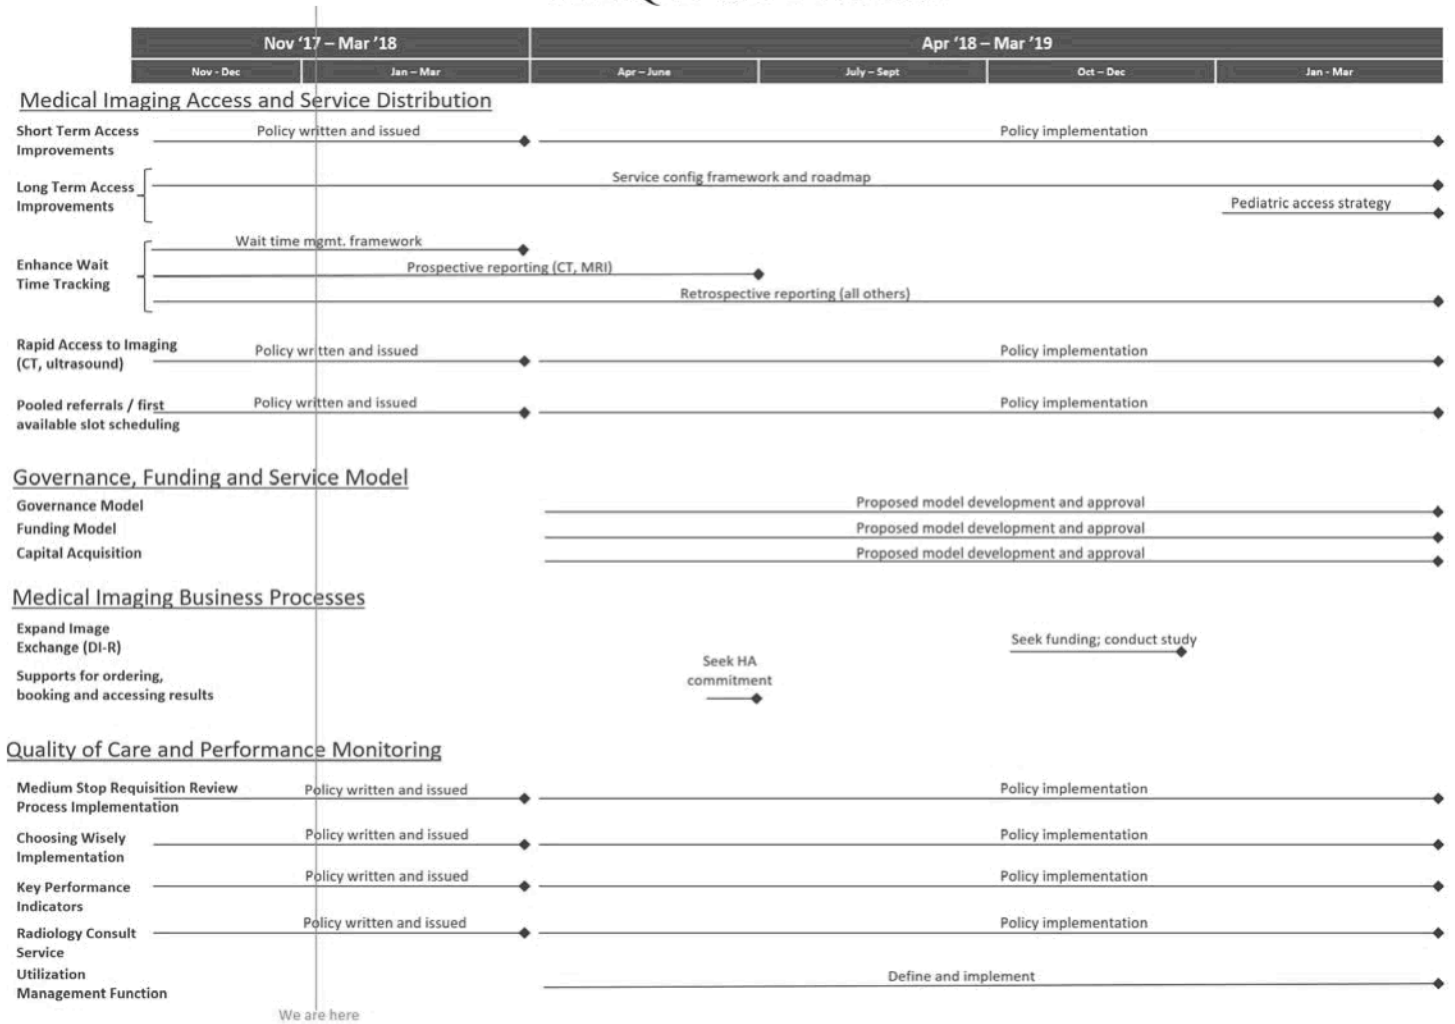

Initiatives	Activities started, ongoing or completed this Reporting Period	Activities planned for the next Reporting Period
<b>Expand Image Exchange (DI-R)</b> (l) Acquire funding and complete a feasibility study regarding medical imaging expansion to community imaging providers	<ul style="list-style-type: none"> <li>Target start date Dec 2018</li> </ul>	<ul style="list-style-type: none"> <li></li> </ul>
<b>Supports for ordering, booking and accessing results</b> (m) Seek HA commitment for business process improvement (through IMITSC)	<ul style="list-style-type: none"> <li>Target start date June 2018</li> </ul>	<ul style="list-style-type: none"> <li></li> </ul>

## Workstream #4. Quality of Care and Performance Monitoring

Initiatives	Activities started, ongoing or completed this Reporting Period	Activities planned for the next Reporting Period
<b>Medium Stop Requisition Review Process Implementation</b> (n) Develop MRI/CT medium-stop approach and scope for implementation	<ul style="list-style-type: none"> <li>Gather background info – conduct initial learning engagements to understand current state &lt;Ongoing&gt;</li> </ul>	<p>Jan 1 - 15</p> <ul style="list-style-type: none"> <li>Consult in Van to develop conceptual model. Included in common package to MIAC</li> </ul> <p>Jan 16 – 31</p> <ul style="list-style-type: none"> <li>Conduct MI-AQI policy consult</li> </ul>
<b>Choosing Wisely Implementation</b> (o) Develop & implement choosing wisely in community-based care (p) Develop & implement choosing wisely in HA facilities	<ul style="list-style-type: none"> <li>Form HA advisory group. &lt;Started&gt;</li> </ul>	<p>Jan 1 - 15</p> <ul style="list-style-type: none"> <li>Consult in Van to develop conceptual model. Included in common package to MIAC</li> <li>Conceptual development for CW, it's measurement and mandate of HA advisory group (estimate 6 months of work to complete)</li> <li>Start the collaboration MOU with GPAC</li> </ul>
<b>Key Performance Indicators</b> (q) Report and monitor KPIs	<ul style="list-style-type: none"> <li>To discuss w/HSIAR ADM (Dec 11) &lt;Complete&gt;</li> </ul>	<p>Jan 16 - 31</p> <ul style="list-style-type: none"> <li>Conduct scoping meetings with HSIAR</li> </ul>
<b>Radiology Consult Service</b> (r) Establish Radiology Consult Service to provide input on ordering best first test	<ul style="list-style-type: none"> <li>Gather background info – conduct initial learning engagements to understand current state &lt;Complete&gt;</li> </ul>	<p>Jan 1 - 15</p> <ul style="list-style-type: none"> <li>Consult in Van to develop conceptual model. Included in common package to MIAC</li> </ul> <p>Jan 16 - 31</p> <ul style="list-style-type: none"> <li>Determine if the Radiology consult could be part of the primary care network</li> <li>Conduct MI-AQI policy consult</li> </ul>
<b>Utilization Management Function</b> (s) Define and implement utilization management function	<ul style="list-style-type: none"> <li>To discuss w/HSIAR ADM (Dec 11) &lt;Complete&gt;</li> </ul>	<p>Jan 16 - 31</p> <ul style="list-style-type: none"> <li>Conduct scoping meetings with HSIAR</li> </ul>

# Project Timelines

## MI-AQI. Phase 2 Timeline

# MRI Volumes and Wait Times – Tracking

## MRI Volumes

Location	Current Period			Year To Date			Comments
	Target Volume	Actual Volume	Variance	YTD Target Volume	YTD Actual Volume	YTD Variance	
	HA Projected Volume F2017/18 Period 9	HAMIS Actual Volume F2017/18 Period 9	HA Projected Volume vs HAMIS Actual Volume F2017/18 Period 9	HA Projected Volume F2017/18 YTD Period 9	HAMIS Actual Volume F2017/18 YTD Period 9	HA Projected Volume vs HAMIS Actual Volume F2017/18 YTD Period 9	
IHA	1,818	1,588	-130	14,664	13,589	-1,075	In the current year (up to period 9) the actual volumes for MRI exams is 122,341, which is lower than the projected volume 123,431. Four health authorities (IHA, FHA, VCHA & VIHA) have notable lower actuals than their YTD projected volumes. For Period 9 2017/18, the BC total has a significant variance in -2,486.
FHA	5,250	4,226	-1,024	37,036	36,301	-735	
VCHA	5,038	4,211	-827	34,800	36,692	1,892

<b>BC</b>	<b>204</b>	<b>196</b>	<b>200</b>	

Wait times are for completed out-patient cases.

## Budget and Projections

The Phase 2 budget includes:

- Funding for staff and consulting labour from existing, funded positions from within the Ministry

The Phase 2 budget does not include:

- Funding for any tools, equipment or people required for the HAs to meet their commitments. Where applicable, FCS is anticipated to provide this funding to the HAs

The budget will be managed by the Project Director and Project Sponsor.

## Appendix A – Status Key Legend

### Number indicators

The numbers indicated next to the arrows indicates the number of periods that the status has been at the reported level (colour).

### Arrow indicators

	No change in status from previous period.
	Increase in status level from previous period (e.g. green to yellow)
	Decrease in status level from previous period (e.g. red to yellow)
	Decision required; Issue or risk exists
	No decision required; No issue or risk exists

# Project Status Report

Overall Status: At Risk

## Medical Imaging Access and Quality (MI-AQI)

February 8, 2018

<b>Project Purpose</b>	Improve both the access to, and quality of, Medical Imaging (MI) services in British Columbia.
<b>Project Phase</b>	Phase II, Sept '17 – Mar '19
<b>Phase II Objectives</b>	<ul style="list-style-type: none"> <li>Realize short-term access improvement</li> <li>Begin monitoring quality of care and performance</li> <li>Establish wait-time benchmarks and tracking capabilities</li> <li>Implement quality and appropriateness interventions</li> <li>Recommend models for governance, funding and service delivery</li> </ul>

Project Code	Phase II Project Stage	Reporting Period	Project Sponsors	Project Director	Project Manager
2017-NN	Initiation / Execution	1/1/2018 - 1/31/2018	Ian Rongve, Lynn Stevenson, Tricia Braidwood-Looney	Carolyn Rudden	Jim Manning

## Project Dashboard

<b>Schedule</b>		2		No changes to schedule
<b>Scope/Objectives</b>		2		No changes to scope/objectives.
<b>Budget</b>		4		No additional resource costs. Funding for staff and consulting labour sourced from existing, funded positions from within the Ministry; Need to develop CIN for contracted resources for next fiscal.
<b>People</b>		5		The need for additional project team resources identified; Hiring process underway.
<b>Issue / Response</b>		4		<b>All aspects of project requiring data collection and analysis</b> (I) Requests submitted to HSIAR in summer '17. (R) Raised to Ian
<b>Risk / Mitigation</b>		2		<b>Short Term Access Improvements</b> (R) Any announcements impacting MRI service delivery. (M) Accept (R) Funding request in response to volume increase mandate. (M) Accept.
		1		<b>MRI service volumes</b> (R) Some HAs not on track to meet current year targets defined in Phase I. (M) Accept. Determine ADM position/response.
<b>Decision(s) Required</b>		4		Revised project charter awaiting sponsor approval.

<b>On Track -&gt; At Risk</b>	<p>The project status is now considered as 'At Risk'.</p> <ul style="list-style-type: none"> <li>Assertion: the status can be recovered to 'On Track' within the allocated timeline if the necessary actions are taken</li> </ul> <p>HSIAR</p> <ul style="list-style-type: none"> <li>Minimal collaboration; Service delivery requests unfulfilled</li> <li>Propose an escalation (ADM-to-ADM)</li> </ul> <p>Choosing Wisely</p> <ul style="list-style-type: none"> <li>Consensus from key players on the 'what' and 'how' has not been achieved.</li> <li>Propose a facilitated workshop to accomplish in early Feb.</li> </ul>
-------------------------------	--

<b>Number indicators</b>
The numbers indicated next to the arrows indicates the number of periods that the status has been at the reported level (colour).

Arrow indicators	
	No change in status from previous period.
	Increase in status level from previous period (e.g. green to yellow);
	Decrease in status level from previous period (e.g. red to yellow)
	Decision required; Risk exists.
	No decision required; No risk exists

## Project Deliverables and Key Milestones

### Workstream #1. Medical Imaging Access and Service Distribution

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion	% Complete	Comments
<b>Short Term Access Improvements</b> (a) Set expectations for short term access improvement (b) Define linkages of medical imaging to primary care networks and specialized services- <moved to radiology consult> (c) Monitor HAs as they continue to increase MRI service volumes as per Phase I	Policy component written and issued	Nov '17	Mar '18	50%	Component of common policy paper.
	Policy component implemented	Apr '18	Mar '19	0%	(C) is 'At Risk'. Action: Raised with the ADM.
<b>Long Term Access Improvements</b> (d) Develop evidence-based service configuration framework and roadmap (e) Develop a strategy for pediatric access to medical imaging	Service configuration framework Service configuration roadmap	Jun '17	Mar '19	10%	
	Pediatric access strategy	Jan '19	Mar '19	10%	
<b>Enhance Wait Time Tracking</b> (e) Develop and implement enhanced wait time measurement framework	Wait time measurement framework	Nov '17	Mar '18	25%	Wait time measurement framework is 'At Risk'. HSAIR has not provided adequate support. Action: Meet w/HSIAR to determine remediation.
	Prospective reporting for CT and MRI implemented	Nov '17	June '18	25%	
	Retrospective reporting for all other modalities implemented	Nov '17	Mar '19	10%	
<b>Rapid Access to Imaging (CT and ultrasound)</b> (f) Establish rapid access services - access for CT and ultrasound for urgent care patients (to avoid outpatient ED)	Policy component written and issued	Nov '17	Mar '18	50%	Policy development is 'At Risk'; Action: Consult with HAs (target Feb).
	Policy component implemented	Apr '18	Mar '19	0%	Component of common policy paper
<b>Pooled Referrals/First Available Slot Scheduling</b> (g) Establish and implement referrals/scheduling approach (where feasible)	Policy component written and issued	Nov '17	Mar '18	25%	Component of common policy paper
	Policy component implemented	Apr '18	Mar '19	0% 50%	

### Workstream #2. Governance, Funding and Service Model

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion	% Complete	Comments
<b>Governance Model</b> (h) Undertake analytics and policy development to produce the proposed governance model (i) Acquire decision/direction for the proposed governance model	Proposed governance model Approval for governance model	Apr '18	Mar '19	10%	
<b>Funding model</b> (j) Define a value-based funding model	Value-based funding model	Apr '18	Mar '19	10%	
<b>Capital Acquisition</b> (k) Define a capital planning/funding model for strategic medical imaging equipment purchases	Capital planning funding model	Apr '18	Mar '19	25%	

### Workstream #3. Medical Imaging Business Processes

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion	% Complete	Comments
<b>Expand Image Exchange (DI-R)</b> (l) Acquire funding and complete a feasibility study regarding medical imaging expansion to community imaging providers	Funding received for feasibility study Feasibility study results	Sept '18	Dec '18	25%	
<b>Supports for ordering, booking and accessing results</b> (m) Seek HA commitment for business process improvement (through IMITSC)	HA commitment (through IMITSC)	June '18	June '18	50%	

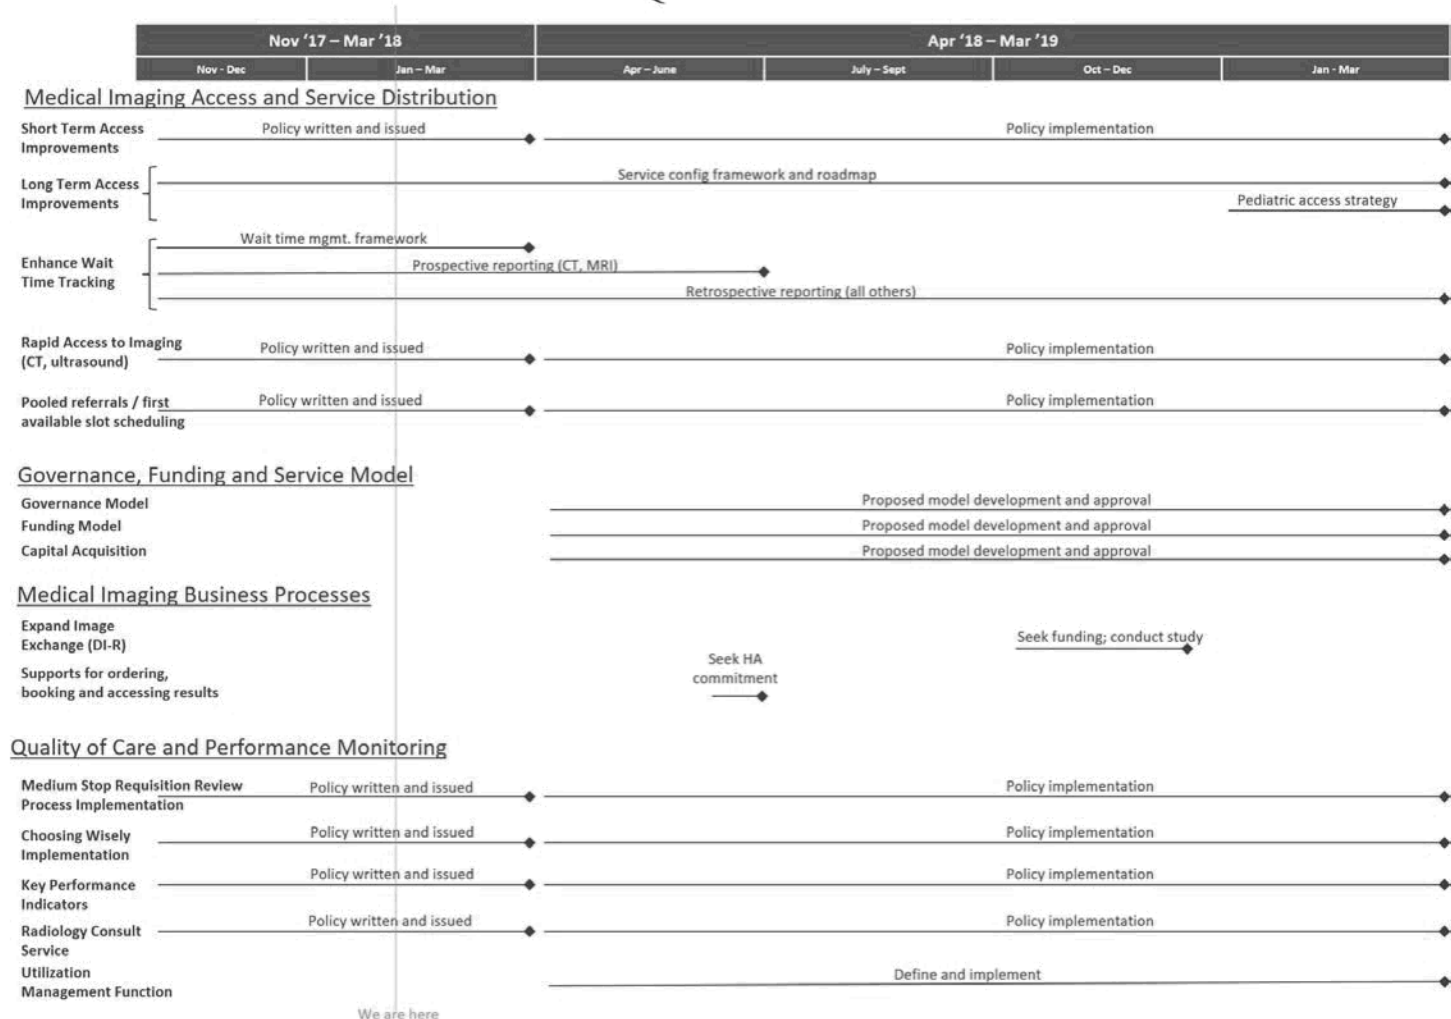

### Workstream #4. Quality of Care and Performance Monitoring

Initiatives	Deliverables and Key Milestones	Target Start	Target	%	Comments
-------------	---------------------------------	--------------	--------	---	----------

			Completion	Complete	
<b>Medium Stop Requisition Review Process Implementation</b> (n) Develop MRI/CT medium-stop approach and scope for implementation	Policy component written and issued	Nov '17	Mar '18	50%	Policy development is 'At Risk'.
	Policy component implemented	Apr '18	Mar '19	0%	Conceptual development still underway – shared understanding w/HA & Docs. Action: To meet w/Dr. Coleman & Dr. Wale to discuss options for conceptual model.  Component of common policy paper.
<b>Choosing Wisely Implementation</b> (o) Develop & implement choosing wisely in community-based care (p) Develop & implement choosing wisely in HA facilities	Policy component written and issued	Nov '17	Mar '18	50%	Policy development is 'At Risk'.
	Policy component implemented	Apr '18	Mar '19	0%	Conceptual development still underway – shared understanding w/HA & Docs. Action: To meet w/Dr. Coleman & Dr. Wale to discuss options for conceptual model  Component of common policy paper.
<b>Key Performance Indicators</b> (q) Report and monitor KPIs	Policy component written and issued	Nov '17	Mar '18	50%	Policy development is 'At Risk'.
	Policy component implemented	Apr '18	Mar '19	0%	HSIAR not contributing to development of KPIs Action: Waiting for stmt of readiness from HSIAR  Component of common policy paper.
<b>Radiology Consult Service</b> (r) Establish Radiology Consult Service to provide input on ordering best first test (r.1) Define linkages of medical imaging to primary care networks and specialized services	Policy component written and issued	Nov '17	Mar '18	50%	Component of common policy paper.
	Policy component implemented	Apr '18	Mar '19	0% 25%	
<b>Utilization Management Function</b> (s) Define and implement utilization management function	Utilization mgmt function implemented	Apr '18	Mar '19	10%	

Deliverables Legend	
Approach for Deliverable % Complete	10% - Work is started, initial thinking (initiation) 25% - Work is defined, elements in place (initiation, planning) 50% - Perform the work (execution, monitor & control) 75% - Deliver material for internal review, amend cycle (execution, monitor & control) 90% - Deliver material for external review to executive / steering (execution, monitor & control) 100% - Deliver final version of material, complete (close)

## MI-AQI. Phase 2 Timeline

# MRI Volumes and Wait Times – Tracking

## MRI Volumes

Location	Current Period			Year To Date			Comments
	Target Volume	Actual Volume	Variance	YTD Target Volume	YTD Actual Volume	YTD Variance	
	HA Projected Volume F2017/18 Period 10	HAMIS Actual Volume F2017/18 Period 10	HA Projected Volume vs HAMIS Actual Volume F2017/18 Period 10	HA Projected Volume F2017/18 YTD Period 10	HAMIS Actual Volume F2017/18 YTD Period 10	HA Projected Volume vs HAMIS Actual Volume F2017/18 YTD Period 10	
IHA	1,818	1,526	-292	16,482	15,115	-1,367	In the current year (up to period 10) the actual BC YTD volumes for MRI exams is 136,509, which is lower than the projected volume 138,325. Three health authorities (IHA, FHA, & VIHA) have notable lower actuals than their YTD projected volumes. For Period 10 2017/18, the BC total has a variance of -1,816, which is a decrease from the Period 9 variance of -2,486.
FHA	4,083	4,128	45	41,119	40,429	-690	
VCHA	3,918	4,304	386	38,718	40,996	2,278	
VIHA	3,660	2,828	-832	29,705	27,900	-1,805	
NHA	725	665	-60	5,398	4,952	-446	
PHSA	690	717	27	6,903	7,117	214	
<b>BC Total</b>	<b>14,894</b>	<b>14,168</b>	<b>-726</b>	<b>138,325</b>	<b>136,509</b>	<b>-1,816</b>	

	Target Volume	Actual Volume	Variance
<b>BC Total Previous Period (Period 9)</b>	<b>17,180</b>	<b>14,694</b>	<b>-2,486</b>

## Wait Times

Location	Previous Wait Time 90th Percentile Wait Times (in Days) Quarter 1 F2017/18 (All Priorities)	Current Wait Time 90th Percentile Wait Times (in Days) Quarter 2 F2017/18 (All Priorities)	Total YTD 90th Percentile YTD F2017/18 (All Priorities)	Comments
IHA	235	238	236	There has been significant wait time increase in Q2 for NHA. A key event to note for NHA in Q2 was Mills Memorial Hospital in Terrace reporting wait times for the first time.
FHA	301	304	302	
VCHA	117	103	110	
VIHA	153	165	158	
NHA	194	321	275	
PHSA	n.a.	n.a.	n.a.	
<b>BC</b>	<b>204</b>	<b>196</b>	<b>200</b>	

Wait times are for completed out-patient cases.

## Budget and Projections

The Phase 2 budget includes:

- Funding for staff and consulting labour from existing, funded positions from within the Ministry

The Phase 2 budget does not include:

- Funding for any tools, equipment or people required for the HAs to meet their commitments. Where applicable, FCS is anticipated to provide this funding to the HAs

The budget will be managed by the Project Director and Project Sponsor.

# Project Status Report

Overall Status: At Risk

## Medical Imaging Access and Quality (MI-AQI)

June 8, 2018

<b>Project Purpose</b>	Improve both the access to, and quality of, Medical Imaging (MI) services in British Columbia.
<b>Project Phase</b>	Phase II, Sept '17 – Mar '19
<b>Phase II Objectives</b>	<ul style="list-style-type: none"> <li>Realize short-term access improvement</li> <li>Begin monitoring quality of care and performance</li> <li>Establish wait-time benchmarks and tracking capabilities</li> <li>Implement quality and appropriateness interventions</li> <li>Recommend models (governance, funding and service delivery)</li> </ul>

Project Code	Phase II Project Stage	Reporting Period	Project Sponsors	Project Director	Project Manager
2017-NN	Execute; Monitor/Control	5/1/2018 - 5/31/2018	Ian Rongve, Tricia Braidwood-Looney	Carolyn Rudden	Jim Manning

## Project Dashboard

Schedule		1	↑	<p>The following policy development/implementation milestones have started earlier:</p> <ul style="list-style-type: none"> <li>HA policy plans and commitments (charters) to be finalized earlier (July-&gt;June)</li> <li>HA implementation of plans to start earlier (Aug-&gt;July)</li> <li>Monitor of plans and reporting to start earlier (Aug -&gt; July)</li> </ul> <p>(Result of Issue #1) Enhanced Wait Time Tracking deliverables, which are not under the control of the project, have missed their scheduled due dates.</p>
Scope/Objectives		1	↑	<p>(Result of Issue #1) Enhanced Wait Time Tracking project objectives, which are not under the control of the project, have yet to be achieved.</p>
Budget		7	⇒	No additional resource costs. Funding for staff and consulting labour sourced from existing, funded positions from within the Ministry.
People		1	↑	<p>Project team staffing changes.</p> <ul style="list-style-type: none"> <li>Tricia Braidwood-Looney, the acting Executive Director for LDBS, who is also a project sponsor, has announced her retirement effective the end of June.</li> <li>The project team needs to be re-staffed with new people (using existing, funded positions) with a manager (competition underway) and a senior policy analyst.</li> </ul>
Issue / Response	<input checked="" type="checkbox"/>	8		<p>Issue #1. All aspects of the project requiring data collection and analysis</p> <ul style="list-style-type: none"> <li>(I) Requests for HSIAR data collection and analysis (initiated summer '17) are outstanding. Project delivery impacted <ul style="list-style-type: none"> <li>Wait time measurement framework</li> <li>Prospective reporting for CT and MRI</li> </ul> </li> <li>(R) Escalated to Ian for resolution. Continue to engage HSIAR.</li> </ul> <p>Issue #2. Internal MoH communication and coordination</p> <ul style="list-style-type: none"> <li>(I) Information and reports presented by non-project team members to executive without prior program area / project team review and validation</li> <li>(R) Escalated to Ian for resolution. Continue to engage the TPO and HSIAR.</li> </ul> <p>Issue #3. HA engagements</p> <ul style="list-style-type: none"> <li>(I) Multiple contacts by non-project team members requesting the same information from HAs</li> <li>(I) Engagement results not shared with the project team</li> <li>(R) Escalated to Ian for resolution. Continue to engage the TPO and HSIAR.</li> </ul>
Risk / Mitigation	<input checked="" type="checkbox"/>	2		None.
Decision(s) Required	<input checked="" type="checkbox"/>	4		None.

## Project Deliverables and Key Milestones

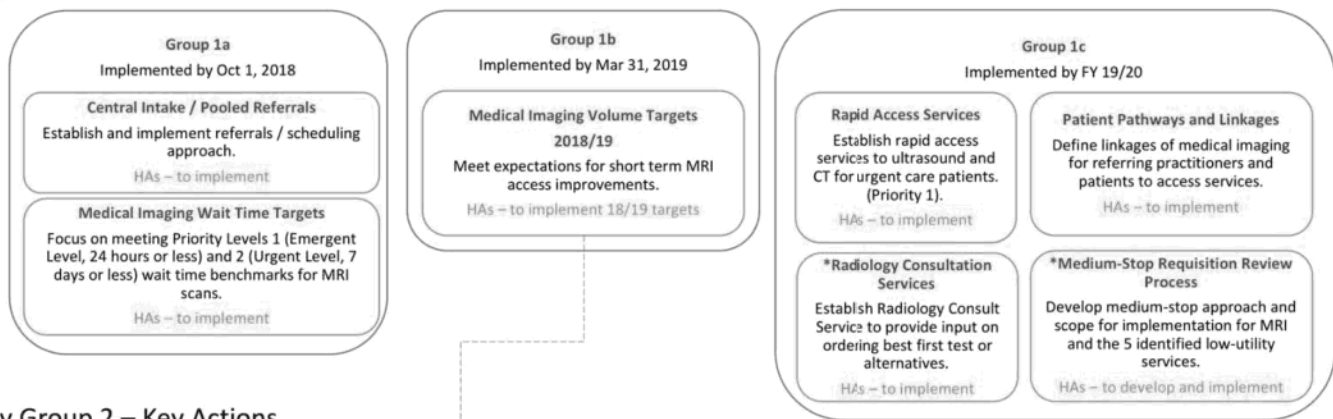

### HA Policy Expectations

	Target Start	Target End	% Complete	Comments
<b>Policy – Develop/Implement</b>				
Write Policy	Nov '17	Apr '18	100%	
Consult, Approve and Issue Policy	Apr '18	Jun '18	90%	Completed: Draft policy distributed; Kick-off mtg w/HAs conducted May 30 <sup>th</sup>
Develop/Approve HA Policy Plans	Apr '18	Jun '18	50%	Completed: HA Policy Expectations Charter template distributed to HAs May 31. Policy groups 1a+b+c are in scope. Planned: HA response due to project team June 22. MoH review and HA sign-off due June 29.
HAs Implement Policy Plans	Jul '18	Mar '19	50%	Approach: The bulk of the work will be completed in 18/19; Remainder in 19/20.
Monitor Plans and Report	Jul '18	Mar '19	50%	Approach: The bulk of the work will be completed in 18/19; Remainder in 19/20.
<b>Monitor - Volumes and Wait Times</b>				
Monitor and Report	Apr '18	Mar '19	50%	Enhanced Wait Time Tracking <ul style="list-style-type: none"> <li>Wait time measurement framework. (Request submitted to HSIAR Nov '17) <ul style="list-style-type: none"> <li>Due: Mar '18: 10% &lt;Past due. HSIAR recently indicated that this will be addressed&gt;</li> </ul> </li> <li>Prospective reporting for CT and MRI implemented (Request submitted to HSIAR Nov '17) <ul style="list-style-type: none"> <li>Due: Jun 18: 10% &lt;Past due. No indication that it will be addressed&gt;</li> </ul> </li> <li>Retrospective reporting for all other modalities implemented. (Request submitted to HSIAR Nov '17) <ul style="list-style-type: none"> <li>Due: Mar '19: 0% &lt;At risk&gt;</li> </ul> </li> </ul>

The partnership between the Project Team, TPO and HSIAR has evolved. The following table provides a summary of the new arrangement.

Group	Responsibility (as pertains to the HA Policy Expectations)
Project Team	<ul style="list-style-type: none"> <li>Deliver approved policy</li> <li>Guide and approve HA charters &amp; plans</li> <li>Monitor against the HA plans (review aggregated executive reports provided by the TPO)</li> </ul>
Transformation Projects Office	<ul style="list-style-type: none"> <li>Collect HA project performance reports (e.g. deliverable and milestone progress)</li> <li>Incorporate HA project performance information into the aggregated executive reports</li> <li>Provide the aggregated executive reports to the project team for review/validation</li> <li>Distribute the reports to executive</li> </ul>
HSIAR	<ul style="list-style-type: none"> <li>Develop and implement a framework for enhanced wait time tracking</li> <li>Develop and implement a framework for measuring appropriateness of ordering</li> <li>Collect data, produce reports and submit the reports to the TPO</li> </ul>

## Policy Group 1 – Key Actions

## Policy Group 2 – Key Actions

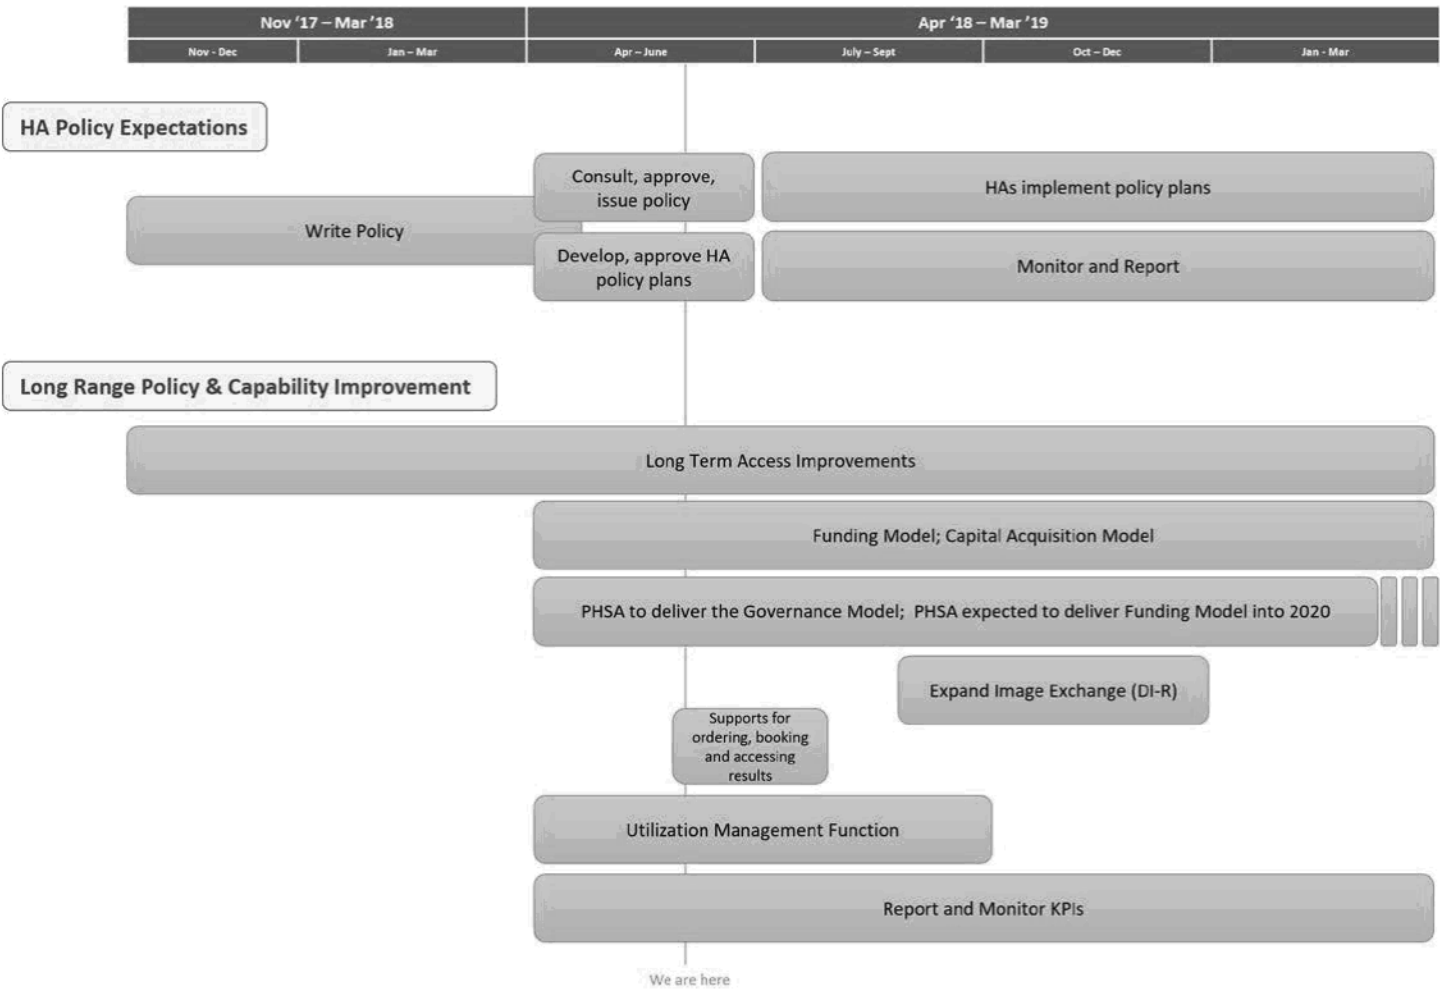

## Long-Range Policy and Capability Improvement

	Deliverables and Key Milestones	Target Start	Target End	% Complete	Comments
<b>Initiatives</b>					
<b>Long Term Access Improvements</b> <ul style="list-style-type: none"> <li>Develop evidence-based service configuration framework and roadmap</li> <li>Develop a strategy for pediatric access to medical imaging</li> </ul>	Service configuration framework Pediatric access strategy	Jun '17	Mar '19	10%	<b>Status</b> <ul style="list-style-type: none"> <li>Pediatric access strategy has been initiated. ChildHealthBC has agreed to develop a tiers of service model for medical imaging and will present plan to MIAC in July.</li> </ul> <b>Issue</b> <ul style="list-style-type: none"> <li>Service configuration work cannot begin until HSIAR is engaged.</li> </ul> <b>Action/Response</b> <ul style="list-style-type: none"> <li>Requested a statement of readiness/commitment from HSIAR.</li> </ul>
<b>Governance Model</b> <ul style="list-style-type: none"> <li>Undertake analytics and policy development to produce the proposed governance model</li> <li>Acquire decision/direction for the proposed governance model</li> </ul>	Proposed governance model Approval governance model	Apr '18	Mar '19	10%	<b>Change in approach</b> <ul style="list-style-type: none"> <li>PHSA to develop options for the provincial governance model for Medical Imaging.</li> <li>The project team will monitor and support PHSA</li> </ul>
<b>Funding Model</b> <ul style="list-style-type: none"> <li>Define a value-based funding model</li> </ul>	Value-based funding model	Apr '18	Mar '20	10%	<b>Key contribution delayed</b> <ul style="list-style-type: none"> <li>MoH Physician compensation unable to work with the project team as their focus is primary and community care</li> <li>The project team is unable to advance this work at this time</li> <li>Anticipate delivery of the funding model in 2020</li> </ul> <b>Potential change in approach</b> <ul style="list-style-type: none"> <li>Like the governance model, the responsibility for delivery may transfer to the PHSA</li> </ul>

# Project Timelines

## MI-AQI. Phase 2 Timeline

## MRI Volumes and Wait Times – Tracking

Volumes and wait times will no longer be included in this monthly status report. HSIAR will now publish the information.

## Budget and Projections

The Phase 2 budget includes:

- Funding for staff and consulting labour from existing, funded positions from within the Ministry

The Phase 2 budget does not include:

- Funding for any tools, equipment or people required for the HAs to meet their commitments. Where applicable, FCS is anticipated to provide this funding to the HAs

The budget will be managed by the Project Director and Project Sponsor.

## Indicators and Legend

Dashboard Legend	
Number Indicators	# The numbers indicated next to the arrows indicates the number of periods that the status has been at the reported level (colour).
Arrow Indicators	→ No change in status from previous period.
	↑ Increase in status level from previous period (e.g. green to yellow);
	↓ Decrease in status level from previous period (e.g. red to yellow)
	☑ Decision required; Risk exists.
	☒ No decision required; No risk exists

Deliverables Legend	
Approach for Deliverable % Complete	<p>10% - Work is started, initial thinking (initiation)</p> <p>25% - Work is defined, elements in place (initiation, planning)</p> <p>50% - Perform the work (execution, monitor &amp; control)</p> <p>75% - Deliver material for internal review, amend cycle (execution, monitor &amp; control)</p> <p>90% - Deliver material for external review to executive / steering (execution, monitor &amp; control)</p> <p>100% - Deliver final version of material, complete (close)</p>

# Project Status Report

Overall Status: At Risk

## Medical Imaging Access and Quality (MI-AQI)

April 13, 2018

<b>Project Purpose</b>	Improve both the access to, and quality of, Medical Imaging (MI) services in British Columbia.
<b>Project Phase</b>	Phase II, Sept '17 – Mar '19
<b>Phase II Objectives</b>	<ul style="list-style-type: none"> <li>Realize short-term access improvement</li> <li>Begin monitoring quality of care and performance</li> <li>Establish wait-time benchmarks and tracking capabilities</li> <li>Implement quality and appropriateness interventions</li> <li>Recommend models (governance, funding and service delivery)</li> </ul>

Project Code	Phase II Project Stage	Reporting Period	Project Sponsors	Project Director	Project Manager
2017-NN	Initiation / Execution	2/1/2018 - 3/30/2018	Ian Rongve, Lynn Stevenson, Tricia Braidwood-Looney	Carolyn Rudden	Jim Manning

## Project Dashboard

<b>Schedule</b>		4	⇒	No changes to schedule.
<b>Scope/Objectives</b>		4	⇒	No changes to scope/objectives. HA policy expectation development nearing completion. Consultation soon to be initiated. Long range policy and capability development on track
<b>Budget</b>		6	⇒	No additional resource costs. Funding for staff and consulting labour sourced from existing, funded positions from within the Ministry;
<b>People</b>		7	⇒	The need for additional project team resources identified; Hiring process underway.
<b>Issue / Response</b>	<input checked="" type="checkbox"/>	6		<b>All aspects of project requiring data collection and analysis</b> (I) Requests for HSIAR data collection and analysis (initiated summer '17) are outstanding. Project delivery impacted - unable to perform enhanced wait time tracking (R) Escalated to Ian for resolution. Continue to engage HSIAR. <b>Choosing Wisely</b> (I) Lack consensus from key players on the 'what' and 'how'. (R) Conduct a facilitated workshop to accomplish Apr 19
<b>Risk / Mitigation</b>	<input checked="" type="checkbox"/>	1		(R) Support for partner responsibility matrix. (M) Project Team to review w/Ian (seeking approval), then partners (HSIAR, Strategic Projects)
<b>Decision(s) Required</b>	<input checked="" type="checkbox"/>	2		None.

## Project Reframe

The project originally envisioned the work as being organized into four work streams:

- Medical Imaging Access and Service Distribution
- Governance, Funding and Service Model
- Medical Imaging Business Processes
- Quality of Care and Performance Monitoring

A decision was recently made to reframe the work. The core project attributes (schedule, scope/objectives, etc.) have not fundamentally changed. This reframe better reflects how the project is being executed, managed and communicated. The two work streams are now:

- HA Policy Expectations
- Long-Range Policy and Capability Improvement

A contributing factor to the need to reframe the work was the evolution of the policy. As a part of this policy evolution, two additional components are now considered:

- Improved Waitlist Management and Patient Communications (added to the HA Policy Expectations)
- Pediatric Access Strategy (added to the Long-Range Policy and Capability Improvement, Long Term Access Improvements)

## Project Deliverables and Key Milestones

### HA Policy Expectations

	Target Start	Target End	% Complete	Comments
<b>Policy – Develop/Implement</b>				
Write Policy	Nov '17	Apr '18	90%	Short term service volume announced.
Consult, Approve and Issue Policy	Apr '18	Jun '18	10%	
Develop/Approve HA Policy Plans	Apr '18	July '18	10%	
HAs Implement Policy Plans	Aug '18	Mar '19	0%	The bulk of the work completed in 18/19; Remainder in 19/20.
Monitor Plans and Report	Aug '18	Mar '19	0%	The bulk of the work completed in 18/19; Remainder in 19/20.
<b>Monitor - Volumes and Wait Times</b>				
Monitor and Report	Apr '18	Mar '19	10%	On-going

Policy Component	Description
Meet Medical Imaging Volume Targets	• Set expectations for short term access improvement
Rapid Access to Imaging (CT and ultrasound)	• Establish rapid access services - access for CT and ultrasound for urgent care patients (to avoid ED)
Pooled Referrals/First Available Slot Scheduling	• Establish and implement referrals/scheduling approach (where feasible)
Medium Stop Requisition Review Process Implementation	• Develop medium-stop approach and scope for implementation for MRI/CT and 5 low utility services
Imaging Appropriateness Improvement (Choosing Wisely Implementation)	• Develop & implement choosing wisely in community-based care • Develop & implement choosing wisely in HA facilities
Standardized Requisitions	• Develop and implement a standardized requisition for MRI and CT scans
Radiology Consult Service	• Establish Radiology Consult Service to provide input on ordering best first test
Improved Reporting of Wait Times	• Develop and implement enhanced wait time measurement framework
Patient Pathways and Linkages	• Define linkages of medical imaging to primary care networks and specialized services
Monitor and Report	• Monitor HAs as they continue to increase MRI service volumes as per Phase I

### Long-Range Policy and Capability Improvement

## MI-AQI. Phase 2 Timeline

## MRI Volumes and Wait Times – Tracking

Both the volumes and wait times tables below have been updated for the period.

Note: Recent 17/18 announcements (which incorporate period 13 values) differ from the MRI volumes below (which are inclusive of period 12).

### MRI Volumes

Location	Current Period			Year To Date			Comments
	Target Volume	Actual Volume	Variance	YTD Target Volume	YTD Actual Volume	YTD Variance	
	HA Projected Volume F2017/18 Period 12	HAMIS Actual Volume F2017/18 Period 12	HA Projected Volume vs HAMIS Actual Volume F2017/18 Period 12	HA Projected Volume F2017/18 YTD Period 12	HAMIS Actual Volume F2017/18 YTD Period 12	HA Projected Volume vs HAMIS Actual Volume F2017/18 YTD Period 12	
IHA	1,818	1,724	-94	20,118	18,464	-1,654	Staffing issues at one site (departures and mat leaves) and problems
FHA	5,250	4,705	-545	51,619	49,407	-2,212	Unexpected down time of 10 yr old scanner Abbotsford Regional
VCHA	5,038	4,952	-86	48,794	50,529	1,735	
VIHA	3,660	3,150	-510	37,025	34,077	-2,948	Staffing shortages result in lower volumes
NHA	725	772	47	6,848	6,467	-381	
PHSA	690	808	118	8,284	8,653	369	
<b>BC Total</b>	<b>17,181</b>	<b>16,111</b>	<b>-1,070</b>	<b>172,688</b>	<b>167,597</b>	<b>-5,091</b>	

	Target Volume	Actual Volume	Variance
<b>BC Total Previous Period (Period 11)</b>	<b>17,181</b>	<b>14,958</b>	<b>-2,223</b>

### Wait Times

Location	Previous Wait Time	Previous Wait Time	Current Wait Time	Total YTD	Comments
	90th Percentile Wait Times (in Days) Quarter 1 F2017/18 (All Priorities)	90th Percentile Wait Times (in Days) Quarter 2 F2017/18 (All Priorities)	90th Percentile Wait Times (in Days) Quarter 3 F2017/18 (All Priorities)	90th Percentile YTD F2017/18 (All Priorities)	
IHA	235	240	248	239	Wait times in NHA continue to increase (by 32 days) in Q3, even though the 2 net new MRI units are now operational. Noted delays for the MRI unit in Prince George was reported in Q2, having a negative impact on wait times for NHA. With new Q3 data, the overall YTD went down from 200 to 197 because wait times in Q3 had reduced.
FHA	301	304	268	294	
VCHA	117	103	99	106	
VIHA	153	165	163	160	
NHA	194	318	350	322	
PHSA	n.a.	n.a.	n.a.	n.a.	
<b>BC</b>	<b>204</b>	<b>196</b>	<b>190</b>	<b>197</b>	

Wait times are for completed out-patient cases.

### Budget and Projections

The Phase 2 budget includes:

- Funding for staff and consulting labour from existing, funded positions from within the Ministry

The Phase 2 budget does not include:

- Funding for any tools, equipment or people required for the HAs to meet their commitments. Where applicable, FCS is anticipated to provide this funding to the HAs

The budget will be managed by the Project Director and Project Sponsor.

## Indicators and Legend

Dashboard Legend	
Number Indicators	# The numbers indicated next to the arrows indicates the number of periods that the status has been at the reported level (colour).
Arrow Indicators	→ No change in status from previous period.
	↑ Increase in status level from previous period (e.g. green to yellow);
	↓ Decrease in status level from previous period (e.g. red to yellow)
	☑ Decision required; Risk exists.
	☒ No decision required; No risk exists

Deliverables Legend	
Approach for Deliverable % Complete	<p>10% - Work is started, initial thinking (initiation)</p> <p>25% - Work is defined, elements in place (initiation, planning)</p> <p>50% - Perform the work (execution, monitor &amp; control)</p> <p>75% - Deliver material for internal review, amend cycle (execution, monitor &amp; control)</p> <p>90% - Deliver material for external review to executive / steering (execution, monitor &amp; control)</p> <p>100% - Deliver final version of material, complete (close)</p>

# Project Status Report

Overall Status: At Risk 

## Medical Imaging Access and Quality (MI-AQI)

June 8, 2018

<b>Project Purpose</b>	Improve both the access to, and quality of, Medical Imaging (MI) services in British Columbia.
<b>Project Phase</b>	Phase II, Sept '17 – Mar '19
<b>Phase II Objectives</b>	<ul style="list-style-type: none"> <li>Realize short-term access improvement</li> <li>Begin monitoring quality of care and performance</li> <li>Establish wait-time benchmarks and tracking capabilities</li> <li>Implement quality and appropriateness interventions</li> <li>Recommend models (governance, funding and service delivery)</li> </ul>

Project Code	Phase II Project Stage	Reporting Period	Project Sponsors	Project Director	Project Manager
2017-NN	Execute; Monitor/Control	5/1/2018 - 5/31/2018	Ian Rongve, Tricia Braidwood-Looney	Carolyn Rudden	Jim Manning

## Project Dashboard

Schedule		1	↑	<p>The following policy development/implementation milestones have started earlier:</p> <ul style="list-style-type: none"> <li>HA policy plans and commitments (charters) to be finalized earlier (July-&gt;June)</li> <li>HA implementation of plans to start earlier (Aug-&gt;July)</li> <li>Monitor of plans and reporting to start earlier (Aug-&gt; July)</li> </ul> <p>(Result of Issue #1) Enhanced Wait Time Tracking deliverables, which are not under the control of the project, have missed their scheduled due dates.</p>
Scope/Objectives		1	↑	<p>(Result of Issue #1) Enhanced Wait Time Tracking project objectives, which are not under the control of the project, have yet to be achieved.</p>
Budget		7	⇒	No additional resource costs. Funding for staff and consulting labour sourced from existing, funded positions from within the Ministry.
People		1	↑	<p>Project team staffing changes.</p> <ul style="list-style-type: none"> <li>Tricia Braidwood-Looney, the acting Executive Director for LDBS, who is also a project sponsor, has announced her retirement effective the end of June.</li> <li>The project team needs to be re-staffed with new people (using existing, funded positions) with a manager (competition underway) and a senior policy analyst.</li> </ul>
Issue / Response	<input checked="" type="checkbox"/>	8		<p>Issue #1. All aspects of the project requiring data collection and analysis</p> <ul style="list-style-type: none"> <li>(I) Requests for HSIAR data collection and analysis (initiated summer '17) are outstanding. Project delivery impacted <ul style="list-style-type: none"> <li>Wait time measurement framework</li> <li>Prospective reporting for CT and MRI</li> </ul> </li> <li>(R) Escalated to Ian for resolution. Continue to engage HSIAR.</li> </ul> <p>Issue #2. Internal MoH communication and coordination</p> <ul style="list-style-type: none"> <li>(I) Information and reports presented by non-project team members to executive without prior program area / project team review and validation</li> <li>(R) Escalated to Ian for resolution. Continue to engage the TPO and HSIAR.</li> </ul> <p>Issue #3. HA engagements</p> <ul style="list-style-type: none"> <li>(I) Multiple contacts by non-project team members requesting the same information from HAs</li> <li>(I) Engagement results not shared with the project team</li> <li>(R) Escalated to Ian for resolution. Continue to engage the TPO and HSIAR.</li> </ul>
Risk / Mitigation	<input checked="" type="checkbox"/>	2		None.
Decision(s) Required	<input checked="" type="checkbox"/>	4		None.

## Project Deliverables and Key Milestones

### HA Policy Expectations

	Target Start	Target End	% Complete	Comments
<b>Policy – Develop/Implement</b>				
Write Policy	Nov '17	Apr '18	100%	
Consult, Approve and Issue Policy	Apr '18	Jun '18	90%	Completed: Draft policy distributed; Kick-off mtg w/HAs conducted May 30 <sup>th</sup>
Develop/Approve HA Policy Plans	Apr '18	Jun '18	50%	Completed: HA Policy Expectations Charter template distributed to HAs May 31. Policy groups 1a+b+c are in scope. Planned: HA response due to project team June 22. MoH review and HA sign-off due June 29.
HAs Implement Policy Plans	Jul '18	Mar '19	50%	Approach: The bulk of the work will be completed in 18/19; Remainder in 19/20.
Monitor Plans and Report	Jul '18	Mar '19	50%	Approach: The bulk of the work will be completed in 18/19; Remainder in 19/20.
<b>Monitor - Volumes and Wait Times</b>				
Monitor and Report	Apr '18	Mar '19	50%	Enhanced Wait Time Tracking <ul style="list-style-type: none"> <li>Wait time measurement framework. (Request submitted to HSIAR Nov '17) <ul style="list-style-type: none"> <li>Due: Mar '18: 10% &lt;Past due. HSIAR recently indicated that this will be addressed&gt;</li> </ul> </li> <li>Prospective reporting for CT and MRI implemented (Request submitted to HSIAR Nov '17) <ul style="list-style-type: none"> <li>Due: Jun 18: 10% &lt;Past due. No indication that it will be addressed&gt;</li> </ul> </li> <li>Retrospective reporting for all other modalities implemented. (Request submitted to HSIAR Nov '17) <ul style="list-style-type: none"> <li>Due: Mar '19: 0% &lt;At risk&gt;</li> </ul> </li> </ul>

The partnership between the Project Team, TPO and HSIAR has evolved. The following table provides a summary of the new arrangement.

Group	Responsibility (as pertains to the HA Policy Expectations)
Project Team	<ul style="list-style-type: none"> <li>Deliver approved policy</li> <li>Guide and approve HA charters &amp; plans</li> <li>Monitor against the HA plans (review aggregated executive reports provided by the TPO)</li> </ul>
Transformation Projects Office	<ul style="list-style-type: none"> <li>Collect HA project performance reports (e.g. deliverable and milestone progress)</li> <li>Incorporate HA project performance information into the aggregated executive reports</li> <li>Provide the aggregated executive reports to the project team for review/validation</li> <li>Distribute the reports to executive</li> </ul>
HSIAR	<ul style="list-style-type: none"> <li>Develop and implement a framework for enhanced wait time tracking</li> <li>Develop and implement a framework for measuring appropriateness of ordering</li> <li>Collect data, produce reports and submit the reports to the TPO</li> </ul>

# Project Timelines

## MI-AQI. Phase 2 Timeline

## MRI Volumes and Wait Times – Tracking

Volumes and wait times will no longer be included in this monthly status report. HSIAR will now publish the information.

## Budget and Projections

The Phase 2 budget includes:

- Funding for staff and consulting labour from existing, funded positions from within the Ministry

The Phase 2 budget does not include:

- Funding for any tools, equipment or people required for the HAs to meet their commitments. Where applicable, FCS is anticipated to provide this funding to the HAs

The budget will be managed by the Project Director and Project Sponsor.

## Indicators and Legend

Dashboard Legend

Approach for Deliverable % Complete	<p>10% - Work is started, initial thinking (initiation)</p> <p>25% - Work is defined, elements in place (initiation, planning)</p> <p>50% - Perform the work (execution, monitor &amp; control)</p> <p>75% - Deliver material for internal review, amend cycle (execution, monitor &amp; control)</p> <p>90% - Deliver material for external review to executive / steering (execution, monitor &amp; control)</p> <p>100% - Deliver final version of material, complete (close)</p>

# Project Status Report

Overall Status: On Track

## Medical Imaging Access and Quality (MI-AQI)

December 8, 2017

<b>Project Purpose</b>	Improve both the access to, and quality of, Medical Imaging (MI) services in British Columbia.
<b>Project Phase</b>	Phase II, Sept '17 – Mar '19
<b>Phase II Objectives</b>	<ul style="list-style-type: none"> <li>Realize short-term access improvement</li> <li>Begin monitoring quality of care and performance</li> <li>Establish wait-time benchmarks and tracking capabilities</li> <li>Implement quality and appropriateness interventions</li> <li>Recommend models (governance, funding and service delivery)</li> </ul>

Project Code	Phase II Project Stage	Reporting Period	Project Sponsors	Project Director	Project Manager
2017-NN	Initiation / Execution	11/15/2017 - 11/30/2017	Ian Rongve, Lynn Stevenson, Tricia Braidwood-Looney	Carolyn Rudden	Jim Manning

## Project Dashboard

<b>Schedule</b>		2	⇒	Schedule refinement nearing completion.
<b>Scope/Objectives</b>		1	↑	Scope for phase II has been reduced (in response to ADM request).
<b>Budget</b>		2	⇒	No additional resource costs. Funding for staff and consulting labour sourced from existing, funded positions from within the Ministry
<b>People</b>		2	⇒	The need for additional project team resources identified; Hiring process underway.
<b>Issue / Response</b>		2	⇒	<b>All aspects of project requiring data collection and analysis</b> (I) Requests submitted to HSIAR in summer '17. Work not initiated. On hold until Dec mtg with HSIAR ADM. (R) Raised to Ian; Prioritize outstanding requests
<b>Risk / Mitigation</b>		2	⇒	None.
<b>Decision(s) Required</b>		2	⇒	Revised project charter (with reduced scope) to be approved by the sponsors.

See Appendix A for the status key legend

## Project Deliverables and Key Milestones

### Workstream #1. Medical Imaging Access and Service Distribution

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion	% Complete	Comments
<b>Short Term Access Improvements</b> (a) Set expectations for short term access improvement (b) Define linkages of medical imaging to primary care networks and specialized services (c) Monitor HAs as they continue to increase MRI service volumes as per Phase I	Policy component written and issued	Nov '17	Mar '18	25%	Component of common policy paper.
	Policy component implemented	Apr '18	Mar '19	0%	
<b>Long Term Access Improvements</b> (d) Develop evidence-based service configuration framework and roadmap (e) Develop a strategy for pediatric access to medical imaging	Service configuration framework Service configuration roadmap	Jun '17	Mar '19	10%	
	Pediatric access strategy	Jan '19	Mar '19	10%	
<b>Enhance Wait Time Tracking</b> (e) Develop and implement enhanced wait time measurement framework	Wait time measurement framework	Nov '17	Mar '18	10%	
	Prospective reporting for CT and MRI implemented	Nov '17	June '18	25%	
	Retrospective reporting for all other modalities implemented	Nov '17	Mar '19	10%	
<b>Rapid Access to Imaging (CT and ultrasound)</b> (f) Establish rapid access services - access for CT and ultrasound for urgent care patients (to avoid outpatient ED)	Policy component written and issued	Nov '17	Mar '18	25%	Component of common policy paper
	Policy component implemented	Apr '18	Mar '19	0%	
<b>Pooled Referrals/First Available Slot Scheduling</b> (g) Establish and implement referrals/scheduling approach (where feasible)	Policy component written and issued	Nov '17	Mar '18	25%	Component of common policy paper
	Policy component implemented	Apr '18	Mar '19	0%	

### Workstream #2. Governance, Funding and Service Model

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion	% Complete	Comments
<b>Governance Model</b> (h) Undertake analytics and policy development to produce the proposed governance model (i) Acquire decision/direction for the proposed governance model	Proposed governance model Approval for governance model	Apr '18	Mar '19	10%	
<b>Funding model</b> (j) Define a value-based funding model	Value-based funding model	Apr '18	Mar '19	10%	
<b>Capital Acquisition</b> (k) Define a capital planning/funding model for strategic medical imaging equipment purchases	Capital planning funding model	Apr '18	Mar '19	25%	

### Workstream #3. Medical Imaging Business Processes

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion	% Complete	Comments
<b>Expand Image Exchange (DI-R)</b> (l) Acquire funding and complete a feasibility study regarding medical imaging expansion to community imaging providers	Funding received for feasibility study Feasibility study results	Sept '18	Dec '18	25%	
<b>Supports for ordering, booking and accessing results</b> (m) Seek HA commitment for business process improvement (through IMITSC)	HA commitment (through IMITSC)	June '18	June '18	50%	

## Workstream #4. Quality of Care and Performance Monitoring

Initiatives	Deliverables and Key Milestones	Target Start	Target Completion	% Complete	Comments
<b>Medium Stop Requisition Review Process Implementation</b> (n) Develop MRI/CT medium-stop approach and scope for implementation	Policy component written and issued	Nov '17	Mar '18	25%	Component of common policy paper.
	Policy component implemented	Apr '18	Mar '19	0%	
<b>Choosing Wisely Implementation</b> (o) Develop & implement choosing wisely in community-based care (p) Develop & implement choosing wisely in HA facilities	Policy component written and issued	Nov '17	Mar '18	25%	Component of common policy paper.
	Policy component implemented	Apr '18	Mar '19	0%	
<b>Key Performance Indicators</b> (q) Report and monitor KPIs	Policy component written and issued	Nov '17	Mar '18	25%	Component of common policy paper.
	Policy component implemented	Apr '18	Mar '19	0%	
<b>Radiology Consult Service</b> (r) Establish Radiology Consult Service to provide input on ordering best first test	Policy component written and issued	Nov '17	Mar '18	25%	Component of common policy paper.
	Policy component implemented	Apr '18	Mar '19	0%	
<b>Utilization Management Function</b> (s) Define and implement utilization management function	Utilization mgmt function implemented	Apr '18	Mar '19	10%	

### Deliverables Legend

Approach for Deliverable % Complete	10% - Work is started, initial thinking (initiation) 25% - Work is defined, elements in place (initiation, planning) 50% - Perform the work (execution, monitor & control) 75% - Deliver material for internal review, amend cycle (execution, monitor & control) 90% - Deliver material for external review to executive / steering (execution, monitor & control) 100% - Deliver final version of material, complete (close)

## Workstream Activity Report

### Workstream #1. Medical Imaging Access and Service Distribution

Initiatives	Activities started, ongoing or completed this Reporting Period	Activities planned for the next Reporting Period
<b>Short Term Access Improvements</b> (a) Set expectations for short term access improvement (b) Define linkages of medical imaging to primary care networks and specialized services (c) Monitor HAs as they continue to increase MRI service volumes as per Phase I	<ul style="list-style-type: none"> <li>ID rates in other jurisdictions. Email other provinces, request per capita rate for MRI &amp; CT and service volumes (this year, and last two)</li> <li>Investigate other sources of info e.g. CIHI &amp; OECD (Org for Economic Cooperation and Development) rates for MRI &amp; CT</li> </ul>	<ul style="list-style-type: none"> <li>Completion of prior period activity</li> </ul>
<b>Long Term Access Improvements</b> (d) Develop evidence-based service configuration framework and roadmap (e) Develop a strategy for pediatric access to medical imaging	<ul style="list-style-type: none"> <li>Prioritize all requests &lt;complete&gt;</li> <li>Discuss w/HSIAR ADM. &lt;deferred&gt;</li> </ul>	<ul style="list-style-type: none"> <li>Discuss w/HSIAR ADM</li> </ul>
<b>Enhance Wait Time Tracking</b> (e) Develop and implement enhanced wait time measurement framework	<ul style="list-style-type: none"> <li>Consult HA &amp; PIC to address data quality issues related to prospective wait times</li> </ul>	<ul style="list-style-type: none"> <li>Continuation of prior period activity</li> </ul>
<b>Rapid Access to Imaging (CT and ultrasound)</b> (f) Establish rapid access services - access for CT and ultrasound for urgent care patients (to avoid outpatient ED)	<ul style="list-style-type: none"> <li>Gather info on VIHA service model</li> <li>Initiate MI-AQI policy consult with HAs</li> </ul>	<ul style="list-style-type: none"> <li>Continuation of prior period activity</li> </ul>
<b>Pooled Referrals/First Available Slot Scheduling</b> (g) Establish and implement referrals/scheduling approach (where feasible)	<ul style="list-style-type: none"> <li>Gather info on current state and the gaps identified in the Primary Care strategy</li> <li>Perform MI-AQI policy consult with HAs</li> </ul>	<ul style="list-style-type: none"> <li>Continuation of prior period activity</li> </ul>

### Workstream #2. Governance, Funding and Service Model

Initiatives	Activities started, ongoing or completed this Reporting Period	Activities planned for the next Reporting Period
<b>Governance Model</b> (h) Undertake analytics and policy development to produce the proposed governance model (i) Acquire decision/direction for the proposed governance model	<ul style="list-style-type: none"> <li>Determine approach for analysis and options paper</li> </ul>	<ul style="list-style-type: none"> <li>Continuation of prior period activity</li> </ul>
<b>Funding model</b> (j) Define a value-based funding model	<ul style="list-style-type: none"> <li>Wait for Ministry Project on value-based funding models to begin.</li> </ul>	<ul style="list-style-type: none"> <li>Continuation of prior period activity</li> </ul>
<b>Capital Acquisition</b> (k) Define a capital planning/funding model for strategic medical imaging equipment purchases	<ul style="list-style-type: none"> <li>Finance and Corporate services representatives identified</li> </ul>	<ul style="list-style-type: none"> <li>Setup 1<sup>st</sup> meeting of the working group</li> </ul>

### Workstream #3. Medical Imaging Business Processes

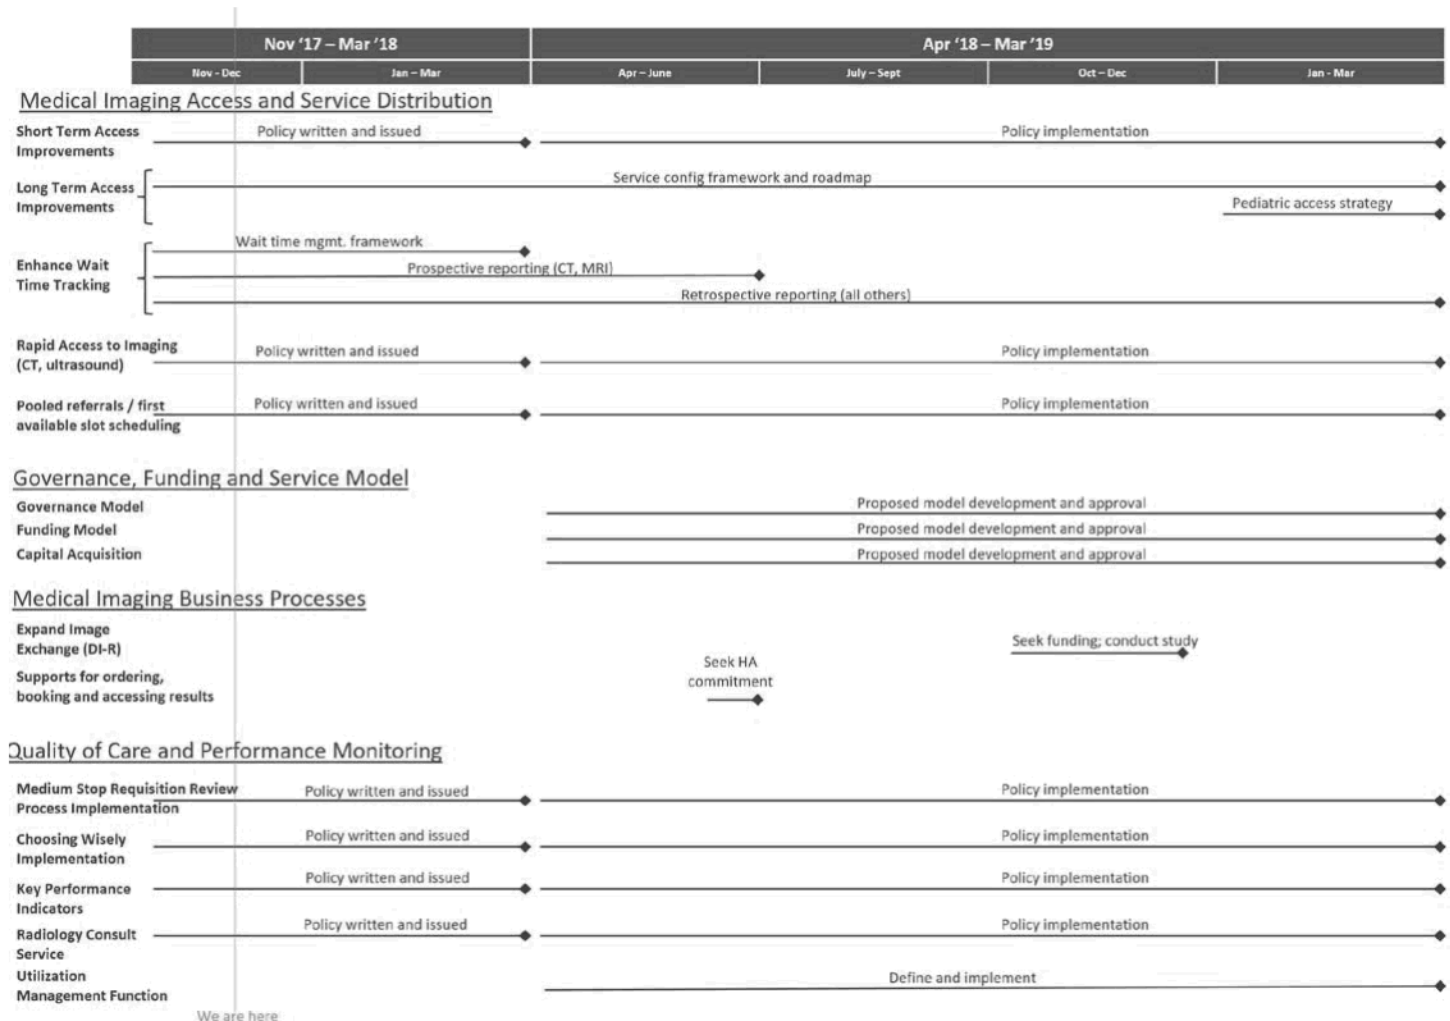

Initiatives	Activities started, ongoing or completed this Reporting Period	Activities planned for the next Reporting Period
<b>Expand Image Exchange (DI-R)</b> (l) Acquire funding and complete a feasibility study regarding medical imaging expansion to community imaging providers	<ul style="list-style-type: none"> <li>Develop BN</li> </ul>	<ul style="list-style-type: none"> <li>Continuation of prior period activity</li> </ul>
<b>Supports for ordering, booking and accessing results</b> (m) Seek HA commitment for business process improvement (through IMITSC)	<ul style="list-style-type: none"> <li>Develop approach for ask of IMITSC</li> <li>Meet with HSIMIT CIO to plan presentation for Jan IMITSC</li> <li>Sharing of Vision and Roadmap with HAs (from Phase I)</li> </ul>	<ul style="list-style-type: none"> <li>Continuation of prior period activity</li> </ul>

## Workstream #4. Quality of Care and Performance Monitoring

Initiatives	Activities started, ongoing or completed this Reporting Period	Activities planned for the next Reporting Period
<b>Medium Stop Requisition Review Process Implementation</b> (n) Develop MRI/CT medium-stop approach and scope for implementation	<ul style="list-style-type: none"> <li>Gather background info – conduct initial learning engagements to understand current state</li> <li>Conduct MI-AQI policy consult</li> </ul>	<ul style="list-style-type: none"> <li>Continuation of prior period activity</li> </ul>
<b>Choosing Wisely Implementation</b> (o) Develop & implement choosing wisely in community-based care (p) Develop & implement choosing wisely in HA facilities	<ul style="list-style-type: none"> <li>Form HA advisory group.</li> <li>Tricia and Carolyn to meet with co-chair of GPAC</li> <li>Develop the collaboration MOU</li> </ul>	<ul style="list-style-type: none"> <li>Continuation of prior period activity</li> </ul>
<b>Key Performance Indicators</b> (q) Report and monitor KPIs	<ul style="list-style-type: none"> <li>To discuss w/HSIAR ADM</li> </ul>	<ul style="list-style-type: none"> <li>Continuation of prior period activity (planned for Dec 11)</li> </ul>
<b>Radiology Consult Service</b> (r) Establish Radiology Consult Service to provide input on ordering best first test	<ul style="list-style-type: none"> <li>Gather background info – conduct initial learning engagements to understand current state</li> <li>Conduct MI-AQI policy consult</li> </ul>	<ul style="list-style-type: none"> <li>Continuation of prior period activity</li> </ul>
<b>Utilization Management Function</b> (s) Define and implement utilization management function	<ul style="list-style-type: none"> <li>To discuss w/HSIAR ADM</li> </ul>	<ul style="list-style-type: none"> <li>Continuation of prior period activity (planned for Dec 11)</li> </ul>

## Project Timelines

## MRI Volumes and Wait Times – Tracking

### MRI Volumes

Location	Current Period			Year To Date			Comments
	Target Volume	Actual Volume	Variance	YTD Target Volume	YTD Actual Volume	YTD Variance	
	HA Projected Volume F2017/18 Period 8	HAMIS Actual Volume F2017/18 Period 8	HA Projected Volume vs HAMIS Actual Volume F2017/18 Period 8	HA Projected Volume F2017/18 YTD Period 8	HAMIS Actual Volume F2017/18 YTD Period 8	HA Projected Volume vs HAMIS Actual Volume F2017/18 YTD Period 8	
IHA	1,873	1,742	-131	12,846	11,901	-945	In the current year (up to period 8) the actual volumes for MRI exams is 107,647, which is higher than the projected volume 106,250. Three health authorities (IHA, VIHA, NHA) have notable lower actuals than their projected volumes. VCHA has a notable increase in actual of +2,719.
FHA	5,250	4,227	-1,023	31,786	32,075	289	
VCHA	5,038	4,265	-773	29,762	32,481	2,719	
VIHA	3,660	3,079	-581	22,385	21,978	-407	
NHA	724	739	15	3,949	3,536	-413	
PHSA	690	710	20	5,522	5,676	154	
<b>BC Total</b>	<b>17,235</b>	<b>14,762</b>	<b>-2,473</b>	<b>106,250</b>	<b>107,647</b>	<b>1,397</b>	

	Target Volume	Actual Volume	Variance
<b>BC Total Previous Period (Period 7)</b>	<b>14,634</b>	<b>14,889</b>	<b>255</b>

### Wait Times

Location	Previous Wait Time	Current Wait Time	Comments
	90th Percentile Wait Times (in Days) Quarter 1 F2017/17 (All Priorities)	90th Percentile Wait Times (in Days) Quarter 2 F2017/18 (All Priorities)	
IHA	235	238	None.
FHA	301	304	
VCHA	117	103	
VIHA	153	165	
NHA	194	321	
PHSA	n.a.	n.a.	
<b>BC</b>	<b>204</b>	<b>196</b>	

Wait times are for completed out-patient cases.

### Budget and Projections

The Phase 2 budget includes:

- Funding for staff and consulting labour from existing, funded positions from within the Ministry

The Phase 2 budget does not include:

- Funding for any tools, equipment or people required for the HAs to meet their commitments. Where applicable, FCS is anticipated to provide this funding to the HAs

The budget will be managed by the Project Director and Project Sponsor.

## Appendix A – Status Key

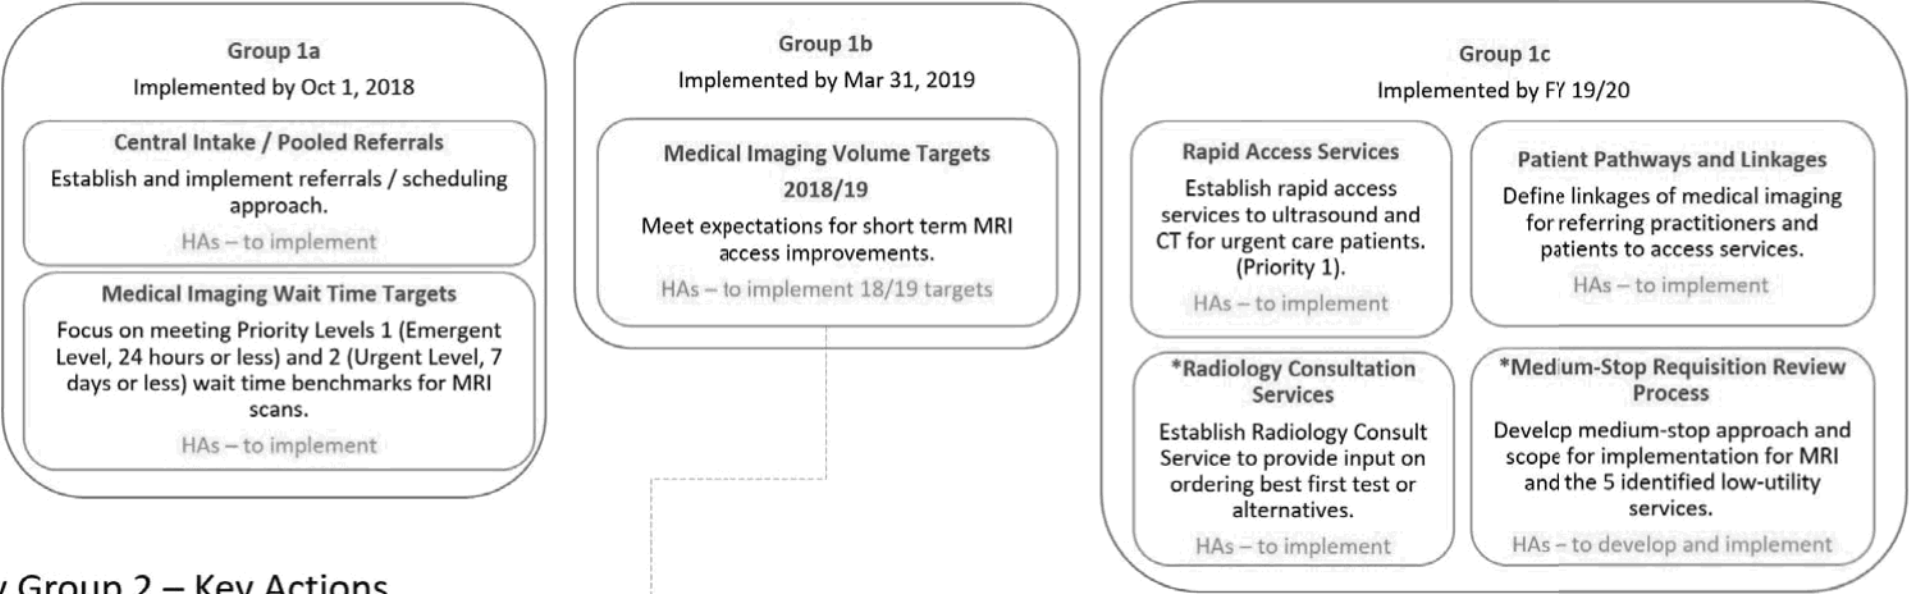

### Number indicators

The numbers indicated next to the arrows indicates the number of periods that the status has been at the reported level (colour).

### Arrow indicators

	No change in status from previous period.
	Increase in status level from previous period (e.g. green to yellow)
	Decrease in status level from previous period (e.g. red to yellow)
	Decision required; Risk exists.
	No decision required; No risk exists

## Policy Group 1 – Key Actions

## Policy Group 2 – Key Actions

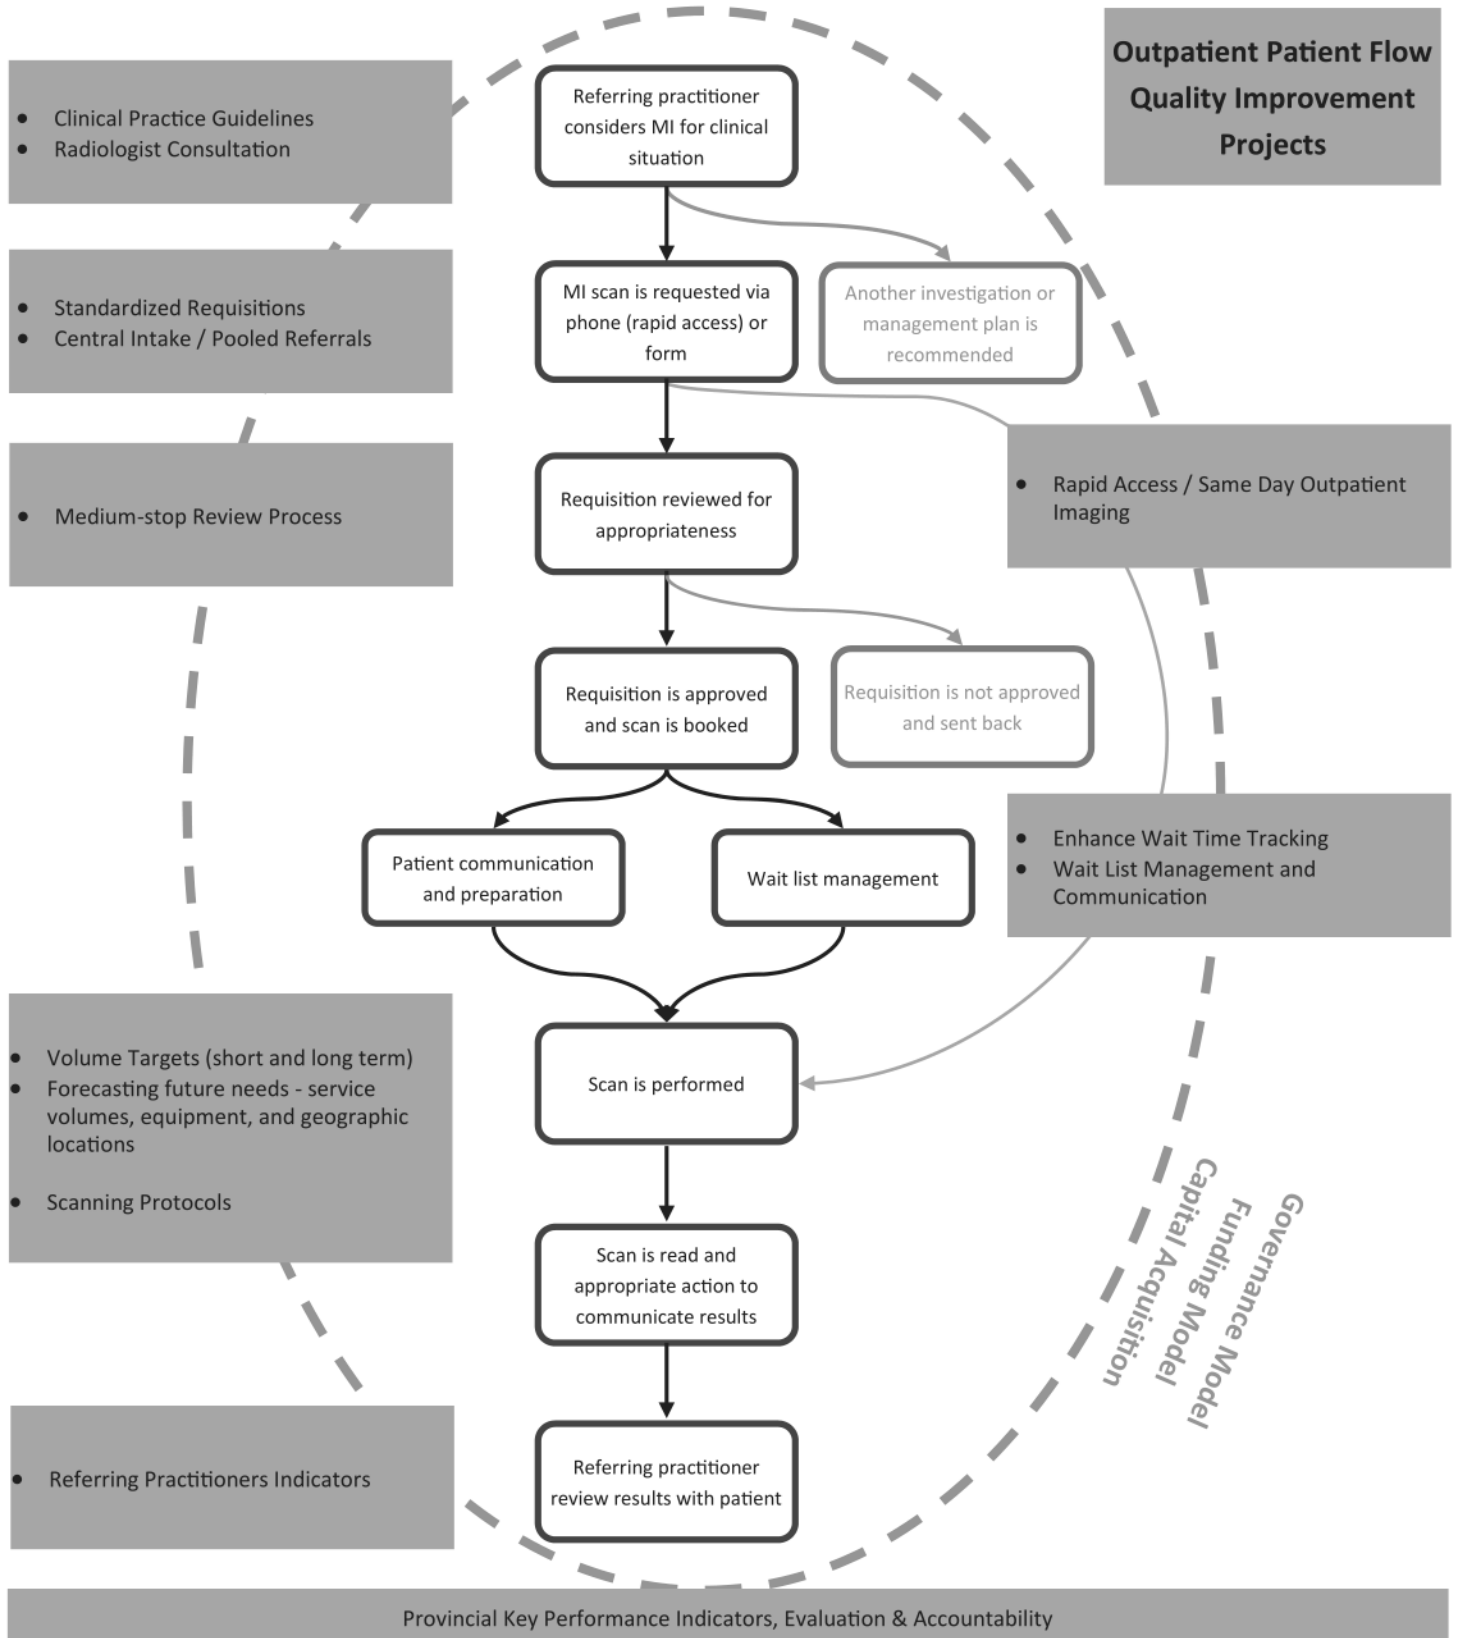

# Medical Imaging Access and Quality Improvement Project

## Phase 2 of the Advanced Imaging Strategy

Objectives of the Medical Imaging Access and Quality Improvement (MI-AQI) Project are:

- 1) Reduce the wait times and improve geographic access to medical imaging services;
- 2) Improve quality and appropriateness of medical imaging services;
- 3) Improve business processes for medical imaging services; and
- 4) Implement a framework for the governance, funding and service delivery models which promotes long-term sustainability.

Provincial Surgical Executive Committee (PSEC)

**Minutes**

February 2, 2018 - 9:00 am to 3:00 pm

s.15

<b>Attendees</b> <ul style="list-style-type: none"> <li>• Marilyn Copes (Co-Chair)</li> <li>• Dr. Andy Hamilton (Co-Chair)</li> <li>• Vicki Kendall</li> <li>• Jean Walters</li> <li>• Alison Dormuth</li> <li>• Dr. Paul Whelan</li> <li>• Kelly Chapman</li> <li>• Darlene MacKinnon</li> <li>• Dr. Erik Skarsgard</li> <li>• Dr. Gary Redekop</li> <li>• Dr. Mark Carey</li> <li>• Shari McKeown</li> <li>• Dr. Ken Hughes</li> <li>• Janine Johns</li> <li>• Collette Christney (by phone)</li> </ul>	<ul style="list-style-type: none"> <li>• Dr. Chris Taylor</li> <li>• Dr Robert Halpenny (by phone)</li> <li>• Dr. Sam Bugis (morning only)</li> <li>• Jordon Lowe (secretariat)</li> <li>• Ian Rongve</li> </ul> <b>Guests</b> <ul style="list-style-type: none"> <li>• Brendan Abbott (by phone)</li> </ul>	<b>Regrets</b> <ul style="list-style-type: none"> <li>• Dr. Mike Stanger</li> <li>• Dr. David Albiani</li> <li>• Shelley Hatcher</li> <li>• Dr. Trina Montemurro</li> <li>• Susan Wannamaker</li> <li>• Dr. Ralph Belle</li> <li>• Dr. Simon Treissman</li> <li>• Dr. Roanne Preston</li> <li>• Dr. Ian Courtice</li> </ul>
---	--	---

Agenda Item	Speaker	Discussion/Decision
<b>Welcome and Introductions</b>	Marilyn Copes Dr. Andy Hamilton	<ul style="list-style-type: none"> <li>• Marilyn welcomed everyone and explained that some members and speakers would be arriving late due to flight delays.</li> </ul>
<b>Agenda Additions &amp; Minutes/ Action Items</b>	All	<ul style="list-style-type: none"> <li>• No additions to the agenda were made.</li> <li>• The December 8 minutes were amended by Dr Hamilton; otherwise approved.</li> </ul>  <p>AMENDED_Dec8_PSEC_Minutes.pdf</p> <ul style="list-style-type: none"> <li>• Marilyn reported that outstanding Action Items have been completed.</li> <li>• PSEC will review Terms of Reference (TOR) at April 6 meeting.</li> </ul>
<b>Vascular Access Indicator Report</b>	Dr. Adeera Levin and Colleen Hart	<p>Dr. Adeera Levin and Colleen Hart presented on vascular access (VA) surgery wait times. See <i>Summary, VA Incidence, Prevalence, Surgical Wait Times &amp; Outcomes</i> report presented for rates of wait times.</p>  <p>Agenda #3 Summary Rates Oct 1 2016 to I</p>

		<p><b>Discussion:</b></p> <ul style="list-style-type: none"> <li>• VA cases are known well in advance, so they should be easy to plan time for in the OR.</li> <li>• Not meeting wait time targets can have serious negative outcomes for patients.</li> <li>• Despite efforts from Health Authorities (HA) and BC Renal Agency, wait time targets are not being met.</li> <li>• Mandated volumes or dedicated time for a procedure seems to improve waitlists.</li> <li>• To standardize things across the province we need a mandate and provide incentives.</li> <li>• Each HA needs to have dedicated time that is used for vascular access surgery first. If it's not filled with VA surgery by a given date, it should be filled by more urgent procedures.</li> </ul> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li>• Chairs to formulate recommendation to send to Standing Committee on Health Services and Population Health.</li> </ul> <p> Recommendation to SCHSPH on Dialysis A</p>
<b>Patient Story</b>	Vicki Kendall	<p>Vicki shared the story <sup>s.22</sup> s.22</p> <p><b>Discussion:</b></p> <ul style="list-style-type: none"> <li>• Although there are many avenues for patients to lodge a complaint, most typically through the Patient Care Quality Office, some patients fear being labelled “difficult” if they speak out, and how that might affect their care.</li> </ul>
<b>Update on Consultation/communication</b>	Marilyn Copes	<p>Marilyn gave an update on the consultation and communication in terms of the surgery plan.</p> <ul style="list-style-type: none"> <li>• Two parallel processes: <ol style="list-style-type: none"> <li>1. Ian Rongve and Marilyn will be meeting with groups, including the Colleges, Unions, Health Authorities, and other regulators to review the 3-year surgical plan and the 18-month action plan.</li> <li>2. At the same time, the HAs are engaging with physicians.</li> </ol> </li> </ul> <p>Note: The Ministry will be visiting BC Children's and Women's Hospitals on February 8, 2018 to conclude the site visits.</p>

		<ul style="list-style-type: none"> <li>• Additional updates: <ul style="list-style-type: none"> <li>○ The Surgical Summit was held on Monday, January 22 in Vancouver, sponsored by the Specialist Service Committee, BC Patient Safety and Quality Council (BCPSQC), Shared Care, and the General Practices Service Committee.</li> <li>○ The focus was on enhanced recovery after surgery (ERAS) and pre-surgical optimization of the patient through multidisciplinary approaches. A report will be posted on BCPSQC and ERAS website.</li> </ul> </li> </ul> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li>• Marilyn will provide a report on the site visits to the Standing Committee on Health Services and Population Health.</li> <li>• Adrian, Marilyn, Collette to have a call on February 14, 2018 re: next steps following the Surgery Summit.</li> <li>• Christina, Shari, Andy and Marilyn to have a call on February 6, 2018 re: the role of BC Patient Safety and Quality in supporting the surgery plan.</li> </ul>
<b>Appropriateness Framework</b>	Matt Brown	<p>See <i>Agenda #4 Appropriateness Surgical Services January 26 2018.</i></p>  <p>Agenda #4 Appropriateness Surg</p> <p><b>Additional presentation notes:</b> The purpose of sharing this document with PSEC (the “wise council”) is to gather feedback. Matt posed the following three questions to the group:</p> <ol style="list-style-type: none"> <li>1. Given your experience and knowledge in the realm of appropriateness, where have you seen it work in your practise?</li> <li>2. What are the factors for success?</li> <li>3. Where would you start?</li> </ol> <p><b>Discussion:</b></p> <ul style="list-style-type: none"> <li>• Data is needed to show how we are doing in terms of appropriateness.</li> <li>• The academic community needs to be involved to determine what and when procedures are appropriate.</li> <li>• There are examples of guidelines and strategies across the province, e.g. BC Children’s Hospital’s <i>Choosing Wisely</i> document sends back some referrals to GPs, and cancer guidelines created by interdisciplinary teams.</li> <li>• The Patterns of Practice Committee could be a good vehicle for investigating appropriateness, starting with prescribing habits.</li> </ul>

		<ul style="list-style-type: none"> <li>• Brendan Abbott explained appropriateness is in the provincial plan in order to improve access. Are there unnecessary surgeries? If there are, that will improve access to appropriate surgeries.</li> <li>• A successful plan needs to be physician-led with the help of the academic community in conjunction with the Ministry of Health, Health Authorities, and the BCPSQC.</li> <li>• Dr. Bugis indicated there is a Physician Quality Measures Committee.</li> </ul> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li>• Matt Brown to follow up with a discussion with Dr. Bugis and Dr. Halpenny.</li> </ul>
<b>HHR Update</b>	Mark Armitage (via t/c)	<p>Mark explained that the draft 2017/18 Health Human Resources (HHR) plan has been reviewed by senior executives and shared with Health Authorities. There are two documents:</p> <ol style="list-style-type: none"> <li>1. A framework or system-level document of HHR activities in the province.</li> <li>2. A specific set of deliverables and actions that are organized to support the strategic priorities: primary/community care, seniors, mental health and addictions, and surgery.</li> </ol> <ul style="list-style-type: none"> <li>• Mark advised that he met with ADMs and Lynn Stevenson to walk them through the plan.</li> <li>• These HR activities will be incorporated into larger project plans that Erica Meldrum and her team manage.</li> <li>• The documents should be shared in the next few weeks.</li> <li>• With respect to the surgical initiative, the two major areas of focus are anaesthesia and speciality nursing.</li> <li>• The plans to increase surgery volumes to meet targets require human resources.</li> <li>• There is short term activity to deal with volumes, e.g. short-term compensation models to increase surgical volumes and operating times, and long-term activity towards a value-based compensation model.</li> <li>• Speciality nursing is another area of focus. Mark reported that he is working with David Byres (ADM for Clinical Integration, Regulation and Education) and BCIT to maintain and expand their speciality nursing program.</li> <li>• Need for HHR planning to be driven by a population/health-needs perspective in addition to profession-driven forecasting process based on number of health professionals in a specific</li> </ul>

		<p>discipline.</p> <p>There are two projects underway:</p> <ol style="list-style-type: none"> <li>1. Clear modelling around surgical wait times and surgeries that need to be completed and the anticipated future demands to meet those targets.</li> <li>2. HEABC discussion around perioperative roles before/after surgery, and how we can use other health professionals, e.g. anaesthetist assistants and the nursing family in general.</li> </ol> <p><b>Discussion:</b></p> <ul style="list-style-type: none"> <li>• What about increasing residency programs for anaesthesiology?</li> <li>• The hip and knee “keep up” plan is putting stress on physiotherapists and occupational therapists. There is a need to connect with the Physiotherapy Association of BC to better understand the supply and demand on the public side and the connection with the private sector.</li> <li>• The committee identified that there is universal difficulty in getting surgical assistants for both scheduled and emergency surgery and that this resource needs to be built into the plan. Kelly Chapman noted that salaried surgical assists have been successful in Alberta.</li> </ul> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li>• Mark Armitage to talk to David Byres and Kevin Brown and bring information on residency programs to a future PSEC meeting.</li> <li>• Kelly Chapman to send information on Alberta’s surgical assists to Mark Armitage.</li> </ul>
<b>Rural Surgical Obstetrics Network</b>	Kim Williams and Dr. Nancy Humber	<p>See attached ppt presentation, <i>Rural Surgical and Obstetrical Networks</i>.</p> <p> PSEC 2018 02 02 kw.pptx</p> <p><b>Additional presentation notes:</b></p> <ul style="list-style-type: none"> <li>• There is fast attrition of community services in rural areas.</li> <li>• Ten sites were initially identified as communities supported by either GPESS or solo General Surgeons so the Rural Surgical Obstetrics Network (RSON) wanted to work with them first. The goal is to maintain maternity care and sustain surgical care. The RSON funding will be used to support</li> </ul>

		<p>equitable access to services in rural areas.</p> <p><b>Discussion:</b></p> <ul style="list-style-type: none"> <li>What are some potential strategies for sustainability of rural sites? <ul style="list-style-type: none"> <li>For low-volume rural surgeons (e.g. one C-section per month), some strategies to keep surgical skills current are: <ul style="list-style-type: none"> <li>Increasing volumes by travelling to larger centres to perform surgeries.</li> <li>Having surgery teams from larger sites visit smaller sites to provide coaching.</li> </ul> </li> <li>Virtual networks do the whole intake and follow-up visits, and the patient only travels for the surgery.</li> <li>Adding common low-risk procedures to rural C-section programs to make them sustainable.</li> </ul> </li> <li>What is funding going to be spent on? <ul style="list-style-type: none"> <li>A range of things that could include increasing OR days, clinical coaching (coaches will be paid for time), remote presence technology, CQI team, pay to physicians to build this in their community, and to travel to talk to others.</li> <li>At the end of five years, the Health Authorities need to take responsibility for RSON.</li> </ul> </li> <li>Is there alignment with FNHA? <ul style="list-style-type: none"> <li>RSON got their buy-in at the beginning of this project.</li> <li>The hope is that local working groups would engage with the Patient Voices Network and engage with care leaders in indigenous communities.</li> </ul> </li> </ul>
<b>Surgical Services Report – period 9</b>	Zachary Young	<p>See report, <i>Agenda #5 Surgical Services Strategic Draft Report v1_8</i>.</p> <p></p> <p>Agenda #5 Surgical Services Strategic Dr:</p> <p><b>Additional presentation notes:</b></p> <ul style="list-style-type: none"> <li>The report covers performance indicators, and covers how each HA is doing in terms of implementing the 18-month surgical plan.</li> <li>This report will iterate over time.</li> <li>This report was presented at the Standing Committee on Health Services and Population Health (SCHSPH), Leadership Council, and will continue to be a monthly item at Leadership Council.</li> </ul>

		<p><b>Discussion:</b></p> <ul style="list-style-type: none"> <li>• How accurate is the data? Are we measuring apples to apples? <ul style="list-style-type: none"> <li>○ It was stressed that currently the data on site implementation is not comparable between Health Authorities.</li> <li>○ The report will become more accurate over time. Future iterations of the report will improve transparency by indicating on the report where the data comes from, e.g. Lighthouse, DAD, SPR.</li> </ul> </li> <li>• The report needs to use standardized definitions and scales on graphs. <ul style="list-style-type: none"> <li>○ The scales will be standardized for the period 10 report.</li> </ul> </li> <li>• It also needs to declare the date and time data is pulled.</li> <li>• There was a deliberate decision to show each HA's performance on the same report. Sharing information with each other can help improve quality and share lessons across HAs.</li> <li>• The data can help change the culture and create openness.</li> </ul>
<p><b>Update on Surgical Services Programs and Site Implementation and Expansion Working Groups</b></p>	<p>Collette Christney</p>	<p><u>Site Implementation Working Group</u> Includes members from the HAs and Ministry of Health. The group supports four areas:</p> <ol style="list-style-type: none"> <li>1. Patient notification</li> <li>2. Point of Contact</li> <li>3. Scheduling</li> <li>4. ERAS</li> </ol> <ul style="list-style-type: none"> <li>• Patient notification was the initial focus because there is some urgency to get this work moving.</li> <li>• All HAs voted to adopt the following solution: <ul style="list-style-type: none"> <li>○ The SPR will include functionality that enables patient notification: the creation of the notification itself and the ability to track the notifications.</li> <li>○ The functionality will be live in September 2018 and all HAs are expected to phase in patient notification from this point.</li> </ul> </li> <li>• There is also a sub-working group investigating the technical aspects of the Patient Notification and the estimation of the wait time to be included in the notification.</li> <li>• The Working Group is very close to completing the patient notification letters.</li> <li>• Point of Contact will be next, then scheduling and ERAS.</li> </ul>

		<p><u>Surgical Services Programs (SSP) Working Group</u></p> <ul style="list-style-type: none"> <li>• The Working group includes representatives from the Health Authorities and a patient representative.</li> <li>• The group has completed the conceptual overview of an SSP, including its key attributes.</li> <li>• The first instance of SSPs will be centred on hip and knee replacement surgery. A hip and knee replacement program will be in place in each HA by end of March 2018. This will comprise: <ol style="list-style-type: none"> <li>1. Central intake;</li> <li>2. A pre-surgical program;</li> <li>3. Efficiencies (e.g. dedicated beds, pathways, dedicated ORs); and</li> <li>4. Evaluation (through Lighthouse).</li> </ol> </li> <li>• Longer term goals are to integrate with the interdisciplinary team and enable the connection with the primary care network.</li> <li>• Physicians are expected to join the working group shortly. Dr. Ken Hughes has already joined, with an orthopaedic surgeon from each HA joining over the next couple of meetings. A meeting has been scheduled with the Specialist Services Committee (SSC) about ongoing support and integration with SSC related activities, in particular communication, engagement, and optimization.</li> </ul> <p><b>Action:</b> As the work progresses, more details, including the wait time estimation methodology, will be shared with PSEC.</p>
<b>Surgery Wait List Management and Scheduling System</b>	Marc Koehn (via t/c)	<ul style="list-style-type: none"> <li>• Requirements have been completed.</li> <li>• Deputy Minister approved the briefing note on funding.</li> <li>• A technical resource from BC Clinical and Support Services (BCCSS) has been assigned.</li> <li>• Will be bringing in a procurement lead to turn the requirements into a Request for Proposal (RFP).</li> <li>• Marc will be able to provide a more concrete plan by the June 1 PSEC meeting.</li> </ul>
<b>Closing Comments</b>	Marilyn Copes Dr. Andy Hamilton	<ul style="list-style-type: none"> <li>• The Chairs asked that as members look at and absorb the surgical services report, they provide Zach Young with feedback.</li> <li>• They also asked that any feedback on the draft Appropriateness Framework should go to Matt Brown.</li> <li>• They confirmed that the vascular access feedback will be taken to Standing Committee.</li> </ul>

## Next PSEC Meetings

### April 6, 2018

- **Patient Story by** Janine Johns (IHA)
- **HA Efficiency Story by** Alison Dormuth (Island Health)

# Appropriateness of Care – Surgical Services

---

## Objective

Develop a provincial approach for an appropriateness framework for surgery to support high-quality, cost effective and appropriate patient-centred surgical services.

## Expected Impact on Health Outcomes

A framework for appropriateness in patient-centred surgical services will enable British Columbia care providers to improve timely access to surgical procedures, assist in managing surgical waitlists, improve the patient experience, and optimize the cost associated with surgery. Outcomes will include:

1. *Efficiency*: the framework will be broadly applied and widely used by clinicians and healthcare providers in the province to ensure appropriate and timely care for all patients and promote a collaborative and efficient surgical system.
2. *Accessibility*: improve access to surgical services for patients who require surgery by eliminating the overuse, misuse, underuse and variation in service.
3. *Person Centred*: an appropriateness framework for surgery is developed with input from healthcare providers, stakeholders, patients and families, and caregivers.
4. *Safety*: appropriateness in surgical services will be evidence-driven and reduce unwarranted variation in service by providing more standardized care to all patients across the province.
5. *Cost effective*: the elimination of unnecessary diagnostic tests and surgical procedures will result in better use of existing financial resources for the healthcare system.
6. *Acceptability*: better performance of physicians and health authorities will improve the quality of surgical services for patients and their families.

## Background

Data released by the Canadian Institute for Health Information (CIHI, 2017a) showed Canada's health spending was forecast to grow by nearly 4% in 2017, reaching \$242 billion. This amount represents approximately \$6,604 per Canadian, up \$200 per person from 2016. In British Columbia health spending is estimated at \$6,321 per person.

The increasing in spending across the province is due in part to the increase in testing and treatments. It is estimated more than 1 million Canadians (30%) undergo unnecessary medical tests and treatments each year (CIHI, 2017). Unnecessary testing and procedures do not add

value can take away from patient care by potentially exposing patients to harm, lead to more testing, add stress for patients, and contribute to increased wait times for more urgent patients. Data shows there is substantial variation between regions and facilities in terms of the number of unnecessary tests and procedures performed. This suggests there is an opportunity to improve (CIHI, 2017).

*“Unnecessary care wastes health resources, increases wait times for patients and can lead to patient harm” (CIHI, 2017)*

### Appropriateness of Care

The Canadian Medical Association (CMA) (2013) defines appropriateness of care as “the right care, provided by the right providers, to the right patient, in the right place, at the right time, resulting in optimal quality care”. Appropriateness includes five key components:

1. Right care is based on evidence for effectiveness and efficacy in the clinical literature and covers not only use but failure to use;
2. Right provider is based on ensuring the provider’s scope of practice adequately meets but does not far exceed the skills and knowledge to deliver the care;
3. Right patient acknowledges that care choices must be matched to individual patient characteristics and preferences and must recognize the potential challenge of reconciling patient and practitioner perceptions;
4. Right venue emphasizes that some settings are better suited in terms of safety and efficiency to delivering a specific type of care than others;
5. Right time indicates care is delivered in a timely manner consistent with agreed upon bench marks.

If all five components of appropriateness are present, high quality care will be delivered with the appropriate use of resources – the right cost.

In practice, appropriateness of care involves the consideration of: **overuse** (patients may receive unnecessary tests), **underuse** (patients may not receive the care they should), **misuse** (patients may receive the wrong care and may die prematurely), and **variation** in service (patients with the same health issues receive different care based on where they live).

In 2015, the CMA provided a policy options paper which outlined recommendations for a Canadian approach to appropriateness in healthcare. The CMA’s recommendations included:

- Provinces and territories should work with providers to develop a comprehensive framework by which to assess the appropriateness of health care.
- Provinces and territories should work with providers to develop robust educational products on appropriateness in health care and to disseminate evidence-informed strategies for necessary changes in care processes.
- Provinces and territories should work with providers to put in place incentives to decrease the provision of marginally useful or unnecessary care.

## **Appropriateness of Care in practice**

A number of Canadian provinces incorporate an aspect of appropriateness into their healthcare system – predominantly through a provincial adaptation of the Choosing Wisely Canada program. Choosing Wisely Canada is a campaign to help clinicians and patients have conversations about unnecessary medical tests and treatments and to make smart and effective care choices. Alberta, Saskatchewan, Manitoba, Ontario, Quebec, New Brunswick, Nova Scotia and Newfoundland are all committed to the Choosing Wisely campaign and coordinate with their provincial health system, academic institutions, or health quality councils to facilitate provincial level Choosing Wisely campaigns.

The Nova Scotia Health Authority is in the early stage of developing an appropriateness framework with physicians and shifting their focus to outcome measurements. Recent work in geriatrics with the Palliative and Therapeutic Harmonization (PATH) program has shown a patient-centred approach providing more information to patients and families has led to more informed choices and a higher rate of refusal for higher risk procedures. For example, of the first 150 patients who have completed the program, 75% declined surgery and other procedures. Patients with the highest level of frailty or dementia were the least likely to choose aggressive treatments.

The Alberta Medical Association and the College of Physicians and Surgeons Alberta actively practice optimized prescribing with seniors – analyzing the appropriateness of prescribing medications and balancing the benefits and drawbacks of multiple medications (polypharmacy) in patients.

## **The Saskatchewan Model**

An Appropriateness of Care Program has been adopted in the Saskatchewan Health Authority (SHA) and an Appropriateness of Care Network has been in place since the province completed the Patient First Review in 2009. The Patient First Review identified goals for healthcare in the province and highlighted the changing demographics of residents and their desire for high quality, safe healthcare. Increasing wait times and costs further supported the need for an appropriateness of care program.

The Saskatchewan Surgical Initiative (SSI) was launched to pilot an appropriateness strategy and ran from 2010-2014 with the guideline: “sooner, safer, smarter”. Surgical rates were reviewed and a framework was developed for monitoring procedures and data collection. The SSI also partnered with private healthcare clinics to deliver day surgery procedures to patients. Success with the SSI was due to three key factors: leadership, front-line staff and physician engagement, and a patient-centred focus. While success was limited (only improved wait times for elective surgery patients), it fundamentally changed the culture and decision-making process and changed the way waiting lists were managed. The initiative did not reach the root of the system’s problem, however, which was the overall funding and structure of the Medicare system.

At the conclusion of the SSI, a Provincial Appropriateness of Care framework was launched in 2015 by the Appropriateness of Care Program Team with the support of the Saskatchewan Health Authority (SHA), the Saskatchewan Health Quality Council (SKHQC), the Saskatchewan Medical Association, and Ministry of Health. The Appropriateness of Care Program Team is led by 2 surgeons, the Senior Medical Officer, a lead coordinator, and one full time policy analyst. The Team also runs the Clinical Quality Improvement Program (CQIP) which provides quality improvement training to physicians. The SKHQC provides administrative support for the Appropriateness of Care Program.

The first implementation of the Appropriateness of Care Framework in 2015-16 was in the clinical area of Magnetic Resonance Imaging (MRI) of the lumbar spine – an area with strong evidence suggesting overuse in Canada. In 2017-2018, Appropriateness of Care projects in Saskatchewan will include: a continuation of the MRI of the lumbar spine, CT Lumbar Spine Project, Standardizing Pre-Operative Testing and Evaluation for Elective Surgery, and Improving Quality of Care for Patients Requiring Colonoscopy (Saskatchewan Health Authority, 2018).

### **Data Driven**

As an evidence-based/informed approach to healthcare, appropriateness of care is anchored in data. In the Saskatchewan model, the framework is dependent on relevant clinical information to support continuous learning and improvements. Relevant and timely data is crucial to display the current state of a clinical area, identify areas for improvement, and measure the impact of changes and improvements on patient outcomes. Current and timely data is also used to influence buy-in – encouraging physicians across regions to meet agreed upon standards in appropriateness of care.

### **Training**

Education and training are key system supports to achieve appropriateness targets and facilitate the cultural change needed to make an appropriateness framework a norm in clinical practice. In Saskatchewan, physicians and quality improvement experts can apply to complete

the Intermountain Healthcare Quality Improvement Training called Advanced Training Program (ATP). To date the ATP has been well received and dozens of pilot projects on appropriateness have been completed. Training a second cohort of 40 physicians is planned for 2018. In the next few years training is expected for clinicians, administrative staff, patients, families and data experts to further develop appropriateness projects at the provincial level.

The BC Patient Safety and Quality Council (BCPSQC) offers a comparable program for physicians in the area of quality through their Clinician Quality Academy. Participants attend residency sessions and complete a quality project over an 8-month training program. The Academy is heavily supported through the BCPSQC; however participants are required to pay a registration fee of \$1,495. The third session begins in April 2018.

### **Lessons Learned**

Lessons learned from the Saskatchewan Appropriateness of Care Program indicate data sharing agreements among practitioners, health authorities, and health care facilities in the province are essential for successful implementation of an appropriateness framework. The involvement and buy-in from community practitioners was also considered a valuable component of the program as they are generally the healthcare providers that refer patients to surgery specialists.

In BC, support from data partners (i.e. Health Authorities, Ministry of Health HSIAR, and Universities) and access to data sources (i.e. CIHI, National Surgical Quality Improvement Program [NSQIP], Canadian Partnership Against Cancer [CPAC]) will be integral for building and maintaining an appropriateness framework.

### **British Columbia Context**

In 2015, the Ministry of Health released “Future Directions for Surgical Services in British Columbia”, which focused on improving timely access to appropriate surgical treatments and procedures. The policy direction paper was built on five elements:

- 1) Understanding population and patient surgical health care needs;
- 2) Developing quality and sustainable surgical care delivery models;
- 3) Recruiting and retaining engaged, skilled health care providers;
- 4) Using IT/IM tools and processes as supports to allow innovation and effective coordination and delivery of surgical services; and
- 5) Using financial models to support the achievement of intended health system outcomes.

The recommendations in this paper align with the strategic direction for the health system in Setting Priorities for the BC Health System, the Ministry of Health’s BC Health System Strategy

Implementation: A Collaborative and Focused Approach, and also align with the overarching goals of the Triple Aim:

1. Improve the health of populations;
2. Improve the patient experience of care; and
3. Reduce the per capita cost of health by focusing on quality (especially effectiveness and appropriateness) and the efficiency of health care delivery.

A variety of factors are driving an increased demand for surgery – a growing and aging population, increased longevity of seniors, increased levels of obesity, improvements in surgical procedures and technology, and patient preferences and choices. While the Ministry of Health has used a range of funding strategies for surgical services, including pay-for-performance and activity based funding, there has only been a small positive impact to the surgery performance indicators.

The British Columbia Physician's Master Agreement (2014-2019) outlines the role for physicians in the area of appropriateness of care. Article 8 – Joint Clinical Committees states the Government and the BC Medical Association will create or continue their work in three joint committees, namely: a) the Specialist Services Committee; b) the General Practice Services Committee; and c) the Shared Care Committee. The core mandate for these committees includes an aspect of quality, evidence based care, and the adoption of appropriate clinical practice guidelines (see Appendix A).

### **3 Year Plan for Surgical Services 2017 – 2020 and the 18-Month Surgical Action Plan – October 2017 to March 2019**

Surgical Services and surgery wait times continue to be a priority for British Columbia. The Premier's mandate letter to the Minister of Health in the fall of 2017 directed the Minister to make substantive progress on several priorities including: work to reduce wait times and implement province-wide co-ordination to manage and actively monitor waitlists.

The Provincial Surgery Executive Council (PSEC) created the 3 Year Surgical Services Strategy 2017 – 2020 and within that the 18-month Surgical Action Plan (October 2017 to March 2019) to address this priority. The Action Plan identified several main goals:

1. Improve timely access to appropriate surgical procedures,
2. Manage surgical waitlists consistently and proactively,
3. Improve patient experience, and
4. Use key enablers to support implementation (Health Human Resources, funding, Information Management Information Technology [IMIT], Performance Reporting and Management).

One item in the Surgical Services Strategy is to “*develop an appropriateness framework*”.

### **Implementation in the BC Surgery Context**

Adoption of an appropriateness framework will have a direct impact on surgeons, physicians, nurse practitioners, diagnostic technicians, patients and families, nurses, allied health practitioners, among others.

To fulfill the objective to develop an approach for an appropriateness framework BC could adopt the Saskatchewan Appropriateness of Care Program definition as: “*a treatment, procedure, medication or intervention that is expected to do more good than harm for a patient with a given health problem or set of problems, based on scientific evidence*” (Government of Saskatchewan, 2015).

In addition to applying lessons learned from the SHA Appropriateness of Care Program, within BC best practices, such as “When to image (and when not to image): A toolkit for ensuring appropriate use of medical imaging” (2017) can be leveraged. Prepared by Dr. Bruce Forster and Dr. Vivian Chan (Vancouver Coastal Health/Providence Health Care) with support from the Ministry of Health, and experts from the provincial Quality, Performance, Service Distribution Working Group, the medical imaging toolkit focused on computed tomography (CT) and magnetic resonance imaging (MRI). The toolkit was created for physician groups, clinical services and organizations to help reduce inappropriate imaging in all areas, though particular focus was on procedures of high volume and high risk with clear evidence-based appropriateness guidelines: lower back pain, minor head trauma, uncomplicated headache, major joints with co-existent osteoarthritis, and pulmonary embolism in low-risk patients.

### **Key Ingredients for an Appropriateness of Care Framework:**

1. Engage key stakeholders early and often. Include a wide range of stakeholders such as College of Physicians and Surgeons of BC, BCPSQC, Doctors of BC, Health Authorities, patients and families, Ministry of Health among others. Achieve consensus from physicians and expert groups on appropriateness criteria and recommendations for the chosen procedure or process. Criteria and rules moving forward can be gleaned from Provincial expert working groups, surgery specialists, or from Choosing Wisely specialists (<https://choosingwiselycanada.org>).
2. Create detailed data sharing agreements among practitioners, health authorities, and health care facilities in the province. Ensure support from data partners (i.e. Health Authorities, Ministry of Health HSIAR, and Universities) and access to data sources (i.e. CIHI, NSQIP) to build and maintain an appropriateness framework.
3. Understand the main drivers of inappropriate surgical interventions. Determine what factors are causing variations in surgery across the region/province. Determine what

factors are contributing to overuse/underuse/misuse of surgery in a region/institution/province.

4. Focus initial efforts on a single type of surgery or a surgical process that has the most unwarranted variation, overuse, or misuse. The surgical procedure or process selected of focus should be supported by validated data including: a review of Canadian studies, medical journals and statistics, as well as available quantitative data from CIHI, other. Examples include: focusing on hip/knee surgery, focusing on the referral process from family physician to specialist care, surgical evaluation processes for hip surgery as significant in the region with support from medical journals or other data sources.
5. Confirm the project has the leadership and resources to succeed. It is essential to have commitment from physicians, executive, leadership, patients and families, staff and other stakeholders who will form an inter-professional project team. The project will require a budget, human resources, analysts, and possibly software and IT expertise.
6. Identify achievable actions to reduce the overuse/misuse or underuse of the chosen surgical procedure or process. These should be outlined at the beginning of the project and can highlight ways to ensure success and stay on track. Potential actions may include: educating teams about appropriateness; provide standardized, evidence informed, and plain language information to patients and their family in order to make fully informed choice and their best decisions. (i.e.: why the decision is being made, what alternatives are available, data reviewed by the team, etc.).
7. Implement an appropriateness framework. Data collection on agreed upon indicators specific to appropriateness as well as progress on implementation of the initiative will inform the progress of the initiative. Ensure the collection of the right data to measure the success of your project. Indicators can also be used to measure each aspect of the project; allowing quick rectification for any area that is off-track (i.e.: data is not being collected at a specific site). Everyone should be clear on their role and responsibilities to support adoption and implementation of the framework.
8. Share findings and results. It will be critical to share the findings and results amongst all stakeholders in a clear, transparent and easily understood way. Knowledge transfer throughout the initiative is an example of continuous quality improvement at work, and will aid in the development of next areas of focus, adoption of the framework, increase buy-in, and gain new champions to increase participation.

## Conclusion

A variety of factors are driving an increased demand for surgery in the province – a growing and aging population, increased longevity of seniors, increased levels of obesity, improvements in surgical procedures and technology, and patient preferences and choices. With healthcare spending in British Columbia estimated at \$6,321 per person, and access to surgery and patient experience critical factors, the development of an approach for an Appropriateness of Care framework will ensure a patient and family centred core value in the healthcare system.

Adopting this framework for surgery will enable British Columbia care providers to improve timely access to surgical procedures, assist in managing surgical waitlists, improve the patient experience, and optimize the cost associated with surgery. Sharing knowledge from the success or challenges as they are implemented could also lead to the adoption of appropriateness frameworks in other areas of healthcare – potentially reducing spending and improving outcomes for all patients.

As learned through the Saskatchewan Appropriateness of Care Program, data sharing agreements among the Ministry of Health, practitioners, health authorities, and health care facilities within the province will be an essential component of a successful implementation of an appropriateness framework. Data partners (i.e. HSIAR, CIHI, NSQIP, CPAC, etc.) will be integral for building and maintaining a strong data-driven appropriateness framework. Engagement and leadership from specialists and community practitioners is a critical and valuable component of the initiative as they work collaboratively to care for patients and their families during their journey through the surgery continuum.

## **8.2 Core Mandate of the Joint Clinical Committees**

In fulfilling each of their specific mandates, each of the Joint Clinical Committees will operate from a core mandate to:

- (a) identify changes in current physician service delivery that could result in improvements in patient care, more effective utilization of physician and other healthcare resources, and measurable savings in expenditures that could be reallocated for more optimal provision of healthcare services;
- (b) support the integration and alignment of physician services with other health service delivery;
- (c) strengthen the application of Triple Aim Principles in service design and delivery;
- (d) encourage appropriate collaborative practice with other physicians and integration of physicians with other healthcare professionals in the delivery of services;
- (e) identify gaps in care and address population health needs;
- (f) support the delivery of quality and evidence based care, including the use of quality improvement methodologies and promoting the adoption and effective implementation of appropriate clinical practice guidelines, where appropriate in order to address unwarranted variations in care;
- (g) prior to making decisions, consider the unique issues arising from rural practice;
- (h) use total expenditure data for services as an aid to making decisions;
- (i) form temporary sub-committees (that may be allocated a specific budget) where required to address issues of patient care which engage the mandates of more than one Joint Clinical Committee;
- (j) make recommendations on appropriate shared care between physicians and other healthcare professionals; and
- (k) establish measures for accountability and achievement of outcomes.

Provincial Surgical Executive Committee (PSEC)

		 <p>Feb2_PSEC Minutes - Final.pdf</p> <p>Update on the following action items:</p> <ul style="list-style-type: none"> <li>• The Health Authority Site Visit Summary document will be presented at the next SCHSPH meeting.</li> <li>• Various discussions around appropriateness are taking place to form an approach to this work.</li> </ul>
<b>Dialysis Access Update</b>	Marilyn Copes Dr. Andy Hamilton	<p>Recommendations on dialysis access surgery were presented to the Standing Committee on Health Services and Population Health (SCHSPH) on March 8<sup>th</sup>. SCHSPH is fully supportive of recommendations from PSEC.</p>  <p>Recommendation to SCHSPH on Dialysis A</p> <p><b>Discussion:</b></p> <ul style="list-style-type: none"> <li>• Members discussed dialysis access, including vascular access (VA), suggesting that cases are known well in advance so they should be easy to plan for time in the operating room (OR).</li> <li>• Wait time targets are currently not being met, despite efforts from HAs and the BC Renal Agency to improve.</li> <li>• Mandated volumes and/or dedicated operating room time for VA procedures will help to reduce wait times. Need a mandate and to provide incentives for physicians.</li> <li>• BC Nephrology Society should provide the sense of timelines for vascular access (e.g. 6 weeks? 8 weeks?).</li> <li>• Vascular surgeons must be 'on-board'.</li> </ul> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li>• Further discussion on dialysis access surgery to take place during the April 9th all-day Surgical meeting.</li> </ul>
<b>Terms of Reference Review</b>	All	<p>The Terms of Reference (TOR) have had draft revisions made and will come back to the June meeting for finalization.</p> <p>Dr. Carl Brown, a BC Cancer representative, will join PSEC as an active member in June.</p> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li>• Members to review the revised TOR and provide feedback by the June 1st PSEC meeting.</li> </ul>

		 <p>PSEC Terms of Reference - March 20</p>
<b>HA Efficiency</b>	<p>Alison Dormuth Stefan Fletcher Dr. Colin Landells</p>	<p>Alison Dormuth, Stefan Fletcher and Dr. Colin Landells presented information on the South Island Hip and Knee Centre (Rebalance<sup>MD</sup>):</p> <ul style="list-style-type: none"> <li>• Rebalance<sup>MD</sup> has seen much growth and anticipates 2,400 hip and knee replacement patients next year (i.e. increased from 3 total joint replacements/day to 5).</li> <li>• Rebalance<sup>MD</sup> employs 110 professionals who provide personalized services.</li> <li>• Offers a streamlined pathway for increased access for patients.</li> <li>• Currently approximately 3,200 patients on the waitlist with wait one = 8 weeks.</li> <li>• Strong partnership with VIHA and MoH.</li> <li>• Provides an efficient system that maximizes OR and bed utilization.</li> <li>• Uses an efficient data management system which includes PREMS/PROMS.</li> <li>• Need to utilize free PROMS tools as the current cost is significant.</li> <li>• PROMS – 3, 6 and 12 month follow up forms are emailed to patients through a portal whereby they complete the PROMS assessment.</li> <li>• PROMS Assessment was developed using a number of assessments, including Veterans RAND (VR-12), Single Assessment Numeric Evaluation (SANE) for Knee/Hip and Shoulder, Oxford Hip and Oxford Knee Assessments.</li> <li>• Performance reports are sent to physicians monthly to compare their performance with the clinic average.</li> <li>• Rebalance<sup>MD</sup> website provides robust education modules for patients.</li> </ul> <p><b>Next Steps:</b></p> <ul style="list-style-type: none"> <li>• Volume based care will become part of the Rebalance<sup>MD</sup> model.</li> <li>• In July, electronically managed records will be directly uploaded to VIHA's data management systems (i.e. VIHA's EHR).</li> <li>• PSEC members thanked the presenters for their excellent work.</li> </ul>

<b>Surgical Summit on Patient Optimization – next steps</b>	<p>Adrian Leung Katie Hill Shari McKeown Dr. Kelly Mayson (by phone) Joanna Pannekoek (by phone)</p>	<p>Adrian Leung and Katie Hill presented on the Specialist Services Committee's (SSC) surgical optimization and enhanced recovery initiative.</p> <p> SSC Presentation to PSEC_JP edits.pptx</p> <p><b>Discussion:</b></p> <ul style="list-style-type: none"> <li>• A coordinated approach to surgical optimization is the right thing to do for patients.</li> <li>• All surgical patients should be treated the same with respect to optimization, regardless of procedure.</li> </ul> <p>Adrian recommended the following next steps to support the surgical strategy:</p> <ul style="list-style-type: none"> <li>• Engagement is a key factor.</li> <li>• Expand ERAS to include gynecology and urology.</li> <li>• Conduct environmental scans to collect current pathways and data sets.</li> <li>• Develop provincially endorsed pathways for gynecology and urology (can be any site – does not have to be NSQIP site).</li> <li>• General practitioners need appropriate billing codes for optimization to be effectively implemented.</li> <li>• The Specialist Services Committee (SSC) is supportive of enhanced patient access through pooled referrals, and recommends there should be incentives for physicians to participate.</li> <li>• The MoH and health authorities need to innovate in order to implement an optimized and collaborative model of care.</li> </ul>
<b>Update with Lynn Stevenson</b>	<p>Marilyn Copes Dr. Andy Hamilton</p>	<p>The co-chairs thanked Lynn Stevenson for her years of service and many contributions, and highlighted that Lynn's "get stuff done" approach was a driving force for the surgical strategy and in securing ongoing base funding for surgery.</p> <p>The surgical initiative is in a far better position than it was 4 years ago, but there is still much work ahead.</p> <p>Lynn Stevenson iterated that announcements for hip, knee and dental surgery were recently made public, and that further clarification and discussion around the following items will occur at the all-day surgical meeting on April 9<sup>th</sup>:</p> <ul style="list-style-type: none"> <li>• There needs to be movement on the surgical plan.</li> </ul>

		<ul style="list-style-type: none"> <li>• Funding is available. The Deputy Minister will attend the meeting on April 9<sup>th</sup> to advise that money is available, and that the Ministry is expecting progress in “catching up” and “keeping up” with volumes.</li> <li>• The expectation is that volumes for hip, knee and dental surgeries will increase, and there will be no deterioration in other surgeries.</li> <li>• Monitoring – The Minister is focused on volumes and HAs’ overall progress in meeting all of the deliverables of the surgical plan.</li> </ul> <p><b>Discussion:</b></p> <ul style="list-style-type: none"> <li>• HHR is a key area of focus to achieve increased volumes (e.g. not all nurses are trained to work with total joint replacement procedures), a plan should be created. ORs are going to have more students; while this will be challenging, it is reality.</li> <li>• Observation that in one HA there is unutilized capacity since no longer able to contract out. Lynn advised that this is not the case – contracting out is an option.</li> <li>• Nurse burnout is an issue due to understaffing and overworking. Lynn asked why the same numbers of nurses are working to achieve increased volumes when funding is available to hire additional nurses. There is an operational disconnect.</li> </ul> <p><b>Next Steps:</b></p> <ul style="list-style-type: none"> <li>• Next set of priority procedures (i.e. planning should be underway for 2019/20).</li> <li>• Surgical Oncology – For 2019/20, a strategy for surgical oncology should be produced. It is already a priority for the BC Cancer, but HAs have not begun planning yet. PSEC will direct the inclusion of surgical oncology in the surgical strategy for 2019/20. Dr. Mark Carey and Dr. Carl Brown will provide valuable contributions regarding surgical oncology.</li> <li>• Administration of prioritization codes will be reviewed (ties in well with surgical oncology).</li> <li>• Appropriateness.</li> <li>• Reporting of total wait time (i.e. wait one and two data).</li> <li>• Volumes for 2019/20.</li> <li>• Surgical Waitlist Management and Scheduling Solution (SWMSS).</li> </ul>
<b>Impact of Hip and Knee Programs on</b>	Dr. Mike Stanger	Dr. Mike Stanger presented information on the impact of increased hip and knee replacement volumes.

Orthopaedic Community		<p><b>See presentation for details</b></p> <p> PSEC Talk April 6th 2018 (2).pptx</p> <ul style="list-style-type: none"> <li>• There are stresses associated with meeting increased targets.</li> <li>• It is concerning that arthroplasty surgeons are operating up to five days per week, as it is impacting their ability to conduct pre and post-operative responsibilities. Safety and quality of care is at risk.</li> <li>• SPR cannot differentiate shoulder replacement from shoulder repair or shoulder examination. This is just one example of the limitations in granularity of the SPR.</li> <li>• SPR cannot present total ankle replacement as it is rolled up into ankle repair.</li> <li>• Given the issues with respect to the data, it is impossible to identify the impact that increased volumes has on other surgeries.</li> <li>• Review of the SPR data shows a large wait time discrepancy for Island Health's hip and knee cases versus the other HAs.</li> </ul>
<b>Patient Story</b>	Janine Johns	<b>Deferred to June 1<sup>st</sup> PSEC meeting.</b>
<b>Anesthesia HHR Discussion</b>	Dr. Andy Hamilton	<p>Dr. Andy Hamilton presented information on the shortage of Anesthesiologists in BC, suggesting that it is a growing concern. For VCHA, 70 additional Anesthesiologists are required over the next 5 years in order to reduce hip and knee replacement waitlists.</p> <p>Dr. Roanne Preston advised that only 11 Anesthesiologists are trained and certified in BC each year and that she has started a conversation with the UBC Assistant Dean of Medicine on this topic.</p> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li>• Dr. Hamilton to obtain information on Anesthesiology HR once VCHA and PHC have conducted their analysis. This information will be presented at the June 1<sup>st</sup> PSEC meeting and later to the SCHSPH.</li> <li>• Further analysis into the state of anesthesiology HR to be conducted by all HAs.</li> </ul>

<p><b>Update on Surgical Services Programs and Site Implementation and Expansion Working Groups</b></p>	<p>Luba Hazeldine</p>	<p>Luba Hazeldine provided an update on the Site Implementation and Expansion and Surgical Services Programs Working Groups:</p> <p><b>Site Implementation and Expansion Working Group (SIEWG):</b></p> <ul style="list-style-type: none"> <li>• Patient notifications and point of contact have been a key focus over the past several months.</li> <li>• Focus recently shifted to health authority scheduling.</li> <li>• SIEWG objectives also include implementation of ERAS.</li> <li>• Patient notification letter template content is finalized. Feedback was provided by Patient Voices Network (PVN), FHA and NHA representatives with regard to the language, format and procedure description.</li> <li>• A separate Patient Notification working group was stood up to assist with the testing and technical aspects of the patient notification project.</li> <li>• The Surgical Patient Registry is creating a system that will produce and monitor patient notifications to support the health authorities. Implementation is September 1, 2018.</li> <li>• Some priority 2 (at the discretion of the HAs) patients, and all priority 3-5 patients will receive notification letters once they are placed on a waitlist (Milestone 1 letter), and reminder letters will be sent throughout their wait (Milestone 2) which will include important information and a point of contact.</li> <li>• Milestone 1 and 2 letters will provide reference to the Ministry's Surgical Wait Times website.</li> <li>• The SPR patient notification system is an interim solution until the IM/IT system is in place.</li> </ul> <p><b>Discussion:</b></p> <ul style="list-style-type: none"> <li>• There will be costs associated with producing and mailing patient notifications. It is important to quantify how many notifications will be sent.</li> </ul> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li>• Collette Christney to circulate copies of the Milestone 1 and 2 patient notification letters with PSEC members for feedback. (Note, the simplified procedure description has not been developed yet so will not be included for review).</li> <li>• Bruce Dangerfield of the SPR Office to request the surgical safety checklists from the HAs to compare the procedure descriptions with the patient notification letters to try to keep language consistent if at all possible.</li> </ul> <p><b>Surgical Services Programs Working Group (SSPWG):</b></p>
---	-----------------------	--

		<ul style="list-style-type: none"> <li>• The SSPWG finalized 8 attributes of an SSP, and has produced an implementation plan.</li> <li>• Five HAs have implemented one instance of a Hip and Knee Replacement Program (HKRP).</li> <li>• The target has been revised from 100% to 80% of patients undergoing a hip or knee replacement will go through a HKRP by March 31, 2019. By March 31, 2020, 100% of hip and knee replacement patients should receive their services through a HKRP.</li> <li>• Phase 1 implementation of HKRPs will focus on central intake, efficiency, evaluation and pre-operative care. Phase 2 implementation will focus on integration and coordination with primary care, post-op support, self-management and interdisciplinary teams.</li> <li>• Dr. Ken Hughes has joined the SSPWG.</li> <li>• The SSPWG is in the process of attaining additional physicians to join the working group.</li> </ul>
<b>Surgery Wait List Management and Scheduling System</b>	Marc Koehn	<p>Marc Koehn provided an update on the Surgery Wait List Management Scheduling System project (the Project):</p> <ul style="list-style-type: none"> <li>• The work that the Site Implementation and Expansion Working Group and Surgical Patient Registry are undertaking around patient notifications is valuable (i.e. lessons learned).</li> <li>• This week, a procurement lead, Nicki Sandhu, joined the team to assist in developing a procurement strategy.</li> <li>• Financial constraints are no longer an issue.</li> <li>• A timeline and deliverables will be produced in May.</li> <li>• Regular progress updates will be provided to PSEC.</li> <li>• RFP is 75-90% complete, and should be finalized within 8 weeks (tentatively). <ul style="list-style-type: none"> <li>• Technical review will be undertaken by the BC Clinical and Support Services (BCCSS).</li> </ul> </li> <li>• Gevity Consulting continues to provide support for the project.</li> </ul> <p><b>Action:</b></p> <ul style="list-style-type: none"> <li>• Marc Koehn to provide Dr. Ken Hughes the list of members on the working group.</li> <li>• Marc to present a more concrete plan with firm timelines at the June 1<sup>st</sup> PSEC meeting.</li> </ul>
<b>Data and Analytics Update</b>	Nancy South Kal Parmar	<p><b>Deferred to the June 1<sup>st</sup> PSEC meeting.</b></p> <p><b>Separate Discussion:</b></p> <ul style="list-style-type: none"> <li>• Ken Hughes advised that a physician led Data Quality group has been stood up, and will have its first meeting</li> </ul>

		<p>next week. Representation includes Doctors of BC, MoH, and Health Authorities under a physician master agreement (PMA).</p> <ul style="list-style-type: none"> <li>Alison Dormuth advised that there are too many reports and sources of information. It would be good to have one reliable, synchronized and accurate data source.</li> <li>Ian advised that further discussion around Lighthouse and other data information will take place during the April 9<sup>th</sup> meeting.</li> </ul>
<b>(Addition) Physician Office Medical Device Reprocessing Assessments (POMDRA)</b>	Alison Dormuth Chris Taylor	<p>Alison Dormuth and Dr. Chris Taylor provided a brief update regarding Physician Office Medical Device Reprocessing Assessments (POMDRA)</p> <ul style="list-style-type: none"> <li>In collaboration with Dr. Robert Halpenny, work is underway to review the tray fee - A meeting is scheduled for April 16<sup>th</sup> to discuss.</li> <li>Dr. Halpenny advised that it will be a couple of months before an update is prepared.</li> </ul>
<b>Closing Comments</b>	Marilyn Copes Dr. Andy Hamilton	<p>Marilyn advised that the next meeting is June 1<sup>st</sup> in Vancouver.</p> <p>The following place holders will be added to the June 1<sup>st</sup> agenda:</p> <ul style="list-style-type: none"> <li>Nancy South and Kal Parmar to present on data and analytics.</li> <li>Dr. Carl Brown joining PSEC to present on surgical oncology.</li> <li>Carol Laberge and her team from Cardiac Services BC to present a comprehensive approach to cardiac care.</li> <li>Marc Koehn will present an update on the IM/IT project.</li> <li>Mark Armitage may attend either the June or July meeting to present an HHR update.</li> <li>Janine Johns will provide a patient story.</li> <li>July PSEC meeting may take place at BC Children's Hospital.</li> </ul>

### Next PSEC Meetings

## Hip and Knee Replacement Program: Next Wave Implementation Approach

### First Wave (17/18) Implementation Approach

**By March 31 2018, each health authority will have a hip and knee replacement program in at least one location.**

	Element	First Wave
		2017/18 (one instance in each HA)
1	Efficiencies	✓
2	Pre surgical support	✓
3	Post-surgical support	
4	Self-management	
5	Evaluation	✓
6	Central Intake	✓
7	Interdisciplinary team	
8	Integration and coordination	

**Next Wave (18/19) – Completion of first wave and replicate first wave approach in next locations**

**By March 31, 2019, 80% of patients having a hip or knee replacement in each health authority are having their procedure at a Hip and Knee Replacement Program. Health authorities are encouraged to surpass this minimum target if possible, given the next year's target of full completion.**

Element		First Wave	Next Wave	
		1 instance	Existing instances	New instances
1	Efficiencies	✓		✓
2	Pre surgical support	✓		✓
3	Post-surgical support		✓	
4	Self-management		✓	
5	Evaluation	✓		✓
6	Central Intake	✓		✓
7	Interdisciplinary team		✓	
8	Integration and coordination		✓	

#### **New instances**

- HAs implement 4 elements implemented as part of first wave (efficiencies, evaluation, pre surgical support, and central intake).
- Province collaborates with the Specialized Services Committee and health authorities on an initiative to support implement central intake.

#### **Existing instances**

- HAs implement the 4 other elements to complete the set (post-surgical support, self-management, interdisciplinary team, and integration and coordination).
- Province collaborates with the Shared Services Committee, and health authority/Ministry primary care and health human resources teams on an initiative to support implementation of integration and coordination across services and interdisciplinary team-based care.

## Phase 2: Provincial Implementation of Hip and Knee Replacement Programs

### Implementation Approach

The Hip and Knee Replacement Programs will be implemented across BC in phases:

- **2017/18:** By 31 March 2018, each health authority will have a hip and knee replacement program in at least one location.
- **2018/19:** by March 31, 2019, 80% of hip and knee replacement patients should receive their services through a Hip and Knee Replacement Program. Health authorities are encouraged to surpass this minimum target if possible, given the next year's target of full completion.

Figure 1: Hip and knee replacement program locations per health authorities

Phase	Island Health	Fraser Health	Northern Health	Interior Health	Vancouver Coastal
<b>1</b> <b>2017/18</b>	Victoria (RJH and VGH)	Burnaby (BH)	Prince George (UHNBC)	Kelowna (KGH)	Vancouver Acute (VGH & UBC)
<b>2</b> <b>2018/19</b>	North Island, Nanaimo (Campbell River Hospital & Comox Valley Hospital, Nanaimo Regional Hospital )	Abbotsford, Surrey (Abbotsford Regional Hospital, Surrey Memorial Hospital)	Prince Rupert, Dawson Creek, Kitimat (Dawson Creek & District Hospital, Prince Rupert Regional Hospital, Kitimat General Hospital)	Kamloops, Vernon, Penticton (Royal Inland Hospital, Vernon Jubilee Hospital, Penticton Regional Hospital)	North Shore, Richmond (Lions Gate Hospital, Richmond Hospital)
<b>2019/2020</b>	Cowichan (Cowichan District Hospital)			Trail, Cranbrook (Kootenay Boundary Hospital)	

### Vancouver Island Health Authority

The first instance of a HKRP in Vancouver Island Health Authority (VIHA) integrates orthopedic services provided by Rebalance<sup>MD</sup>, Royal Jubilee Hospital (RJH) and Victoria General Hospital (VGH). Victoria's HKRP provides central intake, comprehensive pre-surgical support and post-surgical support as well as self-management support for patients. Efficiency improvements at RJH and VGH have been achieved through standardization, a dedicated operating room (OR) at RJH and reduced length of stay. The introduction of the Lighthouse<sup>TM</sup> operations management solution in their health authority has allowed VIHA to evaluate costs, activity and services. Victoria's HKRP success has hinged on their capacity to offer interdisciplinary team-based care while integrating and co-ordinating care across service providers.

Phase 2 will expand hip and knee replacements program services to the North and Mid Island, with HKRPs implemented at Campbell River Hospital and Comox Valley Hospital - collectively the North Island Hospitals and at Nanaimo Regional Hospital. Patient centered care will start with central intake and pre-surgical support. Central intake will be implemented in an office setting at both locations with standardized referral forms. Pre-surgical supports will include enhanced pre-habilitation/optimization services with educational resources. Quality will be measured by monitoring rates of returning to the operating room, returning to the emergency department and complication. Patient experience improvements will be measured through the implementation of Patient Reported Outcome Measures (PROM) and Patient Reported Experience Measures (PREM). As well, case cost monitoring in place through Lighthouse™ has identified opportunities for cost savings on equipment standardization.

### **Fraser Health Authority**

The Burnaby Hospital Orthopedic Central Intake and Optimization Clinic is Fraser Health Authority's (FHA) first complete HKRP. Referrals for surgeon consults are assessed and triaged at a central intake office for assignment to the first available surgeon (or surgeon of choice). Surgical candidates are provided pre-surgical assessments by an interdisciplinary team to customize surgical optimization and pre-habilitation supports and resources. Self-management and post-operative services are also customized to individual needs by the interdisciplinary team. Non-surgical candidates are referred back to their primary care provider with recommendations for treatment and information about community resources. Patient outcomes are tracked, evaluated and reported as part of the quality improvement practice.

Phase 2 leverages key learnings from Burnaby's HKRP to implement additional HKRPs at Surrey Memorial Hospital (SMH) and Abbotsford Regional Hospital (ARH). Both sites will implement pre-surgical supports, evaluations and efficiencies. Improving patient experiences will be achieved through self-management care and earlier access to rehabilitation. Implementation of pre-surgical supports will include partnering with additional pre-habilitation support to provide programs focused on surgical optimization. Efficiencies will be gained through bed mapping and standardization of pre- and post-operative procedures, clinical practices, and equipment and supplies. SMH will implement central intake with standardized processes. Implementation of central intake at ARH is dependent on the outcome of ongoing engagement with orthopedic surgeons.

### **Northern Health Authority**

The first instance of a HKRP in the Northern Health Authority (NHA) was established at University Hospital of Northern British Columbia (UHNBC).. 50% of referrals are currently accessing services through UHNBC's central intake booking office. Expansion of the space for

scheduling of additional assessment appointments and the involvement of a 'Surgeon Leader' are underway to increase the utilization of central intake. Pre-surgical supports include: pre-optimization classes, patient education resources, and occupational therapy assessments. An expansion of these services is currently underway. Efficiencies have been achieved through pre- and post-surgical pathways, standardization of equipment, implants and disposables, and eight designated orthopedic inpatient beds. Evaluation efforts being implemented include patient experience surveys and quality assurance checks.

Phase 2 of HKRP implementation in the NHA is being planned for at locations at Dawson Creek & District Hospital, Prince Rupert Regional Hospital and Kitimat General Hospital. A gap analysis is underway to determine next steps.

### **Interior Health Authority**

The Kelowna HKRP integrates orthopedic services at the Surgical Optimization Clinic and the Kelowna Bone and Joint Clinic (KBJC), forming the first instance of a HKRP in the Interior Health Authority (IHA). Central intake, triage and assessment, and non-surgical supports are provided by the KBJC. Interdisciplinary teams provide optimized pre-habilitation and self-management support including classes and education. Individualized rehabilitation programs are created for post-surgical support. Evaluations are done through chart auditing to track and evaluate quality care outcomes and patient reported outcome measures. Interdisciplinary team-based care is a pillar of Kelowna's HKRP with five orthopedic surgeons, the patient's general practitioner, registered nurses, a nurse practitioner, anesthesiologists and physiotherapists. Collaboration and referrals also occur with dietitians, counsellors, home nursing support, other surgical specialists and social workers as required based on patient need.

Phase 2 of HKRP implementation in the IHA includes the addition of three locations: Royal Inland Hospital, Vernon Jubilee Hospital and Penticton Regional Hospital. Work with local specialists is currently underway to implement a standardized central intake process. Surgical optimization will be enhanced through the implementation of additional pre-surgical supports including additional educational programs, health literacy resources and the establishment of an interdisciplinary team to deliver robust pre-surgical care for patients. All three sites will increase efficiencies through implementation of Lighthouse<sup>TM</sup> and standardization of pre- and post-surgical processes. Evaluations will include the implementation of Patient Reported Outcome Measures (PROMS).

## **Vancouver Coastal Health Authority**

Phase 1 of HKRP implementation in the Vancouver Coastal health Authority (VCHA) merged the orthopedic services provided by the Vancouver Osteoarthritis Service Integration System (OASIS) clinic with the Vancouver General Hospital and the University of BC Hospital (UBC). Patients are assessed and triaged through central intake at VGH and OASIS. OASIS provides pre-surgical supports including building physical strength, losing weight and making changes to patient's home. Educational resources include a mandatory two hour class and reading material. Efficiency measures implemented at VGH & UBC include working with surgeons and MOAs to discuss proper diagnosis and procedural codes, First In First Out (FiFo) principles and regular waitlist cleanup with the surgeon and OR booking offices. Additional efficiencies are being achieved through swing rooms at UBC and bed mapping. VCHA monitors waitlists through the use of the OR Management Information System (ORMIS), the Surgical Patient Registry (SPR) and Lighthouse. Non-surgical candidates are referred to other OASIS or community-based health education programs. The HKRP at VCHA will be completed in 2019, with the implementation of post-surgical care, self-management support, interdisciplinary team-based care and integration, and co-ordinated care across service providers.

Phase 2 of implementation of HKRPs in the VCHA will bridge the remaining two OASIS clinics (Richmond and North Vancouver) with orthopedic services at Lions Gate Hospital (LGH) and Richmond Hospital (RH). Central intake will be implemented in both LGH and RH to ensure all patients are triaged and offered a place on the shortest available waitlist. Pre-surgical supports will include pre-op education programs for patients and caregivers. Patients who have not been assigned a surgical date are able to access pre-habilitation education through community-based classes. Efficiencies will include working with surgeons and MOAs to discuss proper diagnosis and procedural codes, FiFo principles and regular waitlist cleanup with the surgeon and OR booking offices. Additional efficiencies are being achieved through swing rooms at LGH and bed mapping at both sites. Evaluation measure will include monitoring waitlists using ORMIS, the SPR and Lighthouse. Evaluation measures at OASIS will track wait times for an assessment, number of referrals and patient satisfaction. Implementation of these two additional HKRPs will take a staggered approach with LGH implementation starting in July 2018 and RH in October 2018.

## Program for Hip and Knee Replacement: Next Wave Implementation Approach

### First Wave (17/18) Implementation Approach

- By March 31 2018, each health authority will have a hip and knee replacement program in at least one location.

	Element	First Wave
		2017/18 (one instance in each HA)
1	Efficiencies	✓
2	Pre surgical support	✓
3	Post-surgical support	
4	Self-management	
5	Evaluation	✓
6	Central Intake	✓
7	Interdisciplinary team	
8	Integration and coordination	

- First wave (17/18) was unique because the focus of activity for the HAs was predominately one of integration of existing program elements.
- The first five locations for the PHKR were selected because they already had existing central intake/pooled referral to work with.
- Additionally, health authorities are focused on developing the elements where they do not exist or need to be augmented (for example, even existing comprehensive pre surgical support services don't routinely offer nutritional programs or smoking cessation).
- Approximately 50% of patients having a hip or knee replacement in BC are having their procedure at one of the first five locations.<sup>1</sup>

Health Authority	Island Health	Fraser Health	Northern Health	Interior Health	Vancouver Coastal
Site	RJH (Victoria)	BH (Burnaby)	UHNBC (Prince George)	KGH (Kelowna)	VGH, UBC, LGH, RH (Vancouver)
% of BC total	8.6%	5.0%	5.7%	7.5%	22.5%
% of HA total	39.2%	20.7%	73.2%	34.5%	93.5%

### Next Wave (18/19) – Replicate first wave approach in next locations

Element		First Wave	Next Wave	
		1 instance	Existing instances	New instances
1	Efficiencies	✓		✓
2	Pre surgical support	✓		✓
3	Post-surgical support		✓	
4	Self-management		✓	
5	Evaluation	✓		✓
6	Central Intake	✓		✓
7	Interdisciplinary team		✓	
8	Integration and coordination		✓	

<sup>1</sup> Surgical Wait Times (SWT) - Wait Two Cases Completed, 2017/18 YTD to January 31, 2018

## New instances

- HAs implement 4 elements implemented as part of first wave (efficiencies, evaluation, pre surgical support, and central intake).
- Province co-leads/partners with the Specialized Services Committee and health authorities on an initiative to implement central intake.
- *Central intake:* requires a change in the business model and practice of independent physicians. A significant proportion of GPs and specialists operate from small owned and operated businesses. Referral patterns are deeply entrenched. Much management of patients occurs between these physicians, outside of the HA (especially true for medical specialists, and for patients that see a surgeon but who may not progress to surgery.) Neither the HA or MOH has direct authority on changes to these well-established business models and practices. Central intake has been quickly identified by the HAs and the specialists we have been working with as “the hardest nut to crack.”

## Existing instances

- HAs implement the 4 other elements to complete the set (post-surgical support, self-management, interdisciplinary team, and integration and coordination).
- Province partners with the Shared Services Committee, and health authority/Ministry primary care and health human resources teams on an initiative to implement integration with primary care, and development of the interdisciplinary team.
- *Integration and coordination:* it is desirable that optimization and pre surgical activities are undertaken by GPs and/or PCNs. This requires a large degree of integration and coordination between primary and acute care. The Ministry of Health’s 2018/19 – 2020/21 Service Plan sets the target that by 2018/19 there will be 15 instances of PCN. The first five instances of PCNs have yet to be confirmed, but the unconfirmed list of PCNs do not align with the first five instances of hip and knee replacement programs in all communities (i.e. for Island Health and Interior Health); and most significantly, the first and second wave do not align in Interior Health.

Health Authority	Island Health	Fraser Health	Northern Health	Interior Health	Vancouver Coastal
1 <sup>st</sup> Wave of HKRPs Sites	RJH (Victoria)	BH (Burnaby)	UHNBC (Prince George)	KGH (Kelowna)	VGH, UBC, LGH, RH (Vancouver)
1 <sup>st</sup> Wave of PCN (Service plans to be completed in May 2018)	Comox	Burnaby	Prince George	South Okanagan Similkameen	Richmond
2 <sup>nd</sup> Wave of PCNs (timelines TBC)	South Island	Fraser Northwest & Ridge Meadows		Kootenay Boundary	Vancouver

- *Interdisciplinary team:* ideally the team that is involved in the hip/knee patient’s care operate from both primary and acute care environments.

### Next Wave (18/19) Target Options for New Instances:

- **Option 1: By March 31 2019, all patients in BC receiving hip and knee replacements will receive their services through a hip and knee replacement program.** This will be very challenging for the central intake element where the HAs (or the Ministry) has little to no direct control or line of accountability. HAs have indicated that there are certain communities where implementing central intake in 2018/19 is likely feasible, but mandating that all instances must have central intake stood up over the next year is a huge risk.
- **Option 2: By March 31 2019, each health authority will have at least four instances of a hip and knee replacement program.** Depending on the sites selected, this will likely result in approximately 80% patients in BC receiving hip and knee replacements will receive their services through a hip and knee replacement program.

Health Authority	Island Health	Fraser Health	Northern Health	Interior Health	Vancouver Coastal
% of BC total (wave 2 only)	~9.9%	~7.8%	~2.1%	~8.7%	0% (unless they add a 5 <sup>th</sup> site at St. Paul's – 1.6%)
% of HA total (wave 2 only)	~44.9%	~32.2%	~26.8%	~39.9%	0% (unless they add a 5 <sup>th</sup> site at St. Paul's – 6.5%)
% of HA total (wave 1)	39.2%	20.7%	73.2%	34.5%	93.5%
% of HA total (wave 1 and 2)	~84.1%	~52.9%	100%	~74.4%	93.5%

- **Option 3: By March 31 2019, each health authority will have at least 80% of their patients receiving hip and knee replacements receiving their services through a Hip and Knee Replacement Program.** This will level the playing field between the health authorities, to better ensure patients across the province are receiving more equal access to hip and knee replacement programs.

Health Authority	Island Health	Fraser Health	Northern Health	Interior Health	Vancouver Coastal
% of HA total (wave 1)	39.2%	20.7%	73.2%	34.5%	93.5%
% of HA total (increase needed to achieve 80% in wave 2)	40.8%	59.3%	6.8%	45.5%	0%
% of HA total (increase needed to achieve 80% in wave 2)	40.8%	59.3%	6.8%	45.5%	0%

- **Option 4: By March 31 2019, each health authority will have at least three instances of a hip and knee replacement program.** Depending on the sites selected, this will likely result in approximately 70% patients in BC receiving hip and knee replacements will receive their services through a hip and knee replacement program.

Health Authority	Island Health	Fraser Health	Northern Health	Interior Health	Vancouver Coastal
% of BC total (wave 2 only)	~4.8%	~5.4%	~1.7%	~6.1%	0% (unless they add a 5 <sup>th</sup> site at St. Paul's – 1.6%)

<b>% of HA total (wave 2 only)</b>	~21.6%	~22.1%	~21.2%	~28.1%	0% (unless they add a 5 <sup>th</sup> site at St. Paul's – 6.5%
--	--------	--------	--------	--------	---

# Provincial Implementation of Hip and Knee Replacement Programs

## Implementation Approach

The Hip and Knee Replacement Programs will be implemented across BC in phases:

- **2017/18:** By 31 March 2018, each health authority will have a hip and knee replacement program in at least one location.
- **2018/19:** by March 31, 2019, 80% of hip and knee replacement patients should receive their services through a Hip and Knee Replacement Program. Health authorities are encouraged to surpass this minimum target if possible, given the next year's target of full completion.
- **2019/20:** by March 31, 2020, 100% of hip and knee replacement patients should receive their services through a Hip and Knee Replacement Program.

Figure 2: Hip and knee replacement program locations per health authority

	Island Health	Fraser Health	Northern Health	Interior Health	Vancouver Coastal
<b>2017/18</b>	Victoria (RJH)	Burnaby (BH)	Prince George (UHNBC)	Kelowna (KGH)	Vancouver (VGH)
<b>2018/19</b>	North Island Nanaimo	Abbotsford, Surrey	Prince Rupert, Dawson Creek, Kitimat	Kamloops, Vernon, Penticton	North Shore, Richmond

Many of the elements of a Hip and Knee Replacement Program already exist in the health authorities, some in groupings, others in disparate parts of service or locations, or for other patient populations. A significant focus of the health authorities' Phase 1 activities are on integrating their existing elements into one distinguishable program: a Hip and Knee Replacement Program.

Additionally, health authorities are focused on developing the elements where they do not exist or need to be augmented (for example, even existing comprehensive pre surgical support services don't routinely offer nutritional programs or smoking cessation).

### Vancouver Coastal Health Authority

Vancouver Coastal Health Authority (VCHA) has a tremendous amount of analysis of surgical efficiencies to leverage in Phase 1. The introduction of the Lighthouse™ operations management solution has allowed VCHA to **evaluate** surgical costs, activity and services. In particular, areas for Operating Room (OR) **efficiencies** have now been identified for each site, for instance reducing late starts at the beginning of the surgery day and reducing turnaround time getting the OR ready between cases. Areas where standardization can create efficiencies have also been identified. The swing OR was removed from Richmond Hospital some years ago and now exists at University of British Columbia Hospital. There are plans to add 3 new dedicated hip and knee replacement surgical slates<sup>1</sup> in VCHA.

VCHA has had the Osteoarthritis Service Integration System (OASIS) since 2006 in Vancouver, the North Shore, and Richmond. OASIS is a program that helps people with osteoarthritis self-manage their condition. For those considering surgery, OASIS provides pre- and post-surgical support. VCH also has a (separate) instance of central intake for reconstructive orthopaedics at Lion's Gate Hospital, the Rapid Orthopaedic Consultation Clinic (ROCC.)

<sup>1</sup> A slate is a block of time available in an Operating Room.

VCHA's approach in Phase 1 is to developing Hip and Knee Replacement Programs is to re-design the OASIS program to ensure it aligns with the strategies of the Hip and Knee Replacement Programs and provides the necessary **pre-surgical support**. VCHA will also integrate OASIS with the **central intake** of the Lion's Gate Rapid Orthopaedic Consultation Clinic. This new integrated service will be first piloted at Vancouver General Hospital, University of British Columbia Hospital, Richmond Hospital and Lion's Gate Hospital in March 2018.

### Island Health Authority

Island Health Authority (VIHA) also has a tremendous amount of analysis of surgical efficiencies to leverage in Phase 1. The introduction of the Lighthouse™ operations management solution in their health authority has allowed VIHA to **evaluate** costs, activity and services. In particular an extensive cost analysis has been used to determine focus for (OR) **efficiencies** including standardization and reduced length of stay. These efficiency gains will allow VIHA to add, during Phase 1, a dedicated OR at the Royal Jubilee Hospital and one more hip or knee replacement per slate, resulting in an expected additional 800 joint replacements in Phase 2.

VIHA's approach in Phase 1 is to locate their first hip and knee replacement program in Victoria at the Royal Jubilee Hospital with physician and outpatient services provided by Rebalance<sup>MD</sup>. Rebalance<sup>MD</sup> provides **central intake**, comprehensive **pre-surgical support** and post-surgical support as well as self-management support for patients. VIHA is also focused in Phase 1 on strengthening the involvement of family physicians in the services delivered to hip and knee replacement patients.

### Fraser Health Authority

Fraser Health Authority (FHA) has a tremendous amount of analysis of surgical efficiencies to leverage in Phase 1. The introduction of the Lighthouse™ operations management solution has allowed FHA to **evaluate** surgical costs, activity and services. In particular, areas for Operating Room (OR) **efficiencies** have now been identified for each site, for instance reducing late starts at the beginning of the surgery day and reducing turnaround time getting the OR ready between cases. Areas where standardization can create efficiencies have been a particular focus, and have resulted in the introduction of the Superpath, a standardized care pathway for joint replacements.

The Burnaby Hospital Orthopedic Central Intake and Optimization Clinic (CIOC) opened in pilot form in January 2017. An evaluation of the CIOC was recently completed, and its processes including **central intake**, **pre-surgical support** and post-surgical support were refined and solidified. CIOC will now be rolled out with the first two additional orthopaedic surgeons joining in Phase 1. FHA is also focused on developing self-management resources for patients and introducing a Nurse Practitioner for the pre- and post-surgical support in Phase 1.

### Interior Health Authority

Interior Health Authority (IHA) has recently completed its implementation of the Lighthouse™ operations management solution. This tool will stabilize during Phase 1 and will enable them to identify OR efficiency opportunities for each site. IHA is engaged in an exercise to **evaluate** the smoothing of the allocation of surgical slates among surgeons in order to gain **efficiencies**. The identified efficiency gains have resulted in them implementing a regional OR at Kelowna General Hospital dedicated to hip and knee replacement. Additionally the exercise has resulted in standardization of equipment used in hip and knee replacements and post operative care.

IHA has two separate but interdependent programs for patients requiring hip and knee replacement surgeries in Kelowna, the Kelowna Joint and Bone Clinic (BJC) and the Kelowna Surgical Optimization Clinic (SOC). The BJC already offers **central intake** and SOC provides **pre-surgical support** and post-

surgical support for patients. IHA is focused in Phase 1 on integrating these two separate clinics together into a Hip and Knee Replacement Program and implementing common assessment and referral criteria.

### **Northern Health Authority**

Northern Health Authority (NHA) has recently completed its implementation of the Lighthouse™ operations management solution. This tool will stabilize during Phase 1 and will enable them to identify OR efficiency opportunities for each site. During Phase 1 NHA is focused on using Lighthouse to **evaluate** activities in the ORs and identifying further opportunities. For **efficiencies**, NHA has implemented standardized equipment and implants as part of Phase 1 along with a dedicated joint OR at the University Hospital of Northern BC in Prince George and 8 dedicated surgical beds for hip and knee replacements.

NHA has an optimization clinic for orthopaedics in Prince George. This clinic provides **pre- surgical support** to patients. NHA is focused on Prince George in phase one and building out the suite of services at the optimization clinic and transitioning the existing central referral mechanism into **central intake**.

Table 1: Strategies by Health Authority

STRATEGIES		IMPLEMENTATION					
	Provincial Hip & Knee Replacement Program	Island Health Authority (RIH)	Vancouver Coastal Health Authority (VGH,UBCH,LGH,RH)	Northern Health Authority (UHNBC)	Interior Health Authority (KGH)	Fraser Health Authority (BH)

\*These efficiencies will be achieved for hip and knee replacements through general OR efficiency work underway in the health authorities

# Provincial Implementation of Hip and Knee Replacement Programs

## Implementation Approach

The Hip and Knee Replacement Programs will be implemented across BC in 2 phases:

- **2017/18:** By 31 March 2018, each health authority will have a hip and knee replacement program in at least one location.
- **2018/19:** By 31 March 2019, all patients receiving hip and knee replacements will receive their services through a hip and knee replacement program.

Figure 2: 2017/18 hip and knee replacement program locations per health authority

Island Health	Fraser Health	Northern Health	Interior Health	Vancouver Coastal
Victoria (RJH)	Burnaby (BH)	Prince George (UHNBC)	Kelowna (KGH)	Vancouver (VGH, UBC, LGH, RH)

Many of the elements of a Hip and Knee Replacement Program already exist in the health authorities, some in groupings, others in disparate parts of service or locations, or for other patient populations. A significant focus of the health authorities' Phase 1 activities are on integrating their existing elements into one distinguishable program: a Hip and Knee Replacement Program.

Additionally, health authorities are focused on developing the elements where they do not exist or need to be augmented (for example, even existing comprehensive pre surgical support services don't routinely offer nutritional programs or smoking cessation).

### Vancouver Coastal Health Authority

Vancouver Coastal Health Authority (VCHA) has a tremendous amount of analysis of surgical efficiencies to leverage in Phase 1. The introduction of the Lighthouse™ operations management solution has allowed VCHA to **evaluate** surgical costs, activity and services. In particular, areas for Operating Room (OR) **efficiencies** have now been identified for each site, for instance reducing late starts at the beginning of the surgery day and reducing turnaround time getting the OR ready between cases. Areas where standardization can create efficiencies have also been identified. The swing OR was removed from Richmond Hospital some years ago and now exists at University of British Columbia Hospital. There are plans to add 3 new dedicated hip and knee replacement surgical slates<sup>1</sup> in VCHA.

VCHA has had the Osteoarthritis Service Integration System (OASIS) since 2006 in Vancouver, the North Shore, and Richmond. OASIS is a program that helps people with osteoarthritis self manage their condition. For those considering surgery, OASIS provides pre- and post-surgical support. VCH also has a (separate) instance of central intake for reconstructive orthopaedics at Lion's Gate Hospital, the Rapid Orthopaedic Consultation Clinic (ROCC.)

VCHA's approach to developing Hip and Knee Replacement Programs is to re-design the OASIS program to ensure it aligns with the strategies of the Hip and Knee Replacement Programs and provides the necessary **pre-surgical support**. VCHA will also integrate OASIS with the **central intake** of the Lion's Gate Rapid Orthopaedic Consultation Clinic. This new integrated service will be first piloted at Vancouver General Hospital, University of British Columbia Hospital, Richmond Hospital and Lion's Gate Hospital in March 2018.

Agenda Item	Speaker	Discussion/Decision
<b>Welcome and Introductions</b>	Marilyn Copes Dr. Andy Hamilton	<ul style="list-style-type: none"> <li>• PSEC Co-chairs welcomed members to the meeting and apologized for the changes to the agenda and meeting times.</li> <li>• Dr. Sukh Brar and Dr. Dean Chittock have decided to step down from PSEC membership and the decision is to not replace at this time.</li> </ul>
<b>Review of Minutes</b>	All	The minutes were accepted as circulated.
<b>February Meeting Location TBA</b>	All	<ul style="list-style-type: none"> <li>• As the s.15 is not available for the Feb 2 2018 meeting, other options needed to be explored.</li> <li>• Dr. Gary Redekop suggested BC Simulation Centre.</li> </ul> <p><b>Action:</b> PSEC secretariat to follow up and confirm location; a meeting invite will be sent out as an update.</p>
<b>HA Efficiency Story</b>	Susan Wanamaker Dr. Stephanie Rhone	<p>Dr. Stephanie Rhone presented on the Gynecology Surgical Daycare Optimization project at BC Women's and across the lower mainland. The presentation focused on:</p> <ul style="list-style-type: none"> <li>• Workforce crisis and the negative impact it had on access to gynecology surgery (increased waiting times).</li> </ul>

		<ul style="list-style-type: none"> <li>• Drivers for change</li> <li>• Opportunities for change: Innovative Models of Care, Surgical Gynecology Optimization Initiative, benefits</li> <li>• Patient experience, summary of benefits and potential barriers.</li> </ul>
<b>Analysis Work: Opportunities to Consider Lighthouse Software – A Discussion</b>	Dr. Andy Hamilton	<p><b>Questions on opportunities for Analysis Works – Lighthouse were discussed for input: Discussion Followed:</b></p> <p><b>Waitlist Indicator</b></p> <p><b>Does FIFO or Percent booked in turn need to be tightened?</b> Discussion included:</p> <ul style="list-style-type: none"> <li>• Mathematical formula not validated and needs to be refined.</li> <li>• Not a strong measure of performance currently.</li> <li>• Only useful for services and surgeons with long wait lists.</li> <li>• Even if it isn't perfect it is useful in drilling down to compare individual surgeons and specialties.</li> </ul> <p>Recommendation to review mathematical model to assure the indicator is most relevant.</p> <p><b>Would it be useful to show the effect of improving FIFO on maximum wait times?</b> Yes, in conjunction with tightening up the model, would be useful to portray the effect on the tail of the curve of improved waitlist management. Members also noted that related to this, HA's should ensure that the prioritization codes are being used consistently.</p> <p><b>Efficiency</b></p> <p><b>Will it be able to monitor over longer periods of time?</b> Yes - and to trend over time with a standardized approach in order to make valid comparisons and be monitored provincially.</p> <p><b>Is the opportunity for extra hours or as a ratio of the total staffed hours a useful surrogate indicator of efficiency over time that should be monitored provincially?</b> Yes - as it keeps in context the size of the OR at a particular site.</p> <p><b>Modeling</b></p> <p><b>Assumes present activity is at the same efficiency level and that future activity is at 95% utilization. Should we continue with a workaround or should there be a slider for improved efficiency as well?</b> Not at this time as we shouldn't strive for perfection, just improvement.</p> <p><b>Would it be useful to project further out: eg how many slates are required to achieve 95% in benchmark by 1 April 2020?</b> Yes – felt this would be useful.</p>

		<p><b>Do we need more definitive identification of backlog and ongoing demand?</b> Not at this time.</p> <p><b>Do we need to change the projected period for the modeling from 40 weeks given that we are trying to reduce OR seasonal closures?</b> Health Authorities are using different numbers of weeks for modelling depending on their opportunity to reduce seasonal closures. PSEC felt it would be useful to model based on 46 week O.R. utilization or possibly a variable utilization rate.</p> <p><b>Lighthouse compresses the benchmarks down to two categories. What is PSEC's view on this and should this change?</b> Discussion as to whether PSEC and PCATS have too many categories or Analysis Works has too few. In general, it was felt that the use of the priority codes should be optimized first. Longer term, this needs to align with the cancer strategy and targets and could be reviewed.</p> <p><b>Action:</b> PSEC secretariat to collate PSEC recommendations and submit to MoH HSIAR (Nancy South) and Analysis Works ( David Ball)</p>
<b>Update From Leadership Council</b>	Lynn Stevenson	<ul style="list-style-type: none"> <li>Lynn Stevenson addressed the group and shared Minister Dix's high priorities: <b>Wait time Management: Surgery, Colonoscopy and MRI's</b>. The expectation includes assurance from the Ministry on how the HAs will put this into action and how the plans make sense to patients.</li> <li>Lynn further clarified that funding will be given to HAs who can meet the deliverables for surgery. Therefore HAs need to be moving forward then money will flow.</li> <li>Clarification is requested from MoH on \$25M for surgery (what it can be spent on, how decisions will be made and how the funding will flow), and this will be shared with LC, CFO's and COO's.</li> </ul> <p><b>Action:</b> Co-chair Marilyn Copes will follow up with Lynn Stevenson and Ian Rongve.</p>
<b>Patient Story - NH Connections Program</b>	Steven Raper	<ul style="list-style-type: none"> <li>Steven Raper presented on Northern Health's "Connections" low-cost health care travel service that was introduced to address the concerns of northern BC residents' access to health care.</li> </ul>
<b>BCCH OR shortages</b>	Lona Cunningham / Linda Lemke	<ul style="list-style-type: none"> <li>Lona Cunningham and Linda Lemke presented on how the BC Children's Hospital team confronted a critical shortage of perioperative nurses and achieved results.</li> <li>The presentation included the nine month journey of "<i>Turning Crisis into Opportunity</i>" and how the team worked together to accomplish positive outcomes.</li> </ul>
<b>Update on 18 Month Surgical Action Plan and Working Groups</b>	Marilyn Copes	<p><b>Governance and Reporting:</b></p> <ul style="list-style-type: none"> <li>Reporting on indicators and progress on implementation of the 18-Month Surgical Action Plan will start in Jan 2018.</li> <li>Reports will go to SCHSPH and Leadership Council on a monthly</li> </ul>

		<p>basis. The Report will then be shared with PSEC in Feb 2018.</p> <p><b>HA Accountability:</b></p> <ul style="list-style-type: none"> <li>• Report to LC</li> </ul> <p><b>Role of PSEC:</b></p> <ul style="list-style-type: none"> <li>○ not operational</li> <li>○ the committee is to use its strategic lens to offer Wise Council</li> </ul> <p><u>Areas still to be addressed:</u></p> <ul style="list-style-type: none"> <li>○ Appropriateness in Surgery</li> <li>○ Cancer Strategy - Surgical Oncology</li> <li>○ HHR Plans</li> <li>○ Priority Codes (scheduled and unscheduled)</li> </ul> <p><b>Action:</b> PSEC to Review TOR in 2018</p> <p><b>Working Group and Work Streams:</b></p> <ol style="list-style-type: none"> <li>1. # Comment re TJR program from smaller centre

- Additional funding for orthopedic procedures (even if it is only for THA/TKA) is still a positive development.
- I believe that the government targets for additional joint replacements may not be easily met considering trauma volumes.
- I foresee more scheduled TJA cancellations due trauma work.
- This may be a positive development for our argument for official orthopedic trauma time in all busy centers.
- In our hospital, elective orthopedic surgery cancellation rate has reached 20% this year. With additional TJA procedures, cancellation rate will only go up.
- We need to push for orthopedic day time trauma room to meet the required standard of care for the most vulnerable patients. (This will also improve ed.) hospital efficiency, by limiting length of admissions for trauma patients awaiting surgery, at the same time decreasing elective list cancellations.

# Summary

- Reviewed current TJR situation
- Some concerns expressed re safety and quality due to increased volumes
- Other Orthopaedic wait times compared, with some difficulty due to data issues
- Other common surgeries reviewed and compared
- I declare that a conflict of interest exists.<sup>s.22</sup>  
s.22

- Thanks

# Provincial Surgery Executive Committee

## Terms of Reference

March ~~December 2018~~6

### 1.0 PURPOSE

The Provincial Surgical Executive Committee (PSEC) provides strategic oversight for the planning of Surgical Services across the continuum of care in order to meet the needs of the B.C. population.

The committee will align its work with the Ministry of Health strategies and priorities outlined in the Policy Directives 2017 ~~“Setting Priorities for the BC Health System – February 2014”~~. Using a patient centered approach, the committee serves as the wise council to provides advice and recommendations to, and receives strategic direction from, the Ministry of Health with the goal of improving surgical care in accordance with the dimensions of quality.

### 2.0 SCOPE

The scope of this committee encompasses strategic direction, planning and engagement, policy input, ~~formation,~~ and recommendation setting that is provincial in nature involving the continuum of surgical care.

Responsibility for service delivery and operations rests with the respective Health Authorities.

### 3.0 KEY OBJECTIVES AND FUNCTIONS

#### Strategic Oversight

- Provide strategic oversight of surgical service delivery in BC with emphasis on ensuring high quality care for patients and families in a time frame commensurate with clinical need.
- Where appropriate at the provincial level, sponsor the development of best practice clinical standards, scope of services, guidelines, and policies to improve the stakeholder experience, enhance consistency and achieve provincial goals for surgical service delivery. This includes recommending setting policy and standards for regional and provincial access, wait list management and expectations for service delivery across the province.
- Recommend performance indicators for quality outcomes and efficiency of service delivery; monitor indicators on a regular basis; make recommendations on opportunities for system improvement.
- Recommend ~~Ensure~~ that appropriate, accurate and standardized information is collected, analyzed and reported to support surgical activities. Review provincial surgical data to identify and/or advise on emerging trends and patterns.
- Review and advise on strategic direction and framework documents, recommendations of expert panels, academia, and medical groups related to surgery.
- Make recommendations on future service delivery needs and opportunities.
- Collaborate on surgical services with the BC Patient Safety and Quality Council (BCPSQC), the Doctors of BC, the Specialists of BC, and the Joint Clinical Committees.
- Draw on experiences and initiatives in other provinces and at the national level, related to the surgical continuum, where appropriate.
- Set priorities for working groups or sub-committees.

### **Coordinated, Focused Planning**

- Advise the Ministry of Health regarding future directions of surgical services by leveraging expert knowledge, evidence, experience and liaison roles with peer groups provincially and nationally.
- Act as an interface between stakeholders in the Ministry, patients, physician groups, and the Health Authorities to provide recommendations on planning surgical services.
- Recommend~~Determine~~ priorities for surgery that align with strategic initiatives, human resources, physical resources, and geographical constraints in the province.
- In conjunction with other provincial committees, provide strategic direction on the design and implementation of province wide strategies for ongoing quality and system improvement in surgical services.
- Collaborate with the BCPSQC around planning and implementation of processes to improve the patient experience and outcomes related to surgery.
- Advise on alignment with other Ministry strategies and priorities (e.g. health human resource plans, IMIT plans, funding approaches).
- Direct the formation of time limited tactical working groups that have responsibility to research, provide expertise and formulate recommendations for issues identified by the committee.

### **Communication**

- Use a variety of pathways to provide and receive information regarding the challenges and successes of provincial surgical policies, guidelines and projects.
- Together with the BCPSQC, the Doctors of BC, and Health Authority leadership, promote sharing of lessons learned to all stakeholders to ensure continuous improvement and sustainability.
- Promote the development of mechanisms to receive input and feedback from patients and families on their experience of care, outcome of their surgical procedures, and action plans for improvement.

### **Accountability Framework and Performance Monitoring**

- Provide input into the development, ~~Oversee the development and maintenance and evolution~~ of an accountability framework which supports the strategic priority of improving surgery access and care in BC. The framework includes performance indicators and targets which would demonstrate success in improving surgical services.
- Provide a venue for reporting on performance indicators against targets, monitoring progress on improvement plans, and sharing lessons on system improvement.

## **4.0 MEMBERSHIP**

Members will be solicited through an expression of interest process. Representation from leaders in the following areas will be considered with the goal of having a broad level of experience and expertise to achieve the key objectives and functions of the committee.

- Patient representatives at an executive level.
- Anesthesiologists and surgeons with leadership experience.
- BC Anesthesiology Society.
- BC Patient Safety and Quality Council.
- Doctors of BC.
- Specialists of BC.
- Health Authority Medical Directors of Surgical Services.

- Health Authority Corporate Directors of Surgical Services.
- Health Authority Vice President or equivalent responsible for Surgical Services.
- Tertiary or Community Hospital Administration.
- Ministry of Health.
- University of British Columbia.

Member terms will be 3 years and renewable (once? Twice? Maximum term?) on application. Rotating changes will occur in years 3 and 4 to ensure continuity in function. Membership will be reviewed annually to ensure mutual benefits and participation goals are met.

Members will be supported by a secretariat within the Ministry of Health who will be responsible for the communication of meeting materials, meeting planning and record keeping.

On the direction of the Ministry, the committee will be co-chaired by an Executive Director or equivalent from the Ministry and a Clinical Leader/Medical Director from one of the Health Authorities. The Clinical Leader/Medical Director Co-Chair will be sought through an application process as per the membership of the committee. This position will be for 3 years, renewable and reviewed annually.

## 5.0 ACCOUNTABILITY AND REPORTING

- The Committee is accountable to, and reports on a regular basis to the Standing Committee on Health Services and Population Health, through to Leadership Council.

## 6.0 MEMBERS' ROLES AND RESPONSIBILITIES AND FUNCTION OF THE COMMITTEE

- The Committee will make every effort to reach decisions by consensus. Where consensus is not reached, a dispute resolution process will be followed as per Appendix A.
- Quorum will be 60% of members plus one chair.
- Members are expected to participate in all meetings. In the event a member is unable to attend a meeting, the member may appoint a delegate, with prior approval of the co-chairs. Delegates may partake in discussion but are not authorized to vote in the event of a dispute resolution process.
- Members are expected to demonstrate shared leadership and responsibility to advance the work of PSEC and in strengthening the communication through the health authorities.
- Some PSEC members will participate in the working group(s) to ensure oversight and strategic alignment with priorities.
- To maintain objectivity, members are expected to review issues and make recommendations primarily from the point of view of patients rather than from the constituency or geography they may feel they represent.
- Members are expected to disclose any real or perceived conflict of interests to PSEC secretariat as per Appendix B.

### Responsibilities of the Co-Chairs

- Facilitation of meetings.
- Organizing the meeting schedules, agendas, and follow up regarding action items.
- Ensure meetings are of a decision making and action oriented nature.
- Provide a call for agenda items in advance of the meeting.
- Completion, distribution and storage of meeting minutes and documents.
- Delegation of action items to the appropriate group(s).

### Responsibilities of members:

- Attend all meetings (or identify and inform an approved delegate).
- Review agenda materials.

- Respond to key decision requests within established timelines.
- Support engagement by communicating committee activities, and soliciting input and feedback from the clinical or administrative areas they represent.
- Provide recommendations, decision and leadership support in the member's area of responsibility and expertise.

#### Responsibility of Secretariat:

- Coordination of all meeting schedules, documentation of meeting minutes, follow up on action items, creation of reporting and decision making templates, distribution of materials to committee members.
- Minutes of the meetings will be prepared and distributed to members within 15 business days following the meeting. Members will review and submit changes back to the Co-Chairs within the following 5 business days.
- Work with Health Authorities re: communicating outcomes of decisions at the committee.
- Creation of regular written updates for Co-Chairs to present to the Ministry of Health ~~on a quarterly basis or as requested.~~
- Coordination of working groups, reporting on status of deliverables on high priority initiatives, monitoring milestones.
- Maintain the ~~2018~~ – ~~2021~~ work plan and progress reports.
- Processing payments, facilitating contracts etc. as required.
- Maintain signed "Declaration of Real or Perceived Conflict of Interest" forms submitted by PSEC members.

#### Meeting details:

- Meetings will be held 6 times per year or as determined by the Co-Chairs to achieve specific objectives. An annual schedule of meetings will be established in ~~for~~ advance planning to support attendance.
- Meetings will be held in a manner most efficient for decision making: primarily in person; by teleconference if by necessity.
- The agenda will be set by the Co-Chairs in collaboration with other members and distributed to members with supporting materials one week prior to the meeting.
- In order to facilitate the function of the committee, agenda items will be presented to the committee as action items with formal decision briefs and appropriate documentation.

### 7.0 CONFIDENTIALITY

- To support their ability to provide well informed advice, PSEC members may receive confidential information. All members are expected to maintain confidentiality regarding these materials and committee discussions.
- Members may be asked to sign a non-disclosure agreement under certain circumstances when they are reviewing and discussing information of a particularly sensitive nature.
- The Co-Chairs will ensure that everyone participating in the meeting has received clear instructions on the confidentiality of these proceedings.

### 8.0 ANNUAL REVIEW

The Terms of Reference, composition, membership and function of this committee will be reviewed annually during the month of March~~September~~.

## 9.0 VERSION CONTROL

Author	Version	Release Date	Changes
Andy Hamilton	1	11 February 2014	Initial creation
Marilyn Copes	2	13 August 2014	Feedback incorporated
Marilyn Copes	3	29 September 2015	Annual review
Marilyn Copes	4	23 September 2016	Annual review
Marilyn Copes	5	9 December 2016	Add statement on declaration of real or perceived interest
Marilyn Copes	6	27 March 27, 2018	Annual review

## Appendix A – Consensus and Dispute Resolution

Note: Consensus and Dispute Resolution processes will only be carried out when a Quorum, as defined by the Terms of Reference, is in place.

Determine Level of Consensus:

When discussion of complex topics results in differing opinions of the group or appears to be at a stalemate, individual members will consider the following definitions of consensus and choose the one closest representing their opinion on the subject at hand:

1. I can say an unqualified "yes" to the decision. I am satisfied that the decision is an expression of the wisdom of the group.
2. I find the decision perfectly acceptable.
3. I can live with the decision; I'm not especially enthusiastic about it.
4. I do not fully agree with the decision and need to register my view about it. However, I do not choose to block the decision. I am willing to support the decision because I trust the wisdom of the group.
5. I do not agree with the decision and feel the need to stand in the way of this decision being accepted.
6. I feel that we have no clear sense of unity in the group. We need to do more work before consensus can be reached. (Kelsey 1991).

If all members of the Committee choose between options 1 through 4, consensus is considered reached. Members registering at Level 4 will have their views noted formally in the minutes.

Dispute Resolution:

If members register in Level 5 or 6, a formal dispute resolution should be employed as follows:

- A motion relating to the issue should be put forward by a member, seconded and formal discussion held and recorded.
- All members of the Committee are entitled to then vote, including the Chairs.
- The motion will be passed by a simple majority.
- In the event of a tie, the issue will be directed to the Assistant Deputy Minister for further discussion and a final decision.

## Appendix B – Declaration of Real or Perceived Conflict of Interest

I hereby declare that:

☐ I have no real or perceived monetary or personal interest in any matter that enters or may enter me into conflict with my duties as a member of PSEC.

☐ I have real or perceived monetary or personal interest in a certain matter that enters or may enter me into conflict with my duties as a member of PSEC. The particulars of such matter are stated below:

---

---

---

---

I also acknowledge that I will make another declaration to state any change in any matter that enters or may enter me into conflict with my duties as a member of PSEC.

## SSP Expansion Charters – TPO/PM Summary by HA

### Interior Health Authority (IHA)

#### Instances

- Kelowna
  - 4 remaining attributes, of which some already have some parts complete
- Kamloops
  - New instance (first 4 attributes in 18/19, last 4 in 19/20)
- Vernon
  - New instance (first 4 attributes in 18/19, last 4 in 19/20)
- Penticton
  - New instance (first 4 attributes in 18/19, last 4 in 19/20)
- Trail
  - All 8 attributes in 19/20
- Cranbrook
  - All 8 attributes in 19/20

#### Issues

- Dates for some of the milestones are very long and end heavy. Having completion dates that go right to March 31, 2019 does not leave any slack or room for error.
  - Example: January 2017 start to March 31, 2019 end
  - 51 of the 105 18/19 milestones listed have completion dates of March 31, 2019.
- Funding is referenced as a barrier

### Fraser Health (FHA)

#### Instances

- Burnaby Hospital
  - Has all 8 attributes already
- SMH (Surrey Memorial Hospital)
  - New instance
- ARH (Abbotsford Regional Hospital)
  - New instance

#### Issues

- Charter indicates that they will only be implementing 3 of the 4 attributes at Abbotsford Regional Hospital (ARH)
  - Charter clearly indicates that HA will not have central intake implemented by March 31, 2019

- Charter does not relate back to the target of “80% of hip and knee replacement patients should receive their services through a Hip and Knee Replacement Program.”
- Dates of the milestones are an issue
  - Start and end date of all milestones are: January 2018 and March 2019 respectively
  - Only include month and year, no actual day indicated
  - Milestones are vague – do not show the “how”

## Vancouver Coastal Health (VCHA)

### Instances

- UBC
  - Implement remaining 4 attributes and continue monitoring and evaluation of first 4 elements
- VGH
  - Implement remaining 4 attributes and continue monitoring and evaluation of first 4 elements
- Lions Gate
  - New instance
- Richmond
  - New instance

### Issues

- Plan does not relate back to “80% of hip and knee replacement patients should receive their services through a Hip and Knee Replacement Program.”
- Milestones need to be developed further – not enough detail.
  - Example: Milestones for “implement best practice recommendations” are from June 29, 2018 to March 31, 2018 (page 9)
  - Example: Milestones for collect, evaluate and benchmark and recommend are all happening from April 9, 2018 to June 29, 2018. (page 9)
  - Dates are missing for some milestones
  - How is missing from milestones
  - Some milestones have dates that range the whole timeframe of the project (January 2018 to March 31, 2019)
  - Uneven number of milestones per deliverable – some have less than 5.
  - Dates for milestones on page 12 – 13 may be an issue – all except one have a date range of October 2, 2018 to December 28, 2018
  - A lot of milestones that refer to items that need to be confirmed but do not have milestones that reflect what happens after “confirm”

## Island Health (VIHA)

## Instances

- South Island
  - Jubilee Hospital and Vic General Hospital – status?
- North Island Hospitals
  - Campbell River and Comox
    - New instances
- Nanaimo Regional General Hospital (NRGH)
  - New instance

## Issues

- Charter does not reference getting the remaining 4 elements in place at the 2 South Island sites
  - Not clear if this is because the 8 attributes are already in place or another reason
- Milestones only have months and year, no day
- Uneven number of milestones
  - Multiple deliverables have less than 3 milestones
    - Example: Evaluation Deliverable only has 3 milestones (page 8), and date ranges are very broad (Jan 2019 to March 2019 for all 3 milestones)

## Northern Health (NHA)

### Instances

- UHNBC - will implement remaining 4 attributes
- Dawson's Creek
  - New instance
- Prince Rupert
  - New instance
- Kitimat GH
  - New instance
- Phased Approach – UHNBC first and then DC, PR, KGH

### Issues

- Plan does not relate back to “80% of hip and knee replacement patients should receive their services through a Hip and Knee Replacement Program.”
  - Only mentioned as an outcome in section 3.0, but details of plan do not relate back to how this will be achieved
- Most of the milestones for each of the attributes at each site are the same
- Some milestones need more detail
  - Example: “One Orthopedic Surgeon at site” is the only milestone for central intake (pg8)
  - Some deliverables only have 2 milestones (example: develop improvement plan, implement improvement plan) (page 7-8)
- The “how” is not clear

## **Provincial Health Services Authority**

### **Surgical Patient Registry (SPR)**

#### **Information Note**

**Date:** 25 May 2018

**Prepared by:** Bruce Dangerfield

**Prepared for:** Business user stakeholders of the patient notification module

**Issue:** Wait Time Estimate Methodology Used in Patient Notification Module

#### **Background:**

Part of the requirements of the latest surgical waitlist management policy of 2016 released by the MOH is a requirement for the HAs to notify patients of pertinent milestones in their surgical journey. Notably, when the patient is first waitlisted for surgery, a notification must be sent to the patient informing him/her of the fact that the hospital has received their booking. As a part of this notification, an estimate of how long the patient can expect to wait for the surgery should be included. The SPR has been tasked with building a tool to help with the generating and tracking of these patient notifications. Following discussion between HA representatives and the MOH, the methodology for generating the estimate has been decided upon and is described in this information note.

#### **Discussion:**

The methodology used for the generation of surgical wait time estimates in the SPR Patient Notification tool has the following properties:

1. The calculation of wait time estimates is based on the use of priority levels associated with diagnosis codes rather than procedure codes or procedure groups. This process relies on a statistical summary of completed case data which is used as an estimate for future cases. This is done for each bin of surgeon/priority/facility combination and has the following parameters:
  - a. Completed cases are placed into bins based on the combination of priority level, surgeon and facility. This means that a statistical summary of completed cases will be generated for each surgeon, priority level and facility combination.
  - b. The calculation looks at adjusted wait times (from BFRD to surgery date and with unavailable date ranges excluded) for completed historical cases for a particular surgeon/priority/facility bin. These are used to estimate wait times for future cases:
    - i. If there are more than 15 cases in the last 3 months, this is used to estimate a wait time.

- ii. If there are less than 15 cases in the last 3 months but more than 15 in the last 6 months, the estimate is based on the last 6 months of completed cases.
    - iii. If there are less than 15 cases in the last 6 months but more than 15 in the last year, the estimate is based on the last year of completed cases.
    - iv. If there are fewer than 15 cases in the last year, no estimate is generated.
  - c. The estimates for the priority/surgeon/facility combinations are refreshed weekly.
  - d. The 20<sup>th</sup> and 80<sup>th</sup> percentile of the distribution of adjusted wait times are calculated (in weeks) for the historical completed cases. Both measures are reported as a low and high estimate (respectively) of the wait time.
2. On a weekly basis, the estimates are used to populate the new wait time estimates table and are identified by the combination of surgeon, facility and priority level. Estimates are not generated from cases with no priority level (ie no diagnosis code).

**Summary:**

In summary, the methodology for estimating the surgical wait time for upcoming surgeries for patients for a particular surgeon is based on recent past cases and from these extrapolating to upcoming surgeries. The grouping used for the assessment of past cases is the combination of the surgeon, facility and priority level. The estimate is based on the most recent data for which at least 15 cases can be sampled and is refreshed weekly. The estimate range used is the 20<sup>th</sup> and 80<sup>th</sup> percentile of the sample of past cases. In sample bins where 15 cases are not available from the last year, or in cases where no diagnosis code was available, no estimate is generated.

# Next Steps: SSC Supported Surgical Improvement

Adrian Leung, Director, Specialist Services Committee

Dr Kelly Mayson, Director of Quality Assurance and Patient Safety, Department of Anesthesia and Perioperative Care Vancouver General and UBC Hospitals

Joanna Pannekoek, Liaison, Specialist Services Committee

[www.sscbc.ca](http://www.sscbc.ca)

## Background

BC Enhanced Recovery Collaborative (Nov 2014-Jan 2016)

- Aimed to improve outcomes for elective **colorectal** surgery patients by collectively implementing evidence-based ERAS protocol

# BC Summit on Surgical Improvement:

Advancing Surgical Optimization and Enhanced Recovery

VANCOUVER, BC | JANUARY 22, 2018

Purpose: To bring together multidisciplinary teams and stakeholders to

1. share and connect on surgical improvement work provincially
2. determine the gaps and areas of need moving forwards
3. gain collective agreement on next steps

# BC Summit on Surgical Improvement:

Advancing Surgical Optimization and Enhanced Recovery

VANCOUVER, BC | JANUARY 22, 2018

Copyright

## Key Takeaways:

1. Collective agreement that a coordinated approach to surgical optimization is **the right thing to do for patients**
2. Strong engagement and momentum behind this work

# Surgical Strategy

1. Improve timely access to appropriate surgical procedures
2. Improve the patient experience of care, provide patient centred choice, reduce unwarranted variation
3. Manage surgical waitlists optimally, consistently and proactively
4. Use patient-centered accurate synchronized information solutions to enhance surgical flow
5. Ensure BC has the right number and types of surgical health care providers to meet its needs
6. Monitor performance
7. Reduce per capita cost for surgical services
8. Other: Surgical Services Programs elements

# Enhanced Recovery (ERAS)

## Surgical Strategy

Extending ERAS

Improve the patient experience of care,  
provide patient centred choice, reduce  
unwarranted variation

Monitor performance

Reduce per capita cost for surgical services

## Proposed Deliverables

Build on the success of the Colorectal  
ERAS Collaborative and expand to  
Gynecology and Urology

Conduct an environmental scan: gather  
current pathways and data sets across  
active sites

Develop provincially endorsed pathways  
for Gynecology and Urology

# Surgical Optimization

## Surgical Strategy

Use patient-centered accurate synchronized information solutions to enhance surgical flow

Improve the patient experience of care, provide patient centred choice, reduce unwarranted variation

Target SSP elements across all surgeries by enhancing integration and coordination across services , providing pre and post-surgical support, self-management tools

## Proposed Deliverables

Conduct environmental scan/gap analysis of current optimization models

Develop provincially endorsed optimization model for the BC context

Support coordinated implementation/spread to local sites

# Other SSC Supported Surgical Activity

- Enhancing Access initiative (Pooled Referrals) alignment:
  - Manage surgical waitlists optimally, consistently and proactively
  - Improve timely access to appropriate surgical procedures
  - SSP elements of central intake and triage, waitlist management.
- SSC supporting physician engagement and increased alignment with MoH Surgical Strategy

# Discussion

- How are HAs approaching the overarching surgical strategy and how do these proposed activities fit into your timelines and priorities?
- How do HAs envision their own staff being deployed to support this work?
- What level of interest and need is there to coordinate/ standardize processes of care and data collection across sites?

## **Summary, VA Incidence, Prevalence, Surgical Wait Times & Outcomes**

# PROVINCIAL SURGICAL EXECUTIVE MEETING PROJECT UPDATE

---

Friday, June 1, 2018

*[Amended on June 7, 2018]*

## Project Status

- Project is now in full motion ...
  - Funding issues are ***largely*** assumed to be resolved through funding letters
  - Shared resources (Secretariat team and procurement expert) are in place
- WG and technical sub-group re-engaged
  - WG: May 9, 11 and 16
  - Technical sub-group: May 9 and May 24
- Procurement related activities underway
- Overall Project Evaluation
  - Prep work continued but WG / SC discussion deferred to ensure procurement launch focus

# Updates from May 18 Steering Committee

---

# Key Assumptions were Reviewed with Steering Committee

Surgical Waitlist Management Scheduling Solution (SWMSS)  
Proof of Concept Project

## Status and Participation Assumptions

The Need for Baseline Assumptions	Current Assumptions
<p>As we move forward, it is critical to re-confirm our core operating assumptions as these will drive key data in the RFP including, but not limited to,</p> <ul style="list-style-type: none"><li>• Participating health authorities</li><li>• In-scope sites</li><li>• Expectations around sequence of implementation</li><li>• Notional project parameters (e.g. project team / organization) within the sites</li></ul>	<p>Participating Health Authorities and sites:</p> <ul style="list-style-type: none"><li>• Vancouver Coastal (VGH and UBC),</li><li>• Interior Health (Kelowna General)</li><li>• Fraser Health (Royal Columbian and Eagle Ridge)</li></ul> <p>Scope and requirements</p> <ul style="list-style-type: none"><li>• Detailed requirements identified during the June to Dec 2017 timeframe reflect a consensus</li><li>• Working Group is empowered to help fine-tune as well as to consolidate and address any gaps (e.g. sequence, etc.)</li></ul>

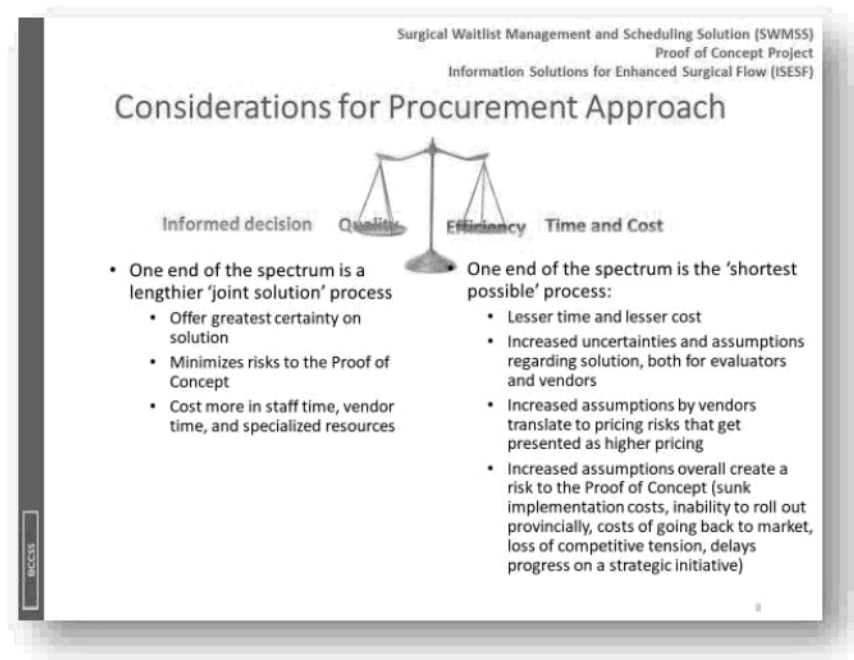

Can we work from this basis?

3

**All three participating health authorities formally re-committed at the May 18 Steering Committee meeting**

# Procurement Approach and Next Steps were Outlined

- Process Points
  - **Staged process** that is responsive to the risk profile or a Proof of Concept scope with potential province-wide expansion expectations
- Additional Resourcing
  - Provisions for “Fairness” and financial analysis
  - Patient engagement
- Key Next Steps
  - Finalize content (functional and technical requirements assumed to be materially complete; services and other aspects under development)
  - RHAs to identify evaluation resources – Key challenge!
  - Publish / Engage / Evaluate / Contract

# Now the Bad News

---

The Schedule

## Recognized Risks to Timelines

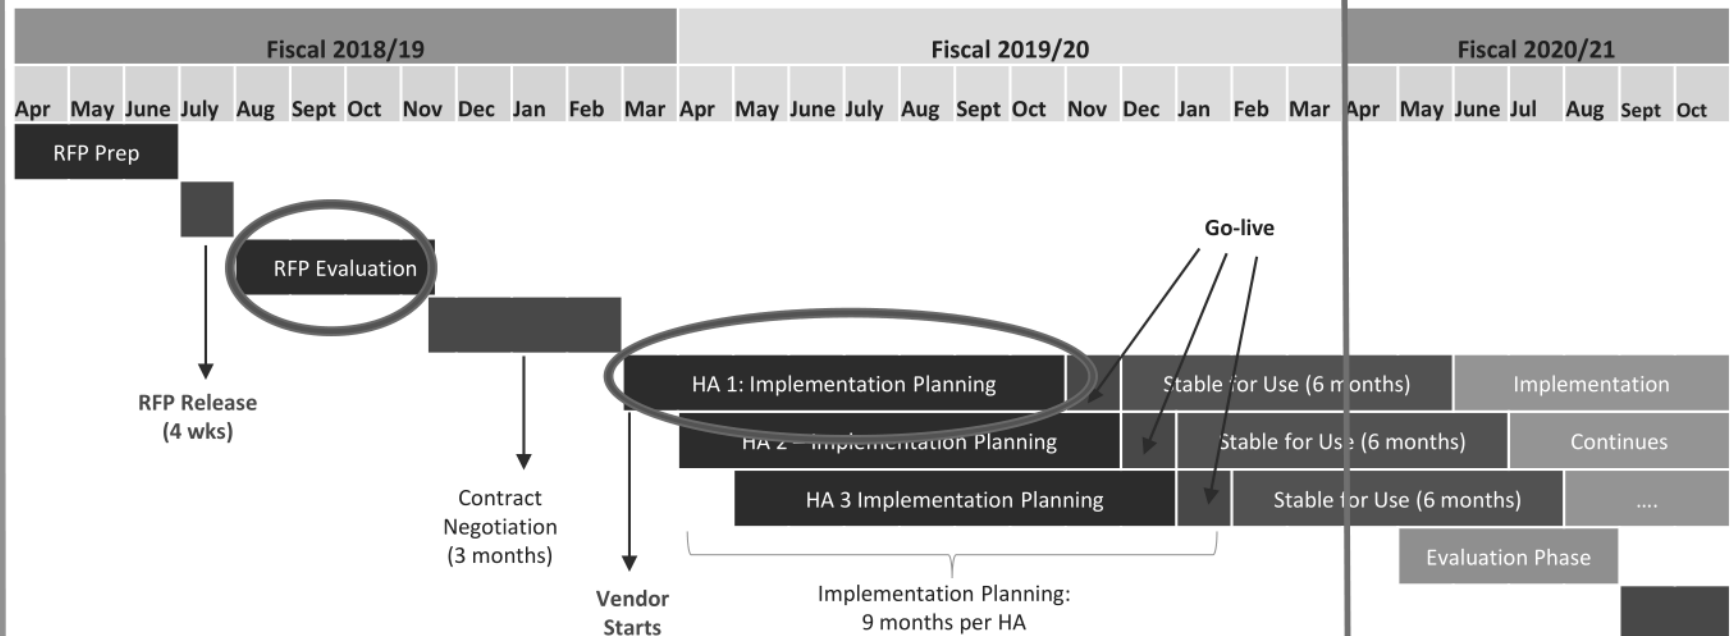

- Complex multi-stakeholder initiative
  - 3 participating HAs, 5 hospital sites and associated surgeon's offices
  - Well aligned but somewhat varied requirements across the 3 HAs
  - Distinct integration requirements per HA, involving legacy systems [Significant time required to develop, test and implement interfaces]
- Unknown Vendor Responses
  - The extent to which multiple viable solution options are identified will impact evaluation process durations
- Change Management impacts
  - Implementation extends to surgeons' offices which will require appropriate engagement of surgeons, their MOAs and possibly their EMR vendor(s)
- Procurement process over Summer months
  - Securing evaluators that are representative of end-user groups and that are available over the summer months will be challenging (Initial evaluation phase falls in August)
- Procurement with PoC focus but intended to position for the future
  - Contract negotiation will need to reflect the implementation needs of 3 separate HAs – this may take additional time
  - Contract negotiation will need to reflect broader provincial costing options – for expansion in participating HA sites and non-participating HAs

## SWMSS Timelines – Context

- Project team approach has been to develop and propose **aggressive** timelines and invited RHA stakeholders to identify issues to land on an **achievable** schedule; key challenges:
  - Evaluation participation during summer
  - Implementation duration given (1) anticipated interfacing challenges and (2) recognition of the importance of change management in the engagement of Surgeons and MOAs

## SWMSS Project – Overall Timeline Estimates

### Assumptions:

- All dates and overall approach dependent on successful proponent
- Phased Implementation (asking vendor input re: capacity / feasibility for phasing activities)
- All HA specific teams are 'ready' and in place for their phased start date (with potential for pre-work before vendor starts)
- Local implementations continue to be 'live' while Post POC decision is under consideration.

### Pending Discussion Items with WG

1. Anticipating issues with "August" evaluation window
2. Specifying order of HAs or asking vendor to assess order based on readiness or complexity
3. Stable for use period of 6 months – may be potential to reduce
4. Emerging information that implementation likely closer to 12 months than 9 – at least for VCHA

**Strictly Confidential**

Questions? Discussion?

# Post Meeting Amendment

---

Updates to the Schedule resulting from June 4 Steering Committee and Working Group discussions follow

# Surgical Waitlist Management Scheduling Solution (SWMSS) Proof of Concept Project

## SWMSS Project – Overall Timeline Estimates

### Assumptions:

- All dates and overall approach dependent on successful proponent
- Phased Implementation (asking vendor input re: capacity / feasibility for phasing activities or concurrent starts)
- All HA specific teams are 'ready' and in place for their phased start date (with potential for pre-work before vendor starts)
- Stable for use period of 4 months before evaluation can be initiated (after successful transition to operations)
- Local implementations continue to be 'live' while Post POC decision is under consideration.

### Pending Discussion Items with WG

1. Current assumption is phased implementation (slight lag) – need to specify order of HAs and/or ask vendor to assess order based on readiness or complexity

**Strictly Confidential**

Page 285 to/à Page 298

# PRIORITY WAIT TIMES MONITORING REPORT

2018/19 P01

Ministry of  
Health

**Health Sector Information, Analysis and  
Reporting Division**

Version 1.5  
June 04, 2018

## Explanatory Notes

1. Some HAs provided calendarized targets (cumulative benchmarks). Where they were not provided benchmarks were distributed to fiscal periods based on the number of days in each period (MoH methodology). Discussion between the Ministry and health authorities is ongoing to finalize data collection dates and calendarization for the period 2 report.
2. Health authorities will report the number of 'other endoscopy' procedures for both period 1 and 2 in future reports.
3. The number of days for P1 and P13 each fiscal differ year to year. Year over year period progress is not directly comparable and are identified with an asterisk (\*) notation. For P1 and P13 the average surgeries per day is identified in the notation.

**How to cite this document:**

B.C. Ministry of Health; Health Sector Information, Analysis and Reporting Division;  
Priority Wait Times Monitoring Report

## Historical and Planned Volumes

This report provides periodic and cumulative performance monitoring against the public commitments for increased access to priority surgeries and MRIs, as well as an assessment of how the health system is keeping up with wait list demand. Historical and planned volumes, as well as reporting commitments to the Minister of Health, are provided for reference:

Health Authority	Procedure(s)	2016/17 Actuals	2017/18 Actuals	2018/19 Planned
Interior Health	Hip and Knee	3,364	3,292	4,614
	Dental	1,121	1,218	1,396
	All Other Surgeries	38,029	37,110	40,230

## INTRODUCTION

### Purpose

The surgical Services Report provides a comprehensive overview of progress towards implementation of the 18 Month Surgical Action Plan (October 2017 – March 2019) within the context of the 3 Year Surgical Services Strategy. The 18 month action plan represents the first half of the 36 month action plan and focuses on five key priority areas:

- Catch Up and Keep Up
- OR Efficiency
- Surgical Services Program
- Site Implementation
- Enablers

It is intended that this report will support all stakeholders in monitoring implementation and performance against established timelines and targets.

### Structure

The Surgical Services Report layout is a series of dashboards offering an executive, provincial and health authority (HA) view of progress and performance. Progress and performance results are reported on a fiscal period basis (P1 to P13). The executive view outlines performance and progress at the highest level (areas of focus). The provincial view outlines surgical performance against established targets and measures progress towards completion of high level actions. The HA view outlines each action in more detail and measures progress towards HA-specific milestones, provides more detail on performance indicators and identifies risks in achieving actions and milestones.

### Implementation Progress

Progress towards completion of both actions and milestones is depicted using a donut progress bar and represents the percent complete, color coded by current status. Health Authorities submitted project charters to the Ministry for the first 18 months, including explicit and achievable operational plans detailing how each health authority will achieve the goals and timelines of the 18 month surgical action plan based on their geography and patient population. As each Health Authority has a different context, there will be variability in completion percentages across each of the areas of focus and progress is not comparable across the Health Authorities. Progress is being monitored by the Ministry on a period by period basis to ensure that the Health Authorities and the Ministry are on track and where issues arise, they are identified and resolved.

Status of process is identified as follows:

- |            |                  |
|------------|------------------|
| ■ Complete | ■ Off Track      |
| ■ On Track | ■ Not Started    |
| ■ At Risk  | ■ Not Applicable |

Status of actions is an assessment of progress against established timelines and can be influenced by a number of factors.

Examples of donut progress bar:

### Indicators

Indicators for surgical services have been selected to monitor performance towards achieving desired outcomes. They include measuring the percent of surgeries for which patients are waiting longer than 26 weeks and the number of surgeries performed.

### Targets

Targets for percent of surgeries waiting longer than 26 weeks were established by the Ministry and Health Authorities. Volume targets (planned volumes) were established in consultation with health authorities and reflect the number of surgeries required to meet the percent completed target. Volume targets were distributed to fiscal periods using 3 years of historical volumes. The percent of surgeries waiting period targets were established using a linear distribution between baseline (P6) and the established target over 18 months.

### Ratings

For the most recent reported period, ratings are assigned based on the gap between performance and established targets. For percent of surgeries waiting longer than 26 weeks this will be actual performance against target. For volume indicators the gap will be a measurement of the projected end of fiscal surgeries completed (linear calculation) and Authority specific targets.

- At or better than target
- ▲ Within 10 percent of target
- ◆ More than 10 percent from target

## SURGICAL SERVICES PROGRAM (Deliverable Dashboard)

### Performance

#### SSP Implementation

IHA FHA VCHA VIHA NHA PHSA BC

**Phase 1: Efficiencies** – incremental gains across the continuum of care

**Evaluation** – patient outcomes tracked and evaluated and measurement of dimensions of quality embedded in existing systems

**Pre-Surgical Support** – SSP's responsible for scheduling surgery and providing access to surgical optimization and pre-habitation

**Central Intake, Assessment and Triage** – a single, commonly-known point of access and contact, referrals received and triaged through central intake office and standardized assessment and referral criteria

Detail to be provided by period 11

**Phase 2: Integration and Co-ordination Across Services** - timely access to surgical expertise, effective and well-co-ordinated care and communication and active primary and community care involvement

**Interdisciplinary, Team-Based Care** – an interdisciplinary approach supporting communication, collaboration, co-ordination and delivery of care

**Post-Surgical Support** – access to post-surgical nursing services, physical/mental support and individualized rehabilitation

**Self-Management Support** – patients receive support services and information to enable them to be actively involved and participatory in their care

### Deliverable Progress to Plan (% Complete / Status)

**Outside Bar:** All patients requiring hip and knee replacement, at all sites where these procedures are performed, are supported by an SSP by March 31, 2019.

**Inside Bar:** Operationalize at least one instance of an SSP for hip and knee replacement by March 31, 2018.

Please note: progress to plan information is not comparable across Health Authorities.

**Progress Status:** ■ Complete ■ On Track ■ At Risk ■ Off Track ■ Not scheduled to start until later date ■ Not Applicable

## SITE IMPLEMENTATION (Action Dashboard)

### Performance

Indicator	Desired Direction	IHA	FHA	VCHA	VIHA	NHA	PHSA	BC
-----------	-------------------	-----	-----	------	------	-----	------	----

Potential HA reported indicators:

Percent of scheduled surgeries booked according to FIFO

Percent of patients notified during their wait for surgery

Percent of surgeries scheduled by HA

Percent of surgeries scheduled by Surgeons Office

Maintain OR access for unscheduled surgeries (Hip fracture fixations completed within 48 hours used as proxy)

Targets to be identified by the beginning of fiscal 2018/19

### Action Progress to Plan (% Complete / Status)

#### Outside to Inside Bar:

- 1) Provide notifications to patients during their wait for surgery
- 2) Implement a point of contact for patients during their wait for surgery
- 3) HA to perform scheduling for all waitlisted surgeries
- 4) Extend ERAS into at least one new clinical specialty
- 5) Extend ERAS to all colorectal patients

Please note: progress to plan information is not comparable across Health Authorities.

**Progress Status:** ■ Complete ■ On Track ■ At Risk ■ Off Track ■ Not scheduled to start until later date ■ Not Applicable

## ENABLERS (Milestone Dashboard)

Milestone		% Complete/ Status	Milestone		% Complete/ Status
IM/IT	DM approved BN for funding Information Solutions for Enhanced Surgical Flow – proof of concept.	100%	FINANCE	Decision briefing note prepared to Deputy Minister review and approval regarding payment methodology	100%
	FCSD to confirm terms of budget allocation (e.g. allocation 2017/18, 18/19, 19/20). BCCSS requires an MOU with signed commitment by 3 participating Health Authorities.	75%		Funding allocation information communicated to health authorities via 2017-18 Preliminary Funding Letters	100%
	Funding in place	50%		Health authorities on boarded to provincial standard modelling system (Note: some smaller sites and BCCA not yet on boarded; follow up will commence in January.**	75%
	Ministry to issue funding letter to HA’s*	75%		MoH receiving data from provincial system***	50%
	BCCSS prep and RFP development.	0%	INFORMATION AND DATA	Surgical modelling and identification of opportunities for efficiencies undertaken	50%
	Evaluation criteria for proof of concept to be developed	0%		Current surgical codes reviewed and validated	25%
	PoC implementation and evaluation	0%		Plan in place for implementation of changes if necessary	0%
	RFP evaluation, negotiation, award	0%		Consultations with data and tech representatives from the Health Authorities	0%
RFP issued	0%		Definitions standardized for timeframes for unscheduled surgeries.	0%	
			Implementation as necessary	0%	

## Issue/Barrier

\*RFP cannot be issued until funding is approved.

## Mitigation Plan

\*\*Plan was to focus on large sites because of the labour intensive nature of small site data collection/alignment. Some of the smaller sites in IHA and NHA are not yet on boarded. We were not aware until late December. New date of end of fiscal. 75% is probably an understatement.

\*\*\*In late December, after the previous version of the plan had been submitted, we discovered that there were internal inconsistencies in the data fields. These are being rectified with a timeline of end January. This is recoding to SPR.

**Progress Status:** ■ Complete ■ On Track ■ At Risk ■ Off Track ■ Not scheduled to start until later date ■ Not Applicable

## INTRODUCTION

### Purpose

The surgical Services Report provides a comprehensive overview of progress towards implementation of the 18 Month Surgical Action Plan (October 2017 – March 2019) within the context of the 3 Year Surgical Services Strategy. The 18 month action plan represents the first half of the 36 month action plan and focuses on five key priority areas:

- Catch Up and Keep Up
- OR Efficiency
- Surgical Services Program
- Site Implementation
- Enablers

It is intended that this report will support all stakeholders in monitoring implementation and performance against established timelines and targets.

### Structure

The Surgical Services Report layout is a series of dashboards offering an executive, provincial and health authority (HA) view of progress and performance. Progress and performance results are reported on a fiscal period basis (P1 to P13). The executive view outlines performance and progress at the highest level (areas of focus). The provincial view outlines surgical performance against established targets and measures progress towards completion of high level actions. The HA view outlines each action in more detail and measures progress towards HA-specific milestones, provides more detail on performance indicators and identifies risks in achieving actions and milestones.

### Implementation Progress

Progress towards completion of both actions and milestones is depicted using a donut progress bar and represents the percent complete, color coded by current status. Health Authorities submitted project charters to the Ministry for the first 18 months, including explicit and achievable operational plans detailing how each health authority will achieve the goals and timelines of the 18 month surgical action plan based on their geography and patient population. As each Health Authority has a different context, there will be variability in completion percentages across each of the areas of focus and progress is not comparable across the Health Authorities. Progress is being monitored by the Ministry on a period by period basis to ensure that the Health Authorities and the Ministry are on track and where issues arise, they are identified and resolved.

Status of process is identified as follows:

- |            |                  |
|------------|------------------|
| ■ Complete | ■ Off Track      |
| ■ On Track | ■ Not Started    |
| ■ At Risk  | ■ Not Applicable |

Status of actions is an assessment of progress against established timelines and can be influenced by a number of factors.

Examples of donut progress bar:

### Indicators

Indicators for surgical services have been selected to monitor performance towards achieving desired outcomes. They include measuring the percent of surgeries for which patients are waiting longer than 26 weeks and the number of surgeries performed.

### Targets

Targets for percent of surgeries waiting longer than 26 weeks were established by the Ministry and Health Authorities. Volume targets (planned volumes) were established in consultation with health authorities and reflect the number of surgeries required to meet the percent completed target. Volume targets were distributed to fiscal periods using 3 years of historical volumes. The percent of surgeries waiting period targets were established using a linear distribution between baseline (P6) and the established target over 18 months.

### Ratings

For the most recent reported period, ratings are assigned based on the gap between performance and established targets. For percent of surgeries waiting longer than 26 weeks this will be actual performance against target. For volume indicators the gap will be a measurement of the projected end of fiscal surgeries completed (linear calculation) and Authority specific targets.

- At or better than target
- ▲ Within 10 percent of target
- ◆ More than 10 percent from target

## PROVINCIAL OVERVIEW - SURGICAL SERVICES PROGRAM (Deliverable Dashboard)

### Progress to Plan Overview

#### SSP Implementation

	IHA	FHA	VCHA	VIHA	NHA	BC
Efficiencies	Incremental gains across the continuum of care through use of operating room resources, intake of patients, preparation of patients and coordination of patient flow (e.g. swing OR, bed mapping, single-entry models, transfers between sites, pre- and post-operative standardization)					
Evaluation	Patient outcomes tracked and evaluated and measurement of dimensions of quality embedded in existing systems through Patient Reported Outcome Measures (PROMS), Patient Reported Experience Measures (PREMS) and Key Performance Indicators (KPIs)					
Pre-Surgical Support	SSP's responsible for scheduling surgery and providing access to surgical optimization and pre-habitation through support services such as exercise, smoking cessation, nutrition, mental health, pain management, symptom management and pre-surgical assessments					
Central Intake, Assessment and Triage	A single, commonly-known point of access and contact for health care providers, care coordinators, care managers, patients, families and caregivers responsible for receiving referrals through a central intake office, assigning referrals through a standardization of referral criteria and assessment processes (first available, appropriate surgeon or surgeon of patients choice)					

Detail to be provided by period 12

### Deliverable Progress to Plan (% Complete / Status)

**Outside Bar:** All patients requiring hip and knee replacement, at all sites where these procedures are performed, are supported by an SSP by March 31, 2019.

**Inside Bar:** Operationalize at least one instance of an SSP for hip and knee replacement by March 31, 2018.

Please note: progress to plan information is not comparable across Health Authorities.

**Progress Status:** ■ Complete ■ On Track ■ At Risk ■ Off Track ■ Not scheduled to start until later date ■ Not Applicable
