Caveats

PHSA's occupancy rate based on BC Children and Women's Hospital only.

Please note that the occupancy rates in this report are a calculated measure. They may differ from rates reported by other sources because of differences in when the bed count is taken and which departments are included in the calculation. See notes page for details on the calculation in this report.

The occupancy rates in the table include Alternate Level of Care (ALC) days. Patients who no longer require the levels of care necessary for acute patients, but who are still in the hospital, are classified as ALC for those days during their stay when they did not require acute care.
