

Discharges from BC Childrens Hospital by Patient postal code FSA and Anatomical Intervention Group
2016/17 and 2017/18

Data source Discharge Abstract Database

Notes

- 1 Anatomical Grouping is determined by the main intervention reported for the case
- 2 Major Clinical Classification is derived from the Case Mix Group, which is determined by the main intervention and diagnosis reported for the case
- 3 Postal fsa represent the first three digits of the postal code. When postal code is unknown or was not provided a code related to province, USA state, or nation was used
- 4 Health Authorities represent the top most geographic jurisdiction of health care service regions.
- 5 Data are for fiscal years 2016/17 and 2017/18. 2018/19 is an open year. Data are not final until the year closes for data submissions on June 30, 2019.

Cases at BC Childrens Hospital by Intervention Anatomical Group by Postal Code FSA 2017/18

Note: *** where postal code and anatomical group combinations had cells with a value less than 5, counts were grouped only by postal code.

Intervention Anatomical Group	POSTAL FSA	Cases
Head, Neck, Nose, Mouth & Pharynx (005)	British Columbia	459
