

Supply Chain Update - 2020218

With the increase in 2019 Novel Coronavirus activity across the world, there has been an increased global demand for N95 respirator masks. Within BC, we have seen a significant increase in orders placed and we are taking proactive measures to ensure we maintain our stock and prevent any supply disruptions that could impact our departments. This is being done while ensuring any staff member who requires an N95 respirator mask has one readily available.

Inventory Levels

The inventory levels below are calculated based on the most recent 7 day run rate which is significantly higher than the historical usage. This is reflected in the lower Days on Hand (DOH) levels. The process controls put in place are working and it looks like order volume has stabilized, though at a high usage rate than historical.

N951870+

LFC has 213 DOH
VIHA has 353 DOH
NHA has 77 DOH
IHA has 31 DOH

N951860M

LFC has 90 DOH
VIHA has 66 DOH
NHA has 28 DOH
IHA has 112 DOH

N951860S

LFC has 96 DOH
VIHA has 64 DOH
NHA has 7 DOH
IHA has 46 DOH

The inventory levels include regular working inventory and Pandemic stock where it exists. Additionally we are tracking levels on procedural masks, face shields and gowns and other items. We are working with Cardinal and other partners on supply on hand sanitizer that is currently on low supply.

Our vendor partners are filling our orders based on historical demand and usage and have placed these products on allocation to ensure that supply goes to where it is needed based on a fair allocation. Inventory on N95 is healthier right now except for the N95 1869S in NHA and we will move stock as needed.

Departmental reports that compare historical usage to current usage, have been run and provided to our HA contacts to address any unusual demand.

Supply Chain Update – 20200317

With the increase in 2019 Novel Coronavirus activity across the world, there has been an increased global demand for N95 respirators, masks and other PPE. Within BC, we have seen a significant increase in orders placed and we are taking proactive measures to ensure we maintain our stock and prevent any supply disruptions that could impact our departments. This is being done while ensuring any staff member who requires PPE has one readily available.

Inventory Levels

The inventory levels below are calculated based on the most recent 7 day run rate which is significantly higher than the historical usage. This is reflected in the lower Days on Hand (DOH) levels. Usage continues to grow on N95, masks and hand sanitizer even with controls in place to limit the depletion rates.

The inventory levels include regular working inventory and Pandemic stock where it exists. Additionally we are tracking levels on face shields, gowns, hand sanitizer and other items. Our vendor partners are filling our orders based on historical demand and usage and have placed these products on allocation to ensure that supply goes to where it is needed based on a fair allocation.

Inventory on N95 is depleting at faster than normal rates and usage did spike in the past 7 days

even with control in place. SC has sourced 400K of N95 8210 which are arriving March 27rd. The N95 sub working group has identified specific departments to use them in as an alternative to the 1870+. Additionally, more reusable respirators have been sourced.^{s.17}

s.17

N95 SWG is focusing on the

implantation of the reusable respirators.

s.13; s.17

15,000 Copan Swabs are arriving today, with 35,000 coming next week.

We are running very low on the 400ml table top Hand sanitizers. We will be receiving 3600 eaches today from our alternate vendor which will give us 4 days usage. Cardinal has given us a tentative date of March 20th for more product. Sourcing has been actively working to secure alternates- any size available as far as it is table top with a pump. New testing sites can't use the wall mounted refills so the demand for the 400 ml stand alone is greater than expected.

We are also running low on the Hand wash soap 411137 but we are able to use the alternate soap from Stevens for which we do have stock. Stevens will be bringing another shipment for the soaps this afternoon.

FHA EMERG has switched to 474103 - GOWN ISOLATION YELLOW LRG level 2 from 345173 - GOWN,ISOLATION,YLW,W/CUFF,XLG which will save us appx 780 packs per month of the 345173. Stevens has the stock to support additional cases of the new gown. We have also been able to secure additional cases for the ZCT5502 LEVEL 2 Gowns from Cardinal with an eta of 4 weeks or if air shipped it would be here earlier.
