

Hospitalizations with an ICU stay

Filename CFR HTH-2021-10943 Hospitalizations with ICU.xlsm

Data source 1 Discharge Abstract Data Base

Extract date 2021-03-15

Notes

- 1 All patients at British Columbia hospitals are included. Hospitals outside of British Columbia are not included. (Hosp ^= 997)
- 2 Patients with discharge date from 1-1-2015 through 31-12-2020 are included. Some patients admitted before 2015 have discharge dates in this range and are included. Some patients admitted in this range have discharge dates after 2020 are excluded.
- 3 Hospital records are included if they contain at least one ICU stay. There may be multiple ICU stays in a single hospital record, but only the first is counted in this analysis.

PAS 3000.0000

Hospitalizations with an ICU stay

Calendar Years 2015 to 2020

PAS 3000.0000

Hospitalizations with ICU stay by year

Discharge Year	Records with ICU Stay
2015	39,676
2016	39,769
2017	39,860
2018	39,976
2019	40,294
2020*	38,335

N.B. Caution should be exercised when interpreting data; please refer to the Notes tab for important information.

N.B. Cite sources when using these data.

Note that some records may still be missing from 2020. Health Authorities are sometimes more than 90 days behind in abstracting patient charts into the Discharge Abstract Database (DAD). DAD records are not considered completed until the fiscal file year is closed. The cut-off date for record submissions from 2020/21 is June 30, 2021.
