 - 40033 Angioplasty
 - 50029 Laryngoscopy
 - 50056 Laryngopharyngoscopy
 - 100004 Bronchoscopy
- 3 HAs sent 17,863 distinct cases, 17,407 of which were identifiable in SWT surgical database. The difference in these pools is accounted for by GI endoscopy cases included by the health authorities, cancelled cases with SPR errors that were not retrospectively addressed by the health authorities, and other cases not submitted successfully to the SPR due to severe errors (i.e. data quality issues)
- 4 Some cases were added to the waitlist after April, 1st 2020 and subsequently postponed. This explains why the sum of cases completed and cases cancelled does not exactly match the difference between cases waiting at current and previous periods.

 - 100004 Bronchoscopy
- 3 HAs sent 17,863 distinct cases, 17,366 of which were identifiable in SWT surgical database. The difference in these pools is accounted for by GI endoscopy cases included by the health authorities, cancelled cases with SPR errors that were not retrospectively addressed by the health authorities, and other cases not submitted successfully to the SPR due to severe errors (i.e. data quality issues)
- 4 Some cases were added to the waitlist after April, 1st 2020 and subsequently postponed. This explains why the sum of cases completed and cases cancelled does not exactly match the difference between cases waiting at current and previous periods.

² % Completed = [Cases Completed / (Postponed Cases – Cases Cancelled)]

*Cases not yet rebooked included in cancellation total for Fraser Health. Some may be re-added to the waitlist at a future date. This comes from limitations in the OR booking system which requires a case to be cancelled and rebooked instead of postponed.
