System	Service Provider	System Description
Provincial Diagnostic Imaging Viewer and Diagnostic Imaging Repository (PDIV/DIR)	Provincial Health Services Authority Philips Healthcare Canada	The Provincial Diagnostic Image Viewer enables clinicians to view diagnostic radiology images and reports within the Health Authorities. The Diagnostic Imaging Repository stores radiology images and reports.
Health Information Access Layer - Provincial Laboratory Information Solution (HIAL-PLIS)	Provincial Health Services Authority Maximus Canada Services, Inc. Quest Diagnostics Clinical Laboratories, Inc.	The Health Information Access Layer (HIAL) enables the seamless, secure, and timely sharing of clinical data. The Provincial Laboratory Information Solution (PLIS) is a clinical data repository of laboratory test results from both public and community lab systems.
PharmaNet	Maximus Canada Services, Inc. 1070715 BC Unlimited Liability Company (AKA OptumRX)	PharmaNet is the provincial drug information system that links all B.C. pharmacies to a central data system. Every prescription dispensed in community pharmacies in B.C. is entered into PharmaNet.
Client Registry and Provider and Location Registry Systems	CGI Information and Management Consultants, Inc.	The Client Registry is the central repository of healthcare client demographic information for anyone accessing healthcare services in B.C. The Provider and Location Registry is B.C's authoritative registry of healthcare providers' demographic and professional information (e.g., name, identifiers, demographics, expertise, contact and licensing status).
Pan Canadian Health Surveillance Solution (Panorama)	Provincial Health Services Authority CGI Information and Management Consultants, Inc. IBM Canada Limited	Panorama supports the Provincial Public Health Information System enabling communicable disease and outbreak management, BC immunization decision support, family health and vaccine inventory management.
Immunizations BC (ImmsBC)	Provincial Health Services Authority Deloitte, Inc. Salesforce	ImmsBC is the provincial vaccine management platform supporting B.C.'s COVID-19 Immunization Plan. It provides a complete end-to-end experience including online and phone registration, appointment booking, supply management, mass immunization clinic workflow and clinical record of vaccine administration.
