

CFR HTH-2021-12656 ICU capacity and occupancy

Filename HTH-2021-12656 - HSIAR Records.xlsm

Notes

- 1 Data source is daily census and capacity reporting from health authorities undertaken as part of COVID-19 response.

Note that these figures may differ slightly from other Ministry bed reporting which captures bed numbers at a point in time (e.g. the last day of a fiscal period).

- 2 Base beds are beds ordinarily staffed and in operation. Note that base bed numbers may change due to staffing and demand variation

- 3 Surge beds are beds that may be open to deal with demand beyond the base bed capacity. Opening these beds would require suspending other hospital services and/or opening unused wards.

- 4 Occupancy rates are presented for both base bed and total bed capacity.

Occupancy rate (base beds) = (occupied beds/base beds) * 100

Occupancy rate (total beds) = (occupied beds/total beds) * 100

2021_0003

Date	Occupied Beds	Base Beds	Surge Beds	Total Beds	Occupancy rate (Base Beds)	Occupancy rate (Total Beds)
01-Mar	327	423	197	620	77.3%	52.7%
