

Ministry of Health Consolidated Analytics Services

Title CFR HTH-2021-14294 Hospitalizations and ICU data

Completion Date 2021-10-19

Client Judy Law

Program Area

Question being asked

Electronic records that detail COVID-related hospital and critical burden: All electronic records & summary reports on BC hospital capacity and critical-care capacity, that include counts of (1) active COVID cases, (2) hospitalized and ICU patients who previously were active COVID cases but are still now off precautions" (or time-cleared or otherwise no longer requiring isolation), and (3) other non-Covid patients; Please also include briefing notes prepared for the Minister or Deputy Minister of Health that meet the same criteria; KEYWORDS: off precautions, time-cleared, infectious, isolation, exclude email correspondence from this request (except where briefing notes are sent as the body of an email). Specifically seeking the reports / census information. <https://news.gov.bc.ca/releases/2021HLTH0058-001844> (Date Range for Record Search: From 3/15/2021 To 9/15/2021).

Summary of Analysis

Daily counts of COVID-19 and non-COVID-19 patients in BC hospitals and ICUs, as well as critical care and non-critical care beds, by day, for the period requested.

The Ministry of Health does not have detailed data on COVID vs non-COVID patients at the health authority or hospital level readily accessible, so data are presented at the provincial level. The Ministry also does not have detailed data on patient stays in hospital yet, so we are unable to provide information on the number of patients who are no longer active COVID-19 cases, but who may still be in hospital.

Data are from the daily reports submitted to the Ministry by health authorities. Blank cells occur on dates where there was no reporting - generally weekends and holidays.
