[Guidelines for Environmental Monitoring at Municipal Solid Waste Landfills \(gov.bc.ca\)](https://gov.bc.ca)

- In BC, landfill owners and operators are required to design and implement an environmental monitoring program that meets the performance criteria outlined in the [Landfill Criteria for Municipal Solid Waste](#).
 - The Criteria apply to all landfills on public and private land in BC that receive municipal solid waste after the date of issuance of the Criteria.
- Monitoring programs should include regular evaluations of groundwater, surface water, leachate, landfill gas, and ambient air quality as dictated by the nature of the facility on a case-by-case basis. Additional parameters, such as soils or vegetation, should be monitored where a risk is assessed as indicated in the landfill criteria.
- The area between waste disposal sites and neighbouring properties should be monitored to determine if contaminants are migrating in that direction in unacceptable concentrations.

Nanaimo Regional Landfill

- [RDN getting to work on \\$3-million project to permanently close part of landfill – Nanaimo News Bulletin \(nanaimobulletin.com\)](#)
