Subject: Issue an immediate stop work order

Dear Mr. Donaldson,

Please issue an immediate stop work order at the proposed 9A site of Coastal GasLink man camp.

Industry and government have refused to do a proper archaeological survey of the proposed Coastal GasLink man camp site, so supporters have been checking the ground disturbed by CGL bulldozers after hours. Today a Unist'ot'en supporter found several arrowheads in the proposed 9A site.

A prior archaeological impact assessment is a condition of CGL's permits, and this condition clearly has not been met. Therefore there should be a cease work order placed on CGL at this site immediately until a full and detailed archaeological impact assessment is completed with oversight from a Wet'suwet'en traditional knowledge holder of the Wet'suwet'en's choosing.

Yours sincerely

Mr. Donaldson, MLA

Please stop the work at the proposed Coastal GasLink man camp site near Houston BC, where land is being disturbed and artifacts have been found. [see attachment]

A prior archaeological impact assessment is a condition of CGL's permits, and this condition clearly has not been met. You have the power to issue a stop work order, so use it.

Best wishes,

To whom it may concern,

In light of the recent significant archaeological findings from the construction site of Coastal GasLink's proposed man camp , site 9A, that indicates a longstanding and continued tie between Wet'suwet'en people and their ancestral territories and in accordance with section 13(2) of the Heritage Conservation Act, administered by the Ministry of Forests, Lands, and Natural Resource Operations that states that no entity "damage, excavate, dig in or alter, or remove any heritage object from, a site that contains artifacts, features, materials or other physical evidence of human habitation or use before 1846" OR from "a site that contains artifacts, features, materials or other physical evidence of unknown origin"; I demand that you issue an immediate and binding Stop Work Order for Coastal GasLink.

Regards,
