Hi Gordon,

I thought I would quickly mention that on slide 7 of your presentation you have Premier Clark's name spelled with and "e".

Happens to us all and I figured you can't fix it if no one tells you.

Good presentation, I am glad your work is continuing.

Cheers,

Subject: FW: herbicide use on pipelines, surrey LNG meeting^{s.22}

Hi Kim,

In Surrey, those organizing against LNG development took specific aim at Spectra with respect to the use of herbicides, most notably Glyphosate (N-phosphono-methyl glycine) on the pipeline right-of-ways. Since that time^{s.22}
s.22 has sent me these two emails linked below.

Would you be able to forward this to someone in your organization so that I can, for my own edification, know what the current practice is with respect to the use of Glyphosate on pipeline right-of-ways that are constructed on behalf of your company.

I would greatly appreciate it.

Thanks,
Gordon

Glyphosate
Beyond Pesticides Rating: Toxic

Despite widespread use of the weed killer glyphosate, and the prevalent myth that it is harmless, this pesticide is tied to acute human health effects and linked to non-Hodgkin's lymphoma. It is found in two Monsanto products, available over the counter, RoundupTM and RodeoTM, making glyphosate one of the most widely used and well-known herbicides on the market. If there is one pesticide that represents the "fast-food," quick-fix generation, glyphosate would likely be it – the McPesticide of toxic chemicals.

General Use

Glyphosate (N-phosphono-methyl glycine), according to the Environmental Protection Agency's (EPA) most recent data on pesticide usage, was the seventh most widely used active ingredient in agriculture, with 34 to 38 million pounds used in 1997.[i] In 1995/96, glyphosate ranked as the second most used active ingredient in non-agricultural settings, with five to seven million pounds used in the home and garden and nine to twelve million pounds used in commercial settings.[ii] Glyphosate use is currently growing at a rate of about 20 percent per year, due in large part to the growing number of genetically engineered crops that are resistant to the herbicide.[iii] With this growth rate, it is estimated that as much as 100 million pounds of glyphosate was applied in 2000. Of course these numbers fail to reflect the poundage of inert ingredients in the formulations that are mixed with the glyphosate.

First registered for use in 1974, there are 63 glyphosate-containing pesticide formulations registered for use in the U.S. The isopropylamine salt of glyphosate, the active ingredient in 53 of these products, is used to kill a variety of broadleaf

weeds and grasses. The principal agricultural uses include corn, wheat, sorghum, citrus and stone fruits, potatoes, onions, asparagus, coffee, peanuts and pineapple.[iv] There are also a good number of non-food uses including ornamental, turf, forestry and rights-of-way.[v]

Some of the most widespread uses of glyphosate that have been attracting public attention include use in invasive weed management and home gardening. The increase of glyphosate use in these areas is directly tied to the larger problem of poor land management, including over grazing, over development, soil compaction and other stressors.

Glyphosate has replaced ecologically sound and sustainable cultural practices such as green-mulching, and preventive maintenance such as aeration and dethatching.

Mode of Action

Plants treated with glyphosate translocate the systemic herbicide to their roots, shoot regions and fruit, where it interferes with the plant's ability to form aromatic amino acids necessary for protein synthesis. Treated plants generally die in two to three days. Because plants absorb glyphosate it cannot be completely removed by washing or peeling produce or by milling, baking or brewing grains. It has been shown to persist in food products for up to two years.[vi]

Inert Ingredients

A letter published in the February 6, 1988 Lancet (page 299) cited a Japanese report of 56 cases of toxic exposure to Roundup™ between June, 1984 and March, 1986. The individuals had ingested the pesticide, and experienced a range of adverse effects to their respiratory, cardiovascular, and central nervous systems; nine patients died. An analysis of the findings identified one of the so-called "inert ingredients" (inerts) in the formulation, polyoxyethyleneamine (POEA), as the cause of harm. POEA is a surfactant, a chemical added to help glyphosate work its way into the plant tissue. Roundup™ contains 15% POEA.

All pesticide formulations are actually toxic soups, a mixture of the active ingredient (the registered pesticide) with a variety of other chemicals such as solvents, surfactants (like POEA), and emulsifiers – the inerts. Federal law classifies inerts as trade secrets and pesticide manufacturers are not required to list inert ingredients on the pesticide label. Inerts, which can make up to as much as 99% of a pesticide formulation, are often highly toxic chemicals that can be more hazardous than the active ingredient.

Inerts known to be included in glyphosate products include ammonium sulfate, benziothiazolone, 3-iodo-2-propynyl butylcarbamate (IPBC), isobutane, methyl pyrrolidinone, pelargonic acid, sodium sulfite, sorbic acid, and isopropylamine. All of these chemicals are associated with skin irritation, gastric and respiratory problems.[vii]

Acute Exposure

While EPA considers glyphosate to be "of relatively low oral and dermal acute toxicity," [viii] the agency does classify glyphosate in toxicity class II (class I chemicals are the most toxic in a scale from I-IV). Some glyphosate products are of higher acute toxicity, primarily due to eye and/or skin irritation.

The most recent data (1998) from California's Department of Pesticide Regulation finds that glyphosate ranks first among herbicides as the highest causes of pesticide-induced illness or injury to people in California.[ix] Beyond Pesticides' own pesticide incident reporting system has received numerous reports of people poisoned by exposure to glyphosate from around the country. These victims of pesticide exposure suffered from eye soreness, headaches, diarrhea, and other flu-like symptoms.

Symptoms following exposure to glyphosate formulations include:

swollen eyes, face and joints; facial numbness; burning and/or itching skin; blisters; rapid heart rate; elevated blood pressure; chest pains, congestion; coughing; headache; and nausea.[x]

In developmental toxicity studies using pregnant rats and rabbits, glyphosate caused treatment-related effects in high dose groups, including diarrhea, decreased body weight gain, nasal discharge and death.[xi]

Chronic Exposure

One reproductive study using rats found kidney effects in the high dose group while another study showed digestive effects and decreased body weight gain.[xii] A cancer study looking at rats found an increase in pancreas and liver tumors in males as well as an increase in thyroid cancer in females.[xiii]

A 1999 study, A Case-Control Study of Non-Hodgkin Lymphoma and Exposure to Pesticides, (American Cancer Society, 1999), found that people exposed to glyphosate are 2.7 times more likely to contract non-Hodgkin Lymphoma.

There has been controversy regarding whether glyphosate at high doses causes tumors of the thyroid and testes in rats. EPA has reported that technical glyphosate is contaminated with “less than 100 parts-per-billion” of N-nitroso-glyphosate (NNG), a by-product of synthesis. Many N-nitroso compounds are animal carcinogens. EPA is not, however, requiring further investigation of the toxicological effects of NNG, because it does not typically require data on N-nitroso contaminants present at levels of less than one part-per-million.

Environmental Effects

Much of the belief about glyphosate’s environmental safety is based on the expectation that residues will be “immobile in soil,” and therefore the chemical will not contaminate groundwater. EPA acknowledges that the material does have the potential to contaminate surface waters. If glyphosate reaches surface water, it is not broken down readily by water or sunlight.[xiv] The half-life of glyphosate in pond water ranges from 70 to 84 days.[xv]

Glyphosate is moderately persistent in soil, with an average half-life of 47 days, although there are studies reporting field half lives of up to 174 days.[xvi] Residues of glyphosate have been known to persist for months in anaerobic soils deficient in microorganisms. Glyphosate residues are difficult to detect in environmental samples and most laboratories are not able to perform this service because of the lack of generally available, economically feasible methodology.

Effects on Nontarget Animals

Glyphosate use directly impacts a variety of nontarget animals including insects, earthworms, and fish, and indirectly impacts birds and small mammals.[xvii] A study conducted by the International Organization for Biological Control found that exposure to Roundup™ killed over 50 percent of three species of beneficial insects – a parasitoid wasp, a lacewing and a ladybug.[xviii] Repeated applications of glyphosate significantly affected the growth and survival of earthworms.[xix] Studies have also shown that glyphosate, and in particular the inert ingredients in the formulation of Roundup™ are acutely toxic to fish.[xx]

Alternatives to Glyphosate – Integrated Weed Management (IWM)

A good IWM program combines monitoring, proper landscape design, mulching, mechanical and cultural methods, and includes the use of heat, herbicidal soaps, and corn gluten meal. Biological control of weeds, using beneficial insects or pathogens is also an excellent approach.

For home gardeners and farmers alike, the best way to manage weeds is to prevent them. Home gardeners should make sure that their seeds are not contaminated with weed seeds and that all organic matter has been properly composted. Topsoil should also come from a reliable source.

Mulching is a great way to control weeds. A mulch is any type of material that covers the ground and precludes unwanted plants from growing. Organic mulches can be worked into the soil at the end of the season, providing valuable organic material to your garden.

Hi Kim,

If possible I would like to have a quick call with respect to vegetation control on pipeline right-of-ways. This issue came up again in discussion this morning^{s.22}. While this issue is well outside my mandate, and I certainly don't speak for Spectra, I would appreciate the opportunity to educate myself through a discussion with you or someone in your organization who is sensitive to the issue.

Regards,
Gordon

Glyphosate

Beyond Pesticides Rating: Toxic

Despite widespread use of the weed killer glyphosate, and the prevalent myth that it is harmless, this pesticide is tied to acute human health effects and linked to non-Hodgkin's lymphoma. It is found in two Monsanto products, available over the counter, RoundupTM and RodeoTM, making glyphosate one of the most widely used and well-known herbicides on the market. If there is one pesticide that represents the "fast-food," quick-fix generation, glyphosate would likely be it – the McPesticide of toxic chemicals.

General Use

Glyphosate (N-phosphono-methyl glycine), according to the Environmental Protection Agency's (EPA) most recent data on pesticide usage, was the seventh most widely used active ingredient in agriculture, with 34 to 38 million pounds used in 1997.[i] In 1995/96, glyphosate ranked as the second most used active ingredient in non-agricultural settings, with five to seven million pounds used in the home and garden and nine to twelve million pounds used in commercial settings.[ii] Glyphosate use is currently growing at a rate of about 20 percent per year, due in large part to the growing number of genetically engineered crops that are resistant to the herbicide.[iii] With this growth rate, it is estimated that as much as

100 million pounds of glyphosate was applied in 2000. Of course these numbers fail to reflect the poundage of inert ingredients in the formulations that are mixed with the glyphosate.

First registered for use in 1974, there are 63 glyphosate-containing pesticide formulations registered for use in the U.S.

The isopropylamine salt of glyphosate, the active ingredient in 53 of these products, is used to kill a variety of broadleaf weeds and grasses. The principal agricultural uses include corn, wheat, sorghum, citrus and stone fruits, potatoes, onions, asparagus, coffee, peanuts and pineapple.[iv] There are also a good number of non-food uses including ornamental, turf, forestry and rights-of-way.[v]

Some of the most widespread uses of glyphosate that have been attracting public attention include use in invasive weed management and home gardening. The increase of glyphosate use in these areas is directly tied to the larger problem of poor land management, including over grazing, over development, soil compaction and other stressors. Glyphosate has replaced ecologically sound and sustainable cultural practices such as green-mulching, and preventive maintenance such as aeration and dethatching.

Mode of Action

Plants treated with glyphosate translocate the systemic herbicide to their roots, shoot regions and fruit, where it interferes with the plant's ability to form aromatic amino acids necessary for protein synthesis. Treated plants generally die in two to three days. Because plants absorb glyphosate it cannot be completely removed by washing or peeling produce or by milling, baking or brewing grains. It has been shown to persist in food products for up to two years.[vi]

Inert Ingredients

A letter published in the February 6, 1988 Lancet (page 299) cited a Japanese report of 56 cases of toxic exposure to RoundupTM between June, 1984 and March, 1986. The individuals had ingested the pesticide, and experienced a range of adverse effects to their respiratory, cardiovascular, and central nervous systems; nine patients died. An analysis of the findings identified one of the so-called "inert ingredients" (inerts) in the formulation, polyoxyethyleneamine (POEA), as the cause of harm. POEA is a surfactant, a chemical added to help glyphosate work its way into the plant tissue. RoundupTM contains 15% POEA.

All pesticide formulations are actually toxic soups, a mixture of the active ingredient (the registered pesticide) with a variety of other chemicals such as solvents, surfactants (like POEA), and emulsifiers – the inerts. Federal law classifies inerts as trade secrets and pesticide manufacturers are not required to list inert ingredients on the pesticide label. Inerts, which can make up to as much as 99% of a pesticide formulation, are often highly toxic chemicals that can be more hazardous than the active ingredient.

Inerts known to be included in glyphosate products include ammonium sulfate, benziothiazolone, 3-iodo-2-propynyl butylcarbamate (IPBC), isobutane, methyl pyrrolidinone, pelargonic acid, sodium sulfite, sorbic acid, and isopropylamine. All of these chemicals are associated with skin irritation, gastric and respiratory problems.[vii]

Acute Exposure

While EPA considers glyphosate to be "of relatively low oral and dermal acute toxicity," [viii] the agency does classify glyphosate in toxicity class II (class I chemicals are the most toxic in a scale from I-IV). Some glyphosate products are of higher acute toxicity, primarily due to eye and/or skin irritation.

The most recent data (1998) from California's Department of Pesticide Regulation finds that glyphosate ranks first among herbicides as the highest causes of pesticide-induced illness or injury to people in California.[ix] Beyond Pesticides' own pesticide incident reporting system has received numerous reports of people poisoned by exposure to glyphosate from around the country. These victims of pesticide exposure suffered from eye soreness, headaches, diarrhea, and other flu-like symptoms.

Symptoms following exposure to glyphosate formulations include:

swollen eyes, face and joints; facial numbness; burning and/or itching skin; blisters; rapid heart rate; elevated blood pressure; chest pains, congestion; coughing; headache; and nausea.[x]

In developmental toxicity studies using pregnant rats and rabbits, glyphosate caused treatment-related effects in high dose groups, including diarrhea, decreased body weight gain, nasal discharge and death.[xi]

Chronic Exposure

One reproductive study using rats found kidney effects in the high dose group while another study showed digestive effects and decreased body weight gain.[xii] A cancer study looking at rats found an increase in pancreas and liver tumors in males as well as an increase in thyroid cancer in females.[xiii]

A 1999 study, A Case-Control Study of Non-Hodgkin Lymphoma and Exposure to Pesticides, (American Cancer Society, 1999), found that people exposed to glyphosate are 2.7 times more likely to contract non-Hodgkin Lymphoma.

There has been controversy regarding whether glyphosate at high doses causes tumors of the thyroid and testes in rats. EPA has reported that technical glyphosate is contaminated with “less than 100 parts-per-billion” of N-nitroso-glyphosate (NNG), a by-product of synthesis. Many N-nitroso compounds are animal carcinogens. EPA is not, however, requiring further investigation of the toxicological effects of NNG, because it does not typically require data on N-nitroso contaminants present at levels of less than one part-per-million.

Environmental Effects

Much of the belief about glyphosate’s environmental safety is based on the expectation that residues will be “immobile in soil,” and therefore the chemical will not contaminate groundwater. EPA acknowledges that the material does have the potential to contaminate surface waters. If glyphosate reaches surface water, it is not broken down readily by water or sunlight.[xiv] The half-life of glyphosate in pond water ranges from 70 to 84 days.[xv]

Glyphosate is moderately persistent in soil, with an average half-life of 47 days, although there are studies reporting field half lives of up to 174 days.[xvi] Residues of glyphosate have been known to persist for months in anaerobic soils deficient in microorganisms. Glyphosate residues are difficult to detect in environmental samples and most laboratories are not able to perform this service because of the lack of generally available, economically feasible methodology.

Effects on Nontarget Animals

Glyphosate use directly impacts a variety of nontarget animals including insects, earthworms, and fish, and indirectly impacts birds and small mammals.[xvii] A study conducted by the International Organization for Biological Control found that exposure to Roundup™ killed over 50 percent of three species of beneficial insects – a parasitoid wasp, a lacewing and a ladybug.[xviii] Repeated applications of glyphosate significantly affected the growth and survival of earthworms.[xix] Studies have also shown that glyphosate, and in particular the inert ingredients in the formulation of Roundup™ are acutely toxic to fish.[xx]

Alternatives to Glyphosate – Integrated Weed Management (IWM)

A good IWM program combines monitoring, proper landscape design, mulching, mechanical and cultural methods, and includes the use of heat, herbicidal soaps, and corn gluten meal. Biological control of weeds, using beneficial insects or pathogens is also an excellent approach.

For home gardeners and farmers alike, the best way to manage weeds is to prevent them. Home gardeners should make sure that their seeds are not contaminated with weed seeds and that all organic matter has been properly composted. Topsoil should also come from a reliable source.

RE: Industrial users (like Pipelines)

The Committee heard presentations from three organizations representing industrial users of pesticides. They shared the perspective that pesticides play an important role in their work and should not be banned. The Integrated Vegetation Management Association (IVMA) of British Columbia represents the industrial users of herbicides in BC: forestry, highways and railways, electrical utilities, oil and gas utilities, noxious weed control, contractors and suppliers, nurseries and agriculture. It argued that application of herbicides is the only effective method to maintain industrial sites weed-free and safe. Mechanical treatments like hand-pulling and steaming do not eliminate deciduous vegetation or control the spread of some invasive weeds.

Therefore the IVMA urged the Committee to give full consideration to the ramifications new regulations related to pesticide use could have on the vegetation management industry and in particular expressed concern that the undefined term "cosmetic use" leads to the stigmatization of herbicides and is subjective. The Integrated Environmental Plant Management Association of Western Canada, which represents professional certified pesticide applicators, and the BC Business Council, representing 260 large/medium-sized enterprises, supported the use of pesticides under the existing guidelines of Health Canada's Pest Management Regulatory Agency and BC's Integrated Pest Management Act and regulations. They do not support further restrictions and believe that pesticides are necessary and safe tools for homeowners and companies.

Good morning Jim,

The projects in BidCentral that are privately funded are typically by-invitation only – meaning they are not available to view in our online playroom. We do have a few private projects that are available to view, but you are correct they are closed. That being said, I'm trying to create a function so we can isolate the public projects that are not duplicated on BC Bid. We receive a number of projects from various owners throughout the province that come directly to BidCentral, and are not on BC Bid. Currently, there is no way to isolate those specific projects as both are labeled as 'Public'. I'm hopefully this will still generate some projects to post to Buy BC LNG.

Cheers

H Jonathan,

Sorry I missed your call. When we last spoke you explained that the vast majority of the opportunities in BidCentral are public sector projects and that the bulk of the private sector projects are generally “closed” – i.e. they don’t normally get distributed to everyone; just to a short list of pre-qualified companies. You mentioned that you would check on the possibility of being able to reflect even the “closed” private sector opportunities. I wonder what you have determined regard those “closed” opportunities? Is it definite that the “closed” opportunities cannot be reflected on the LNG-Buy BC tool?

Thanks,
Jim

Subject: LNG Regional Energy Seminars - Phase 2 Dates

First, a big thank you to everyone that participated in Phase 1 of the Regional LNG Energy Seminars. The 8 events held from October 28 – February 4 brought over 9,000 participant from BC's communities to participate in various events. As you are aware, the LNG Regional Seminars - Phase 2 will continue in the Lower Mainland and Vancouver Island from March – May 2015. Please see both tentative and confirmed dates and locations below.

Final, confirmed dates will be emailed as soon as possible. For now, can you please hold the times marked below in your calendars. As you will notice, some seminars will be held in one location; others will be held at a local school during the day with the evening programming being held at a hotel/conference centre, similar format to Surrey.

Some general programming information:

- Times (tentative) for each Seminar will be as follows:

 - Day 1: 12:00pm – 7:15pm

 - Day 2: 9:00am – 3:00pm

- The Government Panel (5:15pm-6:15pm) and Proponent Panel (6:15pm-7:15pm) will most likely be on Day 1 of each Seminar.

- There will be a Ministry of Natural Gas Staff Forum on April 9 in Victoria that will coincide with the Victoria Seminar.

- Programs will be on the LNGinBC website (<http://engage.gov.bc.ca/lnginbc/>) two weeks prior to each event.

Date	Tentative/Confirmed	Location	Venue
March 30 – 31	Confirmed	Kelowna	Delta Grand Okanagan Resort and Conference Centre
April 9 – 10	Confirmed	Victoria	Victoria Conference Centre

April 21 – 22 OR April 23 – 24	Tentative	Vancouver	Day Location: Secondary School (TBC) Evening Location: Hotel (TBC)
May 4 – 5 OR May 5 – 6	Tentative	Courtenay	Day Location: Secondary School (TBC) Evening Location: Westerly Hotel and Convention Centre
May 13 – 14	Confirmed	Langley	Langley Events Centre
May 25 – 26	Confirmed	Richmond	Westin Richmond Hotel

Thank you.

Training and Responsible for Labour

Presentation Outline

LNG-BuyBC

- Busting some of the myths about LNG
- Information that businesses wanting to engage in LNG development should know
- A description of the LNG-Buy BC program and online tool. (How it works and what you need to do to benefit)
- A few examples of BC Business who have successfully engaged in LNG
- Where we go from here
- LNG in BC, BCs Competitive Advantage

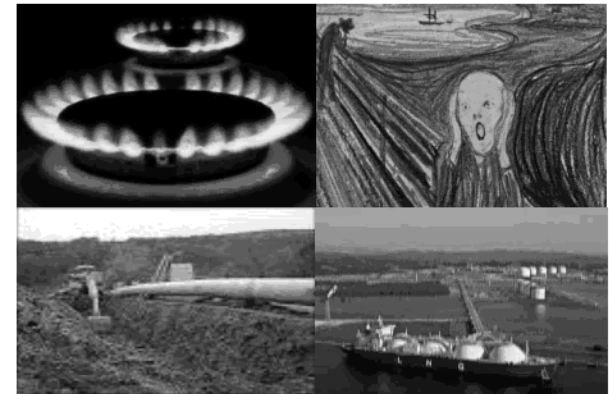

Myth Busting

LNG-BuyBC

- On the matter of LNG
 - What is it?
 - Facts on fracking (the business opportunity)
 - Facts on pipelines and trucking (the NEBC example)
 - Facts on storing (jobs on the ground)
 - Facts on shipping (the marine equation)
- On the matter of the “real” opportunity
 - Where is the business opportunity?
 - What is the process of getting engaged
 - Where is this all happening

Myth Busting

LNG-BuyBC

- Hydraulic Fracturing - Fracking

- Is the process of creating minute fractures in rock
- Practiced in BC since 1960s without a single incidence of groundwater contamination
- Typically there is between 2 – 3 km of impermeable earth between natural gas and water
- Natural gas wells are double-lined with steel and concrete to protect water supply
- It takes on average 17 million litres of non-potable water to fracture a well. Metro Vancouver consumes one billion litres of potable water per day. Gas extraction uses less than 0.5% percent of annual runoff
- Strict oversight on well drilling is undertaken by the Oil and Gas Commission with respect to seismic risk with the power to prohibit drilling.

Myth Busting

LNG-BuyBC

- Hydraulic Fracturing – Fracking Beyond Natural Gas
 - Has been successful in Canada in the petroleum industry since the 1950s
 - Is the source of many products that we routinely use in our daily lives such as Butane, Ethane and Propane
 - Sulphur is a principal by-product when fractured methane is purified prior to shipping.
 - Fracturing increasingly used in the development of geothermal energy sources both in new wells as well as in reactivation
 - Enhanced Geothermal Systems – developing new sources of geothermal energy use hydraulic fracturing and large quantities of water in the production of steam to run electrical turbines.

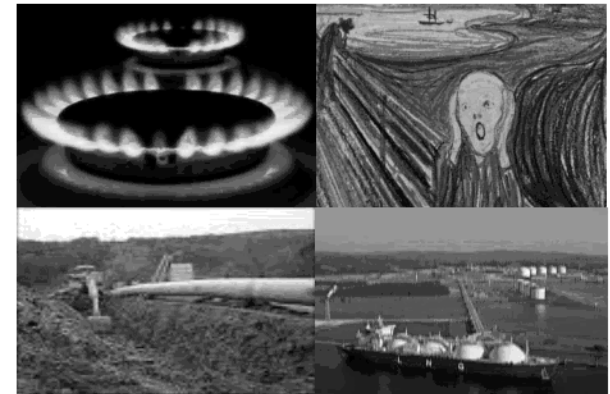

Myth Busting

LNG-BuyBC

- Pipelines

- The first pipelines were built in the 1950s
- In BC there are more than 40,000 km of pipelines safely transporting gas
- Natural gas is colourless, odourless, non-toxic and non-corrosive. 24 hr per day monitoring required by law
- In the unlikely event of a leak, gas will evaporate and break down to carbon dioxide and water.
- Natural gas pipelines are buried under ground not laid upon the surface
- Natural gas pipelines are not permitted to be used to carry oil

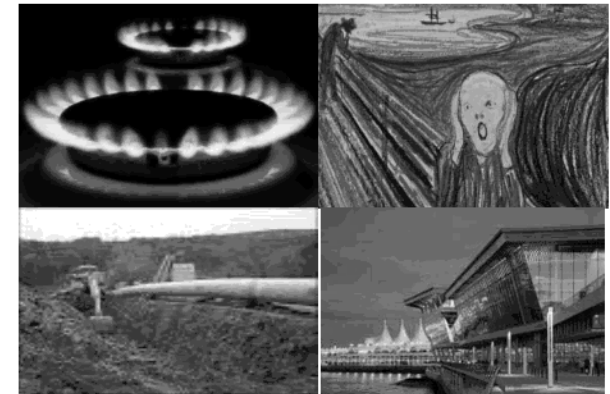

Myth Busting

LNG-BuyBC

- **LNG Storage**

- Natural gas is most safely stored in a cryogenic state (-160°)
- Tilbury Island (Delta) and Ladysmith (Vancouver Island) storage facilities safely operate as a peak shaving facility
- Will provide a safe and clean fuel for diesel conversions
- Will expand the opportunity for wider use of natural gas in domestic applications – i.e. diesel electric generation and the replacement of dependency on propane which is more volatile

- **On the matter of the “real” opportunity**

- LNG is a transition fuel – global benefit overall GHG
- Very significant revenue to the Province to support social spending programs – health – education – social support – infrastructure and debt reduction
- Diversifying markets away from single dependency on the US will also provide a much greater opportunity for domestic application

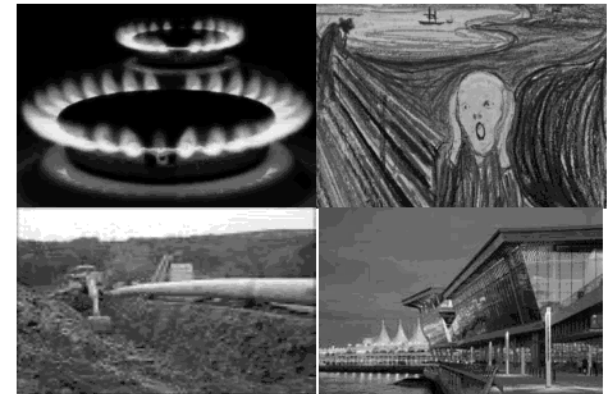

Myth Busting

LNG-BuyBC

- **LNG Shipping**

- Natural gas when reduced to -160° compresses into a liquid which is devoid of oxygen and cannot burn.
- Because it is compressed (not pressurized) a very large volume of gas can be carried in liquid state
- It is the safest method of transporting gas and has been successfully shipped since the 1950s without incidence.
- LNG carriers are specially built with exacting standards and are all double hulled
- Due to the relatively small amount of marine traffic in the waters around Prince Rupert, Kitimat and Howe Sound exclusion zones will not be required
- LNG tankers will have three escort tugs and will have a marine Pilot at the helm through their entire passage in Canadian navigable waters. This ensures maneuverability and safety
- Speeds will be carefully monitored and enforced by Transport Canada to mitigate wake issues.

Where is it all happening?

- ### Natural Gas Basins
- Western Canadian Basin
 - Liard Basin
 - Horn River Basin
 - Cordova Embayment
 - Montney Basin

Vast Resources & Upstream Development

LNG-BuyBC

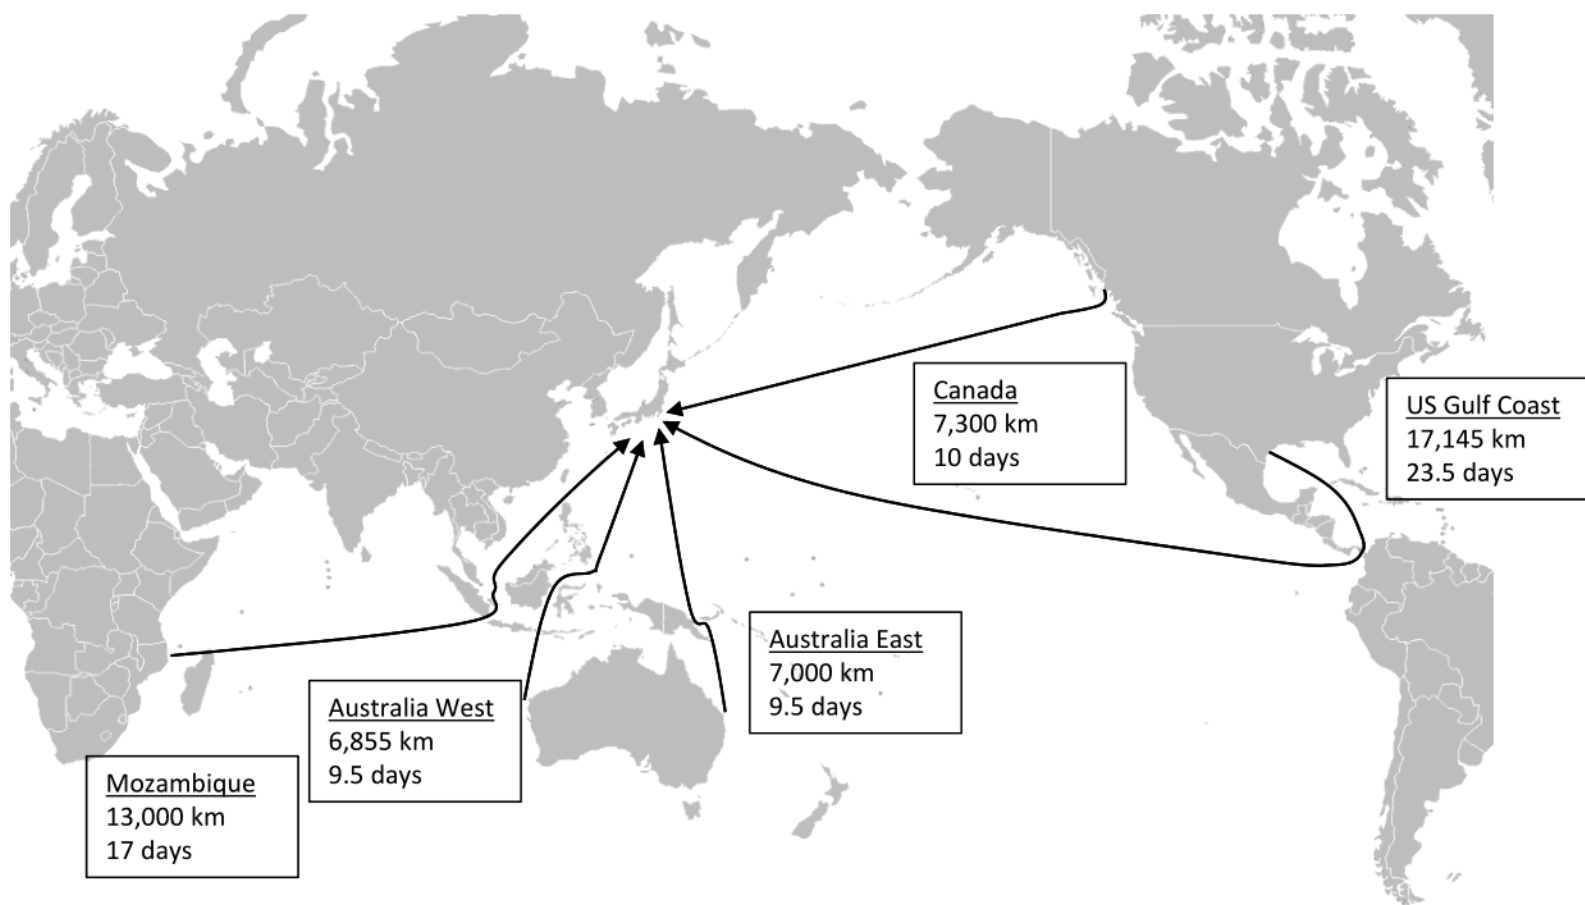

- Over **2,900 trillion cubic feet (tcf)** of natural gas from tight and shale
 - Montney has 1,965 tcf of gas in place
 - Horn River has 448 tcf of gas in place
- B.C.'s 2014 natural gas and petroleum rights sales totalled \$383 million; an increase of \$158 million – or 70% – over 2013.
- In 2014, 663 new natural gas wells drilled in B.C. – 16% increase over last year.
- The most active companies over the past two years have included Progress Energy, Shell and Nexen.

Short transport times to Asian markets

LNG-BuyBC

Source: IHS CERA

B.C.'s Competitive Advantages

LNG-BuyBC

- Short transport times to Asian markets
- Lower Operating Costs for Liquefaction (low ambient temperature)
- Vast Resources
- Stable Jurisdiction
- Labour Supply to Support LNG
- Strong Regulatory Regime*
- First Nations participation
- Competitive Fiscal Regime

Strong Regulatory Regime

LNG-BuyBC

- Modernized *Oil and Gas Activities Act*
- Effective single window regulator: B.C. Oil and Gas Commission
- Commitment to streamlined and efficient processes (i.e. Environmental Assessment Process and permitting) with defined timelines
- Canada and B.C. regulatory alignment and common priority in the development of the LNG sector

The Program

LNG-BuyBC

Announced by Premier Clarke during UBCM September 2013, the Program aims to:

- ❖ Generate broad awareness of LNG opportunities
- ❖ Promote ways for B.C. businesses to take advantage of LNG opportunities
- ❖ Connect LNG project proponents with B.C. businesses
- ❖ Ensure both B.C. businesses and proponents access the on-line registry
- ❖ Engage industry associations, economic development agencies and chambers of commerce
- ❖ Coordinate with organizations doing similar procurement work

- ▶ **Outreach** to proponents /industry/ communities to advocate and raise awareness
- ▶ **Workshops** to help B.C. businesses become suppliers to LNG projects
- ▶ **LNG conference/trade show** to showcase B.C. capabilities and drive business-to-business connections
- ▶ **On-line registry** to help connect LNG project proponents with B.C. businesses and market internationally to highlight B.C. goods and services

Advocate Outreach

LNG-BuyBC

Advocate for LNG-Buy BC appointed in October 2013 to:

- ▶ **Research best practices for for supporting local business participation in LNG/major projects**
- ▶ **Outreach to proponents/industry/communities to understand their needs**
- ▶ **Provide information to businesses wanting to engage in LNG development**
- ▶ **Build awareness of LNG-Buy BC program and online tool. (How it works and what companies need to do to benefit)**
- ▶ **Drive proponent and contractor utilization of the on-line tool launched in November 2014**
- ▶ **Work with companies to prepare them for pre-qualification and connection through the online tool and the LNG conference in October 2015**

Global Supply Chains

LNG-BuyBC

LNG proponents and their prime contractors (EPCM) are global organizations with vast supply chains of proven suppliers. The normal drive for these companies is to rationalize their supply base, not expand it.

- ▶ Same message heard from original equipment manufacturers and global prime contractors in other sectors (aerospace, shipbuilding & energy).
- ▶ Even with a clear obligation to utilize local companies, their position is to only use local companies that are both qualified and competitive.
- ▶ They do not believe it is their job to develop B.C. companies.

Information

Businesses Need to Know

LNG-BuyBC

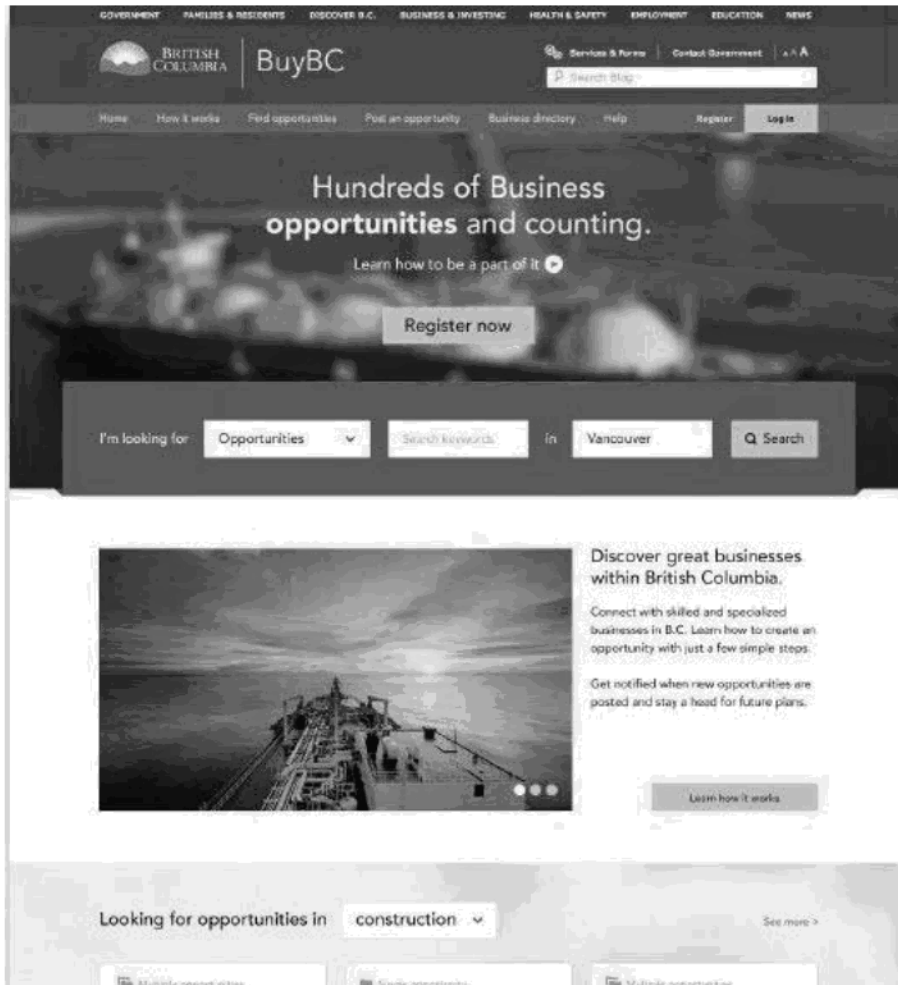

- The scale of LNG operations are enormous
- The need to pre-qualify
- Sufficient financing
- Proper health and safety standards
- Adequate insurance with proven track record of delivery
- The need for First Nations Partnership

On-line Tool

LNG-BuyBC

- **Launched in November 2014**
- **Registration is now open @ www.lngbuybc.ca**
- **The Tool will:**
 - Help make the connections your business needs
 - Generate exposure for your company
 - Promote your business capabilities
 - Help you find suppliers and business partners
 - Keep you informed of major project activity
- **Key Features include:**
 - Automatic opportunity matching
 - One-step expression of interest in a business or opportunity
 - Opportunity tracking and change notification
 - Searches tailored to where you do business

Local Success

LNG-BuyBC

- Inlet Express is a B.C. company based out of Prince Rupert with offices in Cow Bay
- Support local businesses and outlying communities with reliable water transport services
- Vessels and services have been operational since 2007
- Initially rejected as a supplier - demonstrated a “can do” attitude and capability
- Now is engaged as a qualified supplier with multiple LNG proponents

Local Success

LNG-BuyBC

AXYS TECHNOLOGIES

- B.C. company located in Victoria
- Global supplier of innovative environmental monitoring systems and technology tailored to industry needs
- Leverage current products, markets and strategic partnerships to bring a complete solution to meet market needs
- Exploring strategic partnerships in order to bring a complete solution to meet market needs

The WatchKeeper buoy in Strait of Gibraltar provides wave data to local maritime stakeholders

Local Success

LNG-BuyBC

ONE OF CANADA'S
FASTEST GROWING

 - Paramedic / Medic / Emergency Medical Responder
 - Occupational First Aid Level II
- Rapid growth in business responding to proponent's emphasis on safety

ENFORM

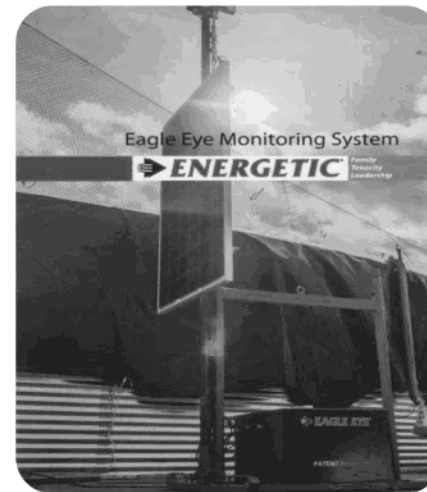

Local Success

LNG-BuyBC

► **ENERGETIC**

- In 1996 a small group of independent fluid hauling Owner Operators joined together and formed Energetic Services in Fort St. John.
- Working together with high standards and integrity, they stand out against the competition.
- Innovators in the industry
- Eagle Eye Monitoring

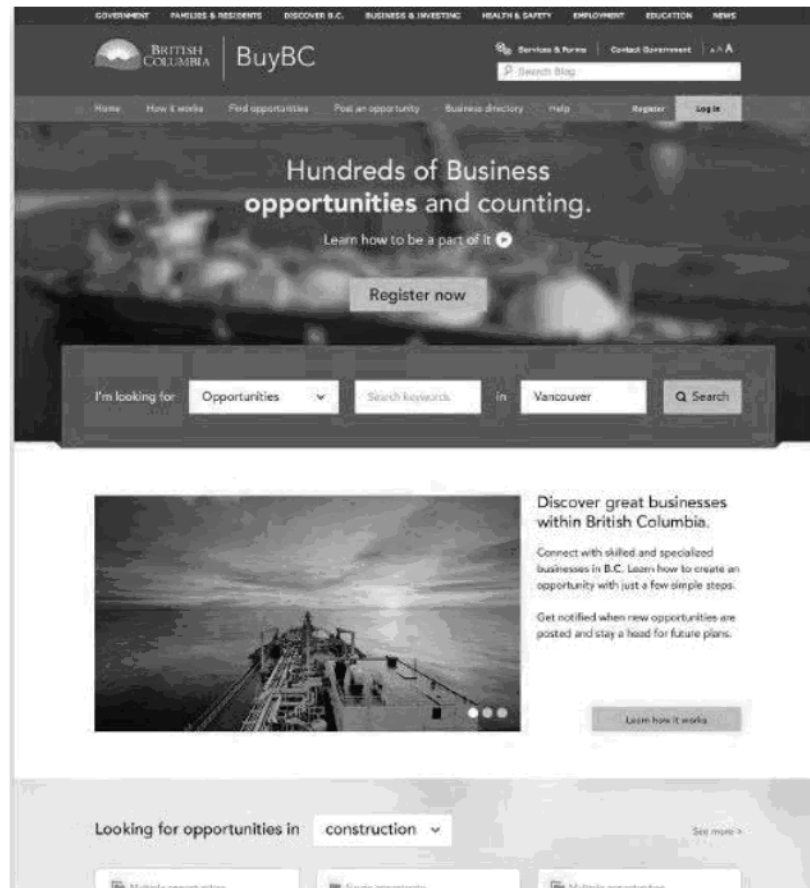

Where do we go from here?

LNG-BuyBC

- B.C. needs a mechanism for helping small and medium-sized companies enter and compete in global supply chains.
- The on-line tool can provide the starting point / minimum requirement for proponent access to further government support to meet procurement needs.
- Our immediate next step may be to focus on helping companies pre-qualify.
- Beyond pre-qualification, we are exploring how to provide B.C. companies with a full suite of supplier development support.

Connecting B.C. businesses
with LNG projects

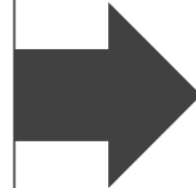

Best Practices of Supplier Development LNG-BuyBC

An effective supplier development program includes:

- ▶ Awareness
- ▶ Assessment
 - ▶ Training & Expert Support
 - ▶ Mentoring
 - ▶ Auditing

A program that addresses the full spectrum of supplier development needs will allow B.C. businesses to access the support they need, when they need it.

- Awareness and assessment should be our first priorities; they set the foundation and direction for all improvement efforts.
- Proven training methods and materials already exists which can be leveraged in B.C.
- Best practices can and should be drawn from a number of industrial sectors.
- Eventual integration of training into post-secondary institutions can help build an effective learning & support network across the province.

Get Connected & Stay Informed

LNG-BuyBC

- Get registered on the online tool www.lngbuybc.ca
- Watch for LNG-Buy BC activity as this industry moves toward their final investment decisions (FIDs)
- Look for supplier development initiatives to assist B.C. business to pre-qualify

DRIVING FORWARD

Today's BC Liberals will:

- Leverage the Federal Industrial Regional Benefits Programs to attract global aerospace and defence contractors to B.C. This would be assisted by an investment of \$5 million over five years to kick start the development of a unified B.C. aerospace cluster to attract investment and integrated contract sourcing from global firms.

Hi John,

When we last met at your West Vancouver constituency office you kindly offered to see if you could arrange for me to meet with a group of community leaders who routinely provided advise and feedback to you on important constituent matters. As the LNG-Buy BC Advocate I am meeting with many business in your riding who are interested in participating with the Woodfibre LNG project and feel that a meeting with this particular group of individuals would be most beneficial.

Please let me know the status of this invitation.

Many thanks,
Gordon Wilson

Safety: The overlap of the Sandia hazard zones associated with transiting LNG tankers onto the shorelines of Howe Sound causes many of us concern for our safety in the event of an accidental or terrorist-initiated attack on these tankers. The guidelines provided by SIGTTO, the LNG industry's own organization, suggest not putting LNG plants in narrow, inland waterways with dense local populations and significant commercial, recreational and ferry traffic. Why would that guideline not apply to Howe Sound?

SIGTTO recommends that you do not put LNG facilities on inland waterways where there is lots of local boating. He has paraphrased/misquoted the attached document to his convenience and if you read the document closely in terms of wind, wave and location its probably a great site.

There is a great deal of mis-quoting out of context when it comes to SIGTTO guidelines especially the section which suggests that a terminal establish an ignition exclusion zone (7.2.4) to control access by small craft. However, if the document is read in full the proposed terminals in BC (including Woodfibre) are well located in terms of wind, wave interaction and other aspects of the SIGTTO that describe an "ideally located terminal" if there is such a thing. See <http://www.scribd.com/doc/22492559/Site-Selection-Design-for-LNG-Ports-Jetties#scribd>

Dr. Finn does not s.22 to have a clear understanding of the role of SIGTTO nor the publications it produces. SIGTTO is non Governmental and produces technical documents that are for Guidance and Recommendation only and they contain what is considered best practice. As the documents are for guidance only and not codes and standards they cannot be rigidly enforced. SIGTTO acknowledges this and that the documents are written that way on purpose so that they cannot be seen to be at odds with the Statutory Requirements of a Government or Local Jurisdiction.

Marine: Where will these tankers be re-fuelled? Port Metro Vancouver prohibits ships of this size being refueled in the harbour anchorages. Do we face the prospect of large oil barges with 3-4,000 tons of bunker fuel being towed up the Sound for refueling?

This also came up last week in Squamish. There is no restriction on vessels in the size category of LNG carriers being bunkered in Burrard Inlet, Vancouver. Indeed we already regularly bunker larger cruise ships, container ships, tankers and Capesize bulk carriers (up to 200,000 tons DWT) in the inlet. The only limitation is draft under the keel and air draft to clear under Lions Gate Bridge). In case of necessity, the regulations were amended a couple of years ago to permit bunkering in English Bay subject to favourable weather conditions. There will be no bunkering in Howe Sound.

Hi Gordon

Thank you very much for your confirmation.

s.22 so we are tag-teaming on the final details for the meeting on
Wed.

As suggested by Katherine Laurence I have sent a note directly to Captain Brown to see if he too is available.

Perhaps you can also mention to him the importance of this last public event in the comment period.

Direct confirmation to Christina about the Wed arrangements makes sense so she can clarify any of the logistics for you.

Thank you again
Nicola

To: Sturdy, Jordan; Wilson, Gordon JTST:EX; Laurence, Katherine GCPE:EX
Cc: Bentley, Nicola LASS:EX
Subject: Format of Squamish Community Information Night - Action required by tomorrow

Christina Moore, Squamish District Communications Manager, has outlined the format for our consideration:

1. Event Moderated by Modus
2. Expecting 100-150 people
3. Introduction and address from Mayor Heintzman
4. No collective Q&A
5. Break out session with issue based tables: The Community Committee, through discussions and presentation over the past year, has identified key issue that need to be addressed. There will be a table for each of these issues and the public will have 2-3 chances to move around the tables. Kind of like speed dating but moving from issue to issue.
6. Wood Fibre and Fortis will have "INFORMATION" tables but will not be part of the circuit.
- 7. It was suggested that Gordon Wilson and Captain Brown could also have an INFORMATION table with their laptop presentations available.**
- 8. While this table would not be part of the circulation, they would be formally introduced and referenced.**

Christina has also forwarded the Questionnaire (see attachment) they used to identify the issues, which should give us some idea of what the tables will be addressing, as per her correspondence below:

As discussed, attached please find the full list of concerns/benefits that were identified in our Questionnaire. These will form the basis of our discussion on Wed night, however, will be grouped together into higher level topics. I can forward those topics to you once I've received them from our facilitator.

Here is a link to our web page describing the overall consultation: www.squamish.ca/LNG

Direct link to the Questionnaire: <http://fluidsurveys.com/s/SquamishLNG/>

Don't hesitate to let me know if you need any further information.

*Thanks!
Christina*

I told Christina that we would review this opportunity and get back to her by tomorrow to let her know how we would like to participate.

Should I forward this information to Resource Works as well?

Thanks.

Hi Vera,

It was a pleasure speaking to you just now.

As requested, please see below the email that went out yesterday morning to our database of approximately 2300 local contacts. We were able to amend the wording to that suggested by Jim. The workshop will also be mentioned in our upcoming newsletter, that should go out next Tuesday. We will also put it on our What's Happening page on our website.

Please note that we will be changing the venue due to the high degree of interest as our boardroom can only accommodate around 35 people. We currently have 41 registered, and expect the number to exceed 50.

Please let me know if you have any further questions.

Best.

Event hosted by:**Local business can access the LNG projects supply chain**

Wednesday, April 30th
8:30 am - 12:00 pm

Background:

Among the many proposed major industrial projects planned throughout B.C. the \$50 billion investment in LNG projects represents a significant opportunity for economic development and job creation. Millions of dollars of goods and services are needed to support these projects. B.C. contractors and suppliers can take advantage of this economic boom. Is your business ready?

You Should Attend if:

- You are a business owner who is interested in learning about the proposed major LNG projects.
- You want to know the procurement process for these projects.
- You want to know what supplies and services will be needed.
- You want to know how your business can take advantage of these major projects and become part of the local supply chain of commercial goods and services.
- You want to find out who can help you get prepared.

Agenda Topics

- Major LNG projects in BC
- Procurement process
- Getting on the supplier list
- Understanding the bid process

Hi Vera,
It was a pleasure speaking to you just now.
As requested, please see below the email that went out yesterday morning to our database of approximately 2300 local contacts. We were able to amend the wording to that suggested by Jim. The workshop will also be mentioned in our upcoming newsletter, that should go out next Tuesday. We will also put it on our What's Happening page on our website.

Please note that we will be changing the venue due to the high degree of interest as our boardroom can only accommodate around 35 people. We currently have 41 registered, and expect the number to exceed 50.

Please let me know if you have any further questions.

Best.

Richard

Subject: Squamish community engagement

FYI... Fazil
FOR IMMEDIATE RELEASE

District of Squamish invites community to Speak; Listen; Learn on Woodfibre LNG and Fortis Pipeline projects

SQUAMISH, BC – The District of Squamish has announced a focused community engagement process to inform Council of the community's opinions and values on the Woodfibre Liquefied Natural Gas and Fortis Pipeline projects. The engagement will run March 9 to 23, 2015 and will include a confidential online questionnaire, an online PlaceSpeak discussion forum, and a public dialogue meeting on March 18. Links and information are available at www.squamish.ca/LNG

"Council needs the community to provide input to us on these projects, and to do so over the next two weeks, feeding into Council discussions before we submit our official response to the Environmental Assessment Office," says District of Squamish Mayor Patricia Heintzman. "I cannot stress enough *how* important the public's input is to our due diligence process on these projects."

Council's official submission will be provided to the Environmental Assessment Office (EAO) by the end of April. Input gained on both critical issues and community values will complement the District's Community Committee work on the technical aspects of the project. The consultation will focus in on Squamish community members including those who live, work or own businesses here.

"We know that everyone has an opinion and we want to give everyone a chance to be heard," continues Heintzman. "The community is being asked to do three things: Speak; Listen; and Learn."

There are 3 ways to **SPEAK** and provide input between March 9th and 23rd. The first way is a private questionnaire. The second is through an online PlaceSpeak discussion, asking for comments on some critical questions. The third will be through a dialogue-based community meeting, to be held Wednesday, March 18th from 6:30 p.m. to 9:30 p.m. at the Sea to Sky Hotel.

Besides speaking out, community members are also asked to **LISTEN** when taking part. "We ask people to remember that we are all friends and neighbours who *all* want the best for Squamish, and so we need to listen to one another respectfully," stresses Heintzman.

The final aspect is the need to **LEARN** from these discussions. "What can we learn about the issues, the options, our values and what success looks like? How can we help ensure the best possible outcome for Squamish?" Heintzman continues.

Community engagement expert Modus Planning Design & Engagement Inc. is supporting this consultation through the design and execution of the program to ensure that the various forums deliver high quality input to the District while allowing for a robust but civil exchange of views.

The costs of the engagement program will be billed back to the project proponents by the District. This is common practice when a municipality conducts consultation on behalf of a proponent's project to ensure that taxpayers are not required to fund such efforts. The consultation is being wholly directed by the District to meet the needs of Council through engagement of the community.

For more information and to get involved, visit www.squamish.ca/LNG

Residents outside Squamish boundaries with interests in this topic are encouraged to submit their comments directly to the Environmental Assessment Office, or to their own Councils or District of Squamish Council at council@squamish.ca.

Bowen Island Plan

- 1) This afternoon there will be 2 presentations to Bowen Island Council:
 - a. Gordon Wilson, LNG Buy – BC Advocate for the Province of British Columbia – broad presentation on LNG and the opportunities that could accompany the LNG industry.
 - b. Stephen Brown, President of the Chamber of Shipping of British Columbia – a discussion on the evolution of the LNG shipping over the past 50 years and how established and additional new protocols will be applied to ensure the safety of LNG carriers in the coastal water of British Columbia (presentation attached).

NOTE: both Stephen Brown and Gordon Wilson are aware of previous presentations made to Bowen Island Council and will be able to counter misinformation that has been previously provided.
- 2) Barinder Rasode of Resource Works is planning attending the Council meeting this afternoon, and will be distributing their LNG Citizens Guide as well as their Our Sea to Sky documentation.
- 3) This evening there is an event planned by My Sea to Sky in Bowen Island at 7:30pm at Collins Hall, Barinder Rasode and several supporters of Resource Works plan to attend to share alternate views.

- 4) Resource Works is planning for their own presentation to Bowen Island later in the month (date not confirmed yet, likely end of March).
- 5) If required Gordon Wilson and Stephen Brown could return to Bowen Island for a larger community meeting. To be discussed after today's presentation.

NOTE: Katherine has shared been keeping Nicola Bentley from MLA Sturdy's Constituency Office in the loop on presentations and plans and will continue to do so moving forward.

Hope that helps!

Presentation Outline

Bowen Island Presentation

LNG-BuyBC

- Busting some of the myths about LNG
- Information that is relevant to local stakeholders and community business interests
- A brief description of the LNG-Buy BC program and online tool.
- Time permitting:
- A few examples of BC Business who have successfully engaged in LNG

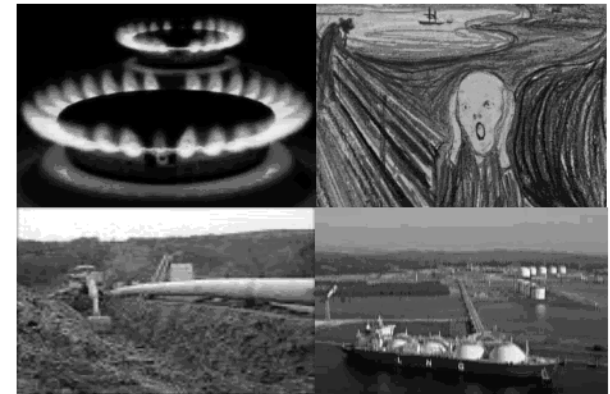

Myth Busting

LNG-BuyBC

- On the matter of LNG

- What is it?
- Facts on fracking (the business opportunity)
- Facts on pipelines and trucking
- Facts on storing (jobs on the ground)
- Facts on shipping (the marine equation)

- On the matter of the “real” opportunity

- Where is the real opportunity?
- What is the benefit to local business?
- Why is this important for Bowen Island?

Myth Busting

LNG-BuyBC

- Hydraulic Fracturing - Fracking

- Is the process of creating minute fractures in rock
- Practiced in BC since 1960s without a single incidence of groundwater contamination
- Typically there is between 2 – 3 km of impermeable earth between natural gas and water
- Natural gas wells are double-lined with steel and concrete to protect water supply
- It takes on average 17 million litres of non-potable water to fracture a well. Metro Vancouver consumes one billion litres of potable water per day. Gas extraction uses less than 0.5% percent of annual runoff
- Strict oversight on well drilling is undertaken by the Oil and Gas Commission with respect to seismic risk with the power to prohibit drilling.

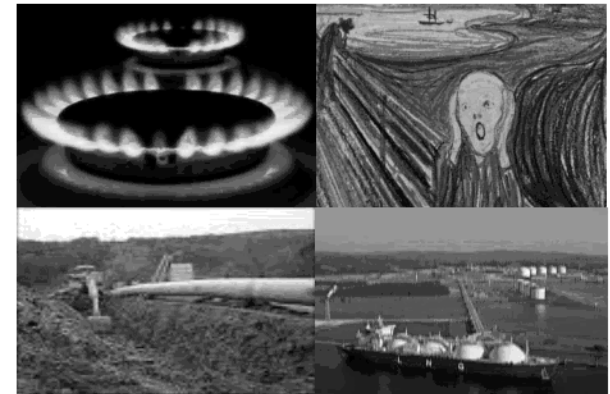

Myth Busting

LNG-BuyBC

- Pipelines

- The first pipelines were built in the 1950s
- In BC there are more than 40,000 km of pipelines safely transporting gas
- Natural gas is colourless, odourless, non-toxic and non-corrosive. 24 hr per day monitoring required by law
- In the unlikely event of a leak, gas will evaporate and break down to carbon dioxide and water.
- Natural gas pipelines are buried under ground not laid upon the surface
- Natural gas pipelines are not permitted to be used to carry oil

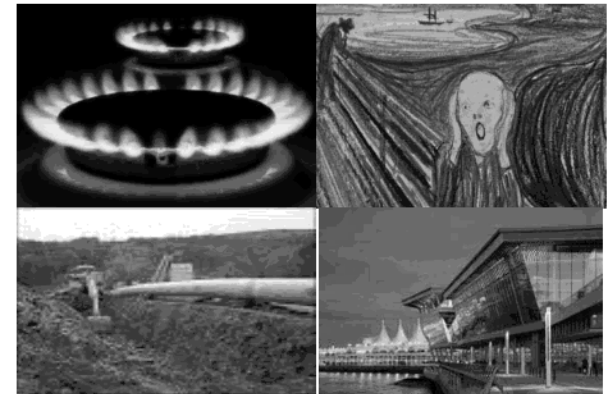

Myth Busting

LNG-BuyBC

- **LNG Storage**

- Natural gas is most safely stored in a cryogenic state
- Tilbury Island and Ladysmith storage facilities safely operate
- Will provide a safe and clean fuel for diesel conversions
- Will expand the opportunity for wider use of natural gas in domestic applications – ie diesel electric generation and the replacement of dependency on propane which is more volatile

- **On the matter of the “real” opportunity**

- LNG is a transition fuel
- Diversifying markets away from single dependency on the US will also provide a much greater opportunity for domestic application
- Communities like Bowen currently dependent upon electric and propane sources may benefit from clean natural gas

Local Success

LNG-BuyBC

AXYS TECHNOLOGIES

- B.C. company located in Victoria
- Global supplier of innovative environmental monitoring systems and technology tailored to industry needs
- Leverage current products, markets and strategic partnerships to bring a complete solution to marine safety
- Working with other BC companies such as Xanatos Marine in North Vancouver to become to marine navigation what NavCan is to aviation

The WatchKeeper buoy in Strait of Gibraltar provides wave data to local maritime stakeholders

I have arranged Alison Morse to pick you up from the 2:25pm ferry.

Alison' cell # is^{s.22}

She will meet you at the ferry shelter (the white metal one) on the left side when you walk off on Bowen Island. A staff person from Bowen Island will take you back to the ferry after your presentation. Alison won't be able to leave as she is a Councillor.

The ferry leaves at 2:25 and you have to have your tickets at least 10 minutes before. The ferry loads from the lower deck so when you get to the terminal walk to the end of the overhead walkway and take the stairs down to the car level.

Please don't hesitate to contact me if there is anything else that you need, and I look forward to hearing how your presentations go.

All the best,

Hi Gordon/Stephen,

Do either of you have a presentation that you would like to supply in advance to Bowen Island?

Thanks

Katherine

Hi Katherine,

Yes I can do those times. Hopefully there will be a full house. We will be off Bowen on the 6:00 pm ferry.

Hi Stephen/Gordon,

Bowen Island has gotten back to me with your presentation times for Monday today, and they are a little later than I had expected. Can you please let me know if there are any issues with these times?

Captain Stephen Brown- 4:40 pm (15 minutes)

Gordon Wilson- 4:55 pm (15 minutes)

Thanks

Katherine

Great – I have confirmed with Alison and Casey your availabilities for March 9th. The 3:30pm time was approximate. They are working on their council agenda for that day – and I will confirm a more exact time with you once I have it.

And the address is as follows:

Bowen Island Municipal Hall
981 Artisan Lane
Bowen Island, BC

My thoughts are that we try to do both if that's an option. Do a short presentation on March 9th as a courtesy to Council and a longer presentation to the public at a later date if that works for you Stephen. For me it will be a long journey for a 30 minute meeting but I think this is important to do. I will likely make a full day of it and drive, giving me the opportunity to set up meetings along the Sunshine Coast on the way down.

Hi Stephen/Gordon,

I spoke with Allison this morning and because of this other meeting – they need to condense things on the 9th. So they are asking if we are interested in having you do a 15 minute presentation each for a total of about 30 minutes. The timing would be around 3:30pm – 4:00pm or thereabouts. The other option would be a public meeting in Council Chambers for about 50 -60 people on a different day, where we could have more time, but there wouldn't be the guarantee that councillors would attend, and it would just be a public presentation.

What are your thoughts?

Hi Alison,

I just wanted to confirm with you that Gordon Wilson would be pleased to present to Council on March 9th between the hours of 3-5pm, given that this date also works for Stephen Brown I think we should proceed with confirming it. Are you able to share the council agenda once confirmed? Or you like me to work through staff for this?

Thank you for the opportunity.

All the best,

Good morning Alison

Well noted and I will keep March 9 open in the hope that we can arrange a presentation.

It's always unfortunate when there is a rush to reach a conclusion on the basis of hearing one side of the story but now we have to ensure that Bowen Islanders hear the other side.

Keep up the good work

Stephen

Stephen we heard this morning that there is a 15 day extension so the pressure is off to try and get something organized for next week. As well the meeting that we (BIM) were already planning for the 2nd has been cancelled as there would only be 4 of us present.

s.22

If it were to be combined with a council meeting the best time would be March 9. At this point we do not have any meetings planned other than the 9th and 23rd. There will be one extra meeting in March that is not set yet. Eoin Finn presented today, our council meetings are videoed so you could have a look at what he presented go to www.bimbc.ca scroll down to the bottom of the home page and you will find a link to the council meeting videos. I had hoped to be able to refer you to just his power point but that is not posted yet. You will see it on the video. Eoin Finn is also presenting at a community information meeting on Bowen sponsored by a local group in the evening of March 9.

I called Katherine Lawrence this afternoon after the meeting and suggested the ninth might be a good time 3-5 in the afternoon as a committee of the whole, the other option would be a community information meeting. The advantage of a council related meeting is that it is videoed and people can watch if they cannot attend. I think she will connect with Jordan Sturdy's assistant who was there this morning and Lorne Mayencourt. s.22

s.22

Thanks for your help.

Hi Gordon/Stephen,

How are you planning on traveling to Bowen Island? I can arrange a pick up from the ferry for you if you are just planning on walking on.

I have had some advice that the 3:30pm Ferry is very busy with high school students coming home and that the 2:30pm might be better.

Please let me know if I can assist with your travel.

Thanks

My thoughts are that we try to do both if that's an option. Do a short presentation on March 9th as a courtesy to Council and a longer presentation to the public at a later date if that works for you Stephen. For me it will be a long journey for a 30 minute meeting but I think this is important to do. I will likely make a full day of it and drive, giving me the opportunity to set up meetings along the Sunshine Coast on the way down.

Hi Stephen/Gordon,

I spoke with Allison this morning and because of this other meeting – they need to condense things on the 9th. So they are asking if we are interested in having you do a 15 minute presentation each for a total of about 30 minutes. The timing would be around 3:30pm – 4:00pm or thereabouts. The other option would be a public meeting in Council Chambers for about 50 -60 people on a different day, where we could have more time, but there wouldn't be the guarantee that councillors would attend, and it would just be a public presentation.

What are your thoughts?

Stephen we heard this morning that there is a 15 day extension so the pressure is off to try and get something organized for next week. As well the meeting that we (BIM) were already planning for the 2nd has been cancelled as there would only be 4 of us present.

s.22

If it were to be combined with a council meeting the best time would be March 9. At this point we do not have any meetings planned other than the 9th and 23rd. There will be one extra meeting in March that is not set yet.

Eoin Finn presented today, our council meetings are videoed so you could have a look at what he presented go to

www.bimbc.ca scroll down to the bottom of the home page and you will find a link to the council meeting videos. I had

hoped to be able to refer you to just his power point but that is not posted yet. You will see it on the video. Eoin Finn is also presenting at a community information meeting on Bowen sponsored by a local group in the evening of March 9. I called Katherine Lawrence this afternoon after the meeting and suggested the ninth might be a good time 3-5 in the afternoon as a committee of the whole, the other option would be a community information meeting. The advantage of a council related meeting is that it is videoed and people can watch if they cannot attend. I think she will connect with Jordan Sturdy's assistant who was there this morning and Lorne Mayencourt. s.22

Happy New year Gordon.

We last met when you gave a presentation to KEDA, Kitimat Economic Development Assoc. last year. We along with the Kitimat Chamber of Commerce have been asked by LNG Canada to put together an evening dealing with Challenges and Opportunities created by the LNG Boom. Terrace and Haisla are feeling the same pressures as Kitimat, and will be included.

Would you be available to be a presenter on the panel, a Q&A, and available later for the shy ones?

I'm guessing you've been involved in a few similar presentations, and might be able to help us from reinventing the wheel. Wouldn't mind having a chat if you are available.

I've got a few things going on this week, but can likely find a time we are both available, or one of the other directors.

We should have our new website up and running by the end of the week, our current one is terrible.

Best Regards

Ron Burnett

Subject: Find Your Fit in Moricetown Today

Hi all. The "FYF Team" is amazing – over 130 kids from Hazelton and Moricetown through the program today – more than they had planned and the event was very well received in the community. No security concerns at all. Moricetown's call to prepare a smaller lunch and light dinner was brilliant – they had adults and kids together for most of the day and early evening. The dinner was attended by about 30-40 people; much smaller group than anticipated and yet it offered a less formal presentation – no power point – no mikes – just talk. MLA Bernier and Gordon Gibson played back and forth in a very relaxed presentation – questions were positive "why haven't you been here to tell us this before?" Questions on a number of the messages relayed -- good discussion in the group setting and Gordon and Mike took questions separately. They want more information in the community now that the politics appear to be settling and they are ready for real conversations. This combined with the day's FYF event and knowledge that skills and training are about to start in the community is very positive. We have lots of work to do but today's was very encouraging. Well done team!!! Thanks for shifting plans to put the event in the community. You rock!!!

**Subject:** Tomorrow - Moricetown

Hi Gordon/Mike,

I just wanted to touch base with you both quickly before the event in Moricetown tomorrow.

As you know Katie Scott from MARR will be on the ground to assist you as needed. **Katie's cell # is 250 812-2570 should you need it.**

I have still not heard back from the Moricetown Band as to who the event Emcee will be. Katie will assist tomorrow if figuring this out on-site. They will have a screen and projector for your presentation and a reminder that you are not doing a formal Q and A. Rather you will have a chance to informally speak with participants following your presentation. Find Your Fit will be set up at 1pm tomorrow and as you know your presentation is scheduled over a dinner which starts at 5pm. If possible I think it would be helpful for you to be on-site earlier than 5pm if there are questions from community members around LNG prior to your presentation. Katie will be there early tomorrow morning and can advise you on how the crowd is looking ext.

I hope that all goes well – please don't hesitate to contact me if there is anything else you need.

All the best,

**Katherine Laurence**

Hi Gordon,

I have talked with Peter and he knows you are coming. Eva Spencer will be the person to ask for on the ground when you arrive on Monday afternoon. She is the person that sets up all the tables and stuff. I have requested you have a table close to BG/Spectra, but it's sort of a first come first serve situation. However they will do their best. I will also call Irene Mills and make sure she knows you are coming and see if she can help hold a spot for you.

Vera – Peter mentioned he will just email the \$200 invoice to me. I will forward it to you when I receive it.

Thanks

Hi Katherine

If you wouldn't mind letting either Peter or Lauren know that I will be there on Monday afternoon and all day Tuesday that would be great. A small spot near the BG\Spectra table would be good. I have asked Vera to look into the \$200 fee.

I have also changed my travel arrangements to fly out of PR late Tuesday to get the 7:20 am flight to Smithers on Wednesday. It is the same flight Mike is on so we can pool a rental and arrive together. A lot less can go wrong this way.

Cheers

Gordon

# Kamloops Presentation

February 3<sup>rd</sup> 2015

## Gordon Wilson LNG-Buy BC Advocate

Ministry of Jobs, Tourism & Skills Training and  
Responsible for Labour

BRITISH  
COLUMBIA

BRITISH  
COLUMBIA

LNG-Buy BC

# Presentation Outline

Prince Rupert and District Chamber of Commerce

- Busting some of the myths about LNG
- Information that businesses wanting to engage in LNG development should know
- A description of the LNG-Buy BC program and online tool. (How it works and what you need to do to benefit)
- A few examples of BC Business who have successfully engaged in LNG
- Where we go from here

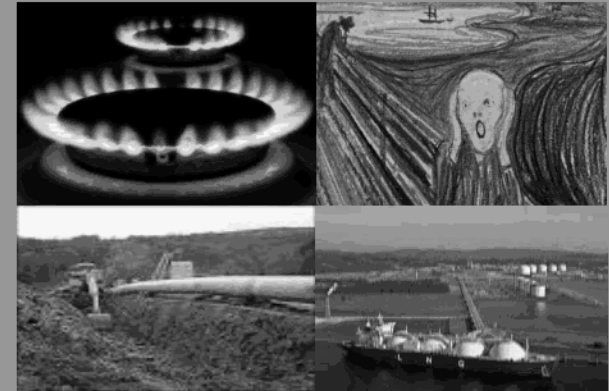

BRITISH  
COLUMBIA

2

# Myth Busting

- On the matter of LNG

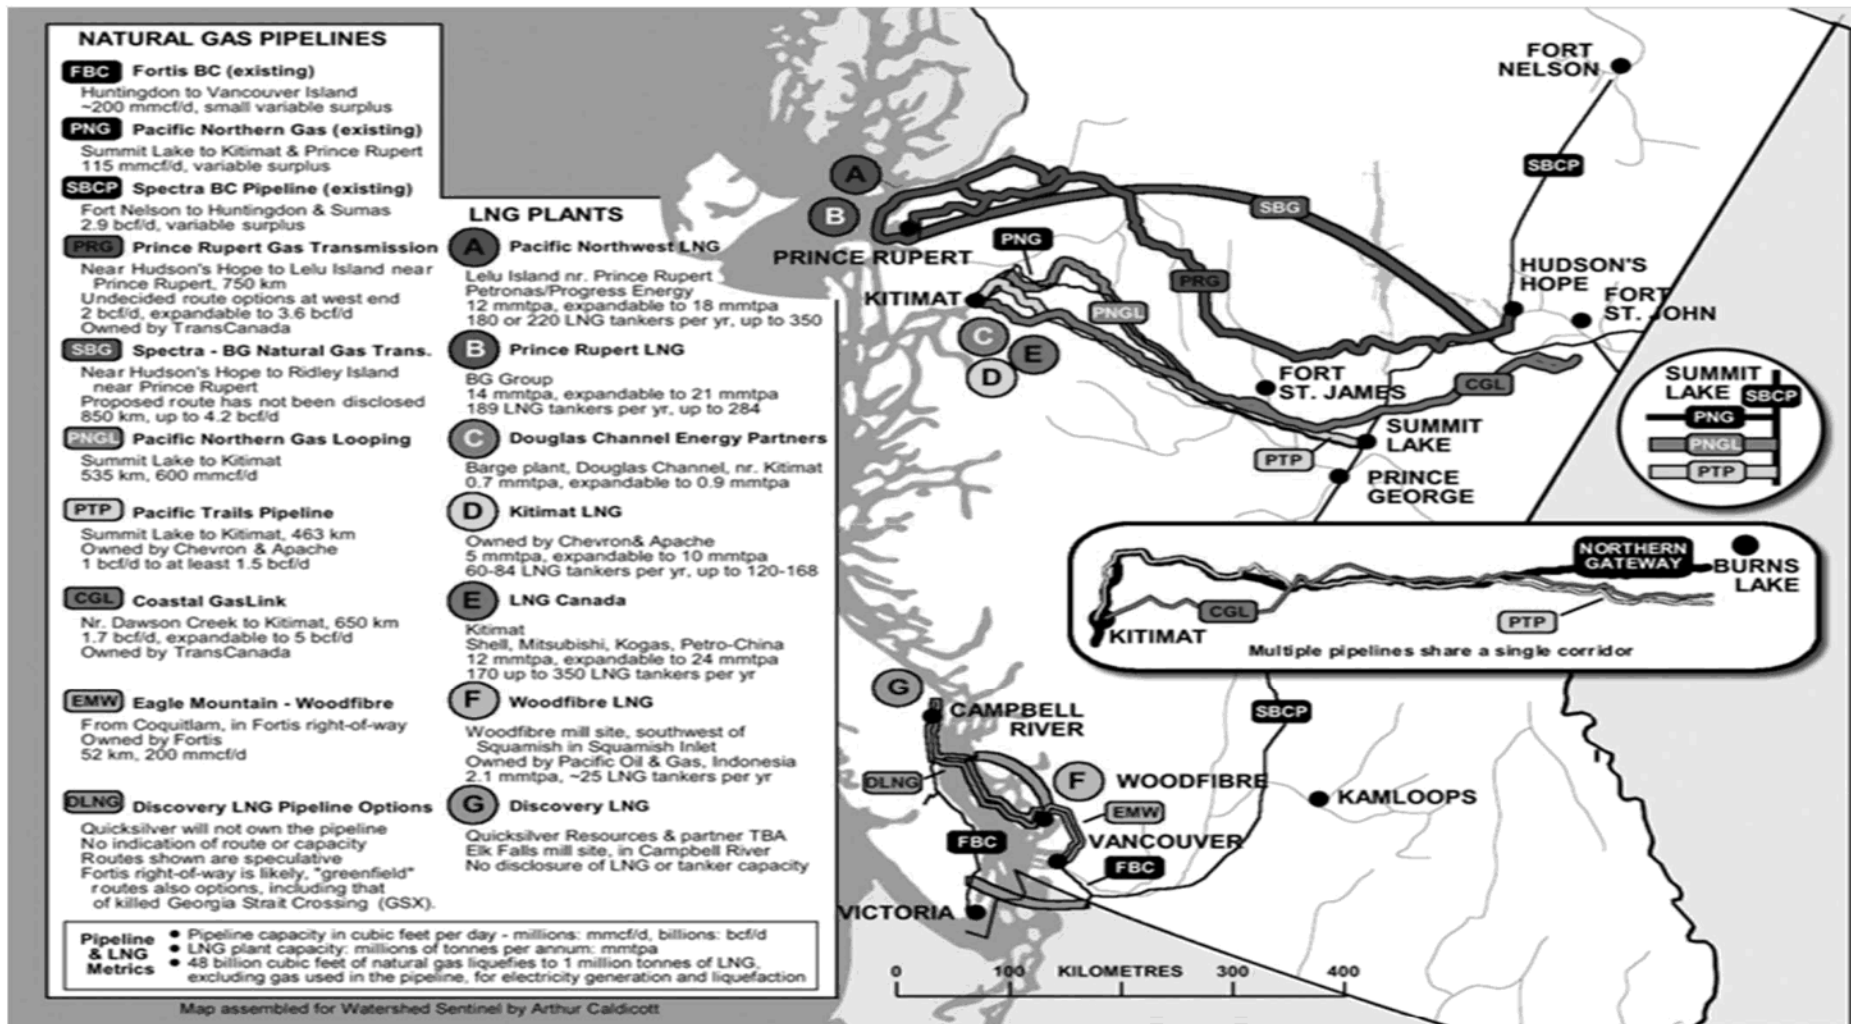

- What is it?
- Facts on fracking (the business opportunity)
- Facts on pipelines and trucking (the NEBC example)
- Facts on storing (jobs on the ground)
- Facts on shipping (the marine equation)

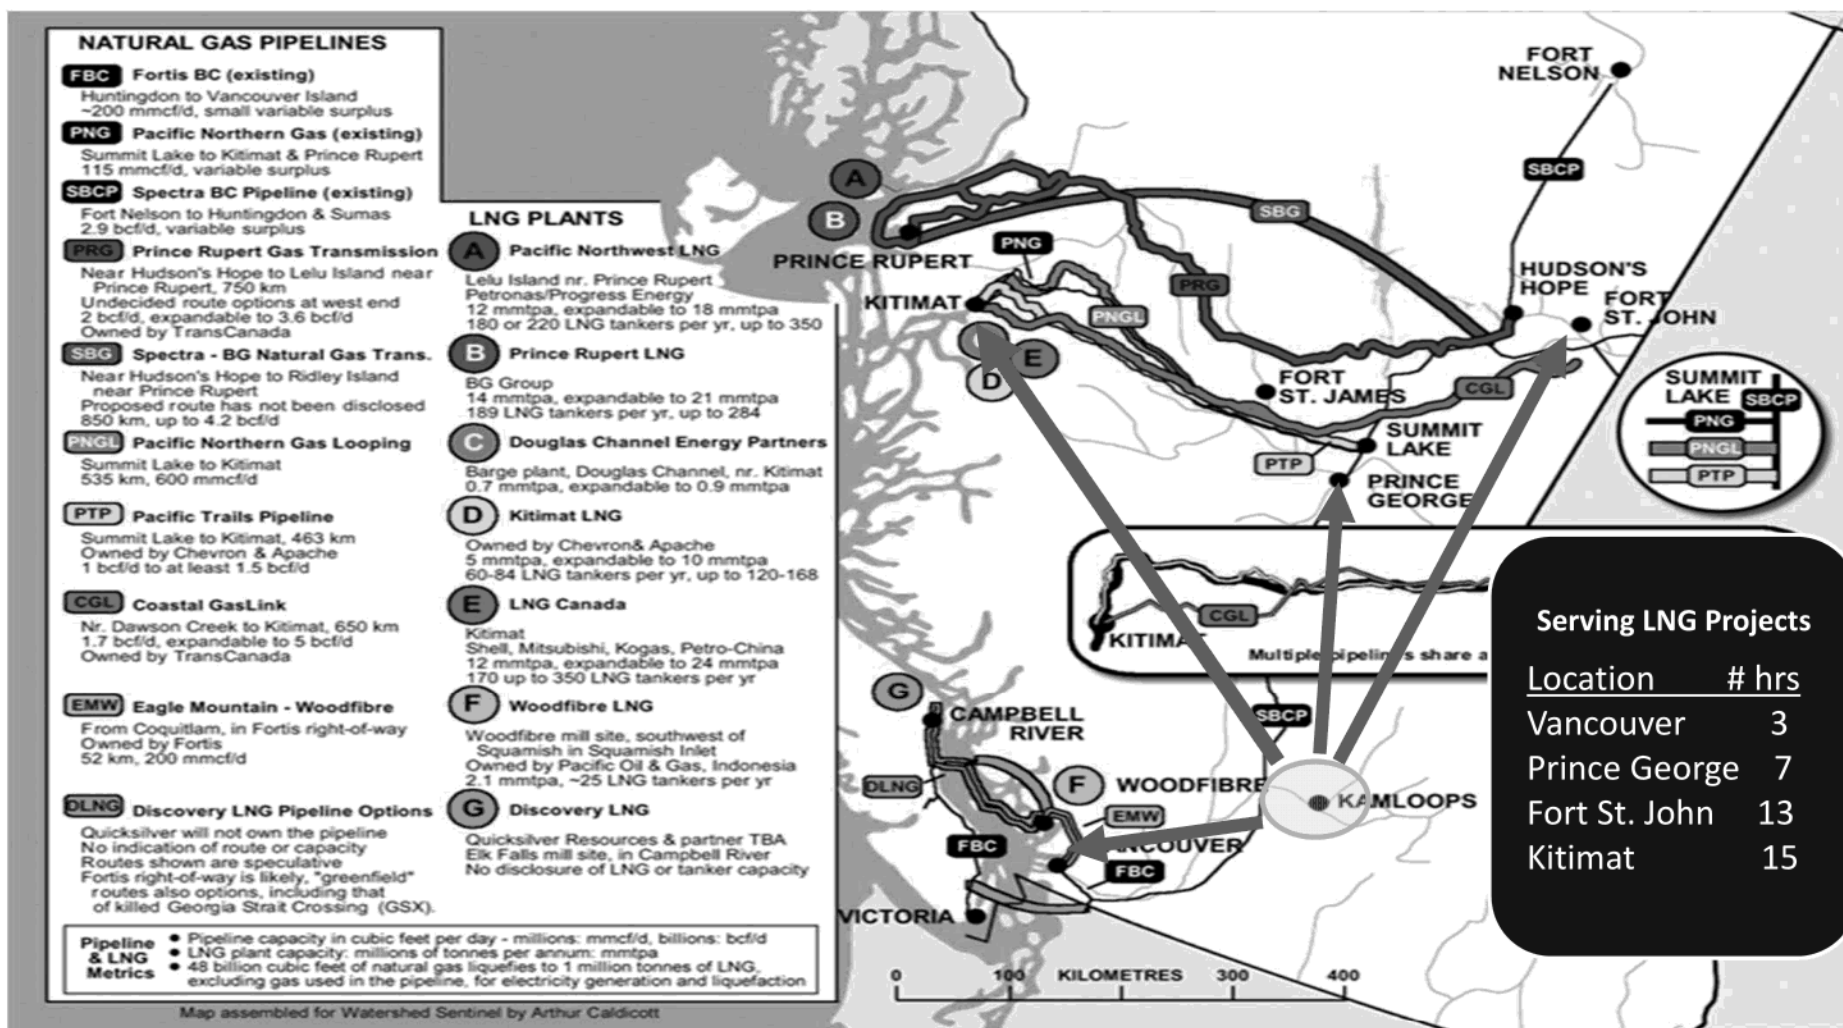

- On the matter of the “real” opportunity

- Where is the business opportunity?
- What is the process of getting engaged
- Where is this all happening

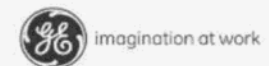

LNG proponents and their prime contractors (EPCM) are global organizations with vast supply chains of proven suppliers. The normal drive for these companies is to rationalize their supply base, not expand it.

- ▶ Same message heard from original equipment manufacturers and global prime contractors in other sectors (aerospace, shipbuilding & energy).
- ▶ Even with a clear obligation to utilize local companies, their position is to only use local companies that are both qualified and competitive.
- ▶ They do not believe it is their job to develop B.C. companies.

LNG-BuyBC

## Information businesses need to know

- The scale of LNG operations are enormous
- The need to pre-qualify
- Sufficient financing
- The need for First Nations Partnership

BRITISH  
COLUMBIA

LNG-BuyBC

# The Program

**Announced by Premier Clark during UBCM September 2013, the Program aims to:**

- ❖ Generate broad awareness of LNG opportunities
- ❖ Promote ways for B.C. businesses to take advantage of LNG opportunities
- ❖ Connect LNG project proponents with B.C. businesses
- ❖ Ensure both B.C. businesses and proponents access the on-line registry
- ❖ Engage industry associations, economic development agencies and chambers of commerce
- ❖ Coordinate with organizations doing similar procurement work

- ▶ **Outreach** to proponents /industry/ communities to advocate and raise awareness
- ▶ **Workshops** to help B.C. businesses become suppliers to LNG projects
- ▶ **LNG conference/trade show** to showcase B.C. capabilities and drive business-to-business connections
- ▶ **On-line registry** to help connect LNG project proponents with B.C. businesses and market internationally to highlight B.C. goods and services

BRITISH  
COLUMBIA

BRITISH  
COLUMBIA

**Advocate for LNG-Buy BC appointed in October 2013 to:**

- ▶ **Research best practices for supporting local business participation in LNG/major projects**
- ▶ **Outreach to proponents/industry/communities to understand their needs**
- ▶ **Provide information to businesses wanting to engage in LNG development**
- ▶ **Build awareness of LNG-Buy BC program and online tool. (How it works and what companies need to do to benefit)**
- ▶ **Drive proponent and contractor utilization of the on-line tool launched in November 2014**

# Supplier Workshops

- ▶ **Delivered *Contractor-Supplier Boot Camp & How to Respond to an RFP* workshops in: Prince Rupert, Terrace, Kitimat, Fort ST. John, Prince George, Kamloops, Kelowna, Squamish and Vancouver**
- ▶ **Provided information to B.C. businesses on supplying major project proponents:**
  - Understanding supplier requirements demanded by major corporations and contractors
  - Learning how to respond to Request for Proposals
- ▶ **>800 businesses participated!**

**19 workshops delivered in 7 communities across the province**

LNG-BuyBC

# LNG Conference & Trade Show Oct 2015

- ▶ 2015 show will follow up on last years conference with global attendance including LNG project proponents, EPCM contractors and major LNG industry suppliers
- ▶ Last year LNG-Buy BC delivered:
  - Trade show with exhibits by 100 B.C. businesses; including more than a dozen aboriginal-owned businesses
  - 3 panel presentations by LNG proponents; BC supplier company success stories ; Presentation on Australia's buy-local program
  - >100 B2B meetings between B.C. companies and LNG proponents/potential partners
  - 4 supplier workshops on how local companies engage with large corporations
  - Networking opportunities with LNG proponents and contractors
- ▶ Next LNG-in-BC Conference planned for October 2015

## On-line Tool

- ▶ Launched in November 2014
- ▶ Registration is now open @ [www.lngbuybc.ca](http://www.lngbuybc.ca)
- ▶ The Tool will:
  - Help make the connections your business needs
  - Generate exposure for your company
  - Promote your business capabilities
  - Help you find suppliers and business partners
  - Keep you informed of major project activity
- ▶ Key Features include:
  - Automatic opportunity matching
  - One-step expression of interest in a business or opportunity
  - Opportunity tracking and change notification
  - Searches tailored to where you do business

# ➤ **ENERGETIC** Local Success

- In 1996 a small group of independent fluid hauling Owner Operators joined together and formed Energetic Services in Fort St. John.
- Working together with high standards and integrity, they stand out against the competition.
- Innovators in the industry
- Eagle Eye Monitoring

# Where do we go from here?

- ▶ **B.C. needs a mechanism for helping small and medium-sized companies enter and compete in global supply chains.**
- ▶ **The on-line tool can provide the starting point / minimum requirement for proponent access to further government support to meet procurement needs.**
- ▶ **Our immediate next step may be to focus on helping companies pre-qualify.**
- ▶ **Beyond pre-qualification, we are exploring how to provide B.C. companies with a full suite of supplier development support.**

**Connecting B.C. businesses  
with LNG projects**

### An effective supplier development program includes:

- ▶ Awareness
- ▶ Assessment
  - ▶ Training & Expert Support
  - ▶ Mentoring
  - ▶ Auditing

A program that addresses the full spectrum of supplier development needs will allow B.C. businesses to access the support they need, when they need it.

- ▶ Awareness and assessment should be our first priorities; they set the foundation and direction for all improvement efforts.
- ▶ Proven training methods and materials already exists which can be leveraged in B.C.
- ▶ Best practices can and should be drawn from a number of industrial sectors.
- ▶ Eventual integration of training into post-secondary institutions can help build an effective learning & support network across the province.

# LNG-Buy BC

## Get Connected & Stay Informed

- Get registered on the online tool [www.lngbuybc.ca](http://www.lngbuybc.ca)
- Watch for LNG-Buy BC activity as this industry moves toward their final investment decisions (FIDs)
- Look for supplier development initiatives to assist B.C. business to pre-qualify

### DRIVING FORWARD

Today's BC Liberals will:

- Leverage the Federal Industrial Regional Benefits Programs to attract global aerospace and defence contractors to B.C. This would be assisted by an investment of \$5 million over five years to kick start the development of a unified B.C. aerospace cluster to attract investment and integrated contract sourcing from global firms.

Hello all,

Thanks for the call to clarify details around this event.

As mentioned on the call, I have already set up a link on our website for the event. I've updated it since our discussion and it is now live. The link is below. Doug & David – please note that I found your logo online, please let me know if it's not okay.

If you could each please review and send me your thoughts and feedback on wording, etc. that would be greatly appreciated. The wording is from what Doug sent me when we originally started discussing the event. Possibly this will need to be updated once the panel speakers all discuss what will be

covered. Once we have all the panel speakers firmed up, I will finalize a poster for the event. I will then send it to each of you to use when reaching out to your contacts.

As a reminder, here's what I need from each of you:

Jim & Vera – please confirm if it will be Gordon Wilson speaking on behalf of LNG and if it is, is it possible to get a headshot of him to use in promotional material?

Doug & David – please confirm who from Fulton & Company will be speaking and if possible, send me headshots of both of you and the Fulton & Company speaker

Fiona – please confirm who the second person from BDC will be and send me headshots of yourself and that person if possible

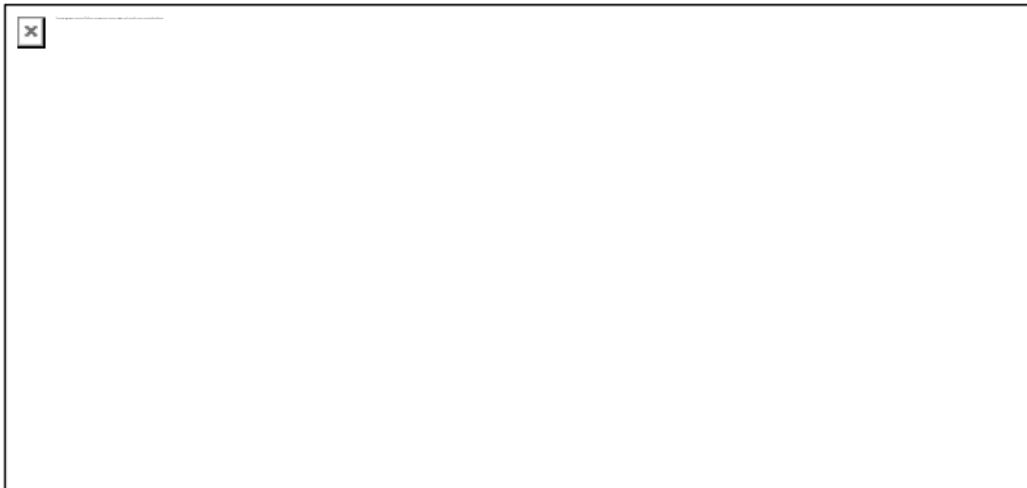

I will work on:

- Securing an MC
- Promotional material
- Finalizing details with venue

Registrations link: <http://web.kamloopschamber.ca/events/Workshop-LNG-Financing-Growth-29/details>

Thanks & have a great weekend!

Holly

Hi Sara and Rachel

Please see information below on confirmed speakers on the government panel for the evening session of the LNG Seminar in Surrey tomorrow night. As previously discussed, depending on the space available, if there are too many bodies for a “table setup”, could we please have the panelists sitting on chairs in a horseshoe shape.

**EMCEE:** Anita Huberman, CEO, Surrey Board of Trade

**MEDIA CONTACT:** Pam Bains - Cell: (604) 290-2577

**MODERATOR:** Gordon Wilson, rep. LNG-Buy BC

**PANELISTS:**

- Brian Hansen, MNGD
- Scott MacDonald, JTST
- Giovanni Puggioni, MARR
- Mayka Kennedy, OCG
- Ed Hoffman, MOE
- Warren Bell, BC HYDRO
- Meggin Messenger, CSCD
- Ines Piccinino, MNGD

- Tim Lesuik, CAS

I don't believe you need them, but should you need panelists' correct titles please let me know and I will forward.

Bye for now

Hi Gordon,

We are just finalizing the itinerary for Kamloops on Feb 3<sup>rd</sup>. Do you have a preference as to the timing of your presentation. You can go from 4pm – 5pm or over the lunch hour. Do you have a preference? Just a note that there will be students in the building over the lunch hour, and at 4pm all students will have departed.

Thanks

# LNG-Buy BC

## Surrey Presentation

January 20<sup>th</sup>, 2015

### Gordon Wilson LNG-Buy BC Advocate

Ministry of Jobs, Tourism & Skills Training and  
Responsible for Labour

BRITISH  
COLUMBIA

BRITISH  
COLUMBIA

LNG-Buy BC

# Presentation Outline

Prince George Presentation

- Busting some of the myths about LNG
- Information that businesses wanting to engage in LNG development should know
- A description of the LNG-Buy BC program and online tool. (How it works and what you need to do to benefit)
- A few examples of BC Business who have successfully engaged in LNG
- Where we go from here

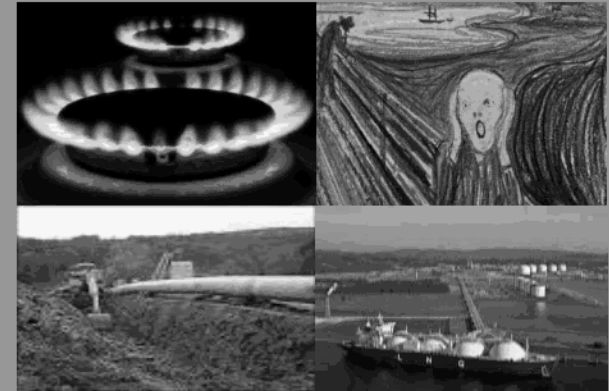

BRITISH  
COLUMBIA

2

# Myth Busting

- On the matter of LNG

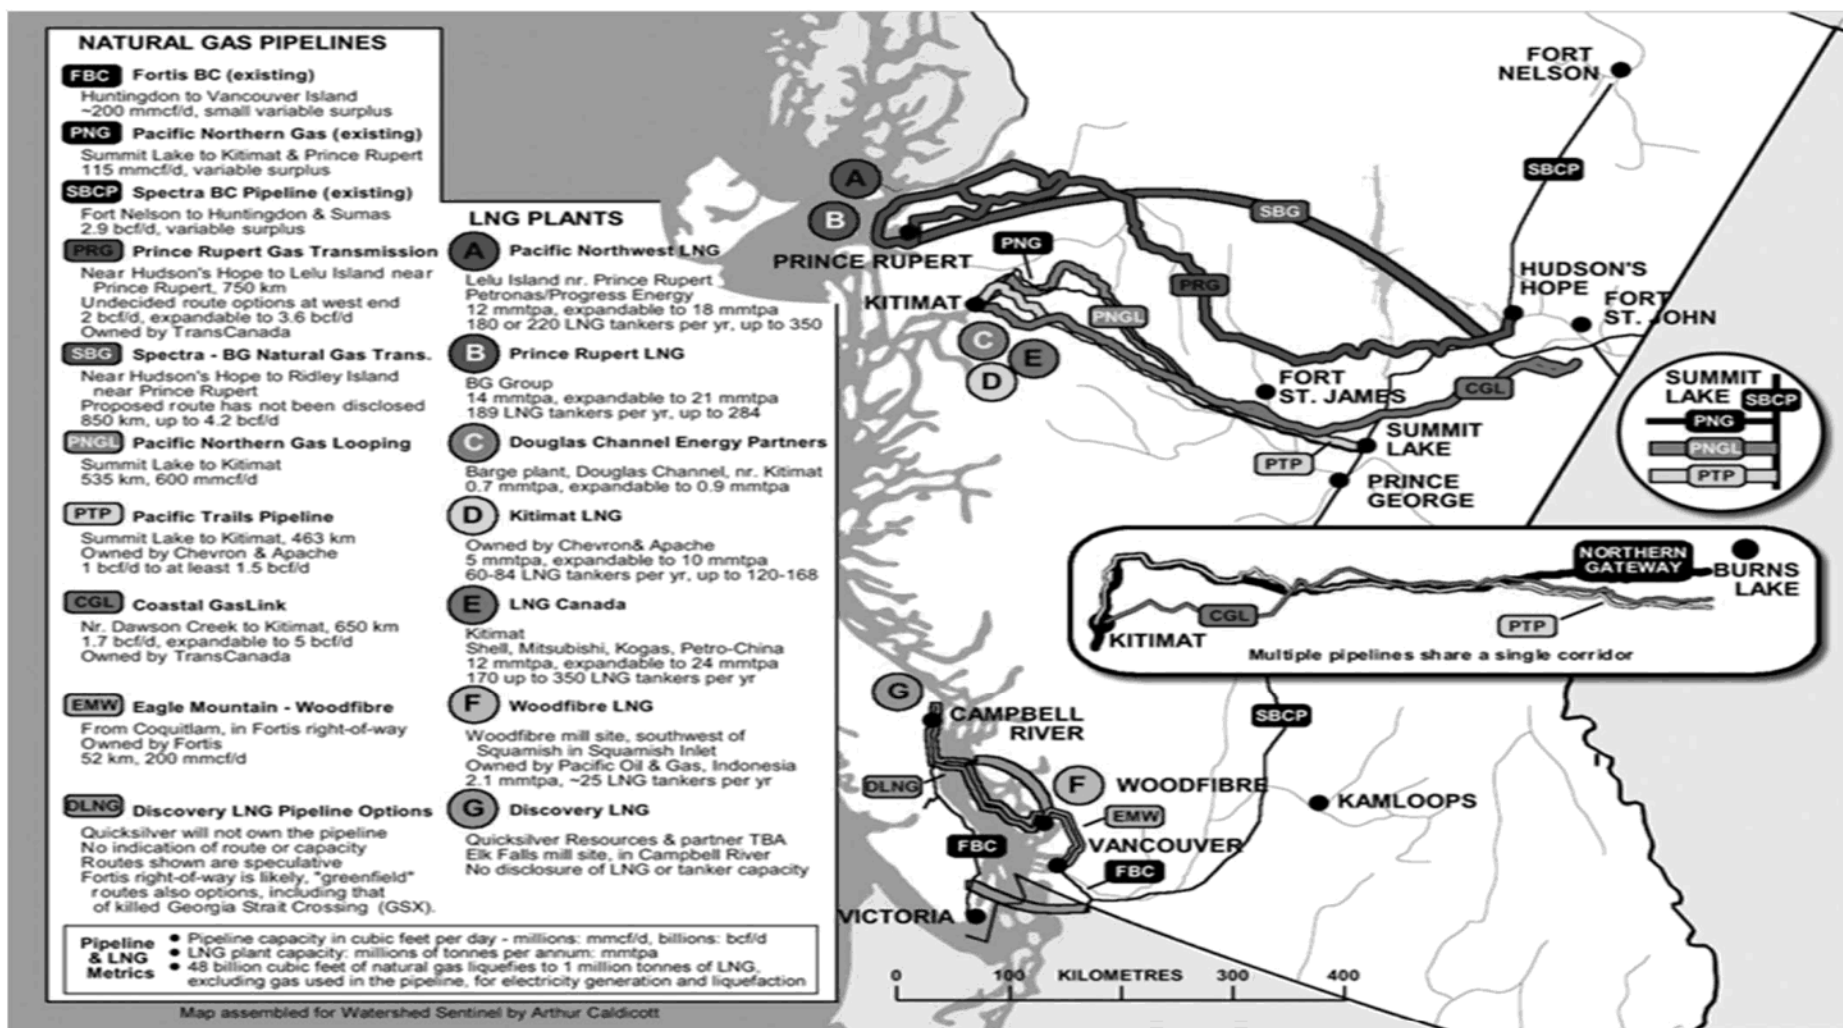

- What is it?
- Facts on fracking (the business opportunity)
- Facts on pipelines and trucking (the NEBC example)
- Facts on storing (jobs on the ground)
- Facts on shipping (the marine equation)

- On the matter of the “real” opportunity

- Where is the business opportunity?
- What is the process of getting engaged
- Where is this all happening

LNG proponents and their prime contractors are global organizations with vast supply chains of proven suppliers. The normal drive for these companies is to rationalize their supply base, not expand it.

- ▶ Same message heard from original equipment manufacturers and global prime contractors in other sectors (aerospace, shipbuilding & energy).
- ▶ Even with a clear obligation to utilize local companies, their position is to only use local companies that are both qualified and competitive.
- ▶ They do not believe it is their job to develop B.C. companies.

LNG-BuyBC

## Information businesses need to know

- The scale of LNG operations are enormous
- The need to pre-qualify
- Sufficient financing
- The need for First Nations Partnership

BRITISH  
COLUMBIA

LNG-BuyBC

# The Program

**Announced by Premier Clark during UBCM September 2013, the Program aims to:**

- ❖ Generate broad awareness of LNG opportunities
- ❖ Promote ways for B.C. businesses to take advantage of LNG opportunities
- ❖ Connect LNG project proponents with B.C. businesses
- ❖ Ensure both B.C. businesses and proponents access the on-line registry
- ❖ Engage industry associations, economic development agencies and chambers of commerce
- ❖ Coordinate with organizations doing similar procurement work

- ▶ **Outreach** to proponents /industry/ communities to advocate and raise awareness
- ▶ **Workshops** engaged NDIT to help B.C. businesses understand what's needed become suppliers to LNG projects
- ▶ **LNG conference/trade show** to showcase B.C. capabilities and drive business-to-business connections
- ▶ **On-line registry** to help connect LNG project proponents with B.C. businesses and market internationally to highlight B.C. goods and services

BRITISH  
COLUMBIA

BRITISH  
COLUMBIA

**Advocate for LNG-Buy BC appointed in October 2013 to:**

- ▶ **Research best practices for supporting local business participation in LNG/major projects**
- ▶ **Outreach to proponents/industry/communities to understand their needs**
- ▶ **Provide information to businesses wanting to engage in LNG development**
- ▶ **Build awareness of LNG-Buy BC program and online tool. (How it works and what companies need to do to benefit)**
- ▶ **Drive proponent and contractor utilization of the on-line tool**

LNG-BuyBC

# Supplier Workshops

- ▶ **Delivered *Contractor-Supplier Boot Camp & How to Respond to an RFP* workshops in: Prince Rupert, Terrace, Kitimat, Prince George, Kamloops, Kelowna and Vancouver**
- ▶ **Provided information to B.C. businesses on supplying major project proponents:**
  - Understanding supplier requirements demanded by major corporations and contractors
  - Learning how to respond to Request for Proposals
- ▶ **>800 businesses participated!**

**19 workshops delivered in 7 communities across the province**

BRITISH  
COLUMBIA

BRITISH  
COLUMBIA

LNG-Buy BC

# LNG Conference & Trade Show

- ▶ Global attendance included LNG project proponents and major LNG industry suppliers
- ▶ LNG-Buy BC delivered:
  - Trade show with exhibits by 100 B.C. businesses; including more than a dozen aboriginal-owned businesses
  - 3 panel presentations by LNG proponents; BC supplier company success stories ; Presentation on Australia's buy-local program
  - >100 B2B meetings between B.C. companies and LNG proponents/potential partners
  - 4 supplier workshops on how local companies engage with large corporations
  - Networking opportunities with LNG proponents and contractors
- ▶ Next LNG-in-BC Conference planned for October 2015

BRITISH  
COLUMBIA

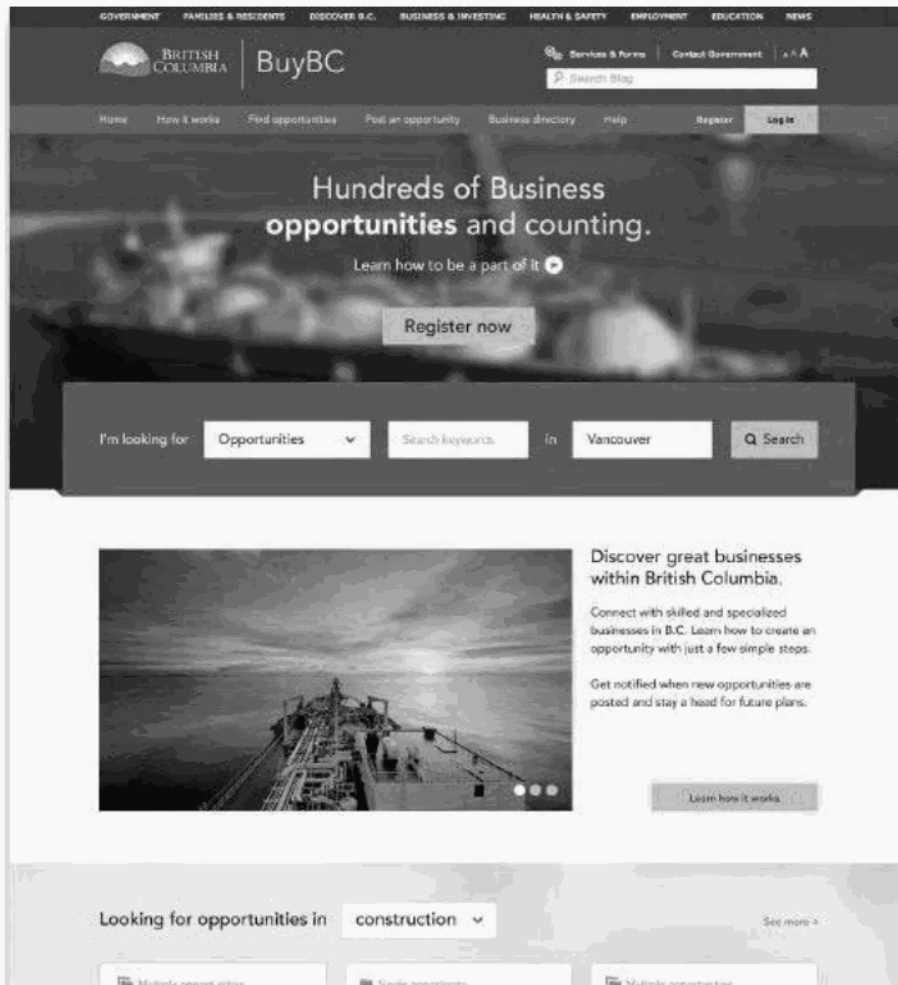

BRITISH  
COLUMBIA

# LNG-BuyBC

## On-line Tool

- ▶ Launching this fall [www.lngbuybc.ca](http://www.lngbuybc.ca)
- ▶ Pre-registration closed on October 22<sup>nd</sup>
- ▶ The Tool will:
  - Help make the connections your business needs
  - Generate exposure for your company
  - Promote your business capabilities
  - Help you find suppliers and business partners
  - Keep you informed of major project activity
- ▶ Key Features include:
  - Automatic opportunity matching
  - One-step expression of interest in a business or opportunity
  - Opportunity tracking and change notification
  - Searches tailored to where you do business

**To:** Wilson, Gordon JTST:EX

**Subject:** Live LNG & the All Native Basketball Tournament

Happy New Year Gordon,

The All Native Basketball Tournament (ANT) is February 8 – 14, 2015, this week long annual event brings to Prince Rupert over 50 basketball teams and over 5000 spectators. For more information on the tournament I have included a link below.

<http://anbt.ca/>

I am wondering if Buy BC LNG is considering having a exhibitor's booth with Live LNG. The cost for a booth is \$200. for the week. The ANT is the largest sporting event held in PR and a great opportunity to meet First Nation's leaders and people from the Northcoast.

Kind Regards,

Irene Mills

**Cc:** Lewis, Kaaren JTST:EX  
**Subject:** FW: Important Notification: 865 Hornby Space

Hello Mr. Wilson,

Please note that staff from Aboriginal Relations and Environment will be coming through to tour the office space at 865 Hornby. You may or may not be there when they come around.

I have alerted the office planning staff that you will need to keep your Vancouver office until 2016, so don't be alarmed if you see people walking around checking out the office space on your floor.

It is unlikely that you will be moved but space allotment can be unpredictable. I have been assured that you would be given an equivalent space if they needed to move you and they would contact me immediately.

I will look after your interest.

Hi Gordon – thanks so much for getting these Telus sheets back to me! I've printed them off, and they'll be sent in with your cheque when it arrives.

Please go ahead and give Patricia the cheque when you go to Vancouver tomorrow.

Patricia: Could you please send the cheque to me as quickly as possible, as it must be deposited in Finance before March 30<sup>th</sup>.

Thanks to both of you!

Sue

Hi Sue,

I have carefully reviewed all of the bills and have totalled up any calls that might even remotely be seen as personal calls. The total that I owe is <sup>s.22</sup> for the year. If I give Patricia a cheque when in the Vancouver office Wednesday, will that be soon enough?

Gordon

**Subject:** Gordon Wilson - Telus - Personal Cell Phone Calls

Hi Gordon:

Well, it's that time of year again, it's almost the end of another fiscal. Would you be able to go through your phone bills, and get this back to me by March 17<sup>th</sup> at the very latest.

Attached are your Telus bills for the following period: **April 2014 – February 2015.**

1. Could you please go through each month, and add up all personal calls.
2. The total of each month needs to go in the small stamp I put at the top of each bill.
3. Please sign off each stamp in the "signature of cellular phone holder"
4. Please make a cheque out for the total amount payable to:  
"Minister of Finance".

You can mail or drop off a cheque to me at:

Sue Sutherland, Deputy Minister's Office  
Ministry of Jobs, Tourism & Skills Training  
and Minister Responsible for Labour  
8th Floor, 1810 Blanshard Street  
PO Box 9846 Stn Prov Govt  
Victoria BC V8W 9T2

Please email your sheets back to both myself and Jeanete Duazo, at [Jeanete.Duazo@gov.bc.ca](mailto:Jeanete.Duazo@gov.bc.ca), and we will ensure your cheque gets deposited before the fiscal year end deadlines.

Thank you Gordon!

**Subject:** Gordon Wilson - Telus - Personal Cell Phone Calls  
**Attachments:** Gordon Wilson - Telus Phone Bills Apr 2014 - Feb 2015.pdf

Hi Gordon:

Well, it's that time of year again, it's almost the end of another fiscal. Would you be able to go through your phone bills, and get this back to me by March 17<sup>th</sup> at the very latest.

Attached are your Telus bills for the following period: **April 2014 – February 2015**.

1. Could you please go through each month, and add up all personal calls.
2. The total of each month needs to go in the small stamp I put at the top of each bill.
3. Please sign off each stamp in the "signature of cellular phone holder"
4. Please make a cheque out for the total amount payable to:  
"Minister of Finance".

You can mail or drop off a cheque to me at:

Sue Sutherland, Deputy Minister's Office  
Ministry of Jobs, Tourism & Skills Training  
and Minister Responsible for Labour  
8th Floor, 1810 Blanshard Street  
PO Box 9846 Stn Prov Govt  
Victoria BC V8W 9T2

Please email your sheets back to both myself and Jeanete Duazo, at [Jeanete.Duazo@gov.bc.ca](mailto:Jeanete.Duazo@gov.bc.ca), and we will ensure your cheque gets deposited before the fiscal year end deadlines.

Thank you Gordon!  
Sue
